Pursuant to Public Law 92-463, notice is hereby given of a change of date and location of a meeting of an ad hoc panel of the Business Advisory Council on Federal Reports originally scheduled for Wednesday, September 19, 1973. The meeting will be held on Wednesday, October 17, 1973, at 9:30 a.m. in the Department of Commerce Auditorium, first floor, Main Commerce Building, 14th and E Streets NW., Washington, D.C. (enter from 14th Street). Notice of the meeting was originally printed in the FEDERAL REGISTER on August 16, 1973.

The purpose of this meeting is to obtain advice on reporting problems involved in a proposed public use report of the Federal Trade Commission entitled "Annual Line of Business Report." The meeting will be open to public observation and participation.

Further information regarding the meeting may be obtained from the Statistical Policy Division, Office of Management and Budget, Room 10208, New Executive Office Building, Washington, D.C. 20503, Telephone 202-395-4730.

VELMA N. BALDWIN,
*Assistant to the Director for Administration.*

[Rel. No. 7979, 812-3491]

## WADE FUND, INC.

### Notice of Application Pursuant to Section 6(c) of the Act for Exemption From Section 15(a) of the Act

SEPTEMBER 7, 1973.

Notice is hereby given that Wade Fund, Inc., Suite 2224 Clark Tower, 5100 Poplar Avenue, Memphis, Tennessee 38137 (Fund), an open-end, nondiversified investment company registered under the Investment Company Act of 1940 (Act), has filed an application pursuant to section 6(c) of the Act for an order temporarily exempting Maury Wade Jr. (Adviser), an investment adviser registered pursuant to section 203 of the Investment Advisers Act of 1940, from the provisions of section 15(a) of the Act which prohibit any person from serving as an investment adviser to a registered investment company except pursuant to a written contract which has been approved by the vote of a majority of the outstanding voting securities of such registered company. Fund requests that the exemption be effective from July 26, 1973, until a special meeting of Fund's shareholders is held for the purpose of submitting to such shareholders a new investment advisory agreement, but in no case longer than 90 days after July 26, 1973. All interested persons are referred to the application on file with the Commission for a statement of Fund's representations which are summarized below.

Maury Wade, who engaged in business as a sole proprietor under the name of Maury Wade & Company, served Fund as investment adviser since the latter commenced operations in 1949. Such services were rendered by Maury Wade pursuant to an investment advisory agreement with Fund initially approved by Fund's stockholders on February 23, 1967, and renewed thereafter. On July 18, 1973, Maury Wade died and as a result, such investment advisory agreement terminated, leaving Fund without a investment adviser.

On July 26, 1973, the Fund entered into a written investment advisory agreement with Adviser, the former investment adviser's son. The application states that on such date this investment advisory agreement was authorized by Fund's board of directors and approved by a majority of the board of directors composed of persons who were neither parties to the agreement nor interested persons of any such party. The Fund represents that the terms and condition under which Adviser will serve pursuant to the agreement made July 26, 1973, are the same as those provided in the terminated agreement.

The Fund also represents that a special meeting of Fund's stockholders will be held as soon as practicable for the purpose of affording such stockholders the opportunity to approve or disapprove payment to Adviser of fees under the agreement made on July 26, 1973, for the period for which exemption is requested and for the purpose of submitting to Fund's stockholders a new investment advisory agreement.

Section 15(a) of the Act provides, in part, that it shall be unlawful for any person to serve or act as an investment adviser to a registered investment company except pursuant to a written contract that has been approved by the vote of a majority of the outstanding voting securities of such registered company.

Section 6(c) of the Act provides, in part, that the Commission, by order upon application, may exempt any person, security or transaction from any provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

The application indicates that the Fund has entered into the agreement with Adviser dated July 26, 1973, and has made the instant request for temporary relief from the provisions of section 15(a) of the Act so that the Fund may have the services of an investment adviser until a meeting of Fund's stockholders can be held to consider a new investment advisory agreement as provided in section 15(a) of the Act. With respect to management's selection of Maury Wade, Jr. to serve Fund as adviser during the interim period, the application states that Maury Wade, Jr. is intimately familiar with the operations of Fund having been employed by Maury Wade for nine years prior to the latter's death and having assisted Maury Wade with investment recommendations to the Fund during the last several years of such period.

Notice is further given that any interested person may, not later than October 4, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and

V 38 177 SEP 13 73 XUM

Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Wade Fund, Inc., at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
*Secretary.*

[FR Doc.73–19448 Filed 9–12–73;8:45 am]

## SMALL BUSINESS ADMINISTRATION

[Application 05/05–5093]

### AMERICAN INNER URBAN INVESTMENT CORP.

#### Application for a License as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 461 et seq.), has been filed by American Inner Urban Investment Corporation (applicant) with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1973).

The officers and directors of the applicant are as follows:

Robert George Harness, Chairman, Board of Directors, 6245 Sharon Woods Boulevard, Columbus, Ohio 43229.

Napoleon Arthur Bell, President, Director, 1975 Sunbury Road, Columbus, Ohio 43219.

Charles Francis Dugan II, Secretary, Director, 120 Halligan Avenue, Worthington, Ohio, 43085.

Lewis Russell Smoot, Sr., Treasurer, Director, 185 Buckeye Court, Westerville, Ohio 43081.

John Wragg Kellogg, Director, General Counsel, 2214 East 81st Street, Cleveland, Ohio 44103.

The applicant, an Ohio corporation with its principal place of business located at 1213 East Dublin-Granville Road, Columbus, Ohio 43229, will begin operations with $505,000 of paid-in capital and paid-in surplus, derived from the sale of 5,050 shares of common stock to American United Inns, Inc., a widely held public company in the business of building, owning and operating nursing homes and day care centers, and located at the same address as the applicant.

As a small business investment company under section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owner and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and SBA Rules and Regulations.

Any person may, not later than September 28, 1973, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Columbus, Ohio.

Dated: September 5, 1973.

JAMES THOMAS PHELAN,
*Deputy Associate Administrator for Investment.*

[Notice of Disaster Loan Area 1004; Amdt. I]

### NEW HAMPSHIRE

#### Amendment to Notice of Disaster Relief Loan Availability

As a result of the President's declaration of the State of New Hampshire as a major disaster area following severe storms and flooding beginning on or about June 26, 1973, and amended for the severe storms and flooding occurring August 2 through 4, 1973, applications for disaster relief loans will be accepted by the Small Business Administration from flood victims in the following additional county: Hillsboro, and adjacent affected areas. (See 38 FR 19878.)

Applications may be filed at the:

Small Business Administration
District Office
55 Pleasant Street
Concord, New Hampshire 03301

and at such temporary offices as are established. Such addresses will be announced locally. Applications will be processed under the provisions of Public Law 93–24.

Applications for disaster loans under this announcement must be filed not later than October 29, 1973.

Dated August 30, 1973.

THOMAS S. KLEPPE,
*Administrator.*

## DEPARTMENT OF LABOR

### Office of the Secretary

### ADVISORY COMMITTEE ON WOMEN TO THE SECRETARY

#### Establishment of Committee

Notice is hereby given of the establishment of the Advisory Committee on Women to the Secretary of Labor pursuant to a request by the Secretary of Labor with the approval of the Office of Management and Budget as required by section 9(a)(2) of the "Federal Advisory Committee Act."

The purpose of this Committee is to advise the Secretary of Labor on improving the status of working women in connection with the laws and programs administered by the Department of Labor, including those employed by the Department of Labor. The Committee will focus on those matters in which the Department of Labor is involved due to its official responsibilities. The Committee will report to the Chairman of the Committee, the Secretary of Labor.

Signed at Washington, D.C., this 11th day of September 1973.

PETER J. BRENNAN,
*Secretary of Labor.*

## INTERSTATE COMMERCE COMMISSION

[Notice No. 72]

### MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

SEPTEMBER 7, 1973.

The following applications (except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application), are governed by Special Rule 1100.247[1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include

issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and on or before November 12, 1973, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

No. MC 8948 (Sub-No. 104), filed June 18, 1973. Applicant: WESTERN GILLETTE, INC., 2550 East 28th Street, Los Angeles, Calif. 90058. Applicant's representative: Therodore W. Russell, 1545 Wilshire Blvd., Los Angeles, Calif. 90017. Authority sought to operate as a common carrier, by motor vehicle, over regular routes transporting: *General Commodities* (except Classes A and B explosives, livestock, articles of unusual value, household goods as defined by the Commission, commodities in bulk, in tank vehicles, and commodities requiring special equipment), (1) Between Dallas, Tex., and New Orleans, La.: From Dallas, Tex., over Interstate Highway 20 to junction U.S. Highway 71 at Shreveport, La., thence over U.S. Highway 71 to junction U.S. Highway 190 at Krotz Springs, La., thence over U.S. Highway 190 to junction U.S. Highway 61 at Baton Rouge, La., thence over U.S. Highway 61 to New Orleans and return over the same route, serving Shreveport, Baton Rouge, and all points on U.S. Highway 61 between Baton Rouge and New Orleans as intermediate points; and Bossier City as an off-route point, and serving Krotz Springs, La., for purposes of joinder only; (2) between Houston, Tex., and Baton Rouge, La.; from Houston, Texas, over Interstate Highway 10 to junction U.S. Highway 167 at Lafayette, La., thence over U.S. Highway 167 to junction U.S. Highway 190 near Opelousas, La., thence over U.S. Highway 190 to Baton Rouge, La., and return over the same route, serving no intermediate points except as otherwise authorized, but serving the intermediate point of Krotz Springs, La., for purposes of joinder only, restricted to traffic moving to, from or through either El Paso or Dallas, Tex.

NOTE.—If a hearing is deemed necessary applicant requests it be held at either Los Angeles, Calif.; New Orleans, La.; or Dallas, Tex.

No. MC 13087 (Sub-No. 37), filed August 3, 1973. Applicant: STOCKBERGER TRANSFER & STORAGE, INC., 524 Second Street, SW., Mason City, Iowa 50401. Applicant's representative: William L. Fairbank, 900 Hubbell Building, Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Beer*, (1) from St. Louis, Mo., to points in Mason City, Iowa, and (2) from Minneapolis, Minn., to Britt, Iowa, restricted to traffic originating at the named origins and destined to the named destinations.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 26396 (Sub-No. 83) (AMENDMENT), filed June 25, 1973, published in the FEDERAL REGISTER issue August 16, 1973, and republished as amended, this issue. Applicant: POPELKA TRUCKING CO., doing business as THE WAGGONERS, a Corporation, P.O. Box 990, Livingston, Mont. 59047. Applicant's representative: Jacob P. Billig, 1108 16th Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lumber, wood products, lumber products, and forest products*, from Beaver and Yakima, Wash.; Priest River, Troy, Calder, Priest Lake, Mountain Home, Tammarock, Kooskia, and Emmet, Idaho; and points in Lane, Wasco, Jackson, Josephine, Linn, Tillamook, Multnomah, Douglas, Polk, Coos, Benton, Yamhill, and Marion Counties, Oreg., to Kalispell and Columbia Falls, Mont.; Fargo, Corrington, Grand Forks, Minot, Bismarck, and Jamestown, N. Dak.; Rapid City, Sioux Falls, Rosholt, Belle Fourche, Watertown, Aberdeen, and Lemmon, S. Dak.; Albany, Windom, New Ulm, Greenwold, Clarks Grove, and St. Paul, Minn.; Belleville and Milan, Ill.; Humboldt, Iowa City, and Eagle Grove, Iowa; Columbia, Mo.; Madison, Oshkosh, Mercer, Glover, Rhinelander, Siren, and Shawano, Wis.; Ft. Morgan, Aspen, Glenwood Springs, Lamar, Springfield, and Sterling, Colo.; points in Larimer, Boulder, Weld, Denver, El Paso, Pueblo, Routt, Jefferson, Arapahoe, and Mesa Counties, Colo.; Casper, Cheyenne, Laramie, Rock Springs, Rawlins, Riverton, and Jackson, Wyo.; Albuquerque and Sante Fe, N. Mex.; and Wichita, Kans.; (2) *charcoal briquettes, charcoal, fireplace logs, and related items* (i.e., lighter fluid, wood chips, barbeque grille base), from Husky Industries, Inc., plant at or near Dickinson, N. Dak., to points in Colorado, Idaho, Montana, Oregon, Washington, and Wyoming; and (3) *feed ingredients and additives* in bag, bulk, and containerized, from Trenton, Mich.; Lawrence, Kans.; Chicago, Chicago Heights, and Joliet, Ill.; Southgate, Calif.; and Rockwell Railsiding at Maintowoc, Wis., to points in Big Horn and Yellowstone Counties, Mont.

NOTE.—The purpose of this republication is to amend the commodity description of "wood" to read "wood products." Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Missoula, Mont.

No. MC 28067 (Sub-No. 19), filed August 6, 1973. Applicant: WILLIAMS MOTOR TRANSFER, INC., South Vine Street, Barre, Vt. 05641. Applicant's representative: John P. Monte, 61 Summer Street, Barre, Vt. 05641. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Abrasive mixtures*, from points in Vermont, to Pittsburgh, Pa., and (2) *masonry equipment, materials, and supplies*, from points in Connecticut, Massachusetts, Maryland, North Carolina, New York, Ohio, Pennsylvania, South Carolina, and Virginia, to points in Maine, New Hampshire, Vermont, and points in Clinton, Franklin, Essex, Warren, Saratoga, and Washington Counties, N.Y.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Montpelier, Vt., or Boston, Mass.

No. MC 35628 (Sub-No. 352), filed July 5, 1973. Applicant: INTERSTATE MOTOR FREIGHT SYSTEM, a Corporation, 134 Grandville SW., Grand Rapids, Mich. 49502. Applicant's representative: Leonard D. Verdier, Jr., 900 Old Kent Building, Grand Rapids, Mich. 49502. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), serving the plantsite of Anaconda Aluminum Company at or near Sebree, Ky., as an off-route point in connection with carrier's regular route operations.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Louisville, Ky., or Chicago, Ill.

No. MC 87511 (Sub-No. 15), filed July 27, 1973. Applicant: SAIA MOTOR FREIGHT LINE, INC., P.O. Box 10157, Houma, La. 70360. Applicant's representative: Philip Robinson, P.O. Box 2207, Austin, Tex. 78767. Authority sought to

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

V 38-177 SEP 13 73 XUM

operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities which because of size or weight require the use of special equipment), (1) Between Alexandria, La., and Monroe, La.: From Alexandria over U.S. Highway 165 to Monroe, and return over the same route, serving no intermediate points; (2) Between Shreveport, La., and Monroe, La.: From Shreveport over U.S. Highway 80 and Interstate Highway 20 to Monroe, and return over the same routes, serving all intermediate points; (3) Between Alexandria, La., and Ruston, La.: From Alexandria, La., over U.S. Highway 167 to Ruston, and return over the same route, serving no intermediate points except service as authorized to and from the plantsite and warehouse facilities of Continental Can Corporation located at or near Hodge, La.; (4) Between Shreveport, La., and the plantsite of International Paper Company located at or near Springhill, La.: From Shreveport over Louisiana Highway 3 to junction Louisiana Highway 157, thence over Louisiana Highway 157 to the plantsite of International Paper Company located at or near Springhill, and return over the same route, serving no intermediate points; (5) Between junction Interstate Highway 20 and Louisiana Highway 7 and the plantsite of International Paper Company located at or near Springhill, La.: From junction Interstate Highway 20 and Louisiana Highway 7 over Louisiana Highway 7 to the plantsite of International Paper Company located at or near Springhill, and return over the same route, serving no intermediate points; (6) Between Minden, La., and the plantsite of Ludlow Corporation located at or near Homer, La.: From Minden over U.S. Highway 79 to the plantsite of Ludlow Corporation located at or near Homer, and return over the same route, serving no intermediate points; (7) Between Monroe, La., and the plantsite of International Paper Company at or near Bastrop, La.: From Monroe over U.S. Highway 165 to the plantsite of International Paper Company at or near Barop, La., and return over the same route, serving no intermediate points except that service is authorized to the off-route point of the plantsite of Commercial Solvents Corporation and the plantsite of R. T. Vanderbilt Co., both located at or near Sterlington, La.; (8) Between Lake Charles, La., and Shreveport, La.; From Lake Charles over U.S. Highway 171 to Shreveport, and return over the same route, serving no intermediate points except that service is authorized to and from the intermediate or off-route points located within: (1) the plantsite of Boise Southern Paper Company at or near De Ridder, La.; and (2) the Fort Polk Army Reservation and Depot located at or near Leesville, La.; (9) Between Baton Rouge, La., and St. Francisville, La.: From Baton Rouge over U.S. Highway 61 to its intersection with Louisiana Highway 10, thence over Louisiana Highway 10 to St. Francisville, and return over the same route, serving all intermediate points and the plantsite of Crown Zellerbach Corp. at or near Zee, La., as an off-route point. RESTRICTION: The above operations authorized over the route next-above described between Baton Rouge and St. Francisville are subject to the restriction that carrier shall transport no traffic between points on said route, on the one hand, and, on the other, New Orleans, La.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Baton Rouge, or New Orleans, La.

No. MC 87566 (Sub-No. 7), filed July 30, 1973. Applicant: SCHMIDT TRUCK SERVICE, INC., U.S. Highway 66, Litchfield, Ill. 62056. Applicant's representative: Robert T. Lawley, 300 Reisch Building, Springfield, Ill. 62701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Truck, automobile, and trailer parts and accessories, engine parts and accessories, brake parts, systems and fluids, fork lift and industrial truck parts and accessories, lawnmower parts, and accessories*, from the plantsite and warehouse facilities of Automotive Controls Corporation at Litchfield, Ill., to points in Alabama, Arkansas, Connecticut, Georgia, Iowa, Indiana, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Mississippi, New York, Oklahoma, Ohio, Pennsylvania, Texas, Tennessee, and Wisconsin.

NOTE:—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or St. Louis, Mo.

No. MC 87720 (Sub-No. 147), filed July 16, 1973. Applicant: BASS TRANSPORTATION CO., INC., P.O. Box 391, Flemington, N.J. 08822. Applicant's representative: Bert Collins, Suite 6193, 5 World Trade Ctr., New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers, closures, caps, covers, carton parts, and material* used in the manufacture, sale, and distribution of glass containers, between Lawrencesburg, Ind., on the one hand, and, on the other, points in Illinois, Wisconsin, Kentucky, Ohio, Missouri, Michigan, and Indiana, under contract with Dart Industries, Inc.

NOTE.—Applicant also holds common carrier authority in MC 135684 and subs thereunder, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 94350 (Sub-No. 339), filed July 23, 1973. Applicant: TRANSIT HOMES, INC., P.O. Box 1628, Haywood Rd., Greenville, S.C. 29602. Applicant's representative: Mitchell King, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers* designed to be drawn by passenger automobiles in initial shipments, from points in Monroe County, Miss., to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Miss.

No. MC 95084 (Sub-No. 95), filed August 2, 1973. Applicant: HOVE TRUCK LINE, a Corporation, Stanhope, Iowa 50246. Applicant's representative: Kenneth F. Dudley, 611 Church Street, P.O. Box 279, Ottumway, Iowa 52501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Agricultural implements and machinery, platforms, feeders, trailers, wagon augurs, spreaders, buckets, hoists, accessories, attachments, and parts*, from Cokato, Minn., and Sioux Falls, S. Dak., to points in the United States (except Alaska and Hawaii); and (2) *materials, equipment, and supplies* used in the manufacture, processing, sale, and distribution of the commodities in (1) above, from points in the United States (except Alaska and Hawaii), to Cokato, Minn., and Sioux Falls, S. Dak.

NOTE.—Applicant states that the requested authority can be tacked with its existing authority in (1) above at Fort Dodge, Iowa; Manhattan, Kans., and Kewanee, Ill., to provide a through service from Cokato, Minn., and Sioux Falls, S. Dak., to points in the United States, however no new service would be provided; and in (2) above at points in the United States to serve points in the United States. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn., or Chicago, Ill.

No. MC 105501 (Sub-No. 7), filed July 16, 1973. Applicant: TERMINAL WAREHOUSE COMPANY, a Corporation, 498 First Street NW., New Brighton, Minn. 55112. Applicant's representative: Joseph J. Dudley, W. 1260 First National Bank Bldg., St. Paul, Minn. 55101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from Cloquet, Minn., to St. Louis, Mo., and points in Illinois, Indiana, Iowa, Michigan, Ohio, and Wisconsin.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 105501 (Sub-No. 8), filed July 16, 1973. Applicant: TERMINAL WAREHOUSE COMPANY, a Corporation, 498 First Street NW., New Brighton, Minn. 55112. Applicant's representative: Joseph J. Dudley, W. 1260 First National Bank Bldg., St. Paul, Minn. 55101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from Brainerd and Cloquet, Minn., to Minneapolis and St. Paul, Minn., restricted to traffic having an immediate subsequent movement by rail to points in Connecticut, Illinois, Indiana, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania, and the District of Columbia.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 105566 (Sub-No. 96), filed August 6, 1973. Applicant: SAM TANKSLEY TRUCKING, INC., P.O. Box 1119, Cape Girardeau, Mo. 63701. Applicant's representative: Thomas F. Kilroy, P.O. Box 624, Springfield, Va. 22150. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plasticizers, plastic materials, and plastic articles*, from Washington and Morgantown, W. Va., Gary, Ind., Ottawa, Ill., Calvert City, Ky., Akron and Xenia, Ohio, Memphis, Tenn., and Tuscola, Ill., to points in Washington, Oregon, Idaho, California, Nevada, Utah, Colorado, Arizona, New Mexico, and Texas.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Columbus, Ohio.

No. MC 107107 (Sub-No. 429), filed July 31, 1973. Applicant: ALTERMAN TRANSPORT LINES, INC., 12805 NW. 42d Ave. (LeJeune Rd.), Opa Locka, Fla. 33054. Applicant's representative: Ford W. Sewell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Candy and confectionery and related products* (except in bulk) and (2) *advertising matter, premium and display materials* when shipped in the same vehicle with commodities described in (1) above in vehicles equipped with mechanical refrigeration, from the plantsite and warehouse facilities of M. & M./Mars, Division of Mars, Inc., located at or near Albany, Atlanta, Decatur and Doraville, Ga., to points in Florida, New Jersey, and New York, restricted to the transportation of traffic originating at the plantsite and warehouse facilities of M. & M./Mars, Division of Mars, Inc.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Miami, Fla.

No. MC 107107 (Sub-No. 431), filed July 30, 1973. Applicant: ALTERMAN TRANSPORT LINES, INC., 12805 NW., 43nd Ave. (LeJeune Rd.), Opa Locka, Fla. 33054. Applicant's representative: Ford W. Sewell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods and foodstuffs* in vehicles equipped with mechanical refrigeration, from South Edmeston and Walton, N.Y., Elizabeth and Freehold, N.J., and Hagerstown, Md., to points in North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, and Texas.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, aplicant requests it be held at Miami, Fla.

No. MC 109540 (Sub-No. 30), filed July 9, 1973. Applicant: YEARY TRANSFER COMPANY, INC., 2171 Christian Road, Lexington, Ky. 40505. Applicant's representative: George M. Catlett, 703–706 McClure Bldg., Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Tobacco hogsheads and tobacco hogshead parts*, from the plantsite of the Gay-Bell Corporation at Paris, Ky., to points in Florida, Georgia, Maryland, New Jersey, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, Wisconsin, Missouri, and Kentucky; and (2) *tobacco handling and testing equipment* between points in Florida, Georgia, Maryland, New Jersey, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, Wisconsin, Missouri, and Kentucky.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Lexington or Louisville, Ky.

No. MC 110098 (Sub-No. 135) (CORRECTION), filed April 11, 1973, published in the FEDERAL REGISTER issue May 24, 1973, and republished, in the FEDERAL REGISTER issue June 21, 1973, and in third publication as corrected this issue. Applicant: ZERO REFRIGERATED LINES, a Corporation, 1400 Ackerman Road, P.O. Box 20380, San Antonio, Tex. 78220. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat byproducts, and articles distributed by meat packinghouses* (except hides and commodities in bulk) as described in Sections A and C of Appendix I to the report in "Descriptions in Motor Carrier Certificates" 61 M.C.C. 209 and 766, (1) From Wagner, S. Dak., to points in Kansas, Missouri, Oklahoma, Arkansas, Texas, Louisiana, and New Mexico; and (2) from points in Colorado, Kansas, Missouri, Oklahoma, Arkansas, Texas, Louisiana, and New Mexico, to Wagner, S. Dak., restricted to transportation of traffic originating at the named origins and destined to the named destinations.

NOTE.—The purpose of this republication is to correctly indicate the commodity description reference sections of Appendix I to the report in "Descriptions in Motor Carrier Certificates" 61 M.C.C. 209 and 766 as A and C in lieu of A and B as previously published. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr., or San Antonio, Tex.

No. MC 113024 (Sub-No. 127), filed July 24, 1973. Applicant: ARLINGTON J. WILLIAMS, INC., R.D. #2, 1963 South DuPont Highway, Smyrna, Del. 19720. Applicant's representative: Samuel W. Earnshaw, 855 Washington Bldg., Washington, D.C. 20005. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Industrial and garden hose, and materials and supplies used in the manufacture thereof* (except commodities requiring special equipment), (1) between points in Box Butte and Red Willow Counties, Nebr., on the one hand, and, on the other, Wilmington, Del., Cockeysville, Md., and points in Cook and Lake Counties, Ill., Fayette and Huntington Counties, Ind., Jefferson County, Ky., Berrien and Wayne Counties, Mich., Essex County, N.J., Franklin, Licking, and Paulding Counties, Ohio, Anderson, Dallas, and Tarrant Counties, Tex.; and (2) from points in Cook and Lake Counties, Ill., to Wilmington, Del., under contract with Electric Hose & Rubber Company.

NOTE.—Applicant also holds common carrier authority in MC 135046 and Subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 113678 (Sub-No. 500), filed May 13, 1973. Applicant: CURTIS, INC., 4810 Pontiac Street, Commerce City (Denver), Colo. 80022. Applicant's representative: Richard A. Peterson, P.O. Box 80806, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from Gallup, N. Mex., to points in Arizona, California, Nevada, Utah, Colorado, Kansas, Missouri, Illinois, Wisconsin, Minnesota, Iowa, Nebraska, Idaho, Oregon, and Washington.

NOTE.—Applicant states that the requested authority can be tacked: (1) at Denver, Colo., with its existing authority held in Sub 12 (presently tacked to Sub 90) which authorizes the transportation of dairy products, chilled and frozen bakery products, frozen fruits, frozen vegetables, frozen pizza, and pizza pie ingredients to provide through service from New York, N.Y., and Philadelphia, Pa., to points in New Mexico; (2) at Los Angeles, San Diego, and San Francisco, Calif., in Sub 38 on meats to provide through service to points in New Mexico, and on fish and agricultural commodities to points in New Mexico; (3) at Bridgeville, Del., and Salisbury, Md., in Sub 49 on canned goods to provide a through service to points in New Mexico; (4) at Denver, Colo., in Sub 274 (presently tacked with Sub 90) on dairy products, chilled and frozen bakery products, frozen fruits, vegetables, berries, french fries, pizza and pizza pie ingredients to provide a through service from points in Idaho, Oregon, and Washington (except Kennewick) to points in New Mexico; (5) at Wahoo, Nebr., in Sub 108 on frozen foods to provide a through service to points in New Mexico; and (6) at Denver, Colo., in Sub 433 on soft drinks and fruit juices, in containers, to provide a through service from Denver, Colo., to points in New Mexico. Applicant states it has no present intention to tack. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.; Chicago, Ill.; or Milwaukee, Wis.

No. MC 113678 (Sub-No. 504) (AMENDMENT), filed June 25, 1973,

V 38 177 SEP 13 73 XUM

published in FEDERAL REGISTER issue of August 16, 1973, and republished as amended this issue. Applicant: CURTIS, INC., 4810 Pontiac Street, Commerce City, Colo. 80222. Applicant's representative: Richard A. Peterson, P.O. Box 80806, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods, food products, food preparations and foodstuffs, and advertising equipment, materials, and supplies when shipped therewith* (except commodities in bulk), from points in Ohio and points in Boone, Campbell, and Kenton Counties, Ky., to points in Kentucky, Illinois, Indiana, Iowa, Nebraska, Colorado, Kansas, Missouri, Michigan, Minnesota, Wisconsin, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New York, New Jersey, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia.

NOTE.—The purposes of this republication are (1) to extend the commodity description to include food preparations and (2) correctly indicate the counties of Boone, Campbell, and Kenton in Kentucky rather than in Nebraska as previously published.

Common control may be involved. Applicant states that the requested authority can be tacked with its existing authority in Subs 90, 92, 99, 114, 133, 149, 157, 190, 257, 262, 284, 330, 331, 350, 376, 387, and 428, however, tacking with these subs is unfeasible because of the circuity involved and also the duplicative nature of some of the authority makes such tacking unnecessary, therefore applicant has no intention to tack these subs with its existing authority. Tacking, however, is possible with applicant's Subs 38 and 162 at points in Colorado, to serve the additional destination states of Arizona, California, Nevada, New Mexico, Washington, Oregon, Idaho, and Montana. Applicant further states that it has no present intention to tack Subs 38 and 162. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 114045 (Sub-No. 388), filed July 2, 1973. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Candy and confectionery and related products* (except in bulk) and (2) *advertising matter, premium and display materials* when shipped in the same vehicle with commodities described in (1) above, in vehicles equipped with mechanical refrigeration, from the plantsite and warehouse facilities of M&M/MARS, Division of Mars, Incorporated, located at or near Albany, Atlanta, Doraville and Decatur, Ga., to points in Arizona, Arkansas, California, Colorado, Illinois, Indiana, Kansas, Maine, Michigan, Minnesota, Nevada, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Texas, Utah, Vermont, Washington, and Wisconsin, restricted to the transportation of traffic originating at the plantsite and warehouse facilities of M&M/MARS, Division of Mars, Incorporated.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or New York, N.Y.

No. MC 114273 (Sub-No. 145), filed August 6, 1973. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Robert E. Konchar, Suite 315, Commerce Exchange Building, P.O. Box 1943, Cedar Rapids, Iowa 52406. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the plantsite and storage facilities of Laclede Steel Company, at Alton and Madison, Ill., to points in Iowa, Kansas, Nebraska, and Colorado.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 115092 (Sub-No. 27), filed July 12, 1973. Applicant: WEISS TRUCKING, INC., P.O. Box O, Vernal, Utah 84078. Applicant's representative: Mark K. Boyle, 345 South State Street, Salt Lake City, Utah 84111. Authority sought to operate as a *common carrier*, by motor vehicles, over irregular routes, transporting: *Cheese and cheese products*, between the plantsite of L. D. Schreiber Cheese Co., Inc., at Logan, Utah, and points in Arizona, California, Idaho, Montana, Nevada, Oregon, and Washington, restricted to the transportation of traffic originating at or destined to the named plantsite.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Green Bay, Wis., or Chicago, Ill.

No. MC 115157 (Sub-No. 2), filed August 6, 1973. Applicant: LONG'S HAULING COMPANY, INC., 128 Friendship Ave., Duquesne, Pa. 15110. Applicant's representative: Jerome Solomon, 3131 United States Steel Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Coal* in dump vehicles, from points in Monongalia, Brooke, Harrison, and Marshall Counties, W. Va., and from points in Guernsey and Belmont Counties, Ohio, to points in Allegheny, Washington, and Westmoreland Counties, Pa., under contract with Pittsburgh Coal Company, a Division of Consolidation Coal Company.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa.

No. MC 115379 (Sub-No. 44), filed July 8, 1973. Applicant: JOHN D. BOHR, INC., P.O. Box 217, Annville, Pa. 17003. Applicant's representative: Christian V. Graf, 407 North Front Street, Harrisburg, Pa. 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat scrap, poultry byproduct meal and feather meal*, in bulk, (1) from points in Pennsylvania, to points in Indiana, North Carolina, Michigan, Minnesota, Ohio, and Wisconsin; and (2) from points in Delaware, Maryland, and Virginia, to points in Indiana, Michigan, Minnesota, Ohio, Pennsylvania, and Wisconsin, restricted to transportation originating at the named origin states and destined to the named destination states.

NOTE.—Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Harrisburg, Pa., or Washington, D.C.

No. MC 115491 (Sub-No. 127), filed August 6, 1973. Applicant: COMMERCIAL CARRIER CORPORATION, 502 East Bridgers Avenue, Post Office Drawer 67, Auburndale, Fla. 33823. Applicant's representative: Troy G. Russell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Frozen citrus concentrates*, from points in Marion, Lake, Pasco, Polk, and Orange Counties, Fla., to Tampa, Miami, Port Everglades, Jacksonville, and Port Canaveral, Fla., and (2) *frozen citrus concentrates, canned juices, and flavoring*, from Tampa, Miami, Port Everglades, Jacksonville, and Port Canaveral, Fla., to points in Marion, Lake, Pasco, Polk, and Orange Counties, Fla., restricted to shipments having a subsequent movement by water in (1) above and shipments having a prior movement by water in (2) above.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Tampa, Fla.

No. MC 117765 (Sub-No. 163), filed July 23, 1973. Applicant: HAHN TRUCK LINE, INC., 5315 NW. 5th, P.O. Box 75267, Oklahoma City, Okla. 73107. Applicant's representative: R. E. Hagan (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Nonfrozen foodstuffs*, in containers (except meats and meat products, meat byproducts, dairy products, and articles distributed by meat packing houses), from (1) the plantsite of Big Stone Canning Company at Bloomer, Wis., to points in Alabama, Arkansas, Kansas, Louisiana, Mississippi, Missouri, Oklahoma, Tennessee, and Texas, and (2) the plantsite of Friday Canning Company Corporation at New Richmond, Wis., to points in Arkansas, Kansas, and Missouri.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary,

applicant requests it be held at Oklahoma City, Okla.

No. MC 117815 (Sub-No. 212), filed July 17, 1973. Applicant: PULLEY FREIGHT LINES, INC., 405 SE. 20th Street, Des Moines, Iowa 50317. Applicant's representative: Larry D. Knox, 9th Floor, Hubbell Building, Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale grocery and good business houses (except commodities in bulk), from Des Moines, Iowa, to Davenport and Dubuque, Iowa, and Dixon, Geneseo, Moline, Mt. Morris, Rock Island, and Sterling, Ill.

NOTE.—Common control was approved in No. MC-F-11497.

Applicant states that the requested authority can be tacked with its existing authority in Sub-No. 2 at (A) Des Moines, Iowa, to provide a through service from Omaha, Nebr., to the destination states named above; (B) at Davenport, Iowa, to provide a through service from Des Moines, Iowa, to Chicago, Ill.; and (C) pursuant to a proceeding in MC-F-11497 (MC-128548), at Mt. Morris and Dixon, Ill., to serve points in northern Illinois. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 118288 (Sub-No. 43), filed July 2, 1973. Applicant: STEPHEN F. FROST, 14750 Boyle Ave., P.O. Box 28, Fontana, Calif. 92335. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Grain products* and (2) *grain*, when moving in the same vehicle with grain products, from points in Montana to points in Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Nevada, California, Oregon, and Washington.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 119777 (Sub-No. 258), filed June 1, 1973. Applicant: LIGON SPECIALIZED HAULER, INC., P.O. Drawer L, Madisonville, Ky. 42431. Applicant's representative: Carl U. Hurst, P.O. Box E, Bowling Green, Ky. 42101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, in cargo containers, and in boxes or crates made of wood, lumber, or plywood; and (2) *empty cargo containers*, between Newport, Ky., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. Applicant holds contract carrier authority under MC 126970 Subs 1 and 3, therefore dual operations may be involved.

Applicant states that the requested authority can be tacked at Newport, Ky., to provide a through service to and from points in Illinois, Indiana, and Kentucky, on the transportation of building and excavating contractors' and mining machinery and equipment, road building equipment and machinery, and commodities which because of size or weight require the use of special equipment. Applicant further indicates that it has no present intention to tack. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Louisville, Ky.

No. MC 123329 (Sub-No. 23), filed June 18, 1973. Applicant: H. M. TRIMBLE & SONS, LTD., 4056 Ogden Road Southeast, Calgary, Alberta, Canada. Applicant's representative: Ray F. Koby, 314 Montana Building, Great Falls, Mont. 59401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities* in bulk, between the ports of entry on the International Boundary line between the United States and Canada located in Washington, on the one hand, and, on the other, points in California, Oregon, and Washington.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at any location in the State of Washington.

No. MC 124328 (Sub-No. 55) (CORRECTION), filed June 26, 1973, published in the FEDERAL REGISTER issue of August 23, 1973, and republished, as corrected, this issue. Applicant: BRINK'S INCORPORATED, 234 East 24th Street, Chicago, Ill. 60616. Applicant's representative: John G. O'Keefe, O'Hara Plaza, Suite 650, 5725 East River Road, Chicago, Ill. 60631. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Silver bullion, precious metals, coin, and rare earths*, between points in the Chicago, Ill., Commercial Zone and Indiana, on the one hand, and, on the other, New York City, and West Point, N.Y., Newark, N.J., and points in Essex, Middlesex, and Union Counties, N.J., under contract with Modatta Metals Corporation, Lee B. Stern and Co., Elsen & Blum, Inc., and General Services Administration.

NOTE.—Common control may be involved. The purpose of this republication is to indicate that applicant is under contract with the above-named shippers, which was inadvertently omitted in the previous publication. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 124565 (Sub-No. 6), filed August 6, 1973. Applicant: JOHN LONG TRUCKING, INC., 1030 Denton Street, Sapulpa, Okla. 74066. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Bldg., 3535 NW. 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass products*, from Sapulpa, Okla., to points in Colorado and those points in Texas on and west of U.S. Highway 281, under a continuing contract or contracts with Liberty Glass Company.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Oklahoma City or Tulsa, Okla.

No. MC 125518 (Sub-No. 4), filed June 27, 1973. Applicant: CLETUS RUHLMAN, doing business as C. RUHLMAN TRUCKING COMPANY, 265 South Riverside Drive, New Miami, Ohio 45012. Applicant's representative: Norbert B. Flick, Executive Building, Cincinnati, Ohio 45202. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Slag*, in bulk, in dump vehicles, from Hamilton, Ohio, to Alexandria, Ind., under contract with American Materials Corporation.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Cincinnati, Hamilton, or Columbus, Ohio.

No. MC 128075 (Sub-No. 29), filed July 29, 1973. Applicant: LEON JOHNSRUD, 757 2nd Street West, P.O. Box 447, Cresco, Iowa 52136. Applicant's representative: Val M. Higgins, 1000 First National Bank Building, Minneapolis, Minn. 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel* for use in the manufacture of air cleaners and air cleaner elements, from Chicago, Ill., and Milwaukee, Wis., to Cresco and Oelwein, Iowa.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa, or Minneapolis, Minn.

No. MC 128114 (Sub-No. 4), filed July 27, 1973. Applicant: PAUL E. SAVAGE, doing business as SAVAGE TRANSPORTATION CO., Building 141, Pasco Airport, Pasco, Wash. 99302. Applicant's representative: Donald A. Ericson, 708 Old National Bank Building, Spokane, Wash. 99201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal feed, poultry feed, and feed ingredients*, between points in Walla Walla County, Wash., on the one hand, and, on the other, points in Idaho, Montana, and Oregon.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Spokane or Seattle, Wash., or Portland, Oreg.

No. MC 128383 (Sub-No. 31), filed June 6, 1973. Applicant: PINTO TRUCKING SERVICE, INC., 1414 Calcon Hook Road, Sharon Hill, Pa. 19079. Applicant's representative: Gerald K. Gimmel, P.O. Box 824, Gaithersburg, Md. 20760. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk, Classes A and B explosives, and motor vehicles requiring the use of special equipment), between Dulles International Airport, located in Fairfax and Loudon Counties, Va., the Greensbiro-High Point-Winston-Salem Airport, N.C., Douglas Municipal Airport at or near Charlotte, N.C., the Hartsfield International Airport at or near Atlanta, Ga., and the Miami International Airport at or near Miami, Fla.; restricted to the transportation of

V 38-177 SEP 13 73 XUM

traffic having a prior or subsequent movement by air or moving in a substitute for air service.

NOTE.—Applicant states that the requested authority can be tacked with its existing authority at Dulles International Airport and provide a through service between the points named in the instant application, and Friendship International Airport, Anne Arundel County, Md., Washington National Airport, Gravelly Point, Va., LaGuardia Airport and John F. Kennedy International Airport, N.Y., Newark Airport, Newark, N.J., and Philadelphia International Airport, Philadelphia, Pa. via a Dulles International Airport gateway, but indicates that it has no *present* intention to tack. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 129729 (Sub-No. 4) (AMENDMENT), filed May 29, 1973, published in the FEDERAL REGISTER issue of June 28, 1973, and republished, as amended this issue. Applicant: FRANCIS J. BEAROFF, INC. (Swedeland Road), P.O. Box 195, King of Prussia, Pa. 19406. Applicant's representative: Raymond A. Thistle, Jr., Suite 1012, Four Penn Center Plaza, Philadelphia, Pa. 19103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ferro alloys* (except in bulk, in dump vehicles), (1) from Camden, N.J., to Swedeland, Pa., and Claymont, Del.; and (2) from Swedeland, Pa., to Claymont, Del.

NOTE.—The purpose of this republication is to indicate applicant's additional request for authority as described in (2) above.

Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa. The order of August 22, 1973, by which this proceeding was directed for handling under modified procedure is vacated and set aside by order dated September 4, 1973.

No. MC 134477 (Sub-No. 37), filed July 23, 1973. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Thomas Fischbach (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from the facilities of Missouri Beef Packers, Inc., at or near Boise, Idaho, to points in Connecticut, Illinois, Iowa, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Texas, and Wisconsin, restricted to traffic originating at the above named origins.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho, or Denver, Colo.

No. MC 135152 (Sub-No. 10) (CORRECTION), filed July 16, 1973, published in the FEDERAL REGISTER issue of August 30, 1973, and annotated in republication this issue. Applicant: CASKET DISTRIBUTORS, INC., Rural Route #2, West Harrison, Ind. 45030. Applicant's representative: Jack B. Josselson, 700 Atlas Bank Building, Cincinnati, Ohio 45202.

NOTE.—The docket number assigned to this proceeding is No. MC–135152 (Sub-No. 10), in lieu of No. MC–135152 (Sub-No. 1) which was erroneously indicated in the FEDERAL REGISTER publication of August 30, 1973. The notice of the request for authority remains as previously published.

No. MC 135170 (Sub-No. 1), filed July 6, 1973. Applicant: TRI-STATE ASSOCIATES, INC., P.O. Box 188, Federalsburg, Md. 21632. Applicant's representative: James C. Hardman, 127 North Dearborn Street, Chicago, Ill. 60602. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Containers, container ends and accessories, and material, equipment, and supplies* used in connection with the manufacture, sale, and distribution of containers, from points in Virginia, New Jersey, Pennsylvania, and North Carolina, to points in Maryland, under a continuing contract, or contracts with Continental Can Company, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or New York, N.Y.

No. MC 135562 (Sub-No. 5), filed May 4, 1973. Applicant: O.C.C., INC., 2201 Sixth Avenue South, Seattle, Wash. 98134. Applicant's representative: Joseph O. Earp, 607 Third Avenue, Seattle, Wash. 98104. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Parts of mobile homes and utility trailers, automotive springs, suspensions, and parts thereof, brake assemblies and parts thereof, wheels and wheel attaching parts, and parts for motor vehicle chassis and motor vehicle undercarriage*, from Detroit, Jackson, and Romulus, Mich., Elkhart, Ind., Rockford, Ill., Davenport, Iowa, and Milwaukee, Wis., to points in Arizona, California, Colorado, Utah, New Mexico, Idaho, Montana, Nevada, Oregon, Washington, and Wyoming; (2) *axles and axle suspension components*, from Chino, Calif., to Detroit, Jackson, and Romulus, Mich., Elkhart, Ind., Rockford, Ill., Davenport, Iowa, and Milwaukee, Wis.; and (3) *empty pallets*, on return in (1) and (2) above, under contract with Kelsey-Hayes Company.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash.

No. MC 136318 (Sub-No. 10), filed July 16, 1973. Applicant: COYOTE TRUCK LINE, INC., 395½ West Fleming Drive, Morganton, N.C. 28655. Applicant's representative: Walter F. Jones, Jr., 601 Chamber of Commerce Bldg., Indianapolis, Ind. 46204. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Household furniture*, from Marion, High Point, Morganton, and Spruce Pine, N.C., to points in Washington, Oregon, Montana, Nevada, Utah, Idaho, Wyoming, New Mexico, Kansas, Nebraska, North Dakota, and South Dakota, under contract with Henredon Furniture Industries, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Raleigh, N.C.

No. MC 138052 (Sub-No. 2), filed July 20, 1973. Applicant: GOLD COAST TRUCKING, INC., 140 North Hill St., Albany, Oreg. 97321. Applicant's representative: Robert G. Simpson, 1200 Standard Plaza, Portland, Oreg. 97204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, from Phoenix, Ariz., to points in Oregon.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Portland, Oreg., or Phoenix, Ariz.

No. MC 138144 (Sub-No. 2) (AMENDMENT), filed June 21, 1973, published in the FEDERAL REGISTER issue of August 2, 1973, and republished, as amended this issue. Applicant: FRED OLSON CO., INC., 6022 West State Street, Milwaukee, Wis. 53213. Applicant's representative: Eugene L. Cohn, One North LaSalle Street, Room 2255, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, between Chicago, Chicago Heights, Joliet, and Waukegan, Ill., and Gary, Ind., on the one hand, and, on the other, points in Iowa, Missouri, Nebraska, and Kansas.

NOTE.—The purpose of this republication is to add Chicago Heights, Ill., to the base territory as described above. Common control may be involved. Applicant states that the requested authority can be tacked with its existing authority at Chicago, Ill., to serve presently authorized points in Indiana, Illinois, and Wisconsin. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C.

No. MC 138512 (Sub-No. 1), filed July 26, 1973. Applicant: ROLAND'S TRANSPORTATION SERVICES, INCORPORATED, doing business as WISCONSIN PROVISIONS EXPRESS, 3383 East Layton Avenue, Cudahy, Wis. 53110. Applicant's representative: Richard C. Alexander, 710 North Plankinton Avenue, Milwaukee, Wis. 53203. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products* (except in bulk in tank vehicles), *and equipment, materials, and supplies* used in the manufacture of dairy products, between points in Arkansas, California, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Montana, Nebraska, Nevada, Oregon, South Dakota, Tennessee, Utah, Washington, and Wisconsin, under contract with L. D. Schreiber Cheese Co., Inc., located at Green Bay, Wis.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Milwaukee, Wis.

No. MC 138869 (Sub-No. 2), filed July 5, 1973. Applicant: W. T. MYLES TRANSPORTATION COMPANY, a Corporation, 4481 Moreland Avenue, P.O. Box 321, Conley, Ga. 30027. Applicant's representative: Archie B. Culbreth, Suite 246, 1252 West Peachtree St. NW., Atlanta, Ga. 30309. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Plumbers' goods, fixtures, and supplies*, such as lavatories, basins, legs, and pedestals, urinals, urinal gutters or stalls, water closet bowls and tanks, and bathroom or lavatory fixtures, china or earthenware, and related articles, from (a) Marysville and Perrysville, Ohio, Ford City, Pa., and Tupelo, Miss., to points in Clayton, Cobb, De Kalb, Fulton, and Gwinnett Counties, Ga., (b) Ford City, Pa., and Tupelo, Miss., to points in Florida on and north of Florida Highway 60, (c) Abingdon and Robinson, Ill., to points in South Carolina on and west of U.S. Highway 1, and (d) Monroe, Ga., to points in North Carolina and points in South Carolina on and west of U.S. Highway 1, (2) *fittings, and fixtures for commodities in (1) above*, brass, bronze, iron, or steel, from Marysville, Ohio, to points in Clayton, Cobb, De Kalb, Fulton, and Gwinnett Counties, Ga., (3) *bath tubs, lavatories, and sinks*, cast iron or steel, from Salem, Ohio, to points in Clayton, Cobb, De Kalb, Fulton, and Gwinnett Counties, Ga., and points in Florida on and north of Florida Highway 60, (4) *water heaters*, from Ashland City and Johnson City, Tenn., to points in Clayton, Fulton, and Gwinnett Counties, Ga., and Jacksonville, Fla., (5) *cast iron pipe and fittings*, (a) from Charlotte, N.C., and Chattanooga, Tenn., to points in Clayton, Cobb, De Kalb, Fulton and Gwinnett Counties, Ga., and (b) from Charlottee, N.C., to points in South Carolina on and west of U.S. Highway 1, (6) *copper tubing*, from East St. Louis, Ill., and Reading, Pa., to points in Fulton and Gwinnett Counties, Ga., Jacksonville, Fla., points in North Carolina, and those in South Carolina on and west of U.S. Highway 1, (7) *shower stalls*, plastic or fibreglass, from Union Point, Ga., to points in South Carolina on and west of U.S. Highway 1, and (8) commodities named in (1) through (7) above between shippers warehouses at Anderson, S.C., Charlotte, N.C., College Park and Lawrenceville, Ga., and Jacksonville, Fla., under contract with Parnell-Martin Supply Company and Subsidiaries.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 138882 (Sub-No. 1), filed July 9, 1973. Applicant: WILEY SANDERS, INC., 212 South Oak Street, Troy, Ala. 36081. Applicant's representative: John W. Cooper, 1301 City Federal Building, Birmingham, Ala. 35203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Scrap batteries*, from points in Florida, Georgia, South Carolina, and North Carolina, to the plantsite of Sanders Lead Co., Inc., at Troy, Ala., and (2) *pallets*, from the plantsite of Troy Box and Pallet, Inc., at Troy, Ala., to points in Florida, Georgia, South Carolina, and North Carolina.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Panama City, Fla., or Birmingham, Ala.

No. MC 138963 (Sub-No. 1), filed July 20, 1973. Applicant: JAY ROZELL, doing business as ROZELL TRUCK LINES, 1003 Cedar, Minco, Okla. 73059. Applicant's representative: Rufus H. Lawson, 2400 Northwest 23rd Street, P.O. Box 75124, Oklahoma City, Okla. 73107. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Portable cattle feeders*, on wheels, and *component parts* for portable cattle feeders, from Canadian and Grady Counties, Okla., to points in Alabama, Arizona, Arkansas, Colorado, Florida, Georgia, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nebraska, New Mexico, Nevada, North Dakota, South Dakota, Tennessee, Texas, Utah, and Wyoming.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Oklahoma City or Tulsa, Okla.

No. MC 138987, filed July 9, 1973. Applicant: MEIER TRUCKING COMPANY, a Corporation, Rural Route No. 4, Pontiac, Ill. 61764. Applicant's representative: William J. Boyd, 29 South LaSalle Street, Suite 330, Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Limestone, fertilizer, nitrogen solution, and agricultural chemicals*, from points in Illinois, to points in Michigan, Indiana, Kentucky, Ohio, Missouri, Wisconsin, and Iowa.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 139025, filed July 12, 1973. Applicant: ARTHUR WHITE, Moores Mills, New Brunswick, Canada. Applicant's representative: George F. O'Connell, 40 Charlotte Street, St. John, New Brunswick, Canada. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Woodchips*, in bulk, from the ports of entry on the International Boundary line between the United States and Canada located at or near York and Charlotte Counties, New Brunswick, Canada, to the plantsite and facilities of Georgia Pacific Corp., located at or near Woodland, Maine, under contract with Georgia Pacific Corp.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Bangor, Augusta, or Portland, Maine.

By the Commission.

## MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate

V 38 I 177
SEP 13 73
XUM

Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before October 3, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74574. By order of September 7, 1973, the Motor Carrier Board approved the transfer to Thayer's Westboro & Boston Express, Inc., 15 Grove Street, Hopkinton, Mass., of the operating rights in Certificate No. MC-69590 issued April 21, 1961, to Edward E. Buxton, doing business as Buxton's Worcester & Westboro Express, 10 Walnut Street, Shrewsbury, Mass., authorizing the transportation of general commodities, with exceptions, between Worcester, Mass., and Westboro, Mass., serving the intermediate points of Northboro and Shrewsbury, Mass.

No. MC-FC-74575. By order of September 7, 1973, the Motor Carrier Board approved the transfer to Garfield Heights Coach Line, Inc., Bedford, Ohio 44146, of Certificate No. MC-3971 issued June 8, 1967, to Ohio Trailways, Inc., Zanesville, Ohio 45056, authorizing the transportation of passengers and their baggage, and express, newspapers, and mail in the same vehicle with passengers, between Zanesville, Ohio, and Coshocton, Ohio, serving all intermediate points, over specified highways; between Zanesville, Ohio, and Wooster, Ohio, serving all intermediate points, over specified highways; between Wooster, Ohio, and Cleveland, Ohio, serving all intermediate points, over specified highways; and passengers and their baggage, and express and newspapers in the same vehicle with passengers, between Zanesville, Ohio, and Corning, Ohio, serving all intermediate points, over specified highways; between Corning, Ohio, and Athens, Ohio, serving all intermediate points, over specified highways; and between Athens, Ohio, and Huntington, W. Va., serving all intermediate points, over specified highways. Langdon D. Bell, 218 East State Street, Columbus, Ohio 43215, attorney for applicants.

[Notice No. 122]

## MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 7, 1973.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 20783 (Sub-No. 92 TA), filed August 23, 1973. Applicant: TOMPKINS MOTOR LINES, INC., P.O. Box 1830, Highway 77, Gadsden, Ala. 35902. Applicant's representative: Christian V. Graf, 407 North Front Street, Harrisburg, Pa. 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned and preserved foodstuffs*, from the distribution facility of Heinz U.S.A. at Greenville, S.C., to points in Alabama, Georgia, and Tennessee, restricted to traffic originating at and destined to the points and territories shown, for 180 days. SUPPORTING SHIPPER: Heinz U.S.A., Division of H. J. Heinz Company, P.O Box 57, Pittsburgh, Pa. 15230. SEND PROTESTS TO: Clifford W. White, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 814, 2121 Building, Birmingham, Ala. 35203.

No. MC 30844 (Sub-No. 476 TA), filed August 23, 1973. Applicant: KROBLIN REFRIGERATED XPRESS, INC., 2125 Commercial Street, P.O. Box 5000 (Box zip 50704), Waterloo, Iowa 50702. Applicant's representative: Paul Rhodes (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 MCC 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plant site of Madison Foods, Inc., at Madison, Nebr., to points in Alabama, Connecticut, the District of Columbia, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Tennessee, Texas, Vermont, Virginia, and West Virginia, restricted to shipments originating at Madison, Nebr., and destined to the above named states, for 180 days. SUPPORTING SHIPPER: Armour and Company, Greyhound Tower, Phoenix, Ariz. 85077. SEND PROTESTS TO: Herbert W. Allen, Transportation Specialist, Interstate Commerce Commission, Bureau of Operations, 875 Federal Bldg., Des Moines, Iowa 50309.

No. MC 85465 (Sub-No. 57 TA), filed August 27, 1973. Applicant: WEST NEBRASKA EXPRESS, INC., P.O. Drawer 952, 5th Avenue and 5th Street, Scottsbluff, Nebr. 69361. Applicant's representative: C. J. Boddington, 2800 West Bayshore Road, Palo Alto, Calif. 94303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts* (except hides) *and articles distributed by meat packing houses* as defined in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 MCC 209 and 766, from the plant site and storage facilities of Madison Foods, Inc., at Madison, Nebr., to points in Kentucky, Virginia, West Virginia, Pennsylvania, New York, Massachusetts, Connecticut, Rhode Island, Vermont, New Hampshire, Maine, Indiana, Ohio, Delaware, New Jersey, Maryland, and the District of Columbia, for 180 days. SUPPORTING SHIPPER: Donald A. Chute, Manager, Transportation and Distribution, Fresh Meats Division, Greyhound Tower, Phoenix, Ariz. 85077. SEND PROTESTS TO: Max H. Johnston, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 320 Federal Building and Court House, Lincoln, Nebr. 68508.

No. MC 92068 (Sub-No. 9 TA), (CORRECTION), filed August 8, 1973, published in the FEDERAL REGISTER issue of August 22, 1973, and republished as corrected this issue. Applicant: MUTUAL TRANSPORTATION, INCORPORATED, President and Fleet Sts., Baltimore, Md. 21202. Applicant's representative: Walter T. Evans, 1111 E St. NW., Washington, D.C. 20004.

NOTE.—The purpose of this partial republication is to show that applicant now seeks to operate as a *common carrier*, in lieu of a contract carrier, which was published in error. The rest of the application remains the same.

No. MC 107403 (Sub-No. 856 TA), filed August 22, 1973. Applicant: MATLACK, INC., 10 West Baltimore Ave., Lansdowne, Pa. 19050. Applicant's representative: John Nelson (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic resin*, in bulk, in tank vehicles, from Holland, N.Y., to Corry, Erie, Franklin, and Warren, Pa., and Buffalo, Jamestown, Lockport, and Rochester, N.Y., for 180 days. SUPPORTING SHIPPER: Thomas N. Gotro. Purchasing Agent, Fisher Price Toys, Div. of Quaker Oats, Holland, N.Y. 14080. SEND PROTESTS TO: Ross A. Davis, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 600 Arch Street, Room 3238, William J. Green, Jr., Federal Bldg., Philadelphia, Pa. 19106.

No. MC 108053 (Sub-No. 122 TA), filed August 27, 1973. Applicant: LITTLE AUDREY'S TRANSPORTATION COMPANY, INC., 1520 West 23rd Street, Mail: P.O. Box 129, Fremont, Nebr. 68025. Applicant's representative: R. W. Pritzke (Same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles and hides), from the plant site of Madison Foods, Inc., at or near Madison, Nebr., to points in Arizona, California, Colorado, Idaho, Montana, New Mexico, Nevada, Oregon, Utah, Washington, and Wyoming, for 180 days. SUPPORTING SHIPPER: Armour and Company, Donald A. Chute, Manager, Transportation & Distribution, Fresh Meats Division, Greyhound Tower, Phoenix, Ariz. 85077. SEND PROTESTS TO: District Supervisor Carroll Russell, Bureau of Operations, Interstate Commerce Commission, 711 Federal Office Bldg., Omaha, Nebr. 68102.

No. MC 113545 (Sub-No. 11 TA), filed August 27, 1973. Applicant: CORMETT FORWARDING CO., INC., 19th Street and Park Avenue, Weehawken Branch, Weehawken, N.J. 07087. Applicant's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Radiopharmaceuticals and medical isotopes*, from Carlstadt, N.J., to New York, N.Y., and points in Nassau and Suffolk Counties, N.Y., for 180 days. SUPPORTING SHIPPER: Mallinckrodt Chemical Works, Box 10172, Lambert Field, St. Louis, Mo. 63145. SEND PROTESTS TO: District Supervisor Robert E. Johnston, Interstate Commerce Commission, Bureau of Operations, 9 Clinton St., Newark, N.J. 07102.

No. MC 113678 (Sub-No. 507 TA), filed August 24, 1973. Applicant: CURTIS, INC., Off.: 4810 Pontiac Street, Commerce City (Denver) Colo. 80022, and Mail: P.O. Box 16004, Stockyards Station, Denver, Colo. 80216. Applicant's representative: David L. Metzler (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 MCC 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plant site of Madison Foods, Inc., at Madison, Nebr., to points in Arizona, California, Colorado, Idaho, New Mexico, Montana, Nevada, Oregon, Utah, Washington, Wyoming, Virginia, Maryland, Delaware, New Jersey, New York, Pennsylvania, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, Maine, and the District of Columbia, for 180 days. SUPPORTING SHIPPER: Armour and Company, Fresh Meats Division, Greyhound Tower, Phoenix, Ariz. 85077. SEND PROTESTS TO: District Supervisor Herbert C. Ruoff, Interstate Commerce Commission, Bureau of Operations, 2022 Federal Building, Denver, Colo. 80202.

No. MC 115322 (Sub-No. 94 TA), filed August 27, 1973. Applicant: REDWING REFRIGERATED, INC., P.O. Box 10177, Off.: Highway 527, Taft, Fla. 32809. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen baked squash*, when moving in mixed shipments with *potatoes and potato products*, from the plantsite and storage facilities of Penobscot Frozen Foods, Inc., Belfast, Maine, to Secaucus, Newark, and Jersey City, N.J.; Philadelphia, Pa.; and Landover and Baltimore, Md.; and points in Virginia, North Carolina, South Carolina, Tennessee, Georgia, Florida, Alabama, Mississippi, and Louisiana, for 180 days. SUPPORTING SHIPPER: Penobscot Frozen Foods, Inc., P.O. Box 229, Belfast, Maine 04915. SEND PROTESTS TO: District Supervisor G. H. Fauss, Jr., Interstate Commerce Commission, Bureau of Operations, Box 35008, 400 W. Bay Street, Jacksonville, Fla. 32202.

No. MC 115826 (Sub-No. 252 TA), filed August 27, 1973. Applicant: W. J. DIGBY, INC., 1960 31st Street, P.O. Box 5088, Terminal Annex, Denver, Colo. 80216. Applicant's representative: Ezekial Gomez (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts, and articles distributed by meat packinghouses* as decribed in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 MCC 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plant site of Madison Foods, Inc., at Madison, Nebr., to points in Alabama, Arizona, California, Colorado, Georgia, Idaho, Montana, New Mexico, Nevada, North Carolina, Oregon, South Carolina, Tennessee, Utah, Florida, Virginia, Washington, and Wyoming, for 180 days. ## READING CO.

### Rerouting or Diversion of Traffic

Upon further consideration of I.C.C. Order No. 76 (Reading Company, Richardson Dilworth and Andrew L. Lewis, Jr., Trustees) and good cause appearing therefor:

*It is ordered*, That:

I.C.C. Order No. 76 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date*—This order shall expire at 11:59 p.m., November 15, 1973, unless otherwise modified, changed, or suspended.

*It is further ordered*, That this amendment shall become effective at 11:59 p.m., August 31, 1973, and that this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., August 23, 1973.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER,
*Agent.*

| 1078 | North Central Iowa | AO-272-A20. |
| 1079 | Des Moines-Iowa | AO-295-A21. |

Notice is hereby given of the filing with the Hearing Clerk of this revised recommended decision with respect to proposed amendments to the tentative marketing agreements and orders regulating the handling of milk in the aforesaid marketing areas.

Interested parties may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, by October 15, 1973. Seventeen copies of the exceptions should be filed. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

PRELIMINARY STATEMENT

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreements and to the orders as amended were formulated was conducted at Atlanta, Ga., on October 18–20, 1971, at Dallas, Tex., on November 9 and 10, 1971, and at Bloomington, Minn., on November 16–18, 1971, pursuant to notice thereof which was issued October 4, 1971 (36 F.R. 19604).

This hearing was a single proceeding on proposed amendments to the tentative marketing agreements and orders regulating the handling of milk in 33 marketing areas. In addition to those listed at the beginning of this document, such marketing areas include the following:

GROUP I

| | |
|---|---|
| Georgia | Northern Louisiana |
| Neosho Valley | Memphis, Tenn. |
| Wichita, Kans. | Nashville, Tenn. |
| Chattanooga, Tenn. | Fort Smith, Ark. |
| New Orleans, La. | Central Arkansas |

GROUP II

| | |
|---|---|
| Red River Valley | Central West Texas |
| Oklahoma Metropolitan | Austin-Waco, Tex. |
| Lubbock-Plainview, Tex. | Corpus Christi, Tex. |
| North Texas | Central Arizona |
| San Antonio, Tex. | Texas Panhandle |
| | Rio Grande Valley |

The hearing notice also included the Mississippi order (Part 1103), which was later included in the recommended decision with the "Group I" orders. The Mississippi order was terminated at midnight, April 30, 1973 (38 FR 8748), at which time it ceased to be a part of this proceeding.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on August 28, 1972, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

Because of its length, and to facilitate its distribution to interested parties, the recommended decision was published in the FEDERAL REGISTER in the form of three separate documents. Each document contained the proposed amendments for the group of 11 orders listed at the beginning of such document and, for the convenience of interested parties, an identical set of findings and conclusions. These documents were published on the following dates: Group I orders—September 16, 1972 (37 FR 18984); Group II orders—September 19, 1972 (37 FR 19210); and Group III orders—September 20, 1972 (37 FR 19482).

On the basis of exceptions to the recommended decision, a number of changes in the findings and conclusions of that decision concerning the classification and pricing of milk in certain uses are appropriate. Because such changes are substantive, a revised recommended decision is being issued with an opportunity to submit exceptions thereto.

The publication procedure used for the August 28, 1972, recommended decision is again being used in the case of this revised recommended decision. The three documents constitute, however, a single revised recommended decision under this proceeding.

The material issues, findings and conclusions, rulings, and general findings of the August 28, 1972, recommended decision are set forth in full herein, subject to the following modifications. The modifications noted do not include those where the reference to "33" orders or markets was changed to "32" orders or markets because of the termination of the Mississippi order.

1. Under the heading "*General setting of the hearing.*", paragraphs 1, 3, and 6 are changed.

2. Under the heading "1. *Application of a uniform milk classification plan in the 33 markets.*", paragraphs 1 and 9 are changed, and a new paragraph is added after the last paragraph.

3. Under the heading "2. *Revision of the present Class I classification.*", paragraphs 8, 9, 11, and 14 are changed, and the 28th paragraph is deleted and three new paragraphs are substituted therefor.

4. Under the heading "3. *Classification and pricing of milk not needed for Class I use.*", the entire discussion is changed.

5. Under the subheading "(a) *Other source milk definition.*", a new paragraph is added immediately after paragraph 7, and paragraph 8 is changed.

6. Under the subheading "(b) *Accounting for nonfat milk solids added to milk and milk products.*", the last paragraph is changed.

6a. Under the subheading "(c) *Classification of milk transferred or diverted to other plants.*", paragraph 12 is changed.

7. Under the subheading "(d) *Classification of end-of-month inventory.*", paragraphs 3 and 12 are changed.

8. Under the subheading "(e) *Classification of shrinkage, milk dumped and milk disposed of for animal feed.*", paragraphs 3–5, 8, 9, 15 and 19 are changed.

9. Under the subheading "(f) *Allocation of receipts to utilization.*", paragraph 7 is deleted, and paragraphs 9, 17, and 19 are changed.

10. Under the heading "5. *Changing the butterfat differentials.*", paragraphs 3–5, 8, 9, 12, 15, 16 and 18 are changed.

11. Under the heading "6. *Advance announcement of prices for surplus milk.*", paragraphs 3 and 4 are changed.

12. Under the heading "7. *Treatment of filled milk under the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa orders.*", paragraph 11 is deleted.

The material issues on the record of the hearing relate to:

1. Application of a uniform milk classification plan in the 32 markets;

2. Revision of the present Class I classification;

3. Classification and pricing of milk not needed for Class I use;

4. Miscellaneous classification and accounting changes:

(a) Other source milk definition;

(b) Accounting for nonfat milk solids added to milk and milk products;

8. A uniform "equivalent price" provision.

*General setting of the hearing.* This hearing is the second of two regional hearings on the proposed use of a uniform plan for classifying milk for pricing purposes under Federal milk orders. The first hearing, which was held at Clayton, Mo., on July 14–22, 1970, was for seven Midwestern markets. A recommended decision based on the seven-market hearing was issued on June 4, 1971, and exceptions have been filed. A revised recommended decision for the seven markets is being issued concurrently with this revised recommended decision.

Prior to the first hearing, the National Milk Producers Federation, an organization of cooperative associations of dairy farmers and federations of such cooperative associations, undertook the development of a uniform milk classification plan for use under milk orders. Guidelines were formulated for use by member organizations in the drafting of specific classification proposals for consideration at public hearings.

Using these guidelines as a basis for their proposals, several cooperative associations petitioned the Department for a hearing on proposals relating to the classification and pricing of milk in seven Midwestern markets. After the hearing and issuance of a recommended decision, these cooperatives, along with other producer groups, requested a similar hearing for an additional 33 markets. The order for one of these markets (Mississippi) has since been terminated, and further reference to this group of markets will be in terms of the remaining 32 markets. The two hearings together involve a group of 39 markets located throughout the central part of the United States.

As in the case of the seven markets, the main thrust of the cooperatives' proposals for the 32 markets was the proposed use of an identical classification plan under each of the orders. As proposed, the new plan would have three classes of utilization rather than the two classes now provided in most of these orders. The present Class II classification would be redesignated as Class III and a new Class II classification, which would include various milk products now in Class I and Class II, would be established.

Corollary pricing proposals by the cooperatives would provide that the new Class II price under all but the Central Arizona order be the Minnesota-Wisconsin price plus an amount ranging from 10 to 20 cents, depending on the order involved. Prices would increase generally from north to south. For the Central Arizona order, which now has three classes, local producers proposed retention of the Class II price now in effect (a butter-nonfat dry milk formula price plus 25 cents).

Producers took diverse positions concerning the appropriate Class III price for the 32 markets. A number of cooperatives operating largely in the Upper Midwest proposed that the Class III price for markets in that area be based on a formula reflecting market prices for butter, nonfat dry milk and cheddar cheese. A regional cooperative operating in the Southeastern United States proposed that the Class III price in four of its local markets be based on the Minnesota-Wisconsin price, with reductions of 5 to 15 cents to be applicable in three of the markets. Another regional cooperative proposed for 15 southwestern markets that the Class III price under each order for the principal surplus products be the lower of the present surplus price now in effect or the Minnesota-Wisconsin price. In the case of still three other markets, local producer groups asked that their present surplus prices (all based solely or in part on butter-nonfat dry milk formulas) be retained.

Cooperatives also proposed that a single butterfat differential apply to all prices under each order. This differential, which would be identical among the 32 orders, would be based on the Chicago butter price times a factor of 0.115.

A uniform classification plan for the 32 orders was advocated also by the Milk Industry Foundation and the International Association of Ice Cream Manufacturers, national trade associations of fluid milk and ice cream processors whose members operate in each of the 32 subject markets. Without taking a position on whether there should be two or three use classes, these groups offered alternative proposals on the classification of various milk products under either type of classification plan. Individual handlers also made proposals concerning specific aspects of the classification and pricing scheme.

A more detailed description of the proposals by producers and handlers is set forth in the discussion of the material issues.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Application of a uniform milk classification plan in the 32 markets.* Each of the 32 orders under consideration should provide for the same basic classification plan. As adopted herein, each order would provide for three classes of utilization, with the milk uses included in each class being the same for each order. Likewise, the same basic procedure would be used under each order for classifying milk transferred or diverted from pool plants to other plants, and for allocating a handler's receipts to his utilization to determine the classification of his producer milk. Each order would use the same Class II price formula. For Class III milk, two price formulas would be used, with one applying under 18 orders and the other under 14 orders. All differential butterfat received from producers would be priced at the same level regardless of use.

The statutory authority for Federal milk orders specifies that an order shall classify milk purchased by handlers from producers or associations of producers in accordance with the form in which or the purpose for which the milk is used. When each of the 32 subject orders was promulgated, the classification plan adopted reflected the marketing conditions and practices prevailing at the time in the local area concerned. Because local conditions and practices were seldom alike from market to market, the classification plans often varied from one order to another. As long as the markets remained relatively isolated from each other, marketing problems resulting from the differences in the various classification plans were minimal.

In recent years the "local" character of these markets has been disappearing. Intermarket movements of milk have become commonplace as handlers and producers alike seek to find additional outlets for milk. Such milk movements have been encouraged or facilitated by such developments as inspection reciprocity between health jurisdictions, improved highway networks and transportation equipment, conversion from can handling to farm bulk tanks, emergence of regional cooperatives, new processing and packaging techniques, and concentration of processing and packaging operations in large, specialized facilities.

Numerous cases were cited by handlers of products being distributed throughout multi-State regions from centralized processing facilities. Products frequently mentioned include frozen desserts, yogurt, various cream products and cottage cheese. Widespread distribution patterns prevail particularly for the processors of specialty products such as yogurt and sterilized cream items. Although the volume of these specialty products is relatively limited, it is probably the distribution of these products more than any others that has precipitated such general interest within the industry for uniform classification provisions among Federal orders.

Although the 32 orders have been revised from time to time to reflect the closer intermarket relationships, the classification plans of these orders continue to differ. The differences relate not only to the products included in each respective class, but also to the attendant class prices and butterfat differentials, the rules for classifying milk moved from one plant to another, the procedure for allocating a handler's receipts to his utilization, the method of classifying end-of-month inventories, and the manner of classifying shrinkage.

Such differences in the classification and pricing of milk are often disruptive to the competitive relationships of handlers and to the marketing of producer milk. Many of these differences, though, have little, if any, foundation under today's marketing conditions. It is thus concluded that a generally uniform classification and pricing plan should be incorporated in each of the 32 orders under consideration.

In conjunction with the development of uniform provisions pertaining to the classification and pricing of milk, it is desirable to also develop a single format of order provisions for use in each of these orders. All orders contain essentially the same categories of provisions, such as those relating to the definition of a pool plant or other source milk.

V 38 I 177 SEP 13 73 XUM

those setting forth the class price formulas, or those describing how the uniform price shall be computed. At present, however, many of the orders are structured in such a way that provisions serving essentially the same purpose under all orders do not appear in each order in the same place or under the same section title.

Coordination of the orders in this respect will be helpful to those in the industry who must work with several orders, a situation that is becoming increasingly common as individual cooperatives and handlers continue to expand their marketing activities into more and more regulated markets. Moreover, the opportunity to effect changes in a relatively large number of orders at the same time makes the adoption of a uniform order format a particularly desirable step at this juncture of the order program.

Each of the orders included in this document is set forth in its entirety at the end of the document. Each order reflects the revised order format as well as the classification and pricing amendments adopted herein. In adapting each order to the new format, no substantitive changes have been made in those provisions not under consideration at the hearing. Since the classification and pricing amendments may be less discernable to the reader with the reprinting of the complete order, the sections in each order that encompass the basic changes in classification and pricing are listed below:

Sections 12–16, 30, 40–44, 50, 52–54, 60, 62, 74–76, and 85.

Some of the amendments adopted herein would change certain procedures under the orders that are carried out after the end of the month to which they apply. These include the submission of reports, the classification of milk, and the computation and announcement of certain class prices, butterfat differentials, and producer prices. It is intended, however, that the amendments apply only to that milk handled after the effective date of the changes. Such amendments are not intended to affect the completion of previously existing procedures with respect to milk handled prior to the effectuation of the amendments.

2. *Revision of the present Class I classification.* With certain exceptions noted below, Class I milk under each of the 32 subject orders should include all skim milk and butterfat disposed of in the form of milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids. Skim milk and butterfat disposed of in any such product that is flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted likewise should be classified as Class I milk. Such classification should apply whether the products are disposed of in fluid or frozen form.

In addition, Class I milk should include all skim milk and butterfat disposed of in the form of any other fluid or frozen milk product (if not specifically designated as a Class II or Class III use) that contains by weight at least 80 percent water and 6.5 percent nonfat milk solids, and less than 9 percent butterfat and 20 percent total solids.

Skim milk disposed of in any product described above that is modified by the addition of nonfat milk solids should be Class I milk only to the extent of the weight of the skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

Class I milk should not include skim milk or butterfat disposed of in the form of evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, or whey.

As a convenience in drafting order provisions, each product designated herein as a Class I product would be defined in the 32 orders as a "fluid milk product."[1]

Class I milk should include also any skim milk and butterfat not specifically accounted for in Class II or Class III, other than shrinkage permitted a Class III classification.

Except for sterilized products, most of the products listed above for inclusion in Class I are now included in the Class I classification under each of the 32 orders. Only in the case of milkshake mixes might there be a higher classification under the adopted amendments than at present. Under some orders, such mixes are now included in the lowest class. This higher classification would be limited, however, to only those milkshake mixes containing less than 20 percent total solids.

The adopted Class I classification would not include eggnog, yogurt, cream, or mixtures of cream and milk, or skim milk containing 9 percent or more butterfat (such as half-and-half). A Class I classification now applies to eggnog in 9 of the 32 markets, and to yogurt in 18 of the markets. In all markets, sweet cream (except that in frozen, concentrated, aerated, or sterilized form) and half-and-half are now Class I products. The classification of sour cream and sour cream mixtures, on the other hand, varies considerably among the orders.

Six of the 32 orders now include ending inventories of packaged fluid milk products in Class I. As discussed later, such inventories would not be classified as Class I milk under the revised orders.

The proposals concerning the Class I classification of milk related primarily to the use under all orders of a uniform fluid milk product definition based on product composition, and to the appropriate classification of milkshake and ice milk mixes, sterilized fluid milk products, cream, eggnog, yogurt, fluid milk products, to which nonfat milk solids have been added and ending inventory. The classification of cream, eggnog, and yogurt, is discussed under Issue 3 which deals with the classification and pricing of milk not needed for Class I use. The method of accounting for nonfat milk solids added to fluid milk products is discussed under Issue 4(b). The classification of ending inventory is dealt with under Issue 4(d). The remaining Class I issues are dealt with at this point.

Milkshake and ice milk mixes containing less than 20 percent total solids should be included in Class I. Such mixes containing a greater percentage of solids should be Class II products.

Cooperatives proposed that milkshake mixes that "are not further processed in a commercial establishment" be in Class I. They proposed that all other milkshake mixes be in Class II. The national organizations of fluid milk and ice cream processors, on the other hand, asked that all milkshake mixes be included in the lowest classification.

Milkshake and ice milk mixes are being marketed generally through two channels. Limited quantities of such mixes are processed for home consumption, with such mixes being distributed to consumers through foodstores and on home delivery routes. The major outlet for milkshake and ice milk mixes, though, is the so-called "soft-serve" trade. Mixes processed by regulated handlers for this use are sold to commercial establishments where the product is run through a special freezer and dispensed to the public in a semisoft form.

Milkshake and ice milk mixes are basically similar in composition and purpose to what might be considered as traditional frozen desserts, such as ice cream. Although such shake mixes are intended to be consumed in a semisoft form, or even in a very thick fluid form, they are being marketed for essentially the same use as the traditional frozen desserts. This is the case whether such mixes are sold through the "soft-serve" trade or for home use. With minor exception, as noted below, milk used in milkshake and ice milk mixes thus should be classified in the same class as milk used in the traditional frozen desserts. As discussed later in this decision, the classification plan adopted herein includes frozen desserts in Class II.

It is possible that a product very similar in composition and form to chocolate milk could be marketed under the label of a milkshake mix for the purpose of having a lower classification apply to the product. Since such a product actually would have the same general form and purpose as other fluid milk products now classified as Class I under these orders, it should be included in the Class I classification. It is necessary, though, to provide some means of distinguishing between such a product and the general category of milkshake mixes that are

[1] The reader should keep in mind that the orders do not classify products per se but rather the skim milk and butterfat disposed of in the form of a particular product or used to produce a particular product. To simplify the presentation of the findings and conclusions, however, reference is made in this decision to Class I products, Class II products, and Class III products, or to certain products included in a particular class.

being sold in competition with frozen desserts. For this purpose, the total solids content of the product should be used. A standard of 20 percent or more total solids should encompass those milkshake and ice milk mixes intended for use as a type of frozen dessert. Mixes with less solids are similar in composition to chocolate milk and other flavored fluid milk products and should be a Class I product.

As proposed by cooperatives and the national organizations of fluid milk and ice cream processors, no exception to the Class I classification of milk should be made for fluid milk products in sterilized form. The sterilization of fluid milk products does not change the form or purpose of such products. As in the case of the unsterilized fluid milk products which they resemble, such sterilized products are disposed of in fluid form for consumption as a beverage. They are generally intended for use in place of their unsterilized counterparts and are thus competing for the same consumers.

Returns to producers for milk disposed of in the form of fluid milk products should be the same whether such products are sterilized or unsterilized. Such products in either form are being marketed for the same beverage use. Classifying all such products in Class I will assure that the returns from producer milk used in sterilized fluid milk products will contribute on the same basis as returns from producer milk used in unsterilized fluid milk products toward inducing an adequate supply of milk for beverage use.

With the removal of any exception to the Class I classification of milk because of sterilization, specific reference must be made in the "fluid milk product" definition to the exclusion of certain products that otherwise could be construed to fall within such definition. Such products are evaporated or condensed milk or skim milk, formulas in hermetically sealed glass or all-metal containers that are especially prepared for infant feeding or dietary use, and products (such as flavored drinks in "pop" bottles) containing by weight less than 6.5 percent nonfat milk solids. These products, which are being sold in sterilized form, are now excluded from the Class I classification and, as proposed by cooperatives and handlers, such exclusion should be continued, notwithstanding the fact that they are sold to the public in fluid form. Evaporated milk and condensed milk sold for home use are intended primarily for cooking purposes. They are not consumed normally as a beverage. Infant and dietary formulas, which are being sold in hermetically sealed glass or all-metal containers, are specialized food products prepared for a limited use. Such formulas do not compete with other milk beverages consumed by the general public. Similarly, fluid products containing only a minimal amount of nonfat milk solids are not considered as being in the competitive sphere of the traditional milk beverages.

Fluid milk products should not be defined only on the basis of product composition, as was proposed by cooperatives. Contending that the present fluid milk product definition in each order does not clearly identify those products that are intended to be classified as Class I products, cooperatives proposed that a fluid milk product be defined solely in terms of moisture and milk solids content of the product. As proposed by producers, a "fluid milk product" would be any product containing at least 6.5 percent but less than 27 percent nonfat milk solids, less than 9 percent butterfat, and more than 20 percent moisture, all computed on the basis of weight.

In support of their proposal, proponents indicated that such a definition would result in a more uniform application among the 32 orders of the classification provisions. They contended that the listing of products under the current definitions does not accommodate the proper classification of new products or variations of the listed products when they are introduced on the market. Proponents pointed out that as market administrators have had to make order interpretations in response to this situation variations in interpretation and classification have resulted among the markets. Adoption of the proposed definition, it was contended, would eliminate such problems. Any product meeting the specified composition limits for a fluid milk product would be a fluid milk product regardless of the name under which the product might be marketed.

Proponents recognized, however, that their proposed fluid milk product definition would include some products not intended by them to be in Class I, and, at the same time, would exclude certain products that they wanted in this classification. To overcome this problem, proponents stated that certain products should be listed by name, either as inclusions or exclusions, to assure that the fluid milk product definition would include those products, and only those products, warranting a Class I classification.

Handlers took the position that the fluid milk product definition should continue to list by name those products intended to be included in Class I. They believe that this procedure would result in less confusion within the industry concerning the application of this definition. Also, handlers were concerned that defining a fluid milk product on the basis of product composition would deter the development and marketing of new products. They contended that the proposed composition standards could embrace a new product that was intended by the processor to be marketed in direct competition with products that would be included in Class II or Class III rather than in competition with Class I products.

The primary concern with any fluid milk product definition is that it clearly define the products or types of products that are intended to be included in the definition. The fluid milk product definition adopted herein, which incorporates both the listing of specified products and the use of composition percentages, should meet this requirement. Incorporation of this definition in each of the 32 orders will provide a uniform basis for identifying those products that are to be defined as "fluid milk products."

For simplicity, the fluid milk product definition should continue to list the generic names of those products commonly sold for consumption as beverages. The products listed in the adopted definition encompass most of the forms in which milk for fluid uses is sold. Anyone referring to this fluid milk product definition may easily ascertain in the case of most milk products whether or not a particular product is included in the definition.

A listing of products alone in the fluid milk product definition may not clearly indicate the classification of new milk products developed for fluid consumption. With certain limited exceptions noted, the fluid milk product definition is intended to include all milk products that are distributed for use as beverages. Although a new milk beverage introduced on the market might not be encompassed within the list of named products, it should be treated as a fluid milk product, nevertheless, if its composition is similar to that of the listed products. This will be the result of the standards of product composition for fluid milk products herein adopted.

As indicated, the adopted composition standards would embrace any fluid or frozen milk product not specified as a Class II or Class III product that contains by weight at least 80 percent water and 6.5 percent nonfat milk solids, and less than 9 percent butterfat and 20 percent total solids. The 9 percent butterfat standard coincides with the butterfat percentage adopted herein to delineate the mixtures of cream and milk or skim milk to be included in Class II. The total solids and water percentages represent a reasonable measure of the fluidity of those products that normally are consumed as beverages. The 6.5 percent nonfat milk solids standard is used to exclude from the fluid milk product definition those products which contain some milk solids but which are not closely identified with the dairy industry, such as chocolate flavored drinks in "pop" bottles.

These composition standards are chosen so as to conform as closely as possible to the water, solids, and butterfat content of those products specifically listed in the fluid milk product definition, i.e., the traditional milk beverages. It is intended that these standards apply only to milk products, and only to such products that are being marketed for consumption in fluid form. Such standards would not be applied to products such as soups, which are not customarily thought of as milk products, or to products that would be a type of frozen dessert marketed for consumption in frozen form.

In determining whether or not a milk product in fluid form falls within the composition standards of the fluid milk product definition, such standards should be applied to the composition of the product in its finished form, not to the composition of the product on a skim equivalent basis. A new product not intended for beverage use might contain in its finished form somewhat more than the maximum total solids specified for a

V 38 177 SEP 13 73 XUM

fluid milk product under the adopted composition standards. On this basis, the product would not fall within the fluid milk product definition. Application of the composition standards to this product on a skim equivalent basis, however, could result in the product meeting such standards and thus being defined as a fluid milk product.

As pointed out by producers in their exceptions, applying the composition standards to products in the form in which marketed could exclude from the fluid milk product definition a new concentrated fluid product that is intended to be consumed as a beverage only after reconstitution. For the present time, however, the composition standards should be applied to a product in its finished form. A refinement of such standards may be appropriate once there has been an opportunity to evaluate their applicability under actual market conditions.

It should be noted that under the adopted classification provisions accounting for a new product on other than a skim equivalent basis would be limited solely to determining whether or not the product meets the composition standards of the fluid milk product definition. For all other purposes under the order, the product would be accounted for on a skim equivalent basis.

In applying the 6.5-percent nonfat milk solids standard, it is intended that this standard apply to such solids in any form except sodium caseinate. As set forth in the "filled milk" decision applicable to most of the 32 orders, sodium caseinate in any product is treated under the orders as a nonmilk ingredient.[2] There is no basis for changing this procedure.

The use of composition standards as a means of defining fluid milk products should not deter the development of new milk products, as handlers contended. Should the Class I classification of a new product appear to be incongruous with the intended use of the product, the hearing process remains as an avenue through which a different classification may be considered. The use of composition standards should result, however, in a more uniform classification among orders of new products developed for fluid consumption.

3. *Classification and pricing of milk not needed for Class I use.* Two use classes, Class II and Class III, should be provided in each of the 32 orders for skim milk and butterfat utilized for other than Class I purposes. The Class II price should be the basic formula price (Minnesota-Wisconsin manufacturing milk price) for the month plus 10 cents. The price under each of the orders for Class III milk should be the basic formula price for the month, but in certain markets not to exceed a butter-nonfat dry milk formula price.

Class II milk should include skim milk and butterfat disposed of in the form of eggnog, yogurt or a "fluid cream product", i.e., cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients. Any product containing 6 percent or more nonmilk fat (or oil) that resembles any of these products likewise should be in this class. Also, eggnog, yogurt and fluid cream products that are in inventory at the end of the month in packaged form should be in Class II.

Included also in this classification should be skim milk and butterfat used to produce cottage cheese, lowfat cottage cheese, dry curd cottage cheese, milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, frozen dessert mixes, any concentrated milk product in bulk fluid form, plastic cream, frozen cream, anhydrous milkfat, custards, puddings, pancake mixes, and formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

A Class II classification should apply also to bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages.

Class III milk should include skim milk and butterfat used to produce cheese (other than cottage cheese, low fat cottage cheese and dry curd cottage cheese), butter, any milk product in dry form, evaporated or condensed milk (plain or sweetened) in a consumer-type package, evaporated or condensed skim milk (plain or sweetened) in a consumer-type package, and any product not otherwise specified as a Class I, Class II or Class III product.

Other Class III uses should include bulk and packaged fluid milk products and bulk fluid cream products in inventory at the end of the month, and that portion of modified (by the addition of nonfat milk solids) fluid milk products not included in Class I. Class III should include any fluid milk product or Class II product accounted for on a "disposed of" basis that is used for animal feed, or is dumped if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition. Also, shrinkage within certain limits should be classified as Class III milk.

As described later, the classification and pricing adopted herein for milk not needed for Class I use differs in some respects from that set forth in the August 28, 1972, recommended decision.

The present classification of milk used in the adopted Class II and Class III classifications is quite varied among the 32 orders. Seven of the orders provide for three use classes while 25 have two classes of utilization. Under four of the three-class orders cottage cheese is classified separately from all other uses. One order classifies cottage cheese and sales of milk to commercial food establishments in an intermediate class. Two orders have a separate use class for milk used in cheddar cheese. Substantial variation exists among the 32 orders in the classification of skim milk and butterfat in eggnog, yogurt, sour cream, milkshake mixes, and milk disposed of to commercial food establishments. The treatment of milk dumped, and milk in inventory at the end of the month, also differs under the several orders.

There is now a variety of price formulas under the 32 orders for milk in other than Class I uses. Seventeen orders use the Minnesota-Wisconsin manufacturing milk price. Three orders use a combination of the Minnesota-Wisconsin price and a butter-nonfat dry milk formula price. Four orders use a combination of a butter-nonfat dry milk formula price and a cheddar cheese formula price. Six orders use a butter-nonfat dry milk formula price, with four of these employing a seasonal adjustment. Two orders use the U.S. manufacturing milk price with a seasonal adjustment for milk used to produce butter, nonfat dry milk and cheddar cheese. This variety of price formulas can result in as many as 11 different prices for milk put to similar uses. Also, four additional prices can result under the five orders that have an intermediate classification and price for milk used to produce cottage cheese.

Cooperatives proposed that each of the 32 orders provide for an intermediate classification (Class II) for skim milk and butterfat disposed of as cream, now a Class I use, and that used to produce several other products now in the lowest priced class under most of the orders. The proposed Class II uses would include cottage cheese, frozen desserts, milkshake mixes for further processing in commercial establishments, eggnog, yogurt, evaporated or condensed milk or skim milk, dietary and infant formulas, custards, puddings, pancake mixes, any product with 6 percent or more nonmilk fat (or oil), and fluid milk products disposed of to commercial food processors. In addition, their new Class II also would include cream, mixtures of cream and milk or skim milk containing 9 percent or more butterfat, cream in plastic, frozen, aerated or sterilized form, sour cream, sour mixtures and anhydrous milkfat.

Under the cooperatives' proposal, the Class I price in 31 markets would be the Minnesota-Wisconsin price plus 10 to 20 cents (increasing generally from north to south). Eleven markets in the States of Minnesota, Iowa, North Dakota, South Dakota, and Tennessee would have a price differential of plus 10 cents. The remainder of the 31 markets would have plus 15 cents, except for a plus 20 cents in the Corpus Christi and Rio Grande Valley markets. A cooperative in the Central Arizona market proposed that the present Class II price, which is 25 cents over the Class III price, be retained in that market.

[2] Official notice is taken of the Assistant Secretary's decision issued on Oct. 13, 1969 (34 F.R. 16881), with respect to the Memphis, Tenn., and certain other marketing areas.

The Class III uses proposed by the cooperatives would include dried products, cheese (except cottage cheese), butter, condensed whey and buttermilk for animal feed, dumpage, ending inventory, shrinkage, and the non-Class I portion of modified fluid milk products.

The cooperatives' Class III pricing proposals varied by regions. A number of cooperatives operating primarily in the Upper Midwest proposed the adoption of a weighted butter-nonfat dry milk (55 percent) and cheese (45 percent) formula using "the product yield factors and make allowances used by the Department in its CCC Price Support Program." While suggesting that such a pricing formula would be appropriate for all 32 markets, they particularly urged its adoption for 11 upper midwestern markets. For four southern markets, the principal cooperative in such markets proposed the use of the Minnesota-Wisconsin price, but with minus adjustments of 5 cents for Chattanooga, 10 cents for New Orleans, and 15 cents for Georgia. For 15 markets in the Southwest, the principal cooperative there proposed that the Class III price be the higher of the Minnesota-Wisconsin price or the current price for the lowest utilization in the respective order. Under its proposal, milk used in butter, nonfat dry milk, and cheddar cheese would be priced, however, at the lower of the Minnesota-Wisconsin price or the current price for the lowest utilization in the respective order. The principal cooperative in the Central Arizona market proposed retention of the Class III price now applicable in that market which is based on a butter-nonfat dry milk formula.

In support of their proposed Class II and Class III use categories, the several cooperatives contended that there are significant differences in the competitive position of, and demand for, milk so used. They stated that handlers demand quality milk on a regular basis for the proposed Class II products, and that in the various markets alternative supplies of milk for such uses generally cannot be obtained for less than the Class II prices they propose for producer milk. Moreover, they claimed that products in such Class II uses should bear, along with fluid milk products, part of the cost necessary to attract an adequate market supply. With respect to the Class III classification, proponents stated that their proposed Class III products are the residual uses of milk associated with fluid markets. Consequently, the local production of such products is related to the amount of reserve or excess milk in the market. Such products, they claimed, can be stored for long periods and do not need to be made on a regular basis.

Proponent cooperatives pointed out that the present Class I classification of cream and cream mixtures has placed these products in a poor competitive position in the marketplace relative to nondairy substitutes. By shifting these products to a lower-priced class, proponents hope the industry will be better able to maintain its present small share of the cream and dessert topping market and perhaps recapture some of the market that it has lost.

In support of their various Class III pricing proposals, the cooperatives urged basically that such prices reflect the net value that can be obtained by cooperatives handling reserve supplies. They claimed that such value should take into consideration (1) product values of butter, nonfat dry milk, and cheese; (2) the cost of moving milk to available outlets; and (3) the burden of "balancing" the fluid milk supply in each market.

With respect to certain southern markets, it was contended that the net value that can be obtained for reserve milk supplies tends to differ from market to market depending upon surplus disposal conditions that prevail in each market. The principal variable factor mentioned was the cost incurred in transporting reserve supplies to available processing plants. For example, there are no plants processing hard cheese, butter, or nonfat dry milk, in Georgia. Consequently, the principal cooperative in the area transports much of the reserve milk supply associated with the Georgia market to manufacturing plants located in Tennessee. The amounts so transported have ranged from 1 to 11 million pounds per month. The cooperative stated that for the 12 months ending with August 1971 it netted an average of 37.6 cents per hundredweight less than the Georgia order Class II price on such shipments because of the cost of hauling the milk.

Extra transportation costs are incurred also by the cooperative with respect to its disposition of reserve milk supplies in the New Orleans market. In the Nashville market, on the other hand, the same cooperative realized an average of 9.7 cents over the Nashville Class II price for the milk it moved to nonpool plants for manufacturing use during the 12 months ending with August 1971. For the Chattanooga market, the cooperative realized slightly less than the Class II price for milk moved to nonpool plants.

Another condition which the cooperative contended has influenced the returns it is able to realize on reserve milk supplies is that the quantity of such milk to be processed varies both seasonally and on certain days of the week. During the month of September, the reserve milk supply handled by the cooperative is at its lowest level. In September 1970, for example, the cooperative processed less than 500,000 pounds of milk at each of its major butter-nonfat dry milk processing plants (Lewisburg, Tenn., and Franklinton, La.). The following April, it processed 23.9 and 5.8 million pounds of milk, respectively, at such plants.

Reserve milk supplies increase on Sundays compared to other days because bottling plants in the markets served by the cooperative usually process milk only five or, at the most, 6 days a week. The needs of bottling plants are highest on Thursdays since sales of packaged milk tend to be higher on Thursday and Friday than on other days of the week.

Because of these circumstances, this cooperative proposed that the Class III prices adopted for the southeastern markets of Georgia, New Orleans, and Chattanooga, be fixed from 5 to 15 cents under the Minnesota-Wisconsin price. This was proposed to enable the cooperative to absorb the costs of transporting reserve milk supplies to manufacturing plants and of maintaining unused capacity in its manufacturing plants during the seasonally short production months and on peak bottling days.

The principal cooperative in the southwestern markets proposed that the current provisions for pricing market surplus be maintained in the several orders throughout that region since such provisions tend to recognize individual market problems of surplus disposal. The problems mentioned by the witnesses for the cooperative are (1) uneven surplus milk volumes to be disposed of, and (2) costs of transporting milk to plants for manufacturing use. They stated that each market differs as to the volume of day-to-day, weekend, holiday, and seasonal surplus to be processed, which tends to result in variations in supply balancing costs among markets. Also, the surplus in each market is situated at varying distances from available processing plants. In Texas, for example, most of the manufacturing use outlets are situated in the northern part of the State at Muenster, Sulphur Springs, and Rusk. While the cooperative operates a small cheddar cheese plant at San Antonio, Tex., at times the San Antonio surplus cannot be processed there and is transported over 300 miles to Muenster or Sulphur Springs. During the Christmas holiday weekend in 1970, the cooperative moved 75 tank truck loads of surplus milk out of Texas to plants as far north as Iowa for manufacturing.

In support of their proposed butter-nonfat dry milk-cheese product price formula for markets in the Upper Midwest, proponent cooperatives pointed out that about half of the manufacturing grade milk in Minnesota and Wisconsin is now handled by as few as three cooperative associations. They contended that, because of this, cooperatives are in a position to influence the level of prices paid for such milk and, in turn, influence the level of the order prices based on the Minnesota-Wisconsin price. Any upward swing in prices, they indicated, could be detrimental to the processors of butter and nonfat dry milk.

Proponents also stated that there have been periods of time when the open market cheese prices have increased relative to prices of butter and nonfat dry milk. When this has resulted in higher pay prices at cheese plants, butter-powder plants also have tended to pay higher prices to hold their milk supplies in competition with cheese plants. Proponents argued that such higher pay prices at butter-powder plants should not be reflected in Federal order surplus prices when the market values of butter and powder are not increased also. They contended that the order price should reflect changes in the market value of manufactured products to provide handlers a fixed processing margin on the butter and nonfat dry milk they process.

V 38 I 177 SEP 13 73 XUM

The national trade associations of fluid milk and ice cream processors did not take a position at the hearing on whether there should be two or three classes of utilization. It is their position that under a three-class system the only products that should be included in Class II are yogurt, eggnog, cottage cheese, cream and any mixtures of cream and milk or skim milk containing 9 percent or more butterfat. While the associations did not endorse a three-class system, they proposed that under such a plan the difference between the Class II and Class III prices be not more than 10 cents.

Certain individual handlers, particularly those operating plants in more than one market, testified that because of intermarket competition each order should provide for the same classification and pricing scheme. One such handler testified further that the Class III price should be the lower of the Minnesota-Wisconsin price or a butter-powder formula price (Chicago butter price times 4.2, plus nonfat dry milk price times 8.2, less 48 cents). Another urged adoption of the dairy price support level as the Class III price. A third handler proposed the use of the announced price support, adjusted to a 3.5 percent butterfat basis by a differential factor of the Chicago butter price multiplied by 0.12, and further adjusted by plus 15 cents during the period September through March.

Proponents of using the dairy price support level as the Class III price urged that such price be adopted to provide a more stable price by avoiding the month to month changes that tend to occur in the Minnesota-Wisconsin price. Proponents pointed out that basing the Class III price on the price support level, which is announced for each marketing year (April–March), would result in handlers knowing the minimum price before the milk is received. The Minnesota-Wisconsin price is announced about 5 days after the end of each month.

*Class III.* As stated at the outset, two classes of utilization should be provided under each order for milk not needed for Class I use. Before discussing the basis for establishing an intermediate price class, consideration should be given to the Class III price issue since the level of such price bears on what the Class II price should be.

Basically, there are two questions to be resolved concerning the Class III price issue: (1) Should the Class III price be uniform among the 32 markets, and (2) what is the appropriate pricing mechanism for determining the Class III price in each market?

The purpose of the classification proposals considered at this hearing strongly suggests the same Class III price under each order. The essence of the proposals by producers and handlers alike was that a particular product should be classified in each market in the same class. Although the various witnesses were not in agreement on the classification scheme that should be adopted, the common purpose of their proposals was the resolution of the many differences among the 32 orders in the classification of milk. It was the general consensus that with the burgeoning intermarket sales of various milk products over increasingly wider areas, these differences in classification are causing undue competitive inequities among handlers in various markets seeking the same outlets for milk.

Any attempt to resolve these competitive inequities through the adoption of a uniform classification plan cannot be divorced from consideration of the prices that would be applicable to each class. The classification of milk does nothing more than determine what uses of milk will be subject to different levels of price. The equity benefits to handlers of using the same classification plan in all markets can be fully realized only if the price for each class is uniform (except for appropriate location adjustments) in all markets. The use of several different Class III price formulas in these markets, as would result under the proposals of the various cooperatives, would nullify much of the intended effectiveness of classifying a particular product in the same class in each market.

Certain cooperatives urged that the Class III price of a market reflect the supply "balancing" costs of individual cooperatives. This could lead only to a proliferation of different Class III prices rather than a reduction of price differences in these markets. In balancing milk supplies for the fluid market, a cooperative incurs various costs. The extent of these costs is dependent on many factors, including the cooperative's share of the market, the location and availability of surplus disposal outlets, whether it operates a manufacturing plant, and policies and practices of the organization and its management. If such costs were to be a main consideration in establishing the Class III price for an individual market, such price would need to vary greatly among markets since the supply balancing situation differs from market to market.

The costs of supply balancing services performed by a cooperative should be reflected as a service charge to the handlers who receive the benefit of the service. A cooperative's cost of supply balancing service varies among handlers according to each handler's procurement practices. A handler that regularly accepts the full production of a given number of producer-members of the cooperative incurs the costs of balancing his own supply. On the other hand, a handler that limits his purchases of milk from a cooperative to 5 days a week, for example, to match his daily bottling schedule shifts the burden of balancing his milk supply to the cooperative. Most supply balancing costs are attributable to the variation between the quantity of milk produced and the demand for milk for Class I use. Since the balancing costs are incurred in serving the Class I market, the incidence of the costs should fall on such use of milk. This connection between these services and the Class I demand is recognized in many of these markets through the assessment by cooperatives of a service charge on their milk delivered to handlers for Class I use.

On the basis of the above findings, it was concluded in the August 28, 1972, recommended decision that the same Class III price should prevail under each order to resolve to the fullest extent the many classification and pricing differences among these orders. Although this concept remains valid, we are persuaded by producer exceptions to the August 28 decision that complete uniformity in the pricing of Class III milk may not be attainable at this time if orderly marketing is to be preserved. For reasons described later, an alternate Class III price formula also should apply under 14 of the 32 orders rather than the one formula initially recommended. It must be emphasized, however, that the use of an alternate Class III price formula in these markets will negate in some degree the uniformity intended to be gained through classifying a particular product in the same class in each market. The adopted classification and pricing scheme will be helpful, nevertheless, in overcoming the marketing problems being experienced by handlers because of the differences in the classification and pricing plans now in use in these 32 markets.

In considering the appropriate mechanism for determining the Class III price in each market, it is consistent with the purposes of the statute authorizing milk orders that reserve milk supplies be priced at the highest practicable level compatible with orderly disposal of the milk. Excess market supplies normally must be channeled into manufactured products that compete on a national basis with similar products made from ungraded milk. It is important, therefore, that the price for surplus milk in the regulated markets be in close alignment with prices being paid by processors of manufacturing grade milk.

The Minnesota-Wisconsin price, which is now the surplus price under 17 of the 32 orders, is a representative pay price for about half of the manufacturing grade milk in the United States. This price reflects a farm price level determined by competitive conditions that are affected by the demand for all major manufactured dairy products. It also reflects the supply and demand of such products within a highly coordinated marketing system, which is national in scope. Use of the Minnesota-Wisconsin price as the Class III price, or principal Class III price determinant, will result in order prices for surplus milk that are in close alignment with the dominant price structure for raw milk within the manufacturing milk segment of the dairy industry.

Use of the Minnesota-Wisconsin price also tends to result in price parity between regulated and unregulated plants engaged in a similar enterprise since it provides the regulated manufacturer essentially the same margin for processing as is experienced in the unregulated market. The Minnesota-Wisconsin price is an average of prices being paid by processors who are meeting the competitive test of the unregulated market place. Competing processors of ungraded milk purchase their supplies from farmers at prices commensurate with the ability of the

more efficient processors to pay for raw milk. As shifts in the relationship between finished product prices take place, one group of processors may be able to pay dairymen higher prices than another. Other processors generally must meet these prices or risk the loss of their milk supplies. If a dairy concern in the unregulated manufactured products market fails to make the necessary adjustments to meet procurement competition, it will, in time, be forced out of business. This is a normal business risk in the unregulated competitive market.

If the Class III price were based solely on market prices of certain manufactured products (e.g., butter and nonfat dry milk) minus a specified processing allowance, as proposed by certain cooperatives, handlers under each order would be assured at all times, regardless of current values of milk competitively procured for the several manufactured product uses in Class III, of a predetermined operating margin. Such pool handlers are protected in procurement competition by being able, through the pool equalization fund, to pay the blended price to producers. This is an advantage not available to manufacturers purchasing unregulated milk. The unregulated processors must pay whatever price to dairy farmers is required to maintain milk supplies, which is determined from competition with other processors. Unless regulated handlers are to have a competitive advantage, or disadvantage, in the manufactured milk product market relative to unregulated plant operators, it is necessary to maintain under the milk orders a close alignment of the Class III prices with the farm prices paid by unregulated plants in the manufacturing milk industry.

In the August 28, 1972, recommended decision, the Minnesota-Wisconsin price was adopted as the Class III price under each order. This would have provided a continuation of the surplus price now applicable in 17 markets and a change in pricing for the remaining 15 markets where a number of different price formulas are now in use.

Upon further consideration of this issue in light of producer exceptions and the record evidence, it is concluded that in 14 of the 15 markets where the surplus price would have been changed the Class III price should be the Minnesota-Wisconsin price but not to exceed a butter-nonfat dry milk formula price. The markets where this pricing mechanism should apply are New Orleans, Northern Louisiana, Wichita, Central Arizona, Rio Grande Valley, Oklahoma Metropolitan, Red River Valley, North Texas, Central West Texas, Texas Panhandle, Lubbock-Plainview, Austin-Waco, San Antonio and Corpus Christi. The Class III price for the other market, Duluth-Superior, should be the Minnesota-Wisconsin price as initially recommended.

The surplus class price in all but two of these 14 markets is now based either entirely or in part on prices derived from some type of butter-nonfat dry milk formula. In the Oklahoma Metropolitan and Red River Valley markets, the surplus price is the U.S. Manufacturing price, but with a 10-cent reduction during six months of the year for milk used in butter, nonfat dry milk or hard cheese. For most of these markets, cooperatives argued in their exceptions to the August 28 decision that the present price formulas should remain in effect in the respective markets. It was contended that these formulas represent an historical recognition of particular surplus disposal conditions in these markets and that such recognition should not be abandoned at this time.

If a uniform classification and pricing scheme is to be implemented to any substantial degree, it is not possible to continue the variety of pricing formulas now applicable in these several markets as cooperatives urge. We recognize, however, that surplus prices in most of these markets historically have been tied directly to the market values of butter and nonfat dry milk. Therefore, it is reasonable to provide that the Class III prices in these 14 markets be limited to a butter-nonfat dry milk formula price should the milk equivalent value of these products become unduly low relative to the average price being paid in Minnesota and Wisconsin for manufacturing grade milk.

The same butter-nonfat dry milk price formula should be used in each of the 14 markets in conjunction with the Minnesota-Wisconsin price. This is consistent with the development of a uniform classification scheme for these markets. The formula adopted herein would be derived from converting the market prices of butter and nonfat dry milk to their milk equivalent values and subtracting a processing allowance. Specifically, such price would be computed by multiplying the average monthly price of 92-score bulk butter at Chicago by 4.2, then multiplying the average monthly price of spray process nonfat dry milk in the Chicago area by 8.2, and then subtracting 48 cents from the sum of the above results. This formula price, when used in conjunction with the Minnesota-Wisconsin price, is commonly referred to in the trade as the "butter-powder snubber."

The adopted formula is the same, or virtually the same, as all other butter-nonfat dry milk formulas now in use under orders applicable outside the 32-market area. In all cases, such formulas are being used in conjunction with the Minnesota-Wisconsin price in the same manner as proposed herein.

As indicated, the Class III price under the Duluth-Superior order should be the Minnesota-Wisconsin price even though the surplus price in this market is now based on a butter-nonfat dry milk formula. The present surplus price historically has averaged somewhat under the Minnesota-Wisconsin price. Conditions in this market do not support a continuation of this lower price level for surplus milk being processed into products such as butter, nonfat dry milk and hard cheese, residual products that would be included in Class III under the revised Duluth-Superior order.

The Duluth-Superior order regulates the handling of milk in certain areas of Minnesota and Wisconsin. Because of their location, regulated handlers in this market are operating within the competitive sphere of the largest concentration of processors of butter, nonfat dry milk and cheese in the United States. As noted earlier, about half of the manufacturing grade milk in the country is produced in this two-State area. It is the prices being paid in this area for such milk that are used in determining the "Minnesota-Wisconsin price." Use of this price for pricing Class III milk in the Duluth-Superior market will result in producer milk used in the residual products being priced at a level commensurate with unregulated milk that is being processed in the same general area into like products. A lower return to the graded producers on the Duluth-Superior market for surplus milk priced under the order is not warranted under the competitive conditions existing in this area.

It should be noted that in all other regulated markets in this two-State area producer milk processed into the residual products is priced at the Minnesota-Wisconsin price. Such markets include Minneapolis-St. Paul, Minnesota-North Dakota, and Chicago Regional, all of which are near the Duluth-Superior market. There is no indication that regulated handlers in the Duluth-Superior market are faced with conditions uniquely different from those faced by handlers in these other markets in disposing of surplus milk.

The surplus pricing adopted for the 32 markets will result in a significantly greater coordination of surplus prices under all Federal milk orders than is now the case. With the exception of one relatively small market (Appalachian), prices under all orders for milk used in the key residual products (butter, nonfat dry milk and cheese) would be based on the Minnesota-Wisconsin price, either alone or in conjunction with the butter-powder snubber adopted herein. As noted earlier, such products are marketed within a highly coordinated marketing system that is national in scope.

*Class II.* Certain uses of producer milk not needed for Class I purposes should be priced at a somewhat higher level than that applicable to milk in the adopted Class III uses. These higher-valued uses, to be included in the Class II classification, were set forth at the beginning of this discussion on pricing surplus milk. The Class II price, which should be the same under each order, should be the Minnesota-Wisconsin price plus 10 cents.

Of the products adopted herein for inclusion in Class II, one of principal importance is cottage cheese. In 1970 about 840 million pounds of the skim milk and butterfat utilized by pool handlers under the 32 orders was used to produce cottage cheese. For this discussion the term "cottage cheese" encompasses cottage cheese (i.e., creamed cottage cheese), lowfat cottage cheese, and dry curd cottage cheese.

Five of the 32 orders under consideration now provide a higher price for milk used in cottage cheese than the price provided for milk used in butter, nonfat

V 38 I 177 SEP 13 73 XUM

dry milk or cheddar cheese. There are several distinguishing characteristics of cottage cheese production that support a higher price for milk in this use than for milk channeled into the residual surplus uses. There is little, if any, relationship between the quantity of cottage cheese made and the amount of reserve milk in a market, as is the case with respect to butter and nonfat dry milk, for instance. Unlike such other manufactured products, cottage cheese has a more limited storage life and must be processed on a regular basis. Thus, as in the case of fluid milk products, handlers normally want adequate supplies of fresh, high-quality producer milk to be made available at their plants at all times for cottage cheese use.

Although some cottage cheese is made in specialized country plants, as the economics of location would suggest, cottage cheese production is commonly an integral part of the processing operations of fluid milk distributing plants. Such plants are usually located in or near the populated centers of the market. This entails a greater hauling expense for producers than when the reserve milk is processed in the production area, as is generally the case with respect to butter, nonfat dry milk and hard cheese manufacture.

The adopted Class II price (the Minnesota-Wisconsin price plus 10 cents) is a reflection of some of the additional value which producer milk used in cottage cheese has to regulated handlers. Although local producers represent the regular source of milk for cottage cheese production, a handler may choose to use milk from some other source for this purpose. Such milk could not be obtained on a regular basis, however, at less than the cost of producer milk under the adopted pricing scheme.

Rather than produce his own cottage cheese, a handler might choose to purchase the finished product from some other Federal order market where a lower price applies to milk for cottage cheese. There is no indication, however, that under the adopted pricing such a handler could materially enhance his competitive position relative to handlers using producer milk. The cost of transporting cottage cheese, a somewhat bulky and perishable item, from distant areas to outlets in the 32 markets would generally negate any seeming price advantage attributable to differences in applicable order prices.

In the New Orleans market, certain handlers process a type of cheese described locally as "Creole cheese". This product, which apparently is limited to this market, was described at the hearing as being similar to cottage cheese. Accordingly, Creole cheese should be included in the same class as cottage cheese under the New Orleans order.

Milk used in yogurt should be priced at the Class II price level. Yogurt is a soft, nonfluid, "spoonable" product. It is not a beverage as are other products defined herein as fluid milk products.

Yogurt has some of the marketing characteristics of cottage cheese, although, unlike cottage cheese, very limited quantities of yogurt are made from milk priced under the 32 orders. In 1970, about 13 million pounds of skim milk and butterfat were utilized in yogurt production in the 32 markets. To the extent of this limited production, however, processors generally use regular supplies of inspected milk. Although yogurt can be made from cream and nonfat dry milk, processors prefer milk. Since yogurt has a relatively limited shelf life, it is made on a continuing basis, thus requiring a regular supply of milk at all times. As in the case of cottage cheese, these conditions warrant that producer milk in yogurt be priced at a level above the price for milk disposed of through the traditional residual uses for surplus milk.

Class II also should include frozen desserts (including commercial milkshake and ice milk mixes), custards, puddings, pancake mixes, dietary and infant formulas, and sales of bulk milk and cream to commercial food processors for use in food products. In the August 28 recommended decision, such uses of skim milk and butterfat were proposed to be included in Class III. Upon consideration of exceptions filed to that decision by cooperatives, it is concluded that market conditions support a higher price for producer milk in such uses than was initially recommended.

As producers pointed out in their exceptions, the rationale set forth in the August 28 decision for including cottage cheese in an intermediate class is in several respects applicable to these other products just listed. The demand for producer milk used in these products is related closely to the current consumer demand for such products. Thus, handlers normally want adequate supplies of producer milk made available at their plants in the quantities and at the times needed for these uses. This is in contrast to the more storable residual "hard" products. Also, the processing of such products often takes place at the market center, which entails a greater hauling expense for producers than when reserve milk is processed in the production area. Moreover, it is doubtful that handlers in general would be able to obtain alternative supplies of milk or product ingredients at less than the cost of producer milk under the adopted pricing provisions.

Cooperatives proposed that the Class II price in most of these markets range from 10 to 20 cents over the Minnesota-Wisconsin price. The lower 10-cent differential (to apply to both cottage cheese and frozen desserts) was proposed for those markets where local ungraded milk supplies represent a significant competitive factor for regulated processors of ice cream and other frozen desserts. The national associations of fluid milk and ice cream processors contended that any price differential over the Class III price for milk in an intermediate class should not be more than 10 cents per hundredweight. In supporting this position, individual handlers stressed that any greater price differential would seriously jeopardize the competitive position of regulated handlers using producer milk relative to unregulated processors relying largely on ungraded milk.

With respect to the several milk uses at issue in the cooperatives' exceptions, the preponderance of evidence at the hearing focused largely on the marketing of frozen desserts. The marketing conditions for frozen desserts are somewhat varied throughout the 32-market area. Some regulated handlers rely regularly on producer milk for use in frozen desserts. In some of the southern markets where milk supplies tend to be shorter than elsewhere, handlers use producer milk when it is available but often must supplement such milk with purchases of condensed skim milk and nonfat dry milk. Some handlers, wherever located, rely on these concentrated forms of milk entirely in processing frozen desserts. Also, the concentrated products used may be made from either graded or ungraded milk. In addition, much of the processing of frozen desserts is done at unregulated plants. Some unregulated processors rely on ungraded milk, while others use milk surplus to the needs of regulated fluid markets. Other unregulated processors use concentrated forms of milk from either graded or ungraded sources.

The marketing situation in the 32-market area for the several other milk uses in question (custards, puddings, pancake mixes, dietary and infant formulas, and sales to commercial food processors) is essentially the same as for frozen desserts.

Under these varying conditions, the Class II price should be set at 10 cents over the Minnesota-Wisconsin price. Pricing Class II milk at this level should permit regulated handlers using producer milk to remain competitive in the marketplace with the unregulated sector in the sale of Class II products. At the same time, such price will reflect the minimum additional value of such high quality producer milk supplied to regulated handlers over the widespread area covered by the 32 markets at the times and places, and in the quantities, needed for the several Class II uses.

It is recognized that under the varied conditions just described an individual handler may find that producer milk does not represent the cheapest source of milk for his Class II uses. Presumably, the alternative source would be concentrated forms of milk since health regulations would not permit the receipt of ungraded supplies of whole milk at a pool distributing plant, and graded supplies would not be available on a regular basis at less than the Class II price. Under the revised allocation provisions adopted herein, receipts of nonfluid other source milk such as condensed skim milk or nonfat dry milk that are used in a Class II product would be allocated directly to the handler's Class II uses, with no obligation applying under the order to such milk. Under this arrangement, the handler could choose to use the other source milk without the cost impact of down-allocation should the cost of such milk become less than the cost of producer milk. The handler thus could rely upon whichever source of milk best fits his competitive and operational circumstances.

Classifying the several types of cream items, some of which are now in Class I while others are in Class II or Class III, in Class II will accommodate proponents' desire for a lower price for milk used in cream products and at the same time price at the same level a variety of products that compete with each other. Half and half, whether sterilized or unsterilized, and light cream are used principally by consumers in coffee. Aerated cream and sterilized and unsterilized whipping cream are used as dessert toppings. Both graded and ungraded sour cream and sour mixtures are used by consumers for similiar purposes. Like classification for these cream products will result in uniform pricing to handlers for milk used in products competing in the same trade channels for essentially similar uses.

Although the present Class I cream products sold in these markets must be made from inspected milk, which is delivered regularly by producers to distributing plants, there was general agreement by producers and handlers that milk sold in the form of such products should no longer be subject to the Class I price. Relative to the total Class I sales of producer milk in these markets, cream products represent only 1.5 percent of the present Class I market. Thus, this classification change will have relatively little effect in total on the returns to producers.

In connection with the reclassification of cream products, it is desirable to define a new term—"fluid cream product." "Fluid cream product" would mean cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

With the reclassification of cream, movements of cream to or from a plant no longer should be considered in determining whether a plant meets the pooling requirements of the order.

Class II milk should include eggnog. Although eggnog is prepared for use as a beverage and is now a Class I use in 9 of the 32 markets, proponent cooperatives contended it should not be a Class I product because of competition from imitation products. Eggnog has a relatively high butterfat content and the limited sales of the product are highly seasonal. In 1970, only about 12 million pounds of eggnog, with an average butterfat content of 7 percent, were disposed of by pool handlers under the 32 orders. An estimated 40 percent of the marketings of this type of product is in the form of imitation eggnog. Classification of eggnog in Class II rather than Class I will materially enhance the competitive position of the product in the marketplace.

Most of the orders now provide that any "filled" product containing 6 percent or more nonmilk fat (or oil) shall be in the surplus price class. With the establishment of an intermediate price class under each of the 32 orders, it is appropriate that any such filled products that resemble the proposed Class II products made with milk fat likewise be included in this class. The substitution of nonmilk fat for milk fat in a product merely changes the composition of the product and not its use. For competitive reasons, a comparable classification of products made with milk fat and their filled counterparts is necessary.

Condensed milk or skim milk in bulk, plastic cream, frozen cream and anhydrous milk fat are "intermediate" products that also should be included in Class II. These products are not end uses in themselves but instead are used in making other products, including frozen desserts and food products such as candy and soup. Under the classification adopted herein, frozen desserts and food products are Class II uses for milk. Accordingly, producer milk used in the several intermediate products likewise should be priced at the Class II level.

A Class II classification should not apply to evaporated or condensed milk or skim milk in consumer-type containers as the cooperatives proposed. Such storable products should remain in the lowest price class. A Class III classification for producer milk in these products will permit such uses to remain as a competitive outlet for milk surplus to the needs of the Class I market. Such products made from milk regulated under these orders must compete over wide areas with the same products processed from ungraded milk or other graded milk that is often priced at no more than the Minnesota-Wisconsin price. Comparable pricing should prevail under these 32 orders.

Although cooperatives proposed Class II price differentials of 10, 15, 20, and 25 cents, the Class II differential for each market should be the same. The distribution of the adopted Class II products from a single plant often extends over a broad region encompassing several Federal order marketing areas. Numerous examples were cited on the record concerning the widespread sales of yogurt, cream items, frozen desserts and cottage cheese in particular. Because of this intermarket competition, a uniform Class II price differential should be provided in these orders to complement the uniform classification provisions. A price differential of 10 cents reasonably reflects the added value which handlers are able to pay for producer milk in such uses as compared to procuring milk supplies or finished products from other sources.

In proposing a generally uniform classification plan for the 32 markets, cooperatives emphasized that any new plan adopted should not result in lower total returns to producers. Handlers, on the other hand, stressed that their total cost of milk should not be increased.

Providing for classification and pricing provisions that are generally uniform among the various markets cannot necessarily encompass at the same time the maintenance of precisely the same value of producer milk in each market. With the many classification and pricing differences that now exist among the 32 orders, resolution of these differences through a uniform classification and pricing plan would be expected to have some effect on the value of producer milk in individual markets. While the provisions adopted in this decision are not designed to change the value of producer milk in the aggregate, their effect on producer returns or handlers' costs in an individual market cannot be controlling in deciding on the matter of classification and pricing here under consideration.

4. *Miscellaneous classification and accounting changes.* The following findings and conclusions relate to certain miscellaneous classification proposals by handlers and producers and to some of the order changes that are necessary to implement the revised classification plan adopted herein for each of the 32 subject orders.

(a) *Other source milk definition.* A common other source milk definition should be adopted for each order.

Because of the revised classification plan, certain changes in the present other source milk definition of each order are necessary. This definition would continue to serve, however, the present function of implementing the identification of various categories of receipts at a regulated plant.

At present, fluid milk products from any source other than producers, cooperatives acting as a handler for farm bulk tank milk, pool plants, and plant inventory at the beginning of the month are considered as other source milk.[3] Under the revised classification plan, however, cream no longer would be defined as a fluid milk product. To facilitate the application of other provisions of each order, it is desirable, nevertheless, that fluid cream products, when in bulk form, continue to be treated in the same manner as fluid milk products for purposes of applying the other source milk definition.

Other source milk should include any receipts in packaged form of fluid cream products, eggnog or yogurt (or any filled product resembling such products). These are Class II products under the revised classification plan.

Producers and handlers proposed that Class II products received at a pool plant in packaged form and then disposed of from the plant without further processing be treated as "pass-through" products. Under this treatment such "pass-through" products would not be considered as other source milk and would not be subject to the allocation and pricing provisions of the order.

[3] The terms "pool plant" and "nonpool plant" will be used occasionally throughout this decision. Most of the 32 orders define such terms for the purpose of distinguishing between those plants that are fully regulated under the order and those plants that are not so regulated. In some orders, the terms "fluid milk plant" and "nonfluid milk plant," or "approved plant" and "unapproved plant", are used for the same purpose. When reference is made in this decision to a "pool plant" or a "nonpool plant", it is intended (unless noted otherwise) that the reference apply correspondingly to the other types of plants.

V 38-177 SEP 13 73 XUM

Although no handler obligation would apply under the provisions adopted herein to these receipts of packaged Class II products, it is desirable for accounting purposes that such receipts be defined as other source milk. This accounting procedure will preclude the recordkeeping difficulties that might otherwise be experienced in accounting separately for inventories and sales of Class II products processed in the handler's plant versus those received at the plant in packaged form from other plants. As provided herein, such receipts of other source milk would be allocated directly to the handler's Class II utilization, rather than being allocated to the extent possible to the handler's lowest utilization as is provided in some cases for other types of other source milk.

The orders now provide that manufactured products from any source that are reprocessed, converted into, or combined with another product in the plant shall be considered as other source milk. For accounting purposes under the order, such manufactured products should include dry curd cottage cheese received at a pool plant to which cream is added before distribution to consumers. When used to produce cottage cheese or lowfat cottage cheese, the receipts of dry curd would be allocated under the adopted provisions directly to the handler's Class II utilization. No handler obligation would apply under the order to such receipts.

The orders should provide that products manufactured in a pool plant during the month and then reprocessed, converted into, or combined with another product in the same plant during the same month not be defined as other source milk. A typical processing operation would be for a handler to make condensed skim milk from producer milk and then use the condensed product in making ice cream. It is intended under this situation that the producer milk be considered as having been used to produce ice cream. The condensing operation is merely one of the steps performed by the handler in processing ice cream from raw milk.

Other source milk should include any disappearance of manufactured milk products for which the handler fails to establish a disposition. Fourteen of the 32 orders now have a provision concerning the unaccounted for disappearance of such products. The other 18 orders do not specify such disappearance as other source milk.

It is reasonable that each handler be required to account fully for all milk and milk products received or processed at his plant. Otherwise, a handler with inadequate records may have an opportunity to gain a competitive advantage over his competitors who properly account for all milk. Specifying any unexplained disappearance of manufactured milk products as other source milk will contribute to a uniform application of the regulatory plan to all handlers.

(b) *Accounting for nonfat milk solids added to milk and milk products.* Except for two orders, no change should be made in the present method of classifying the skim milk equivalent of nonfat milk solids added to a fluid milk product.

Currently, all but two of the orders under consideration provide that a modified fluid milk product shall be classified as Class I in the amount of the weight of an equal volume of an unmodified product of the same nature and butterfat content. The remaining skim milk equivalent of the nonfat milk solids in such product is classified in the lowest class.

The Neosho Valley and Fort Smith orders presently do not set forth a specific procedure for accounting for nonfat milk solids added to milk and milk products. As proposed by producers, such orders should be made uniform in this respect with the other orders under consideration.

Cooperatives proposed that the amount of a modified fluid milk product that is classified as Class I milk be the actual weight of the modified product rather than the weight of a like unmodified product. Proponents stated that the use of the weight of the modified product would accommodate some of the technical problems of laboratory analysis when this procedure is used in verifying the amount of nonfat milk solids added to natural milk or skim milk. They indicated that since the results of laboratory tests are expressed as a percentage of the weight of the product being tested, using the actual product weight factor would simplify the accurate accountability of modified products.

There was no showing of the extent to which laboratory analysis of modified products is used in verification by market administrators in these markets. Also, there is no indication that modified products are not being accounted for in an accurate manner. Thus, it is not clear from this record that the proposed procedure is necessary for more accurate product accounting or that it would result in any net saving in administrative cost.

Proponents did not attempt to demonstrate any economic basis for making the slightly greater charge for nonfat milk solids used to modify fluid milk products that would result from their proposal. Their proposed procedure would increase slightly the quantity of a modified product priced in Class I. A gallon of modified skim milk containing 11 percent nonfat milk solids, for example, would be classified in Class I on an 8.7 pounds weight factor as compared to the present basis of an 8.63 pounds weight factor.

The present method of classifying modified fluid milk products increases total Class I sales only to the extent of the volume of the unmodified product that the added nonfat milk solids replaces. In the absence of evidence that the present procedure is inappropriate it should be continued. The present procedure is used under Federal orders generally and, therefore, carries out the objective of uniformity in this respect.

Handlers may add nonfat milk solids to several of the proposed Class II products, such as half and half and light cream. Each order should provide in this case that the entire weight of the skim milk equivalent of the solids added by classified in Class II. This procedure would differ from that applicable to modified fluid milk products in that no part of the skim milk equivalent of the added solids would be classified in the lowest class. As described in detail later, nonfat dry milk or condensed milk that is added to a Class II product would be allocated directly to the handler's Class II use. Thus, classification of the entire skim milk equivalent in Class II would not affect adversely the handler's pool obligation under this allocation procedure.

(c) *Classification of milk transferred or diverted to other plants.* Certain changes should be made in the provisions of each order that prescribe the classification of fluid milk products that are transferred or diverted from a pool plant to another plant. Several of the changes become necessary with the adoption of three classes of utilization in place of the present two classes. Other changes are appropriate for purposes of uniformity among orders and clarity in the classification of milk.

Under the adopted classification plan, fluid cream products would be classified as Class II products. If such products are transferred to another plant in packaged form, the skim milk and butterfat contained therein should be classified as Class II milk since these items are moved in final form. The classification of fluid cream products when disposed of in bulk form, however, is determinable only by following the movement of the bulk product to its subsequent use. Thus, it is necessary that fluid cream products that are transferred in bulk form from a pool plant to another plant be classified in a manner similar to that now used in classifying transfers of bulk fluid milk products.

Each order now prescribes a procedure for classifying transfers of bulk fluid milk products from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant. To determine such classification, the nonpool plant's utilization must be assigned to its receipts of milk from each source. Some amplification of this procedure is appropriate to set forth clearly the priority for assigning the different types of plant use to the different sources of fluid milk products and bulk fluid cream products received at the nonpool plant.

Under the adopted assignment priorities, the first step is to assign the nonpool plant's Class I utilization to its receipts of packaged fluid milk products from all federally regulated plants. Such receipts should receive first priority on the nonpool plant's Class I use since all orders provide that such packaged transfers from a pool plant to an unregulated nonpool plant shall be classified as Class I milk. Thus, any Class I route disposition of the nonpool plant in the marketing area of a Federal order, and any transfers of packaged fluid milk products from the nonpool plant to plants fully regulated under such order, would be assigned, first, to the nonpool plant's receipts of packaged fluid milk products

from plants fully regulated under such order and, second, to any such remaining packaged receipts from plants fully regulated under other Federal orders.

A similar assignment of any such remaining disposition (i.e., the aforesaid Class I route disposition and transfers of packaged fluid milk products) then would be made to the nonpool plant's receipts of bulk fluid milk products from pool plants and other order plants. Any other Class I disposition of packaged fluid milk products from the nonpool plant, such as route disposition in unregulated areas, would be assigned to any remaining unassigned receipts of packaged fluid milk products at the nonpool plant from plants fully regulated under any Federal order.

After these assignments, any Class I use at the nonpool plant that is attributable to the Class I allocation at a Federal order plant of fluid milk products transferred in bulk from the nonpool plant to the regulated plant would be assigned next. Such use would be assigned, first, to the nonpool plant's remaining unassigned receipts of fluid milk products from plants fully regulated under that order and, second, to any such remaining receipts from plants fully regulated under other orders.

Additional unassigned Class I utilization at the nonpool plant then would be assigned to the plant's receipts of Grade A milk from dairy farmers and unregulated nonpool plants that are determined to be regular sources of Grade A milk for the nonpool plant. Any remaining unassigned receipts of fluid milk products at the nonpool plant from plants fully regulated under any order would be assigned to any of the nonpool plant's remaining Class I utilization, then to its Class III utilization, and then to its Class II utilization.

Following these assignments, any receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants would be assigned to the nonpool plant's remaining unassigned utilization in each class. Such assignment would be made in sequence beginning with the lowest class.

In determining the classification of any transfers or diversions from a pool plant to a nonpool plant, the utilization of any transfers from the nonpool plant to another unregulated nonpool plant also must be established. In this case, the same assignment priorities just outlined should apply also at the second nonpool plant.

Certain changes should be made in each order concerning the classification of products transferred from a pool plant to a producer-handler. Under the revised classification plan, bulk fluid cream products transferred from a pool plant to a producer-handler should be assigned to the extent possible to the latter's Class III use, and then Class II use. If the producer-handler does not have enough utilization in these classes to cover such transfers, any remaining transfers should be classified as Class I milk.

As in the case of all other fluid milk products, such transfers of cream are now classified as Class I milk. Such classification tends to assure that producers do not carry for producer-handlers the burden of maintaining reserve supplies for the Class I sales of producer-handlers. With the removal of cream from the Class I classification, as adopted herein, a mandatory Class I classification of cream transfers to producer-handlers would not be necessary for this purpose.

Each order should provide that fluid milk products transferred from a pool plant to a producer-handler under another order be classified as Class I milk. With one exception, this classification now applies under these orders with respect to such transfers made on an intramarket basis. The San Antonio order has no provisions for classifying such transfers since it does not contain a producer-handler definition.

The producer-handlers, in their capacity as handlers, have been exempt from the pricing and pooling provisions of the various orders. In consideration of this exemption, each order, except as noted, requires a Class I classification of all fluid milk products that are transferred from a pool plant to a producer-handler as defined under that particular order. Inasmuch as the producer-handler exemption under each order is predicated on essentially the same basis, a Class I classification of milk transferred from a pool plant regulated under one order to a producer-handler as defined under another order would be in keeping with the general basis for producer-handler exemption.

In addition to the Class I classification of all fluid milk products transferred from a pool plant to a producer-handler, several orders provide for a similar classification of all fluid milk products transferred to a Government-operated plant. Such plants are exempt from the pooling and pricing provisions of the order in much the same manner as producer-handlers. It is appropriate, therefore, that the adopted method for classifying bulk fluid cream products transferred to a producer-handler likewise apply to transfers of bulk fluid cream products to Government-operated plants.

The orders should be uniform with respect to the conditions under which the classification provisions apply to bulk milk movements from one regulated market to another. Although each order now has the same rules for classifying such movements of milk, their application is limited under some orders to only those movements in the form of interplant transfers. This is because such orders do not permit milk to be moved between markets by diversion.

Since the advent of farm bulk tanks, the diversion of producer milk from pool plants to manufacturing plants has been a common method of handling milk not needed for the fluid market. Under some orders, such diversions are permitted to be made only to unregulated nonpool plants. For a number of markets where available manufacturing facilities are associated with another regulated market, the orders permit producer milk to be diverted to other order plants. Corollary provisions in the order regulating the manufacturing plant specify that such milk, although having been delivered directly from the farm, shall not be considered as producer milk in the market to which diverted if the milk comes into the market for manufacturing use.

In connection with developing uniform classification provisions for the 32 orders, provision should be made under each order for the diversion of milk to other order plants for Class II or Class III use. This will contribute to a more uniform application of the classification provisions to all regulated handlers. At the same time, such provisions will foster the efficient handling of surplus milk in these markets by permitting the disposal of such milk directly from farms to manufacturing plants in other markets, rather than having such intermarket movements limited to the more expensive method of transferring milk from one plant to another. With the safeguards adopted herein, returns to producers in the market to which the milk is diverted will not be affected by the processing of this surplus milk in their market since the diverted milk will continue to be pooled in the market from which diverted.

The classification of fluid milk products transferred or diverted from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant should not be contingent upon any distance limitation. Presently, 20 of the 32 orders under consideration provide for the Class I classification of milk moved beyond a specified distance, regardless of its ultimate use at the nonpool plant. In the case of milk transferred to less distant plants, recognition is given under the classification provisions of the 20 orders to the nonpool plant's actual utilization.

Cooperatives proposed the removal of all mileage limitations affecting the classification of transfers and diversions. They claimed that these provisions are not appropriate under today's marketing conditions and that their removal would facilitate the orderly disposition of reserve milk supplies.

The conditions prompting the initial adoption of these mileage limitations no longer prevail, thereby making their continued use inappropriate. The use of mileage limitations evolved in large part from the relatively high transportation cost of milk relative to its value for manufacturing and from the administrative cost of verifying the utilization of milk transferred to plants distant from the local market. Under today's conditions of distribution, milk regularly moves greater distances as a routine matter. Moreover, Federal orders now operate throughout much of the United States. Arrangements for verifying the utilization at distant plants can be made easily through the facilities of the various market administrators' offices.

Also, the mileage limitations often are no longer consistent with the existing supply patterns. Milk is often moved considerable distances from producers' farms to distributing plants. When such milk is not needed for fluid use, it is usually diverted to manufacturing plants

V 38 177 SEP 13 73 XUM

located close to the production area. Classifying such milk in Class I because of applicable mileage limitations is not consistent with the obvious manufacturing use of the milk. Removal of such provisions will promote uniformity in classification among the 32 markets.

(d) *Classification of end-of-month inventory.* Each of the orders should be made uniform with respect to the classification of inventory on hand at the end of the month. Fluid milk products in either packaged or bulk form that are in a handler's end-of-month inventory should be classified as Class III milk. Such inventory should be subject in the following month to reclassification in a higher class. Ending inventory of fluid cream products, eggnog and yogurt, when held in bulk form, likewise should be classified in Class III and subject to reclassification. Such products held in packaged form at the end of the month should be classified as Class II milk.

Presently, 22 of the 32 orders classify all ending inventories of fluid milk products (which now include most cream products) in the lowest class. Under the remaining orders, such inventories in bulk form are classified in the lowest class, while a Class I classification applies to such inventories in packaged form. In the latter case, a handler's obligation for the Class I inventory is adjusted in the following month by whatever amount the Class I price in such month changes from the Class I price level initially applicable to the inventory. This assures that such inventory is priced on a current basis when disposed of on routes.

Cooperatives proposed that each order classify all ending inventories of fluid milk products in Class III. They claimed that this procedure would be less complicated for handlers and would facilitate the administration of the order since handlers only occasionally would have any adjustment in their pool obligation as a result of having Class III inventory reclassified in a higher class. Proponents stated that with packaged inventory in Class I, as under 10 of these orders now, each handler usually has some adjustment each month in his obligation for Class I inventory. The cooperatives' proposed classification of ending inventory was supported by handlers.

In the interest of establishing uniform classification provisions among the orders, the same procedure for classifying end-of-month inventory should be adopted for each of the orders. Either type of inventory classification procedure now being used in these markets results over the long run in essentially the same pool obligation for handlers and the same returns to producers. In this circumstance, the substantial support among the industry for classifying all ending inventories of fluid milk products in the lowest class suggests that this procedure be used under all orders. Under this procedure, such inventories would be subject in the following month to reclassification in a higher class, as determined through the alocation of a handler's receipts to his utilization. A charge to the handler at the difference between the Class III price for the preceding month and the Class I or Class II price, as applicable, for the current month would apply to any reclassified inventory. This is the same reclassification procedure that now applies under the orders to inventories of fluid milk products in bulk form.

Fluid cream products in bulk form that are on hand at the end of the month likewise should be classified in Class III. As in the case of bulk milk, the final use of cream being held in bulk form is not necessarily apparent from that form. The cream must be followed to its ultimate use, which may be in any class. Accordingly, it is reasonable to classify any closing inventory of bulk cream in Class III and then apply a reclassification charge should the cream, as beginning inventory the following month, be allocated to a higher class.

Fluid cream products, yogurt and eggnog that are on hand in packaged form at the end of the month should be classified in Class II, the class of expected ultimate use, rather than in Class III as would be the case for ending inventories of such products in bulk form. The higher classification will accommodate the treatment adopted herein whereby such products that are received at a pool plant in packaged form and disposed of in the same packages would be permitted to "pass through" the plant without any pool obligation or down-allocation. In this connection, the ending Class II inventory, as Class II inventory on hand at the beginning of the following month, would be allocated in the following month directly to the handler's Class II utilization.

Cooperatives proposed that for classification purposes ending inventory include only those products that are actually on the premises of a pool plant. Under their proposal, the premises of a plant would be limited to a location having equipment for receiving, cooling, processing and storing milk. However, products being held in trucks parked at that location would not be a part of the handler's closing inventory. Also a storage facility at a distributing point for packaged products in transit to wholesale and retail outlets would not be considered under their proposal as an extension of the premises of a plant. Cooperatives proposed also that ending inventory include any bulk milk that is in transit from a pool plant to another plant at the end of the month. Proponents claimed that defining ending inventory in this manner would facilitate the administration of the order.

The present orders do not specify at what point in a handler's distribution system fluid milk products shall be or shall not be considered for classification purposes as being in a handler's closing inventory. This is a matter that has been left to the accounting guidelines established by market administrators in their administration of the orders. It is recognized that at the close of the monthly accounting period fluid milk products that have been packaged but not yet delivered to the place of sale may be at any one of several places in a handler's distribution system. Depending on the handler's method of operation, such places could include the cold storage room within his processing plant, trucks parked on or near the plant's premises, distributing points, or trucks in transit to distributing points or places of sale. No significant problems concerning the determination of what constitutes closing inventory were brought to light at the hearing. Therefore, the cooperatives' proposal in this regard need not be adopted at this time.

For the first month that the revised classification plan is effective, certain transitional provisions relating to inventory should apply. Such provisions are necessary to assure that all handlers under an order will be subject to the same pricing for milk used in packaged fluid milk products and fluid cream products whether such products enter into the month's accounting as beginning inventory or are made from current receipts of producer milk.

As indicated, 22 of the orders under consideration presently classify ending inventories of fluid milk products, including cream items, in the lowest class. Thus, in the last month that the present classification plan is effective, handlers under these orders will have paid the corresponding class price for these products. In the first month under the new plan, such inventories that had been held over in the form of a fluid milk product or a bulk fluid cream product would be allocated to the extent possible to the handler's Class III utilization. Should such inventories be allocated to a higher class, the appropriate reclassification charge would apply.

Under the new plan, beginning inventories of fluid cream products in packaged form normally would be allocated directly to a handler's Class II utilization. Such allocation assumes that the products were priced at the Class II price in the preceding month. Since this would not be the case for the first month under the new amendments, such inventories should be allocated in the first month to the extent possible to Class III, as in the case of inventories of fluid milk products and bulk fluid cream products. A reclassification charge should apply if a higher classification results.

Under the remaining 10 orders, which now classify ending inventories of packaged fluid milk products in Class I, a pool credit should apply to such inventories in the first month that the revised classification plan is effective. Under the new plan, beginning inventories of fluid milk products and, for the first month, all fluid cream products would be allocated to the extent possible to Class III. Again, this allocation assumes that such inventories were priced at the lowest class price in the preceding month. Since such inventories in packaged form will have been priced at the preceding month's Class I price, handlers under these 11 orders should receive a credit on such packaged inventories equal to the difference between the preceding month's Class I price and lowest class price. If a higher classification results through the allocation procedure, the appropriate reclassification charge would apply.

(e) *Classification of shrinkage, milk dumped and milk disposed of for animal feed.* Each of the orders should provide for generally uniform provisions for classifying skim milk and butterfat dumped, disposed of for animal feed, or in shrinkage.

In the case of shrinkage, the cooperative associations requested that no change be made in the present order provisions, except to classify shrinkage in Class III insofar as it is now classified in the lowest class of each order.

The shrinkage provisions adopted herein are basically similar to the shrinkage provisions now effective under 27 of the 32 orders. The classification of shrinkage in the lowest use class (subject to certain limitations), as now provided in all the orders, would be continued under the adopted three-class system. Modifications of shrinkage provisions in the individual orders are in the nature of certain refinements now applicable under several of the orders.

The amount of shrinkage that may be classified in the lowest class under the 32 orders is presently limited with respect to receipts of producer milk and certain interplant transfers. In 31 of the orders, 2 percent is the maximum shrinkage allowed in the lowest class in the case of such receipts. One and one-half percent is the rate usually applicable to bulk receipts of interplant transfers, but generally no limit applies in the case of receipts of other source milk requested for lowest class use. These allowances are adopted for each order in the new uniform provisions.

Also adopted is the commonly used method of prorating total plant shrinkage to (1) those kinds of receipts on which the shrinkage limitations apply, and (2) other receipts of fluid milk products in bulk form, such as milk from other order plants or unregulated supply plants for which a Class II or Class III classification is requested. To the extent that the quantity of shrinkage prorated to the first category exceeds the established limit, the excess would be classified in Class I.

The adopted provisions recognize that shrinkage normally experienced varies with the type of handling involved. More loss is usually experienced in plant processing than in merely receiving milk for delivery to another handler. Thus, with respect to delivery of milk by a cooperative association handler from farms to plants in tank trucks, a Class III shrinkage allowance of 0.5 percent of such milk is provided. Any excess shrinkage over 0.5 percent is classified as Class I milk.

The Class III shrinkage allowance to the processing plant receiving the milk from the cooperative would be 1.5 percent. This maintains a total of 2 percent Class III shrinkage allowance for such milk from producers in the receiving and processing operations.

The provisions adopted herein are designed to carry out the appropriate division of shrinkage whether the plant operator purchases the milk at farm weights and tests or at plant weights and tests. The provisions allow the plant operator up to 2 percent shrinkage in Class III if he buys the milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples. In this case, there is no shrinkage allowance for the cooperative association delivering the milk.

As provided herein, when a plant operator disposes of bulk milk by transfer to another plant, his shrinkage allowance would be reduced at the rate of 1.5 percent of the quantity transferred. Such a reduction would not apply, however, in the case of cream or skim milk transferred from the pool plant. This recognizes the fact that a handler normally experiences more shrinkage when he runs milk through a separator than when the milk is merely received and then transferred in whole form.

In the case of milk diverted from a pool plant to another plant, a shrinkage allowance in Class III of 0.5 percent would be provided the diverting handler if the operator of the plant to which the milk is diverted purchases such milk on the basis of weights and tests determined at the plant. If the milk is purchased at farm weights and tests, no shrinkage allowance would apply for the diverting handler. This is the same procedure applicable to cooperative bulk tank deliveries to pool plants. Similar handling is involved.

This kind of division of the 2 percent shrinkage allowance, both in the case of transfers from cooperatives to plants and for transfers between plants, has been found practical and has been well accepted in the markets where it now applies. Such division of the shrinkage allowance, therefore, should be included also in the Cedar Rapids-Iowa City, North Central Iowa, Des Moines, Fort Smith, and Austin-Waco orders that now treat shrinkage in a somewhat different manner.

As has been indicated, the uniform shrinkage provisions adopted would allow for certain typical variations of individual handler operations. Thus, the provisions should be adaptable to methods of milk handling now in use in all 32 markets. Testimony on the record did not provide any basis for retaining the many minor differences in shrinkage provisions that exist among these orders. In view of these conditions, it is appropriate that the orders have basically uniform shrinkage provisions.

The single exception to the maximum 2 percent shrinkage allowance will be in the Neosho Valley order that now allows up to 5 percent shrinkage in the surplus class for skim milk during April, May, and June. Although the record does not indicate why a need exists for such a substantially different allowance in one market, no change should be made in the allowance until the matter can be explored further.

A proposal in the hearing notice by two trade associations of processors would amend the orders to allow shrinkage on milk solids used in fortifying fluid milk products. While such an allowance now applicable under the North Texas order would be continued in that market, a basis for adoption in the other orders was not developed on the record. It would be important to have, for the other markets, evidence of current plant practices with respect to use of nonfat solids used for fortification and the effect of accounting and recordkeeping procedures on quantities reported as loss. Such data were not presented and thus there is no substantial basis on which to broaden the use of such provision.

Milk or milk products dumped or disposed of for animal feed are minor categories of disposition. Both cases involve quantities of milk products that for one reason or another are not salable for human consumption. Such dispositions are likely to occur in normal plant operations. Route returns that may be nonsalable because of dating regulations often may not be reprocessed economically into other products. Additives such as flavoring or nondairy solids may make reprocessing impractical. Also, in the processing of certain products culturing processes may break down, thereby making the milk unusable for further processing.

The cooperatives proposed that there be no change in the present classification of dumpage and animal feed other than to include such uses in the lowest class in those orders specifically recognizing such dispositions. Several milk dealers and two trade associations of processors also proposed that dumpage and animal feed dispositions be classified in the lowest use class. They requested, however, that these provisions be included in the several orders not now containing such provisions.

In the three-class system adopted in this decision, dumpage and animal feed dispositions are classified in the lowest use class. This conforms to the classification plans in those orders that provide specifically for such dispositions. Existing provisions recognize that such dispositions provide little or no return to the handler.

There are differences among the orders as to the type of products for which the lowest classification is permitted when disposed of for animal feed or dumped. While some of the orders apply such classification to all skim milk and butterfat so disposed of, others limit the application to skim milk in fluid milk products, and several orders provide such classification for cottage cheese and cottage cheese curd dumped or disposed of for animal feed.

The products covered by the dumpage and animal feed provisions should be limited to fluid milk products, fluid cream products, eggnog, yogurt and similar filled products. Because of their relatively limited shelf life, it is these products that are commonly found in route returns and for which handlers realize little, if any, monetary value. Such provisions also would apply to skim milk being used in the manufacture of cottage cheese but which must be dumped because of a failure in the culturing process.

Dumping, unlike other dispositions, involves no sales records that could aid in verification of a handler's records. Thus, advance notice to the market ad-

V 38 - 177 SEP 13 73 XUM

ministrator and opportunity for verification should be required. Also, in the case of animal feed disposition, a plant operator should maintain sufficient records to establish in every instance the quantities of skim milk and butterfat involved, and show a written receipt for every disposition.

The several changes herein adopted with respect to the classification of shrinkage, dumpage, and animal feed disposition will have relatively minor effect on producer returns or on handlers' costs. The quantities of milk classified in these categories are normally a very small percentage of an individual handler's total utilization. The uniform provisions adopted are similar to existing provisions found practical from experience in the majority of markets here involved. The standardization of terminology in the provisions described should result in provisions more easily understood.

Whether there may be some merit in a more general revision of the provisions for classifying shrinkage, dumpage, and animal feed disposition than is set forth herein cannot be decided on this record. If more extensive changes are in any way desirable, such matters should be considered on the basis of a thorough exploration of the issue at another hearing.

A handler proposal for a single "loss" classification including shrinkage, animal feed, and dumped products is not adopted. The proposal was not explored by interested parties on the record as to how it would affect handler and producer equities. There is no substantial basis on which to judge its merit and the proposal therefore is denied.

(f) *Allocation of receipts to utilization.* In adopting a revised classification plan under each of the 32 orders, conforming changes must be made in the provisions that prescribe how a handler's receipts from different sources shall be allocated to his utilization for the purpose of classifying producer milk. Of the 32 orders, all but seven provide for only two classes of utilization. Thus, changes in most of the orders are necessary to provide for the allocation of receipts to three classes of utilization rather than two classes. Also, all orders must be changed with respect to the allocation of beginning inventories, as previously described.

The adoption of three use classes requires a new consideration of how other source milk shall be allocated to a handler's utilization of milk. Under the present orders, other source milk is allocated in most cases to a handler's surplus uses to the extent possible, regardless of how it actually may have been used. The producers who are relied upon for a regular supply of milk for the local fluid market thus receive the highest possible classification of their milk. Depending on the supply conditions, milk from unregulated supply plants and other Federal order plants is permitted to share in varying degrees with local producer milk in the higher value of the handler's Class I sales.

In conjunction with the revised classification plan, however, handlers using certain types of other source milk (whether in the form received or in reconstituted form) in the processing of Class II products should be permitted to have such other source milk allocated directly to their Class II uses. Under the plan adopted herein, such other source milk to which direct allocation could apply would be limited to milk products (such as nonfat dry milk and condensed milk or skim milk) that are not fluid milk products or fluid cream products.

The national associations of fluid milk and ice cream processors proposed that if a three-class system is adopted handlers should have the option of having other source milk allocated to their Class II utilization rather than allocated to the extent possible to the lowest class. It was their position that the Class II price for producer milk should not be set at a level that is any higher than the cost to handlers of obtaining alternative supplies of milk or milk products for Class II use. These groups contended that with such pricing there is no justification for "down-allocating" to Class III any receipts of other source milk which actually may have been used in Class II.

Handlers indicated further that with optional allocation a handler could choose to use other source milk without the cost impact of down-allocation should the cost of such milk become less than the cost of producer milk for Class II use. Also, these groups stated that down-allocation of other source milk would imply an intent to provide undue protection of the Class II market for producers. They maintained that such protection is not justified, or apparently intended by producers in view of no producer proposal for a compensatory payment on other source milk used in Class II.

Cooperative associations, on the other hand, urged in connection with their proposal for three classes that producers have first claim on a handler's Class II use as well as on his Class I use.

In establishing a new intermediate price class, it is not intended that this outlet for producer milk necessarily be reserved for local producers. This new use class merely recognizes that some additional value attaches to producer milk used by regulated handlers in the Class II products. Pricing this milk at a level above the Class III price serves also to reduce the burden on the Class I price of attracting a supply of producer milk for the Class I market. It is not intended that producer returns be enhanced for the purpose of also attracting a full supply of producer milk for handlers' Class II uses. Accordingly, no obligation to the pool (commonly known as a compensatory payment) would be imposed under the revised classification plan on any other source milk which regulated handlers may use in Class II or on any Class II products that may be distributed in the market by nonpool plants, either directly on routes or through pool plants.

As long as the Class II price for producer milk remains in proper relationship with the cost of alternative supplies, it is not expected that this direct allocation of nonfluid other source milk to Class II will induce handlers to use other source milk in preference to producer milk to any greater extent than presently for processing Class II products. Under the adopted Class II price, producers would represent in most circumstances the most economical source of milk for Class II use.

No provision should be made for the direct allocation to a handler's Class II utilization of other source milk received in fluid form. Unlike the handling of nonfat dry milk, it would not be unusual for a handler to commingle in his plant any receipts of fluid other source milk with his receipts of producer milk. In this circumstance, it would not be possible to know just how much of the other source milk may have been used in the processing of a Class II product. The difficulty which a handler would have in demonstrating that he actually used fluid other source milk in a Class II product, and the administrative difficulty in verifying such claimed use, warrants the allocation of such milk in essentially the same manner as now provided by the orders.

In this connection, it should be noted that under the revised classification plan each order would provide for the specific allocation to a handler's Class II and Class III utilization of any receipts of bulk fluid milk products from an other order plant or an unregulated supply plant for which the handler requests a Class II or Class III classification. Such receipts would be allocated to the extent possible first to the handler's Class III utilization and then to his Class II utilization. This would be the case even if a Class II classification were requested by the handler.

An additional proposal concerning the "down-allocation" of other source milk was offered at the hearing by a handler operating distributing plants in several of the markets under consideration. The company's spokesman indicated that in one market the milk supply being furnished to it by the local producer cooperative was withheld by the cooperative in a particular month when the company refused to enter into a "full-supply" contract. The spokesman claimed that because the cooperative controlled about 85 percent of the producer milk on the market, the company was forced to acquire a supply of milk for the remainder of the month from another market. The spokesman indicated that although having purchased the outside milk for Class I use some of the milk was down-allocated to the plant's lowest utilization. This was because of the order provisions that now result in local producers receiving in large part first priority on a handler's Class I utilization. The handler proposed that if local producers refuse to supply a pool plant with sufficient milk for its Class I needs during the month, any supplies acquired from outside the market for Class I use not be down-allocated relative to receipts of producer milk.

The proposal should not be adopted. Any order provision intended to accommodate a handler in this one particular circumstance would be difficult to administer in an equitable manner. Handlers are not required by an order to purchase milk from any particular source. Similarly, producers are not required to supply any particular handler. In negotiating for the purchase or sale of milk, either party may find the proposed terms unsatisfactory and thus may decide not to consummate the transaction. It would be difficult, if not impossible, for a market administrator to determine, however, which party actually decided not to enter into a purchase-sales agreement. Should a handler be able to acquire outside milk at a lesser cost than would be applicable to local producer milk, such handler would have an incentive to claim that local producers refused to supply him with milk when, in fact, this was not the case.

Such administrative difficulties could be overcome, of course, through the adoption of provisions that do not down-allocate receipts of outside milk from selected sources, or from any source, for Class I use. This would be a major departure, however, from the allocation procedure now used under the present orders. This procedure, which was based on comprehensive hearings for all Federal order markets, resulted from the "compensatory payment" decisions concerning the integration of other source milk into the regulatory plan of an order.[4] Such a change would be much broader in scope than was contemplated under the handler's proposal described above and should not be adopted.

In keeping with the goal of classifying milk uniformly under the 32 orders, certain changes should be made in the orders to effect a uniform application of the allocation provisions to multiple-plant handlers. Presently, the 32 orders differ as to how the allocation procedure shall be carried out for handlers who operate two or more pool plants regulated under the same order.

Each order should provide that for purposes of allocating a multiple-plant handler's receipts to his utilization, the operations at each of his pool plants shall be considered separately. As is the case now, however, those receipts of other source milk from unregulated supply plants and other Federal order plants eligible to share with producer milk in a handler's Class I utilization should be allocated on the basis of the handler's total plant system.

This application of the allocation provisions to a multiple-plant handler is now used under six of the 32 orders. Two other orders require that allocation be on an individual-plant basis unless there are receipts of other source milk at any one of the handler's pool plants to be allocated pro rata with producer milk to the plant's Class I utilization. In this case, all allocations of the handler's receipts to utilization are done on the basis of the handler's total system. The remaining orders provide that allocation be on a system basis in all cases.

[4] Official notice is taken of the Assistant Secretary's decisions issued on June 19, 1964 (29 F.R. 9002, 9110, and 9213) with respect to all milk orders then in effect.

Conditions in the individual markets do not require continuance of the several allocation methods now provided in the orders under consideration. Handlers are often subject at different times to the regulatory provisions of different orders. Applying the allocation provisions uniformly among all orders will reduce unnecessary regulatory differences being experienced by these handlers. There would be little, if any, change in a handler's total obligation under the order, or in producer returns, from applying the adopted allocation procedure in those orders not now providing for allocation on an individual-plant basis.

All the orders now provide that certain receipts of milk from unregulated supply plants and other Federal order plants shall share in varying degrees with local producer milk in the receiving handler's Class I utilization at all of his pool plants combined. This procedure, which resulted from the 1964 "compensatory payment" decisions referred to earlier, should be continued. To implement this procedure in those orders being changed from system allocation to individual-plant allocation, several additional allocation steps must be provided in such orders. These involve essentially the same computations now required under the orders for the North Texas, Central West Texas, Lubbock-Plainview, Rio Grande Valley, Northern Louisiana, and Des Moines markets where individual-plant allocation is used. Such provisions are revised, however, to incorporate three classes of utilization rather than two classes.

The additional allocation steps establish a procedure whereby the milk from unregulated supply plants and other order plants will continue to be classified on the basis of the handler's total system, but will be assigned to classes at the pool plant of actual receipt. Under this procedure, the situation may arise where there is not enough utilization in a specific class at the plant of actual receipt to which such other source milk must be assigned (as determined from receipts and utilization of his entire system). In this case, an accounting technique is used for increasing the utilization in such class at the plant of actual receipt and making a corresponding reduction in the same class at one or more of his other pool plants in his system. This technique does not result, however, in changing the amount of milk to be accounted for at each plant, or the classification of milk within the handler's entire system.

(g) *Obligations relative to other source milk.* Each of the orders under consideration that provide for market-wide pooling should be revised to the extent necessary to remove the possibility of a handler being charged under the order at the Class I price for milk that already has been classified and priced as Class I milk under some Federal order. Certain of these orders already have been revised to remove any "double charge" on Class I milk. The order language previously adopted for this purpose should be made uniform, however, and should be included in the remaining orders not now containing such provisions.

No changes in this respect are necessary under the Memphis, Fort Smith, Austin-Waco, and North Central Iowa orders. These orders employ individual-handler pooling and do not provide for any handler obligation on other source milk.

A "double charge" on Class I milk received at a pool plant from an unregulated nonpool plant could result in the following manner. Producer milk could be transferred in bulk from a pool plant under the Wichita order, for example, to an unregulated nonpool plant and be assigned to the nonpool plant's Class I utilization. In determining his pool obligation, the pool plant operator would be charged for this Class I utilization of milk at the Class I price. During the same month, bulk milk could be transferred from the nonpool plant to a pool plant under the Kansas City order and be allocated to such pool plant's Class I utilization. In this case, the operator of the pool plant would be charged under the Kansas City order the difference between the order's Class I price and weighted average price for this receipt of "other source" Class I milk. Thus, to the extent of the Class I milk that was moved to the nonpool plant from the Wichita market as Class I milk, the Class I other source milk received at the Kansas City pool plant from the nonpool plant is, in effect, priced twice as Class I milk under the Federal order system.

More and more, plants are tending to specialize in the processing of certain products, or in the packaging of products in particular types of containers. It is not uncommon for milk to be transferred from a pool plant to an unregulated nonpool plant for special processing and the finished products to be moved back into the regulated market. When the milk is initially priced at the Class I price, the market price structure is in no way undermined if this milk, or its equivalent, is disposed of by the nonpool plant in the regulated market.

The orders therefore should provide that the operator of the Kansas City plant, in this example, will have no obligation to the pool on such other source Class I milk. This is achieved through a revision of the allocation provisions and the procedure for computing the pool obligation of a pool plant operator. Receipts of packaged fluid milk products at a pool plant from an unregulated supply plant would be allocated to the pool plant's Class I utilization to the extent that an equivalent amount of skim milk or butterfat disposed of to the unregulated plant by handlers fully regulated under any Federal order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order. This allocation would be made prior to any other allocation of receipts to the plant's Class I utilization, and no order obligation would apply to the milk so allocated to Class I. In the case of fluid milk products received from an unregulated supply plant in bulk form, the provisions setting forth a han-

V 38-177 SEP 13 73 XUM

dler's pool obligation would specify that no payment would apply to any of such milk allocated to Class I if, as just described for packaged milk, an equivalent amount of milk received at the unregulated plant had been priced as Class I milk under some order.

In this same connection, the provisions prescribing the obligation of a partially regulated distributing plant should be changed in each marketwide pool order. When such plant's obligation is computed as though it were a pool plant, proper recognition must be given to any transfers from the plant to a regulated plant that are considered to already have been priced as Class I milk under some Federal order. Also, in computing such plant's pool obligation on route sales in a Federal order marketing area, recognition should be given to any receipt of milk at such plant from another unregulated plant if an equivalent amount of milk received at the latter plant already has been priced as Class I milk under an order.

Each order now imposes a handler assessment for administering the order on all other source Class I milk except that received in fluid form from an other order plant. This may include milk that already has been priced as Class I milk under some Federal order as described above. With the removal of a "double" Class I charge on such milk, each order should be changed to likewise remove any assessment on such milk for administrative expenses. It is presumed that such milk was subject to a similar charge under the order that initially priced the milk.

The marketwide pool orders should be changed also with respect to the application of location adjustments to other source Class I milk. As just described, each of the orders provides that a pool plant operator's obligation to the producer-settlement fund shall include a payment for fluid milk products received from an unregulated supply plant if they are allocated to Class I. The handler's payment is determined by charging him at the Class I price for the Class I other source milk and giving him a credit on the milk at the weighted average price (or uniform price in the case of those orders that do not provide for any type of seasonal production incentive plan). Both the Class I and weighted average prices are adjusted for the location of the unregulated supply plant. The adjustment of the weighted average price, though, is so limited as to be not less than the lowest class price. No such limitation is applied currently under most of the 32 orders to the Class I price adjustment.

Providing that any adjusted Class I price applicable to other source milk be not less than the Class III price is appropriate under each order. Otherwise, under certain conditions a handler could receive payment from the producer-settlement fund on Class I milk obtained from an unregulated supply plant. Such payment could result when the location differential for the distant plant is greater than the difference between the Class I and Class III prices. In this circumstance, producers under the order, in effect, would be providing the handler with a credit that reduces his cost for the distant milk below its value for manufacturing use at the point of purchase. From the standpoint of marketing efficiency, the handler should not be provided an incentive, which would be at the expense of local producers, to import such distant milk into the local market.

A similar situation now exists with respect to the obligation of the operator of a partially regulated distributing plant or an other order plant. In certain cases, the handler's obligation includes a payment to the producer-settlement fund at the difference between the Class I price applicable at his plant and either the weighted average price or the Class III price. For the same reasons, each order should provide, in computing the obligation of such a handler also, that the Class I price, as adjusted for location, shall not be less than the Class III price.

(h) *Reports.* The proposed changes in the classification of milk are not expected to require any major change in the amount of information to be submitted by handlers in their monthly reports of receipts and utilization. The reporting provisions of each order must be changed, however, to reflect the new categories of information that each market administrator will need in administering an order. These changes stem largely from the proposed reclassification of cream and the revised accounting methods necessary for implementing a three-class classification scheme.

In revising the reporting provisions of each order, such provisions should be made uniform to the extent possible. Essentially the same information is now required to be reported under each order, basically for the purposes of determining the classification of the milk and its classified value. There is considerable variation among these orders, however, in the manner in which the provisions on reports are expressed.

As proposed herein, the reporting provisions would be stated in some orders in slightly less detail than is now the case. The market administrator would have, nevertheless, no less authority than at present to obtain through handler reports, in the detail and on forms prescribed by the market administrator, any information the latter believes is necessary for administration of the order.

5. *Changing the butterfat differentials.* A single butterfat differential should apply under each order for adjusting prices to the actual butterfat content of the milk being priced. This differential should be the Chicago butter price multiplied by 0.115, rounded to the nearest one-tenth cent.

All 32 orders provide butterfat differentials for adjusting class prices and uniform prices for butterfat content. With two exceptions, each order bases the class butterfat differentials on the Chicago butter price, which would be continued under the revised orders. The Chicago butter price is the simple average of the wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk butter at Chicago as reported for the month by the U.S. Department of Agriculture. Under the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa orders, the Class II butterfat differential is based on the price of Grade AA (93-score) butter at New York City.

The handler butterfat differentials for each class are now computed by multiplying the butter price by a specified factor. In the case of the Class I butterfat differential, the factor is 0.120 under 19 orders and 0.125 under 11 orders. One order uses a factor of 0.130 and another a factor of 0.135.

The factor most commonly used in computing the butterfat differentials applicable to the surplus prices is 0.115, as prescribed by 18 orders. Eight orders use 0.110, while the factors 0.120 and 0.108 are used under two other orders. Four orders use a factor of 0.110 during the heavy production months and 0.115 during the remainder of the year.

The butterfat differential used in adjusting the uniform price to producers under 22 of the orders is the average of the butterfat differentials for each class, weighted by the proportion of producer milk in each class. Under six other orders, the butterfat differential to producers is determined by multiplying the Chicago butter price by 0.120. Two other orders use a factor of 0.110 under a similar computation, while another provides that this differential be computed by adding 4 cents to the Chicago butter price and multiplying the sum by 0.1. Under the Memphis order, the producer butterfat differential is determined from a fixed schedule of rates in the order which are related to the Chicago butter price, i.e., for each 5-cent change in the butter price, the butterfat differential changes one-half cent per point of butterfat.

Cooperative associations proposed that all class prices and uniform prices be subject to adjustment by a single butterfat differential based on the Chicago butter price times a factor of 0.115. One handler proposed that the Class II and Class III butterfat differentials be based on the Chicago butter price times 0.110. Handlers in general opposed any change in the present Class I butterfat differentials.

Lowering the Class I butterfat differential factor to 0.115 will accommodate producers' request for a readjustment of the values of skim milk and butterfat in Class I milk at a time of declining use of butterfat in fluid milk products. In 1960, the average butterfat test of fluid milk products (including cream items) in 63 Federal order markets was 3.76 percent. In 1970, the average butterfat test for such products in 58 markets was 3.26 percent.

Comparable data for the 32 subject markets as they are presently constituted are not available. On the basis of information available for much of the area now regulated by these orders, however, there is every indication that the use of

butterfat in Class I in these markets is following the national trend.[5]

The impact of this change on a handler's average cost of producer butterfat for Class I use is dependent, of course, upon the average butterfat test of his Class I products and the butterfat differential now applicable to him. Thus, handlers in the 32 markets will be affected differently from lowering the Class I butterfat differential. An analysis of 1970 data for 30 of the 32 markets will serve to illustrate the general change in handlers' costs under the revised classification plan. Data for the Fort Smith and Austin-Waco markets are not available.

It is estimated that in 18 of the 19 markets now using a Class I butterfat differential factor of 0.120 the average butterfat test of Class I products distributed by handlers (excluding cream and lowfat items) would have ranged in 1970 from 3.55 percent to 2.53 percent. Using the average test for these markets of 2.98 percent, the Class I price at test would have been increased 1.8 cents per hundredweight. For 10 of the 11 markets now using a Class I butterfat differential factor of 0.125, the average test of Class I milk would have ranged from 3.25 percent to 2.81 percent. Based on an average test of 3.01 percent, using a factor of 0.115 in these markets would have increased the Class I price at test by 3.4 cents. The price increases would have been slightly greater in the Duluth-Superior and central Arizona markets, where factors of 0.130 and 0.135, respectively, are used. Based on estimated Class I butterfat tests of 2.73 percent and 3.10 percent, the Class I price at test would have been increased 8.0 cents per hundredweight in the Duluth-Superior market and 5.6 cents in the central Arizona market.

Handlers opposed any change in the Class I butterfat differentials on the basis that the relationship of skim milk and butterfat values had already been altered by a change on April 1, 1971, in the purchase prices for dairy products under the Department's price support program. They pointed out that this change, as reflected in order prices, increased handlers' cost of skim milk about 10 cents per hundredweight. Handlers argued that in view of this any further increase in the value of skim milk should be delayed until there has been an opportunity to observe the market response to the effects of the price support change.

There is no evidence to suggest that Class I sales of skim milk and lowfat products were affected adversely by the price support action. Data for 58 Federal order markets indicate that average daily sales of these products in 1971 increased 2.1 million pounds over such sales in 1970. Monthly data show no drop in sales following the support price change in the early part of 1971. Adopting a lower Class I butterfat differential at this time gives recognition to the lower market value now associated with butterfat in Class I products.

Using a single factor of 0.115 for computing Class II and Class III butterfat differentials will result in a uniform adjustment of class prices for butterfat content among the markets under consideration. Continuation of the several butterfat differential factors now in use would offset to some extent the benefits to be gained through the adoption of a uniform classification plan.

A handler proposed that the butterfat differential factor for adjusting surplus prices be 0.110 rather than 0.115 as proposed by cooperatives. Proponent indicated that in disposing of surplus cream handlers usually are not able to recover their cost of such cream under the order. A Class II-Class III butterfat differential factor of 0.110, it was argued, would provide handlers with some price relief in this circumstance.

The record does not indicate that the adoption of 0.115 as the butterfat differential factor for pricing surplus milk will hinder the removal of surplus butterfat from the fluid market. Of the 32 orders, 22 now use a factor of 0.115, and one uses a factor of 0.120, for pricing surplus milk. The handler proposing the 0.110 factor was the only opponent of the 0.115 factor proposed by cooperatives. The great majority of residual butterfat is disposed of by the cooperatives rather than handlers. It must be concluded that the adoption of the handler's proposal under present marketing conditions would return to producers in most cases less than the obtainable market value for butterfat not needed for Class I purposes.

As indicated, the butterfat differential to producers under 22 of the 32 orders reflects the weighted value of butterfat in the class uses. Inasmuch as producers favor this method of reflecting skim milk and butterfat values in their pay prices, this pricing arrangement should be extended to the other 10 orders. Since the same butterfat differential would be used in adjusting each of the class prices, there is no actual need, of course, for any provision in the order for weighting the values of butterfat in the three classes in determining the producer butterfat differential.

With the use of a single butterfat differential for adjusting all prices under the order, it is necessary that each order provide only for a producer butterfat differential. No handler butterfat differentials need be set forth as such in the order, nor is there any need for pooling butterfat values in each class. All producer differential butterfat would be priced to all handlers at the same level regardless of the class in which used. The proposed revised orders attached hereto have been drafted accordingly.

Under the new pricing arrangement, the single butterfat differential for the current month should be based upon butter prices for such month and should be announced by the fifth day of the following month. This represents a change only for the pricing of Class I milk. The Class I butterfat differentials are now based on butter prices prevailing during the preceding month and are announced by the fifth day of the current month. With the use of a single butterfat differential factor in adjusting all milk prices, as adopted herein, there appears to be no need for announcing more than one butterfat differential, or for doing so before the end of the month in which it applies. The average butter price changes very little from month to month, and changes that do occur result in relatively limited changes in the butterfat differential. Each change in the price of butter is readily seen by following the daily quotations for butter. In the absence of regulation, such information would be the best available for determining trends in butter prices and should be adequate for this purpose under regulation.

It is recognized that the basic formula price of these orders is determined by adjusting the average Minnesota-Wisconsin price at test to a 3.5-percent butterfat basis by using a factor of 0.120 times the average Chicago butter price. The appropriateness of such factor for this purpose was not considered at the hearing and no consideration is given in this decision to changing this factor for such purpose. Moreover, since this method of determining the basic formula price is now used under all Federal milk orders throughout the country, it would appear that any change in this butterfat differential factor should be considered simultaneously for all orders.

6. *Advance announcement of prices for surplus milk.* The proposal by handlers to announce order prices for surplus milk at the beginning of the month rather than at the end of the month during which the prices apply should not be adopted.

Under the present orders, the prices for surplus milk are announced by the fifth day of each month. Such prices apply to producer milk delivered to handlers during the preceding month.

The national associations of fluid milk and ice cream processors proposed that the class prices to be applicable in a particular month to surplus milk be announced by the fifth day of such month. Handlers stated that under the present announcement procedure they are often disadvantaged by not knowing the costs of producer milk for manufacturing use until after the end of the month in which the milk is processed. They claimed that when there is a significant increase in the order price, the delayed notice of the increase prevents them from making corresponding adjustments in their resale prices on a timely basis. Proponents' interest in advance pricing related essentially to the prices that would be applicable to cottage cheese, cream products, yogurt and frozen desserts, the principal Class II products processed by such handlers.

For the regulated handler processing producer milk into butter, nonfat dry milk and cheddar cheese, however, advance announcement of the applicable class price could place him at a competitive disadvantage on his sales of these manufactured products. As indicated

[5] Official notice is taken of the annual summaries for 1960 through 1971 of Federal Milk Order Market Statistics which were issued by the Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C.

V 38-177 SEP 13 73 XUM

earlier, the surplus prices under the revised classification plan generally would be based on the prices paid for manufacturing grade milk in Minnesota and Wisconsin. These prices are closely related to the market values of cheddar cheese, nonfat dry milk, and butter, the principal uses for such milk in the month of delivery of the raw milk. These product prices are established on a regular basis in a market that is national in scope. The manufacturers of ungraded milk are fully aware of the movements of these product prices, which are published weekly, and can adjust their pay prices for milk in response to changes in the prices for the finished products. Regulated handlers who are processing these particular products must compete in the same national market in which the processors of manufacturing grade milk are competing and the same product price information is available to them.

In most of the markets under consideration, substantial quantities of milk are disposed of by regulated handlers in the form of butter, nonfat dry milk, or cheese. In 1970 over 1 billion pounds of milk, or 88 percent of the market's total Class II use, were so disposed of by handlers in the Minneapolis-St. Paul market. In the Minnesota-North Dakota, Southeastern Minnesota-Northern Iowa, Duluth-Superior, Cedar Rapids-Iowa City, Eastern South Dakota, Oklahoma Metropolitan and North Central Iowa markets, over 80 percent of each market's total Class II milk was used that year in manufacturing these products. Although lesser quantities of milk were used in such products in the other markets, only in four markets (Memphis, Fort Smith, Central West Texas and Rio Grande Valley) did such uses represent less than 20 percent of the total Class II use for each market. Thus, handlers in most of the 32 markets have a very definite interest in the relationship of the applicable class price with prices being paid currently for manufacturing grade milk. Accordingly, the prices paid by regulated handlers for Class III milk should correspond very closely with the pay prices during the month of delivery for manufacturing grade milk if these handlers are to be competitive in the sale of the principal surplus products.

The same considerations are involved in the case of an advance announcement of prices for milk used in the proposed Class II products. The influence of the manufacturing milk price level on the competitive relationship of producer milk for Class II uses is similar to that for producer milk used in the proposed Class III products. Therefore, the prices for Class II milk should be announced on the same basis as the price for Class III milk.

In connection with the announcement of surplus prices, a comment should be made concerning the transition from the present pricing provisions to the new ones adopted herein. It is intended that the present surplus prices apply to producer milk delivered to handlers during the last month under the present classification and pricing scheme. Clarification of this point is pertinent since such prices would be announced following the effective date of the new pricing provisions.

*7. Treatment of filled milk under the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa orders.* The Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa orders should be changed to provide that the skim milk ingredient of "filled milk" shall be classified and priced as Class I milk.

The provisions provided herein are substantially those which were proposed for consideration at the hearing by a cooperative association operating in these markets.

In 1968, proposals to classify and price the skim milk component of filled milk were considered for most orders at a hearing held in Memphis, Tenn. The decision resulting from the hearing classified the skim milk component of filled milk in the same way as the skim milk component of natural milk. It provided a means of equating the cost of skim milk in filled milk if it originates from sources other than producer milk with the cost if derived from producer milk.

At the time of the 1968 hearing, the Southeastern Minnesota-Northern Iowa order had not been issued, and the Minneapolis-St. Paul order could not be amended in this respect because of a marketing area expansion to which the filled milk hearing did not apply. As a result, these orders do not contain the uniform provisions dealing with filled milk provided in all other Federal milk orders.

Filled milk is a combination of skim milk and vegetable fat or oil in about the same proportions as the skim milk and milk fat in whole milk. Well over 90 percent of the product is skim milk. In most filled milk, the skim milk portion is fresh fluid skim milk separated from whole milk. Some filled milk contains reconstituted fluid skim milk prepared from a concentrated product such as nonfat dry milk. Whether made from vegetable fat and fresh or reconstituted skim milk or any combination of the two, filled milk resembles whole milk in appearance.

Regulated handlers disposing of filled milk make a substantial savings in cost by substituting vegetable fat or oil for butterfat. This is the main incentive for the marketing of filled milk. While the difference in cost between vegetable fat and butterfat is not an issue at this hearing, it is relevant to the extent that it explains the profit motivation for marketing the product relative to the marketing of natural milk.

At the present time, no filled milk is distributed in the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa marketing areas. In those regulated markets where filled milk is distributed, it moves in the same channels as whole milk. It is distributed by the same handlers in the course of their regular business through the same outlets for natural milk and in the same types of containers.

Filled milk, if disposed of in either the Minneapolis-St. Paul or the Southeastern Minnesota-Northern Iowa marketing area, would directly burden, obstruct, or affect interstate commerce in milk and milk products. It previously has been determined (at the time of the promulgation of each of these orders) that all milk marketed in each marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk and milk products.

Filled milk is in content substantially a product of milk and competes for the same sales outlets as milk. It follows, therefore, that the marketing of the milk ingredients in filled milk in either of the two markets would burden, obstruct, or affect interstate commerce in milk and milk products. This would be equally true whether the marketing of filled milk were by a fully regulated plant or by a plant not fully regulated because both would compete for similar outlets in the market.

Also, manufactured milk products are sometimes used in the production of filled milk. Manufactured milk products move in interstate commerce and compete in the national market, regardless of where the milk is produced. Therefore, manufactured milk products, if used in the production of filled milk for disposition in either the Minneapolis-St. Paul or Southeastern Minnesota-Northern Iowa market, likewise would burden, obstruct, or affect interstate commerce in milk and its products.

The classification of the dairy ingredients of filled milk is a proper consideration derived from the Agricultural Marketing Agreement Act. As stated in the decision resulting from the filled milk hearing in Memphis, Tenn., the "specific language of the Act with respect to classification is that each order shall contain terms '* * * classifying milk in accordance with the form in which or the purpose for which it is used * * *'. In applying the language of the Act we here consider the form and purpose of use for both filled milk and the milk ingredient content of the filled milk.

"The form of filled milk and the purpose for which it is used are the same as the form and purpose of use of whole milk. Filled milk, just as whole milk, is disposed of in fluid form. It is marketed by handlers in the same types of packages and in the same trade channels as the whole milk they market, and is mainly intended as a beverage substitute for milk.

"Similarly, the fluid skim milk content of the filled milk is in the same form as skim milk in whole milk and serves the same purpose, providing in each case the main body of the product thereby making it a milk beverage. The addition of the nonmilk ingredients, principally vegetable fat or oil and stabilizers, does not alter the basis for Class I classification. The addition of nonmilk ingredients in fluid milk products is not a new development. The addition of vegetable fat does not involve an essentially different consideration from that for other Class I fluid milk products to which a flavoring ingredient, such as chocolate (which also contains nonmilk fat) has been added.

"For purpose of illustration, a product within the 'fluid milk product' category containing a nonmilk additive is chocolate milk. The additive is not considered as changing the form of this product so that it is no longer a fluid milk product. For the purposes of classification, the flavoring material has never been regarded as significant in determining the form of the product or as a basis for altering its classification.

"The same reasoning applies in the case of filled milk—that the additives do not change significantly the form or the purpose of use and therefore do not constitute a basis for classification other than in Class I.

"The product 'filled milk' therefore should be classified, for the purpose of pricing under the orders, in the same manner as whole milk. As in the case of other fluid milk products containing some nonmilk ingredients, the classification would apply only to the milk ingredients in the product."

No opposition to the filled milk proposal was expressed at the hearing or in briefs submitted by interested parties.

Based on the testimony of proponent, which related specifically to the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa orders, it is found that the above findings from the Memphis decision are equally applicable to this proceeding. Accordingly, they serve as the basis for concluding that the milk ingredients of filled milk should be classified and priced under the two orders as Class I milk.

Proponent testified also that filled milk may be made by combining reconstituted skim milk with vegetable fat and other minor ingredients. Reconstituted skim milk commonly is made from nonfat dry milk to which water is added to return it essentially to a form and consistency similar to fresh skim milk. Its potential as a disruptive influence on the market for producer milk is substantial, however, since the disposition of any Class I product that has been priced at the surplus price level undermines the classified pricing system.

As was found in the filled milk decision referred to earlier, filled milk made from reconstituted skim milk is, from a marketing standpoint, essentially similar to filled milk made from fresh skim milk. It is a competitor of whole milk at the consumer level. Therefore, reconstituted skim milk in filled milk, as in other fluid milk products, should be classified and priced on the same basis as all other fluid milk products to achieve uniformity in the pricing of milk for similar uses.

Federal milk orders, including the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa orders, have contained for some time specific provisions dealing with the disposition by a regulated handler of other fluid milk products reconstituted from nonfluid milk products. The issue of proper classification and charge for such use of nonfluid milk products to produce products for Class I disposition was dealt with for most orders in the compensatory payment decisions referred to earlier in this decision. The findings and conclusions that relate to the reconstitution of milk appeared at 29 F.R. 9010. The regulatory treatment of reconstituted products that is described in the compensatory payment decisions and reiterated in the later filled milk decision is appropriately applicable to any reconstituted skim milk used in filled milk that may be disposed of in the Minneapolis-St. Paul and Southeastern Minnesota-Northern Iowa marketing areas.

It should be noted that these two orders now provide that a producer-handler would lose his status as such and become a fully regulated handler if he disposes of fluid milk products made from reconstituted skim milk. Since the fluid milk product definition would include filled milk under the amendments adopted herein, loss of producer-handler status would result also from the sale of reconstituted filled milk.

A definition of filled milk should be provided in the two orders to meet the specific needs of order regulation, and for such purpose only. This definition, which would be identical to the filled milk definition in all other orders, should be as follows:

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

The term "filled milk" is not intended to include skim milk marketed in a form or for a purpose specifically excluded from the fluid milk product definition of either order. For example, evaporated milk is a use of skim milk and butterfat not treated as a fluid milk product in either order. If a product containing skim milk and any amount of vegetable fat were marketed in the same form and manner as evaporated milk, it would be excluded from the term "filled milk".

The regulatory treatment of filled milk adopted herein requires numerous conforming changes throughout the order. Accordingly, all the conforming changes found necessary on the basis of the Memphis hearing to implement the filled milk amendments are incorporated herein wherever applicable.

*8. A uniform "equivalent price" provision.* Each of the 32 orders included in this proceeding should be amended to the extent necessary to provide identical language for determining an equivalent price, or price constituent, when a price or price constituent is not available as prescribed by the order.

At present, all of the 32 orders except the Minnesota-North Dakota order provide for computing an equivalent price as needed. Such provisions are not identical, however, among the orders. A Dairy Division proposal for a uniform equivalent price provision under each order was supported by a witness for the National Milk Producers Federation.

An equivalent price provision is necessary in each of the orders to provide a price, or price constituent, in cases where published prices, indexes, quotations, or other pricing constituents as prescribed by the order are not available. It insures that basic formula prices, class prices and butterfat differentials can be computed, as prescribed, in emergency situations without interruption.

All the orders now rely on butter price quotations for computing butterfat differentials. All rely on the Minnesota-Wisconsin price series for computing the basic formula price and Class I prices. As proposed herein, this price series would be used also in establishing Class II and Class III prices under each order.

Under unusual circumstances, these published prices and price constituents might not be available for use in computing order prices. If there were insufficient trading during the month in butter, for example, or if the specific butter price quotations were discontinued, the prescribed butterfat differentials could not be computed without an equivalent price provision. By providing for the determination of an equivalent price as needed, the Department is in a position to draw on comprehensive resource data to assure that the computation of the basic formula price, the class prices, or the butterfat differentials is not interrupted by the contingencies cited.

For these reasons, it is concluded that the Minnesota-North Dakota order should provide for the determination of an equivalent price in the same manner as the other orders included in this proceeding.

In providing for a determination of equivalent price, the same objective is sought for each order. It is appropriate, therefore, to provide for identical provisions in each order. Then, if a determination had to be made for more than one order simultaneously, there would be no question as to the applicability of the determination to each order.

Accordingly, the equivalent price provision in each order should be stated as follows:

"If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required."

A corollary change should be made in the Class I price provisions of the Neosho Valley order. This order provides that the Class I price shall be based in part on the Class I price "under Part 1067 of this chapter regulating the handling of milk in the Ozarks marketing area." At the time the Ozarks order was merged with the St. Louis order, a determination of equivalent price was issued for the Neosho Valley order (33 F.R. 15107) which stated in part that:

For the purpose of computing the Neosho Valley Class I price, the Class I price announced for Zone 1 under the St. Louis-Ozarks milk order (Part 1062) will be equivalent to the price specified in § 1071.51(a)(2) of the Neosho Valley order and should be used in lieu thereof in computation of the Class I price of the Neosho Valley order until such time as the Neosho Valley order may be amended.

V 38-177
SEP 13 73
XUM

This determination of equivalent price, which was issued in October 1968, is still in effect. This proceeding affords an opportunity to amend the Neosho Valley order as prescribed in the determination. Thus, the order language quoted earlier should be revised to read "under Part 1062 of this chapter regulating the handling of milk in the St. Louis-Ozarks marketing area."

RULINGS ON PROPOSED FINDINGS AND CONCLUSIONS

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

GENERAL FINDINGS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

RECOMMENDED MARKETING AGREEMENT AND ORDER AMENDING THE ORDER

The recommended marketing agreements are not included in this decision because the regulatory provisions thereof would be the same as those contained in the orders, as hereby proposed to be amended. The following order amending the orders, as amended, regulating the handling of milk in the aforesaid marketing areas is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. It is the same as the order amending the orders set forth in the aforementioned recommended decision issued by the Deputy Administrator, Regulatory Programs, on August 28, 1972, except for modifications in the following sections of each order. The modifications noted do not include those that have been made in each order to reflect the new Federal Register style for "references" within a section of the order.

## PART 1060—MILK IN MINNESOTA-NORTH DAKOTA MARKETING AREA

§§ 1060.7, 1060.12(b)(2), 1060.14, 1060.15(a)(2), 1060.16, 1060.30(a)(3), 1060.40, 1060.41(b) (2), and (3), and (c), 1060.42(d)(2)(vi), 1060.44(a), 1060.50(b), 1060.76(b)(2) (i) and (ii).

## PART 1061—MILK IN SOUTHEASTERN MINNESOTA-NORTHERN IOWA MARKETING AREA

§§ 1061.7, 1061.12(b)(2), 1061.14, 1061.15(a)(2), 1061.16, 1061.30(a)(3), 1061.40, 1061.41(b) (2), and (3), and (c), 1061.42(d)(2)(vi), 1061.44(a), 1061.50(b), 1061.76(b)(2) (i) and (ii).

## PART 1063—MILK IN QUAD CITIES-DUBUQUE MARKETING AREA

§§ 1063.7, 1063.12(b)(2), 1063.14, 1063.15(a)(2), 1063.16, 1063.30(a)(3), 1063.40, 1063.41 (b)(3) and (c), 1063.42 (d)(2)(vi), 1063.44(a), 1063.50(b), 1063.76(b)(2) (i) and (ii).

## PART 1064—MILK IN GREATER KANSAS CITY MARKETING AREA

The Index and §§ 1064.7, 1064.12(b)(2), 1064.14, 1064.15(a)(2), 1064.16, 1064.30(a)(3), 1064.40, 1064.41(b) (2), and (3), and (c), 1064.42(d)(2)(vi), 1064.44(a), 1064.50(b), 1064.61, 1064.71(a)(2)(ii), 1064.73 (a) and (d)(1), 1064.75(b), 1064.76 (a)(4) and (b)(2)(i) and (ii), and new §§ 1064.110 through 1064.122 are added.

## PART 1065—MILK IN NEBRASKA-WESTERN IOWA MARKETING AREA

The Index and §§ 1065.5, 1065.6, 1065.7, 1065.10, 1065.12(b), 1065.14, 1065.15(a)(2), 1065.16, 1065.30(a)(3), 1065.40, 1065.41(b) (2), and (3), and (c), 1065.42(d)(2)(vi), 1065.44(a), 1065.50(b), 1065.60(d), 1065.61, 1065.62, 1065.71(a)(2), 1065.73 preamble and (e)(3), a new § 1065.73a is added, 1065.74, 1065.75, 1065.76 (a)(4) and (b)(2) (i) and (ii), 1065.85(a), 1065.98(a), and new §§ 1065.90 through 1065.98 and 1065.110 through 1065.122 are added.

## PART 1068—MILK IN MINNEAPOLIS-ST. PAUL, MINNESOTA, MARKETING AREA

§§ 1068.12(b)(2), 1068.14, 1068.15(a)(2), 1068.16, 1068.30(a)(3), 1068.40, 1068.41(b) (2), and (3), and (c), 1068.42(d)(2)(vi), 1068.44(a), 1068.50(b), 1068.76(b)(2) (i) and (ii).

## PART 1069—MILK IN DULUTH-SUPERIOR MARKETING AREA

§§ 1069.7, 1069.12(b)(2), 1069.14, 1069.15(a)(2), 1069.16, 1069.30(a)(3), 1069.40, 1069.41(b) (2), and (3), and (c), 1069.42(d)(2)(vi), 1069.44(a), 1069.50(b), 1069.76(b)(2) (i) and (ii).

## PART 1070—MILK IN CEDAR RAPIDS-IOWA CITY MARKETING AREA

§§ 1070.7, 1070.12(b)(2), 1070.14, 1070.15(a)(2), 1070.16, 1070.30(a)(3), 1070.40, 1070.41(b) (3) and (c), 1070.42(d)(2)(vi), 1070.44(a), 1070.50(b), 1070.76(b)(2) (i) and (ii).

## PART 1076—MILK IN EASTERN SOUTH DAKOTA MARKETING AREA

§§ 1076.7, 1076.12(b)(2), 1076.14, 1076.15(a)(2), 1076.16, 1076.30(a)(3), 1076.40, 1076.41(b) (2), and (3), and (c), 1076.42(d)(2)(vi), 1076.44(a), 1076.50(b), 1076.76(b)(2) (i) and (ii).

## PART 1078—MILK IN NORTH CENTRAL IOWA MARKETING AREA

§§ 1078.7, 1078.12(b)(2), 1078.14, 1078.15(a)(2), 1078.16, 1078.30(a)(3), 1078.40, 1078.41(b) (2), and (3), and (c), 1078.42(d)(2)(vi), 1078.44(a), 1078.50(b).

## PART 1079—MILK IN DES MOINES, IOWA, MARKETING AREA

§§ 1079.7, 1079.12(b)(2), 1079.14, 1079.15(a)(2), 1079.16, 1079.30(a)(3), 1079.40, 1079.41(b)(3) and (c), 1079.42(d)(2)(vi), 1079.44(a), 1079.50(b), 1079.76(b)(2), (i), and (ii).

## PART 1060—MILK IN MINNESOTA-NORTH DAKOTA MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1060.1 General provisions.

DEFINITIONS

1060.2 Minnesota-North Dakota marketing area.
1060.3 Route disposition.
1060.4 Plant.
1060.5 Distributing plant.
1060.6 Supply plant.
1060.7 Pool plant.
1060.8 Nonpool plant.
1060.9 Handler.
1060.10 Producer-handler.
1060.11 [Reserved]
1060.12 Producer.
1060.13 Producer milk.
1060.14 Other source milk.
1060.15 Fluid milk product.
1060.16 Fluid cream product.
1060.17 Filled milk.
1060.18 Cooperative association.

HANDLER REPORTS

1060.30 Reports of receipts and utilization.
1060.31 Payroll reports.
1060.32 Other reports.

CLASSIFICATION OF MILK

1060.40 Classes of utilization.
1060.41 Shrinkage.
1060.42 Classification of transfers and diversions.
1060.43 General classification rules.
1060.44 Classification of producer milk.
1060.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

Sec.
1060.50 Class prices.
1060.51 Basic formula price.
1060.52 Plant location adjustments for handlers.
1060.53 Announcement of class prices.
1060.54 Equivalent price.

UNIFORM PRICE

1060.60 Handler's value of milk for computing uniform price.
1060.61 Computation of uniform price.
1060.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1060.70 Producer-settlement fund.
1060.71 Payments to the producer-settlement fund.
1060.72 Payments from the producer-settlement fund.
1060.73 Payments to producers and to cooperative associations.
1060.74 Butterfat differential.
1060.75 Plant location adjustments for producers and on nonpool milk.
1060.76 Payments by handler operating a partially regulated distributing plant.
1060.77 Adjustment of accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1060.85 Assessment for order administration.
1060.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1060 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

### § 1060.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

### § 1060.2 Minnesota-North Dakota marketing area.

"Minnesota-North Dakota marketing area" (hereinafter referred to as the "marketing area") means all the territory within the boundaries of the counties listed below, including territory wholly or partly within such boundaries occupied by Government (municipal, State, or Federal) reservations, installations, institutions or other similar establishments:

MINNESOTA

Becker.
Beltrami.
Big Stone.
Clay.
Clearwater.
Douglas.
Grant.
Hubbard.
Kittson.
Lake of the Woods.
Mahnomen.
Marshall.
Norman.
Otter Tail.
Pennington.
Polk.
Red Lake.
Roseau.
Stevens.
Traverse.
Wadena.
Wilkin.

NORTH DAKOTA

Barnes.
Cass.
Cavalier.
Dickey.
Grand Forks.
Griggs.
La Moure.
Nelson.
Pembina.
Ramsey.
Ransom.
Richland.
Sargent.
Steele.
Traill.
Walsh.

SOUTH DAKOTA

Grant.
Roberts.

### § 1060.3 Route disposition.

"Route disposition" means a delivery to a wholesale or retail outlet either directly or through a distributing facility such as a distribution point, a plant store, or a vendor of any fluid milk product classified as Class I milk, other than a delivery to a pool plant or a nonpool plant.

### § 1060.4 Plant.

"Plant" means the land, buildings, facilities, and equipment constituting a single operating unit or establishment at which milk or milk products (including filled milk) are received, processed, and/or packaged. Separate facilities used only as a reload point for transferring bulk milk or filled milk from one tank truck to another shall not be a plant under this definition. Facilities used only as a distribution point for storing fluid milk products in transit on routes shall not be a plant under this definition.

### § 1060.5 Distributing plant.

"Distributing plant" means a plant that is approved by an appropriate health authority for the processing or packaging of Grade A milk and from which there is route disposition during the month.

### § 1060.6 Supply plant.

"Supply plant" means a plant from which a fluid milk product that is acceptable to the appropriate health authority for distribution in the marketing area as Grade A is moved during the month to a distributing plant.

### § 1060.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) A distributing plant from which during the month there is disposed:

(1) As route disposition, except filled milk, in the marketing area not less than 15 percent of Grade A milk receipts at such plant; and

(2) As route disposition, except filled milk, or by transfer to another plant and classified as Class I pursuant to § 1060.42, not less than the applicable percentage of such plant's receipts of Grade A milk:

(i) March through June, 20 percent;

(ii) July through February, 25 percent: *Provided,* That all distributing plants operated by a handler may be considered as one plant for the purpose of meeting the applicable percentage requirement of this subparagraph if the handler submits a written request to the market administrator prior to the delivery period for which such consideration is requested.

(b) A supply plant from which not less than 25 percent of its producer receipts at such plant during the month is shipped as fluid milk products, except filled milk, to pool plants qualified pursuant to paragraph (a) of this section: *Provided,* That a supply plant which qualified pursuant to this paragraph in each of the immediately preceding months of August through November shall be a pool plant for the months of March through June unless the plant operator requests the market administrator in writing that such plant not be a pool plant, such nonpool status to be effective the first month following such notice and thereafter until the plant qualifies as a pool plant on the basis of shipments.

(c) The term "pool plant" shall not apply to the following plants:

(1) A distributing plant from which the Secretary determines a greater portion of the route disposition, except filled milk, is made in another marketing area regulated by another order issued pursuant to the Act and such plant is fully subject to regulation of such other order: *Provided,* That a distributing plant which was a pool plant under this order in the immediately preceding month shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of its route disposition, except filled milk, is made in such other marketing area unless, notwithstanding the provisions of this subparagraph, it is regulated by such other order;

(2) A distributing plant which meets the requirements set forth in paragraph (a) of this section which also meets the requirements of another marketing order on the basis of its route disposition in such other marketing area and from which the Secretary determines a greater quantity of route disposition, except filled milk, is made during the month in this marketing area than in such other marketing area but which plant is nevertheless fully regulated under such other marketing order;

(3) A supply plant from which the Secretary determines a greater proportion of its Grade A receipts, except filled milk, is shipped during the month to plants which are regulated by another order pursuant to the Act if such shipments qualify it as a pool plant under such other order;

(4) A producer-handler plant;

(5) A governmentally owned and operated institution which disposes of Class I milk solely for use on its own premises or to its own facilities. Such an institution shall be exempt from all the provisions of this part; or

(6) That portion of a plant that is physically separated from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing or packaging of any fluid milk product for Grade A disposition.

### § 1060.8 Nonpool plant.

"Nonpool plant" means any milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

V 38 177
SEP 13 73
XUM

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is not an other order plant, a producer-handler plant, or a governmentally owned and operated institution described in § 1060.7 (c)(5), from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant from which fluid milk products are shipped during the month to a distributing plant, and is not an other order plant, a producer-handler plant, or a governmentally owned and operated institution described in § 1060.7 (c)(5).

**§ 1060.9 Handler.**

"Handler" means:

(a) Any person (including any cooperative association) in his capacity as the operator of one or more pool plants;

(b) Any cooperative association with respect to producer milk which it causes to be diverted for its account pursuant to § 1060.13;

(c) Any cooperative association with respect to the milk of its member producers which is delivered directly from the farm to the pool plant of another handler in a tank truck owned, operated by, under contract to, or under the control of such cooperative association. The milk for which a cooperative association is a handler pursuant to this paragraph shall be deemed to have been received at the location of the pool plant to which it was delivered;

(d) Any person who operates a partially regulated distributing plant. This definition shall not apply to a governmentally owned and operated institution as described in § 1060.7(c)(5);

(e) A producer-handler; and

(f) Any person who operates an other order plant as described in § 1060.7(c)(1), (2), or (3).

**§ 1060.10 Producer-handler.**

Producer-handler means any person who meets all of the following conditions:

(a) Operates a dairy farm and a distributing plant;

(b) Receives no milk during the month from other dairy farmers or fluid milk products from sources other than pool plants and not more than 3,000 pounds of milk and fluid milk products (including the milk equivalent of milk products other than fluid milk products which are reconstituted into fluid milk products) during the month from any source;

(c) Receives no milk products other than fluid milk products from any source for reconstitution into fluid milk products except that received within the limitations set forth in paragraph (b) of this section; and

(d) Such person must provide proof satisfactory to the market administrator that (1) the care and management of all the dairy animals and other resources necessary to produce the milk are the personal enterprise of and at the personal risk of such person, and (2) the operation of the processing and distributing business is the personal enterprise of and at the personal risk of such person.

**§ 1060.11 [Reserved]**

**§ 1060.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, which milk is (1) received at a pool plant, or (2) diverted as producer milk pursuant to § 1060.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1060.44(a)(8)(iii) and the corresponding step of § 1060.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1060.13 Producer milk.**

"Producer milk" means all the skim milk and butterfat contained in Grade A milk of a producer that is:

(a) Received during the month at a pool plant directly from such producer or a handler described in § 1060.9(c);

(b) Received by a handler described in § 1060.9(c) from producers in excess of the quantity delivered to pool plants; or

(c) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant or the plant of a governmentally owned and operated institution by the operator of a pool plant or a handler described in § 1060.9(b), if such movement is specifically reported and the conditions of paragraphs (c)(1), (2), and (3) of this section have been met. Such milk shall be deemed to have been received by the diverting handler at the location of the nonpool plant to which diverted in applying §§ 1060.52 and 1060.75:

(1) During March through June a cooperative association handler pursuant to § 1060.9(b) may divert for its account without limit the milk of any member producer. During the months of July through February such handler may divert an aggregate quantity not exceeding 50 percent of the milk of all such producers whose milk has been received at a pool plant(s) for at least 3 days during the month.

(2) During March through June a handler in his capacity as the operator of a pool plant may divert for his account without limit the milk of any producer, other than a member of a cooperative association which has diverted milk pursuant to paragraph (c)(1) of this section. During the months of July through February such handler may divert an aggregate quantity not exceeding 50 percent of the milk of all such producers whose milk has been received at his pool plant(s) for at least 3 days during the month.

(3) In the event milk receipts from dairy farmers are diverted in excess of the applicable percentages pursuant to paragraphs (c)(1) and (2) of this section, the diverting handler shall specify the dairy farmers whose milk was overdiverted. Only the milk of such dairy farmer(s) which is received at a pool plant during the month shall be producer milk for such month.

**§ 1060.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products, specified in § 1060.40(b)(1) from any source other than producers, handlers described in § 1060.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1060.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1060.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1060.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1060.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1060.40 (b) or (c)(1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1060.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1060.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1060.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act;"

(b) Has full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or its products for its members; and

(c) Has its entire activities under the control of its members.

HANDLER REPORTS

**§ 1060.30 Reports of receipts and utilization.**

On or before the seventh day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1060.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1060.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1060.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1060.31 Payroll reports.**

(a) On or before the 20th day after the end of each month, each handler described in § 1060.9 (a), (b), and (c), shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1060.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1060.32 Other reports.**

In addition to the reports required pursuant to §§ 1060.30 and 1060.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1060.40 Classes of utilization.**

Except as provided in § 1060.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1060.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, low fat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, low fat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1060.15; and

(6) In shrinkage assigned pursuant to § 1060.41(a) to the receipts specified in § 1060.41(a)(2) and in shrinkage specified in §1060.41 (b) and (c).

**§ 1060.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1060.30, the market

V 38 I 177 SEP 13 73 XUM

administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a) (1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1060.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1060.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraphs (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1060.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

### § 1060.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1060.44(a)(12) and the corresponding step of § 1060.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to 1060.44(a)(7) or the corresponding step of § 1060.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1060.44(a)(11) or (12) or the corresponding steps of § 1060.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1060.40.

(c) *Transfers to producer-handlers and to exempt government institutions.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order or an exempt government institution defined in § 1060.7(c)(5) shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to its receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, an exempt government institution defined in § 1060.7(c)(5), or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraphs (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1060.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

### § 1060.43 General classification rules.

In determining the classification of producer milk pursuant to § 1060.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1060.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1060.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1060.40, 1060.41, and 1060.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1060.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

### § 1060.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1060.9(a) for each of his pool plants separately and of each handler described in § 1060.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1060.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1060.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1060.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1060.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1060.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order and from an exempt government institution defined in § 1060.7(c)(5);

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor plant;

V 38-177
SEP 13 73
XUM

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraphs (a)(8)(ii) (*a*) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1060.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraphs (a)(7)(vi) and (8)(iii) of this section;

(i) Subject to the provisions of paragraphs (a)(12)(ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1060.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1060.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1060.44(a)(14) and the corresponding step of § 1060.44(b).

### § 1060.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1060.44(a)(12) and the corresponding step of § 1060.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from another order plant, the class to which such receipts are allocated pursuant to § 1060.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler during the immediately preceding month from such cooperative association in its capacity as a handler pursuant to § 1060.9(c) and directly from members of such cooperative association. For the purpose of this report the milk so received shall be prorated to each class in proportion to the utilization by such handler in each class remaining after allocation pursuant to § 1060.44(a)(1) through (13) and the corresponding steps of § 1060.44(b).

## Class Prices

### § 1060.50 Class prices.

Subject to the provisions of § 1060.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.30.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

### § 1060.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

### § 1060.52 Plant location adjustments for handlers.

(a) For producer milk received at a pool plant or diverted to a nonpool plant located outside the base zone and classified as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price computed pursuant to § 1060.50(a) shall be adjusted 1.2 cents for each 10 road miles or fraction thereof that such plant is located beyond the perimeter of the base zone.

(b) For the purposes of calculating such adjustments:

(1) All distances shall be by shortest hard-surfaced highways and/or all-weather-roads, as determined by the market administrator;

(2) The adjustment pursuant to this section shall be added to the Class I price if the plant is located in North or South Dakota and shall be subtracted from such price if the plant is located in Minnesota; and

(3) Transfers of fluid milk products between pool plants shall be assigned Class I milk disposition at the receiving plant, in excess of the sum of receipts at such plant from producers (including receipts from a handler described in § 1060.9(c)) and the pounds assigned as Class I milk to receipts from other order plants and unregulated supply plants. Such assignment is to be made first to shipping plants priced at the same price, next to plants having a higher price, and then in sequence to plants having a lower price, beginning with the plant at which the highest price would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

(d) The "base zone" shall include that portion of the marketing area in the counties of Clay, Marshall, Norman, Pennington, Polk, and Red Lake, all in the State of Minnesota; and the counties of Cass, Grand Forks, and Traill, all in the State of North Dakota.

### § 1060.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

### § 1060.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

## Uniform Price

### § 1060.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1060.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1060.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1060.44(a)(14) and the corresponding step of § 1060.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1060.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1060.44(a)(9) and the corresponding step of § 1060.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1060.44(a)(7)(i) through (iv) and the corresponding step of § 1060.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1060.44(a)(7)(v) and (vi) and the corresponding step of § 1060.44(b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1060.44(a)(11) and the corresponding step of § 1060.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) For the first month that this paragraph is effective, subtract the amount obtained from multiplying the difference between the Class I price for the preceding month applicable at the location of the pool plant and the Class III price for the current month by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1060.40(b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

V 38-177 SEP 13 73 XUM

§ 1060.61 Computation of uniform price.

For each month the market administrator shall compute a uniform price per hundredweight of milk of 3.5 percent butterfat content as follows:

(a) Combine into one total the values computed pursuant to § 1060.60 for all handlers who filed the report prescribed in § 1060.30 for the month and who made the payments pursuant to §§ 1060.71 and 1060.73 for the preceding month;

(b) Add an amount equal to the total value of the minus location adjustments computed pursuant to § 1060.75;

(c) Subtract an amount equal to the total value of the plus location adjustments computed pursuant to § 1060.75;

(d) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(e) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1060.60(f); and

(f) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

§ 1060.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

§ 1060.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all funds received pursuant to paragraph (a) of this section and out of which he shall make all payments required pursuant to paragraph (b) of this section:

(a) Payments made by handlers pursuant to §§ 1060.71, 1060.76, and 1060.77.

(b) Payments due handlers pursuant to §§ 1060.72 and 1060.77: *Provided*, That payments due any handler shall be offset by payments due from such handler pursuant to §§ 1060.71, 1060.76, 1060.77, 1060.85, and 1060.86.

§ 1060.71 Payments to the producer-settlement fund.

(a) On or before the 13th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section: *Provided*, That payment made by a cooperative association as a handler shall not relieve the transferee-handler of any obligation on any such milk which is due the cooperative association, or otherwise due pursuant to §§ 1060.70 through 1060.75, and §§ 1060.77 through 1060.86:

(1) The sum of:

(i) The total value of milk of the handler for such month as determined pursuant to § 1060.60; and

(ii) In the case of a handler described in § 1060.9(c), the minimum amounts due from other handlers pursuant to § 1060.73 (c)(1) before adjustments for butterfat content.

(2) The sum of:

(i) The amount required to be paid producers (including payments to producers through cooperative associations) pursuant to § 1060.73 before adjustment for butterfat content, deductions authorized by the producer or cooperative association, or deductions for marketing services pursuant to § 1060.86; and

(ii) The value at the uniform price applicable at the location of the plant(s) from which received of other source milk for which a value is computed pursuant to § 1060.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (a)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

§ 1060.72 Payments from the producer-settlement fund.

On or before the 14th day after the end of each month the market administrator shall pay (subject to the proviso of § 1060.70(b)) to each handler the amount if any by which the amount computed pursuant to § 1060.71(a)(2) exceeds the amount computed pursuant to § 1060.71(a)(1). The market administrator shall offset any payment due any handler against payments due from such handler. If the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 1060.73 Payments to producers and to cooperative associations.

Each handler shall make payment for milk received from producers or cooperative associations as follows:

(a) To each producer for whom payment is not made pursuant to paragraph (b) or (c) of this section:

(1) A final settlement on or before the 15th day after the end of each month during which producer milk was received, at not less than the uniform price for such milk, adjusted by the butterfat differential computed pursuant to § 1060.74 and subject to the location adjustment to producers pursuant to § 1060.75, and less the following amounts:

(i) The payments made pursuant to paragraph (a)(2) of this section;

(ii) Deductions for marketing services made pursuant to § 1060.86; and

(iii) Any deductions authorized by the producer: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 1060.72, he may reduce his total payment to all producers uniformly by not less than the amount of reduction in payment from the market administrator; the handler shall, however, complete such payments not later than the date for making such payments pursuant to this paragraph next following receipt of the balance from the market administrator; and

(2) A partial payment on or before the last day of each month with respect to producer milk received during the first 15 days of the month at not less than the Class III price for the preceding month (without deduction for hauling);

(b)(1) On or before the second day prior to the date payments are due individual producers as specified in this section, pay to a cooperative association which so requests and which the market administrator determines is authorized by its members to collect payments for their milk and which promises in writing to reimburse the handler the amount of any actual loss incurred by him because of any member's claim on the part of the cooperative association of the payments pursuant to paragraph (a) of this section an amount equal to the sum of the individual payments otherwise payable to such producers. The foregoing payment shall be made with respect to milk of each producer whom the cooperative association certifies is a member effective on and after the first day of the calendar month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the cooperative association; and

(2) A copy of each such request, promise to reimburse, and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination;

(c) To a cooperative association which is a handler pursuant to § 1060.9(a) or (c) for milk which it caused to be delivered to such handler:

(1) A final settlement on or before the 13th day after the end of the month in which the skim milk or butterfat was received, an amount equal to not less than the applicable class prices, as adjusted by the butterfat differential specified in § 1060.74, at the location of the handler's pool plant for all skim milk and butterfat so delivered, less the amount of payment made pursuant to paragraph (c)(2) of this section; and

(2) A partial payment on or before the 26th day of each month at not less than the Class III price for the preceding month (without deduction for hauling) for all skim milk and butterfat so delivered during the first 15 days of the current month;

(d) In making payments to producers pursuant to paragraph (a) of this section, each handler shall furnish each producer with a supporting statement in such form that it may be retained by the producer, which shall show:

(1) The month and the identity of the handler and of the producer;

(2) The pounds per shipment, the total pounds, and the average butterfat test of milk delivered by the producer;

(3) The minimum rate or rates at which payment to the producer is required under the provisions of this section and §§ 1060.74 and 1060.75;

(4) The rate which is used in making payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, including any deduction claimed under paragraph (c)(2) of this section and § 1060.86, together with a description of the respective deductions; and

(6) The net amount of payment to the producer; and

(e) Each handler who receives milk from producers, payment for which is to be made to a cooperative association pursuant to paragraph (b) of this section, shall report to such cooperative association with respect to each such producer, on forms approved by the market administrator, as follows:

(1) On or before the 20th day of the month, the total pounds of milk received during the first 15 days of the month;

(2) On or before the seventh day after the end of the month:

(i) The pounds per shipment, the total pounds of milk and the average butterfat test of milk received from such producer during the month;

(ii) The amount or rate and nature of any deductions; and

(iii) The amount of any payments to such producer pursuant to § 1060.77.

§ 1060.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1060.75 Plant location adjustments for producers and on nonpool milk.

(a) For producer milk received at a pool plant or diverted to a nonpool plant located outside the base zone, the uniform price shall be adjusted at the rate set forth in § 1060.52.

(b) For purposes of computation pursuant to §§ 1060.71(b)(2) and 1060.72 the uniform price shall be adjusted at the rates set forth in § 1060.52 applicable at the location of the nonpool plant(s) from which the milk was received, except that the adjusted uniform price shall not be than the Class III price.

§ 1060.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1060.30(b) and 1060.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and prices as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1060.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1060.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1060.60 for such handler shall include, in lieu of the value of other source milk specified in § 1060.60(f) less the value of such other source milk specified in § 1060.71(a)(2)(ii), a value of milk determined pursuant to § 1060.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1060.7(b), subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1060.30(b) and 1060.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(*c*) The value of milk determined pursuant to § 1060.60 for such nonpool sup-

V 38 177 SEP 13 73 XUM

ply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1060.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1060.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

**§ 1060.77 Adjustment of accounts.**

Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in moneys due the market administrator or any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of the amount due and payment therefor shall be made within 5 days if such amount is due the market administrator, or on or before the next date for making payments to producers or a cooperative association, if such amount is due them. Whenever such audit discloses errors resulting in moneys due such handler from the market administrator, payment shall be made within 5 days.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

**§ 1060.85 Assessment for order administration.**

As his pro rata share of the expense of the administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of each month 4 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to skim milk and butterfat contained in:

(a) Producer milk (including a handler's own farm production);

(b) Other source milk allocated to Class I pursuant to § 1060.44(a) (7) and (11) and the corresponding steps in § 1060.44(b), except such other source milk that is excluded from the computations pursuant to § 1060.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant that exceeds the skim milk and butterfat subtracted pursuant to § 1060.76(a)(2).

**§ 1060.86 Deduction for marketing services.**

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to producers other than to himself pursuant to § 1050.73(a)(1) shall deduct 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all milk received by such handler from producers during the month, and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of milk received from, and to provide market information to, such producers. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall, in lieu of the deductions specified in paragraph (a) of this section, make such deductions from the payments to be made directly to producers pursuant to § 1060.73(a)(1), as are authorized by such producers and, on or before the 15th day after the end of each month, pay over such deductions to the association (of which such producers are members) rendering such services.

(c) When requested by the cooperative association a statement shall be supplied the cooperative association showing for each producer for whom such deduction is made the amount of such deduction, the total delivery of milk, and unless otherwise previously provided, the butterfat test.

1061.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1061.85 Assessment for order administration.
1061.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1061 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1061.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1061.2 Southeastern Minnesota-Northern Iowa (Dairyland) marketing area.**

"Southeastern Minnesota - Northern Iowa (Dairyland) marketing area", hereinafter called the "marketing area", means all the territory within the boundaries of the counties listed below, including all territory within such boundaries occupied by Government (municipal, State, or Federal) reservations, installations, institutions or other similar establishments:

MINNESOTA COUNTIES

| | |
|---|---|
| Blue Earth. | Mower. |
| Brown. | Nicollet. |
| Cottonwood. | Olmsted. |
| Dodge. | Redwood. |
| Faribault. | Rice. |
| Fillmore. | Steele. |
| Freeborn. | Wabasha. |
| Goodhue. | Waseca. |
| Le Sueur. | Watonwan. |
| Martin. | Winona. |

IOWA COUNTIES

| | |
|---|---|
| Howard. | Winnebago. |
| Kossuth. | Winneshiek. |
| Mitchell (except city of Osage). | Worth. |

**§ 1061.3 Route disposition.**

"Route disposition" means a delivery from a plant (including delivery from a retail store at such plant and delivery through vendors or distribution points) of any fluid milk product classified as Class I to a retail or wholesale outlet other than a milk or filled milk plant. A delivery through a vendor or through a distribution point shall be considered a route disposition of the plant at the location of the wholesale or retail outlet to which delivery is made.

**§ 1061.4 [Reserved]**

**§ 1061.5 Distributing plant.**

"Distributing plant" means a plant from which there is route disposition (either directly or through another plant) in the marketing area during the month of a Grade A fluid milk product that is packaged in such plant.

**§ 1061.6 Supply plant.**

"Supply plant" means a plant from which a Grade A fluid milk product is shipped during the month to a distributing plant.

**§ 1061.7 Pool plant.**

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) A distributing plant from which there is disposed of during the month not less than the percentages set forth in paragraph (a) (1) and (2) of this section of the total Grade A fluid milk products received during the month at such plant, including producer milk diverted under § 1061.13(d)(2), but excluding receipts of packaged fluid milk products from other pool distributing plants and receipts from unregulated supply plants and other order plants which are assigned pursuant to § 1061.44 (a)(8) (i) and (iii) and the corresponding step of § 1061.44(b):

(1) Not less than 10 percent of such receipts is disposed of from such plant as Class I milk in the marketing area as route disposition. Such disposition is to be exclusive of filled milk and receipts of packaged fluid milk products from other pool distributing plants; and

(2) Not less than 30 percent during the months of February–August and 40 percent during the months of September–January of such receipts is disposed of as Class I milk as route disposition. Such disposition is to be exclusive of filled milk and receipts of packaged fluid milk products from other pool distributing plants.

(b) A supply plant from which not less than 30 percent of its total Grade A milk receipts from dairy farmers during the month is delivered as fluid milk products, except filled milk, to pool plants pursuant to paragraph (a) of this section subject to paragraph (b) (1) and (2) of this section:

(1) Any plant which qualified pursuant to this paragraph in each of the immediately preceding months of September through November shall be a pool plant for the months of December through August unless written application is filed by the plant operator with the market administrator on or before the first day of any such month requesting the plant be designated a nonpool plant for such month and each subsequent month through August during which it would not otherwise qualify as a pool plant; and

(2) In determining the pool plant qualifications of a cooperative association's plant, member producer milk of such association which is delivered directly to plants described in paragraph (a) of this section shall be considered for purposes of this paragraph as having been first received at the cooperative's plant subject to the following conditions:

(i) Written request is made to the market administrator by the cooperative association prior to or during the month, designating the plant to be a pool plant pursuant to this subparagraph for the month, and for each month thereafter, until such request is withdrawn or terminated pursuant to paragraph (b)(2)(ii) of this section; and

(ii) Any such plant which in a succeeding month is pooled under the provisions of another order issued pursuant to the Act shall not be pooled under this subparagraph for the ensuing 12 months.

(c) The term "pool plant" shall not apply to the following plants or facilities:

(1) A producer-handler plant or an exempt governmental plant;

(2) A plant qualified as a pool plant pursuant to paragraph (a) or (b) of this section that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act unless a greater volume of fluid milk products is disposed of from such plant as route disposition, except route disposition of filled milk, in this marketing area and to pool plants qualified on the basis of route disposition in this marketing area than is so disposed of in the marketing area regulated pursuant to such other order;

(3) If a portion of a plant is operated separately from the Grade A portion of a plant meeting the conditions of paragraph (a) or (b) of this section and is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition, it shall not be considered as part of a pool plant pursuant to this section; and

(4) Facilities used only as a reload point for transferring bulk milk from one tank truck to another shall not be a pool plant or part of a pool plant pursuant to this section.

**§ 1061.8 Nonpool plant.**

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is not an other order plant, a producer-handler plant or an exempt governmental plant and from which fluid milk products eligible for sale as Grade A in consumer-type packages or dispenser units or filled milk are disposed of as route disposition in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is not an other order plant, a producer-handler plant or an exempt governmental plant and from which a Grade A fluid milk product or filled milk is shipped during the month to a pool plant.

(e) "Exempt governmental plant" means a distributing or supply plant operated by a governmental agency.

**§ 1061.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant(s);

(b) Any cooperative association with respect to producer milk which it causes to be diverted for its account from a pool plant of another handler pursuant to § 1061.13;

(c) Any cooperative association with respect to milk of its producers which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by or under contract to such cooperative association;

(d) Any person in his capacity as the operator of a partially regulated distributing plant;

(e) A producer-handler; and

(f) Any person in his capacity as the operator of an other order plant from which during the month fluid milk products are either disposed of as route disposition in the marketing area or shipped to a pool plant.

**§ 1061.10 Producer-handler.**

"Producer-handler" means any person who operates a dairy farm and a distributing plant from which Class I milk of his own production is disposed of as route disposition in the marketing area, and who receives no milk or fluid milk products from the farms of other dairy farmers nor from any other source, except receipts by plant transfer from pool plants and who receives no nonfluid milk products from any source for use in reconstituted fluid milk products: *Provided*, That such person provides proof satisfactory to the market administrator that the care and management of all dairy animals and other resources necessary to produce the entire volume of fluid milk and milk products handled (excluding receipts from pool plants) and the operation of the processing and packaging business are wholly the personal enterprise and risk of such person.

**§ 1061.11 [Reserved]**

**§ 1061.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in com-

V 38-177 SEP 13 73 XUM

pliance with the Grade A inspection requirements of a duly constituted health authority which milk is received as producer milk at a pool plant, or diverted pursuant to § 1061.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1061.44(a)(3)(iii) and the corresponding step of § 1061.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1061.13 Producer milk.**

"Producer milk" means the skim milk and butterfat in Grade A milk:

(a) Received at a pool plant directly from a producer;

(b) Received at a pool plant from a handler described in § 1061.9(c);

(c) Received by a handler described in § 1061.9(c) from producers in excess of the quantity delivered to pool plants; or

(d) Moved as diverted milk, subject to the conditions in paragraphs (d)(1), (2), and (3) of this section, from a pool plant to a nonpool plant that is not a producer-handler plant. "Diverted milk" means, for any month, milk produced by a dairy farmer which a pool plant handler or a handler described in § 1061.9(b) caused to be moved from the farm to a nonpool plant that is not a producer-handler plant if such milk is claimed as producer milk and the following conditions have been met:

(1) During the months of February through August a cooperative association handler pursuant to § 1061.9(b), may divert for its account, without limit on the remaining days, the milk of any member who was a producer during the previous month or whose milk is delivered to a pool plant on at least 1 day during the current month. During the months of September through January such handler may divert as producer milk the milk of any member producer whose milk is delivered to a pool plant described in § 1061.7(a) on at least 1 day during the month except that the aggregate quantity of producer milk diverted by such handler shall not exceed the quantity of milk delivered during that month by all its member producers to pool plants described in § 1061.7(a);

(2) During February through August a handler in his capacity as the operator of a pool plant may divert for his account, without limit on the remaining days, the milk of any dairy farmer who was a producer during the previous month or whose milk is received at his pool plant on at least 1 day during the current month. During the months of September through January such handler may divert as producer milk the milk of any producer whose milk is received at his pool plant on at least 1 day during the month except that the aggregate quantity of producer milk diverted by such handler shall not exceed the quantity of milk received during the month at his pool plant from all producers except the member producers of a cooperative which diverted milk during the month pursuant to paragraph (d)(1) of this section; and

(3) If milk receipts from dairy farmers are diverted in excess of the quantities allowed pursuant to paragraphs (d)(1) and (2) of this section, the diverting handler shall specify the dairy farmers whose milk was overdiverted. If the diverting handler does not specify the dairy farmers whose milk was overdiverted, only the milk of dairy farmers which is received at a pool plant during the month shall be producer milk for such month.

**§ 1061.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1061.40(b)(1) from any source other than producers, handlers described in § 1061.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1061.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1061.40(b)(1), and products produced at the plant during the same month) which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1061.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1061.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1061.40 (b) or (c)(1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1061.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1061.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1061.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) Has full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or its products for its members.

HANDLER REPORTS

**§ 1061.30 Reports of receipts and utilization.**

On or before the eighth day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1061.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1061.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1061.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1061.31 Payroll reports.**

(a) On or before the 25th day after the end of each month, each handler described in § 1061.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1061.76 (b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1061.32 Other reports.**

In addition to the reports required pursuant to §§ 1061.30 and 1061.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1061.40 Classes of utilization.**

Except as provided in § 1061.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1061.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (b)(1) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1061.15; and

(6) In shrinkage assigned pursuant to § 1061.41(a)(2) and in shrinkage specified in § 1061.41(b) and (c).

**§ 1061.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1061.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1061.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1061.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)

V 38-177 SEP 13 73 XUM

(1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1061.9 (b) or (c), cut not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1061.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1061.44(a)(12) and the corresponding step of § 1061.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1061.44(a)(7) or the corresponding step of § 1061.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1061.44(a)(11) or (12) or the corresponding steps of § 1061.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1061.40.

(c) *Transfers to producer-handlers and transfers and diversions to exempt governmental plants.* Skim milk or butterfat in the following forms that is transferred from a pool plant to a producer-handler under this or any other Federal order or transferred or diverted from a pool plant to an exempt governmental plant shall be classified:

(1) As Class I milk if so moved in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, a producer-handler plant, or an exempt governmental plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i)(*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipt as set forth in paragraph (d)(2)(ii) through (viii) of this section:

(*a*) The transferor-handler or divertor-handler claims such classification in his report of receipts and utilization filed pursuant to § 1061.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

**§ 1061.43 General classification rules.**

In determining the classification of producer milk pursuant to § 1061.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1061.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1061.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1061.40, 1061.41, and 1061.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1061.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

**§ 1061.44 Classification of producer milk.**

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1061.9(a) for each of his pool plants separately and of each handler described in § 1061.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1061.41 (b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1061.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1061.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1061.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1061.40(b)(1) that was not subtracted pursuant to paragraph (a) (4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order and from an exempt governmental plant;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii)(*a*) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1061.40(b)(1) in

V 38-177 SEP 13 73 XUM

inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a) (2), (7)(v), and (8) (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a) (7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1061.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1061.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1061.44(a)(14) and the corresponding step of § 1061.44(b).

### § 1061.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1061.44(a)(12) and the corresponding step of § 1061.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1061.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 20th day of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler during the immediately preceding month from such cooperative association in its capacity as a handler pursuant to § 1061.9(c) and directly from members of such cooperative association. For the purpose of this report, the milk so received shall be prorated to each class in proportion to the utilization by such handler in each class remaining after allocation pursuant to § 1061.44(a) (1) through (13), and the corresponding steps of § 1061.44(b).

### Class Prices

### § 1061.50 Class prices.

The class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.06.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

### § 1061.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92 score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

### § 1061.52 [Reserved]

### § 1061.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

### § 1061.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

### Uniform Price

### § 1061.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1061.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1061.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1061.44(a)(14) and the corresponding step of § 1061.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1061.74;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1061.44(a)(9) and the corresponding step of § 1061.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1061.44(a)(7) and the corresponding step of § 1061.44(b), excluding receipts of bulk fluid cream products from another order plant;

(e) Add the amount obtained from multiplying the Class I price by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1061.44(a)(11) and the corresponding step of § 1061.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(f) For the first month that this paragraph is effective, subtract the amount obtained from multiplying the difference between the Class I price for the preceding month and the Class III price for the current month by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1061.40 (b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

### § 1061.61 Computation of uniform price.

For each month the market administrator shall compute a uniform price per hundredweight of milk of 3.5 percent butterfat content as follows:

(a) Combine into one total the values computed pursuant to § 1061.60 for all handlers who filed reports pursuant to § 1061.30 for the month and who made payments pursuant to § 1061.71 for the preceding month;

(b) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(c) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1061.60(e); and

(d) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

### § 1061.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

### Payments For Milk

### § 1061.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1061.71, 1061.76, and 1061.77 and out of which he shall make all payments due handlers pursuant to §§ 1061.72 and 1061.77: *Provided*, That the market administrator shall offset any payments due any handler against payments due from such handler.

### § 1061.71 Payments to the producer-settlement fund.

(a) On or before the 14th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1061.60.

(2) The sum of:

(i) The value at the uniform price of such handler's receipts of producer milk; and

(ii) The value at the uniform price of other source milk for which a value is computed pursuant to § 1061.60(e).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part and the Class III price.

### § 1061.72 Payments from the producer-settlement fund.

On or before the 16th day after the end of each month, the market administrator shall pay, subject to the proviso of § 1061.70, to each handler the amount if any, by which the amount computed pursuant to § 1061.71(a)(2) exceeds the amount computed pursuant to § 1061.71 (a)(1).

### § 1061.73 Payments to producers and to cooperative associations.

Each handler shall make payment for milk received from producers or cooperative associations as follows:

(a) To each producer for whom payment is not made pursuant to paragraph (b) and (c) of this section:

(1) On or before the 20th day of the following month not less than the uniform price, adjusted by the butterfat differential computed pursuant to § 1061.74 and less the following amounts:

(i) The payments made pursuant to paragraph (a)(2) of this section;

(ii) Deductions for marketing services pursuant to § 1061.86; and

(iii) Any proper deductions authorized by the producer: *Provided*, That if by such date such handler has not received full payment from the market administrator pursuant to § 1061.72 for such month, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator; and

(2) A partial payment on or before the fifth day of the following month to each producer who had not discontinued shipping milk to such handler at not less than the Class III price for the preceding month for producer milk received during the first 15 days of the month (without deduction for hauling);

(b) Payments required in paragraph (a) of this section shall be made on or before the second day prior to the dates set forth in paragraph (a) of this section to a cooperative association (except

V 38-177 SEP 13 73 XUM

as specified in paragraph (c) of this section) qualified under § 1061.18, or its duly authorized agent, if the cooperative association so requests and the market administrator determines it is authorized by its members to collect payments for their milk. Payments to the cooperative association under this paragraph shall be made subject to the condition that the association has provided the handler with a promise to reimburse the handler the amount of any actual loss incurred by such handler because of any improper claim on the part of the cooperative association;

(c) On or before the 11th day after the end of the month, each handler shall pay a cooperative association which is a handler with respect to all skim milk and butterfat received by him from a pool plant operated by such cooperative association not less than the applicable class prices as adjusted by the butterfat differential specified in § 1061.74; and

(d) In making payment to individual producers as required by § 1061.73, each handler shall furnish each producer from whom he received milk a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month involved, and the identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of the milk received from the producer;

(3) The minimum rate at which payment to the producer is required pursuant to § 1061.73;

(4) The rate used in making the payment if such rate is other than the applicable minimum;

(5) The amount (or rate) per hundredweight of each deduction claimed by the handler, including any deduction claimed under § 1061.86, together with a description of the respective deductions; and

(6) The net amount of the payment to the producer.

**§ 1061.74 Butterfat differential.**

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

**§ 1061.75 [Reserved]**

**§ 1061.76 Payments by handler operating a partially regulated distributing plant.**

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1061.30(b) and 1061.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price; and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1061.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1061.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1061.60 for such handler shall include, in lieu of the value of other source milk specified in § 1061.60(e) less the value of such other source milk specified in § 1061.71(a)(2)(ii), a value of milk determined pursuant to § 1061.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1061.7(b) subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1061.30 (b) and 1061.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(*c*) The value of milk determined pursuant to § 1061.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1061.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1061.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

**§ 1061.77 Adjustment of accounts.**

When verification by the market administrator of reports or payment of any handler discloses errors resulting in money due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made not later than the date for making payment next following such disclosure.

**§ 1061.78 Charges on overdue accounts.**

The unpaid obligation of a handler pursuant to §§ 1061.71, 1061.76, and 1061.77 shall be increased three-fourths of 1 percent for each month or portion thereof that such obligation is overdue: *Provided*, That,

(a) The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include any unpaid charges previously made pursuant to this section; and

(b) For the purpose of this section, any obligation that was determined at a date later than prescribed by the order because of a handler's failure to submit a report to the market administrator when due, shall be considered to have been payable by the date it would have been due if the report had been filed when due.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

**§ 1061.85 Assessment for order administration.**

As his pro rata share of the expense of administration, each handler shall pay to the market administrator on or before the 14th day after the end of the month, 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to milk handled during the month as follows:

(a) Each handler (excluding a cooperative association as the operator of a pool plant with respect to milk transferred in bulk to a pool plant of another handler) with respect to his receipts of producer milk (including such handler's own-farm production, and milk received in bulk from a pool plant owned and operated by a cooperative association);

(b) Other source milk allocated to Class I pursuant to § 1061.44(a) (7) and (11) and the corresponding steps of § 1061.44(b), except such other source milk that is excluded from the computations pursuant to § 1061.60 (d) and (e); and

(c) Each handler in his capacity as the operator of a partially regulated distributing plant with respect to his route disposition in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1061.76(a)(2).

**§ 1061.86 Deduction for marketing services.**

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1061.73 shall deduct 6 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to producer milk received by such handler (except such handler's own farm production) during the month, and shall pay such deductions to the market administrator not later than the 18th day after the end of the month. Such moneys shall be used by the market administrator to verify or establish weights, samples, and tests of producer milk and to provide producers with market information. Such services shall be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of member producers for whom a cooperative association is performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section such deductions as are authorized by such producers and, on or before the 18th day after the end of each month, pay over such deductions to the association rendering such services.

## PART 1063—MILK IN QUAD CITIES-DUBUQUE MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1063.1 General provisions.

DEFINITIONS

1063.2 Quad Cities-Dubuque marketing area.
1063.3 [Reserved]
1063.4 [Reserved]
1063.5 Distributing plant.
1063.6 Supply plant.
1063.7 Pool plant.
1063.8 Nonpool plant.
1063.9 Handler.
1063.10 Producer-handler.
1063.11 [Reserved]
1063.12 Producer.
1063.13 Producer milk.
1063.14 Other source milk.
1063.15 Fluid milk product.
1063.16 Fluid cream product.
1063.17 Filled milk.
1063.18 Cooperative association.

HANDLER REPORTS

1063.30 Reports of receipts and utilization.
1063.31 Payroll reports.
1063.32 Other reports.

CLASSIFICATION OF MILK

1063.40 Classes of utilization.
1063.41 Shrinkage.
1063.42 Classification of transfers and diversions.
1063.43 General classification rules.
1063.44 Classification of producer milk.
1063.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1063.50 Class prices.
1063.51 Basic formula price.
1063.52 Plant location adjustments for handlers.
1063.53 Announcement of class prices.
1063.54 Equivalent price.

UNIFORM PRICE

1063.60 Handler's value of milk for computing uniform price.
1063.61 Computation of uniform price.
1063.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1063.70 Producer-settlement fund.
1063.71 Payments to the producer-settlement fund.
1063.72 Payments from the producer-settlement fund.
1063.73 Payments to producers and to cooperative associations.
1063.74 Butterfat differential.
1063.75 Plant location adjustments for producers and on nonpool milk.
1063.76 Payments by handler operating a partially regulated distributing plant.
1063.77 Adjustment of accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1063.85 Assessment for order administration.
1063.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1063 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1063.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1063.2 Quad Cities-Dubuque marketing area.**

"Quad Cities-Dubuque marketing area", hereinafter called the marketing area, means the territory within the boundaries of the counties of Clinton, Dubuque, Jackson, Muscatine, and Scott in the State of Iowa; the counties of Henry, Mercer, and Rock Island, and the city of East Dubuque, in the State of Illinois, including territory within such boundaries that is occupied by Government (municipal, State or Federal) reservations, installations, institutions, or other establishments.

**§ 1063.3 [Reserved]**

**§ 1063.4 [Reserved]**

**§ 1063.5 Distributing plant.**

"Distributing plant" means a plant which is approved by an appropriate health authority for the processing or packaging of Grade A milk from which any fluid milk product is processed or packaged and disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) located in the marketing area.

**§ 1063.6 Supply plant.**

"Supply plant" means a plant from which milk or skim milk which is acceptable to the appropriate health authority for distribution in the marketing area under a Grade A label is shipped during the month to a pool plant qualified pursuant to § 1063.7.

**§ 1063.7 Pool plant.**

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant from which:

(1) The volume of Class I packaged fluid milk products, except filled milk, disposed of during the month either on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets or moved to other plants, less receipts of packaged fluid milk products other than filled milk from other pool distributing plants, is not less

V 38-177 SEP 13 73 XUM

than 45 percent of the total Grade A fluid milk products, except filled milk, received at such plant, exclusive of receipts of packaged fluid milk products from other pool distributing plants and receipts from other order plants which are assigned pursuant to § 1063.44(a)(8)(iii) and the corresponding step of § 1063.44(b); and

(2) Not less than 15 percent of such receipts during the month are so disposed of in the marketing area on routes.

(b) A supply plant from which the volume of fluid milk products, except filled milk, shipped during the month to plants qualified pursuant to paragraph (a) of this section is not less than 35 percent of the Grade A milk received at such plant from dairy farmers during such month: *Provided*, That if such shipments are not less than 50 percent of the receipts of Grade A milk directly from dairy farmers at such plant during the immediately preceding period of September through November, such plant shall be a pool plant for the months of December through August, unless written application is filed with the market administrator on or before the 1st day of any of the months of December through August to be designated a nonpool plant for such month and for each subsequent month through August.

(c) A plant operated by a cooperative association from whose members the total pounds of producer milk received at the pool plants of other handlers during the month, or during the 12-month period immediately preceeding such month, are more than the total pounds of Grade A milk received at its plant from dairy farmers during the corresponding period: *Provided*, That if written application is filed with the market administrator on or before the 5th day of any month such plant may be designated a nonpool plant for such month and for any subsequent months.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A plant otherwise qualified as a pool plant pursuant to paragraph (a), (b), or (c), of this section during any month in which such plant would be subject to the classification and pricing provisions of another order issued pursuant to the Act unless the disposition of fluid milk products, except filled milk, from such plant to pool plants qualified under paragraph (a), (b), or (c), of this section and to retail and wholesale outlets in the Quad Cities-Dubuque marketing area exceeds such disposition to retail and wholesale outlets in such other marketing area and to pool plants regulated by such other order except in the following circumstances:

(i) If a distributing plant were qualified pursuant to paragraph (a) of this section during each of the 3 immediately preceding months, it would continue to be subject to all the provisions of this part until after the 3d consecutive month in which it remains so qualified and has a greater proportion of its fluid milk product disposition, except filled milk, made in the above described manner in such other marketing area, unless, notwithstanding the provisions of this paragraph, it is regulated under such other order; or

(ii) A distributing plant qualified pursuant to paragraph (a) of this section that is fully regulated under another Federal order but which has greater fluid milk product (except filled milk) disposition during the month on routes in the Quad Cities-Dubuque marketing area and to pool plants qualified on the basis of route distribution in the Quad Cities-Dubuque marketing area than in such other Federal order marketing area; and

(3) That portion of a plant that is physically apart from the Grade A portion of such plant, is operated separately and is not approved by any health authorities for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

### § 1063.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant, other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products in consumer-type packages or dispenser units are distributed on routes in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant from which fluid milk products are shipped during the month to a pool plant.

### § 1063.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any cooperative association with respect to the milk from producers diverted pursuant to § 1063.13 by the cooperative association for the account of such association;

(c) [Reserved]

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler;

(f) Any person who operates an other order plant described in § 1063.7(d); and

(g) Any person in his capacity as the operator of an unregulated supply plant.

### § 1063.10 Producer-handler.

"Producer-handler" means any person who operates a dairy farm and a distributing plant but who receives no milk from producers or other source milk.

### § 1063.11 [Reserved]

### § 1063.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority and whose milk is received as producer milk at a pool plant or diverted pursuant to § 1063.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1063.44(a)(8)(iii) and the corresponding step of § 1063.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

### § 1063.13 Producer milk.

"Producer milk" means the skim milk and butterfat contained in Grade A milk received at a pool plant directly from a producer. Milk normally received from a producer at a pool plant which is diverted from such pool plant by the operator of the plant or a handler described in § 1063.9(b) to a nonpool plant that is not a producer-handler plant shall also be producer milk and shall be deemed to have been received by the diverting handler at the plant from which diverted: *Provided*, That in any of the months of July through January milk diverted from the farm of a producer on more than the number of days that milk was delivered to a pool plant from such farm during the month shall not be deemed to have been received by the diverting handler.

### § 1063.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1063.40(b)(1) from any source other than producers, pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1063.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1063.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1063.40(b)(1)) for which the handler fails to establish a disposition.

### § 1063.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1063.40 (b) or (c)(1)(i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

### § 1063.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

### § 1063.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

### § 1063.18 Cooperative association.

"Cooperative association" means any cooperative marketing association which the Secretary determines:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To be engaged in making collective sales, or marketing milk or its products for its members.

## Handler Reports

### § 1063.30 Reports of receipts and utilization.

On or before the 7th day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) [Reserved]

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1063.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition of fluid milk products in the marketing area.

(c) Each handler described in § 1063.9(b) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

### § 1063.31 Payroll reports.

(a) On or before the 20th day after the end of each month, each handler described in § 1063.9 (a) and (b) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1063.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

### § 1063.32 Other reports.

In addition to the reports required pursuant to §§ 1063.30 and 1063.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

## Classification of Milk

### § 1063.40 Classes of utilization.

Except as provided in § 1063.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1063.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is noti-

V 38-177 SEP 13 73 XUM

fied of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1063.15; and

(6) In shrinkage assigned pursuant to § 1063.41(a) to the receipts specified in § 1063.41(a)(2) and in shrinkage specified in § 1063.41 (b) and (c).

**§ 1063.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1063.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant).

(2) [Reserved]

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraphs (b) (1), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1063.9(b), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1063.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1063.44(a)(12) and the corresponding step of § 1063.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1063.44(a)(7) of the corresponding step of § 1063.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1063.44 (a) (11) or (12) or the corresponding steps of § 1063.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market adminstrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order.

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1063.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2)(ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1063.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition of fluid milk products in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

**§ 1063.43 General classification rules.**

In determining the classification of producer milk pursuant to § 1063.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1063.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1063.9(b) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1063.40, 1063.41, and 1063.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1063.9(b) shall be determined separately from the operations of any pool plant operated by such cooperative association.

**§ 1063.44 Classification of producer milk.**

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1063.9(a) for each of his pool plants separately and of each handler described in § 1063.9(b) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1063.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1063.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1063.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1063.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1063.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that re-

V 38-177 SEP 13 73 XUM

constituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (a) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(a) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(b) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1063.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received;

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1063.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1063.44(a)(14) and the corresponding step of § 1063.44(b).

### § 1063.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1063.44(a)(12) and the corresponding step of § 1063.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1063.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 10th day after the end of each month, report to each cooperative association, which so requests, the percentage of milk caused to be delivered by the cooperative association or its members to the pool plant(s) of each handler during the month, which was utilized in each class. For the purpose of this report, the milk so delivered shall be allocated to each class for each handler in the same ratio as all producer milk received by such handler during the month.

## Class Prices

### § 1063.50 Class prices.

Subject to the provisions of § 1063.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.33.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

### § 1063.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92 score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

### § 1063.52 Plant location adjustments for handlers.

(a) For milk received from producers at a pool plant and disposed of as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price specified in § 1063.50(a) shall be adjusted as follows:

(1) At a plant in Dubuque and Jackson Counties, Iowa, and East Dubuque, Ill., subtract 10 cents;

(2) At a plant located outside the marketing area, north of U.S. Highway No. 80, and, except as provided in paragraph (a)(3) of this section, 70 miles or more, by the shortest hard-surfaced highway distance as determined by the market administrator, from the nearer of the City Hill, Rock Island, Ill., or the Post Office, West Liberty, Iowa, subtract 10 cents and subtract an additional 1.5 cents for each 10 miles or fraction thereof that such distance exceeds 80 miles; and

(3) At a plant located in that Iowa territory beyond 70 miles from the nearer of the City Hall, Rock Island, Ill., or the Post Office, West Liberty, Iowa, and south of U.S. Highway No. 80, or within the Des Moines, Iowa, marketing area as specified in Part 1079, add any amount by which the price specified in § 1063.50(a) is exceeded by the applicable Class I price at the same location pursuant to Part 1079 regulating the handling of milk in the Des Moines, Iowa, marketing area.

(b) For purposes of calculating such adjustments, transfers between pool plants shall be assigned Class I disposition at the tranferee-plant, in excess of the sum of receipts at such plant from producers, and the volume assigned as Class I to receipts from other order plants and unregulated supply plants, such assignment to be made first to transferor-plants having the same Class I price, next to transferor-plants having a higher Class I price, and then in sequence to the plants having a lower Class I price beginning with the plant at which the highest Class I price would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

### § 1063.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

### § 1063.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

## Uniform Price

### § 1063.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1063.9(b) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1063.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1063.44(a)(14) and the corresponding step of § 1063.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1063.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1063.44(a)(9) and the corresponding step of § 1063.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1063.44(a)(7)(i) through (iv) and the corresponding step of § 1063.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1063.44(a)(7)(v) and (vi) and the corresponding step of § 1063.44(b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1063.44(a)(11) and the corresponding step of § 1063.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

V 38 177 SEP 13 73 XUM

**§ 1063.61 Computation of uniform price.**

For each month the market administrator shall compute a uniform price for milk of 3.5 percent butterfat content f.o.b. Rock Island, Ill., as follows:

(a) Combine into one total the values computed pursuant to § 1063.60 for all handlers who made the reports prescribed in § 1063.30 for such month, except those in default of payments required pursuant to § 1063.71 for the preceding month;

(b) Add the aggregate of the values of minus location adjustments and subtract the aggregate of all plus location adjustments pursuant to § 1063.75;

(c) Add an amount equal to one-half of the unobligated cash balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1063.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The result shall be known as the uniform price for milk received from producers.

**§ 1063.62 Announcement of uniform price and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 10th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

**§ 1063.70 Producer-settlement fund.**

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1063.71, 1063.76, and 1063.77 and out of which he shall make all payments to handlers pursuant to §§ 1063.72 and 1063.77.

**§ 1063.71 Payments to the producer-settlement fund.**

(a) On or before the 12th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1063.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1063.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1063.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

**§ 1063.72 Payments from the producer-settlement fund.**

On or before the 14th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1063.71(a)(2) exceeds the amount computed pursuant to § 1063.71(a)(1): *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. A handler who has not received the balance of such payments from the market administrator shall not be considered in violation of § 1063.73 if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

**§ 1063.73 Payments to producers and to cooperative associations.**

Each handler shall make payment as follows:

(a) On or before the 17th day after the end of each month during which milk was received, to each producer for milk received from him and for which payment is not made pursuant to paragraph (b) of this section, at not less than the uniform price as adjusted pursuant to §§ 1063.74 and 1063.75.

(b) On or before the 15th day after the end of each month during which the milk was received, to a cooperative association for milk which it caused to be delivered to such handler from producers, if such cooperative association is authorized to collect such payments for its member producers and exercises such authority, an amount equal to the sum of the individual payments otherwise payable to such producers.

(c) On or before the 10th day after the end of the month, each handler shall pay to each cooperative association which is also a handler, for milk received from it not less than the value of such milk as classified pursuant to this part at the respective class prices, as adjusted by the butterfat differential specified in § 1063.74, that are applicable at the location of the receiving handler's pool plant.

**§ 1063.74 Butterfat differential.**

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

**§ 1063.75 Plant location adjustments for producers and on nonpool milk.**

(a) The uniform price for producer milk pursuant to § 1063.61 received at a pool plant shall be adjusted according to the location of the pool plant, at the rates set forth in § 1063.52; and

(b) For purposes of computations pursuant to §§ 1063.71 and 1063.72 the uniform price shall be adjusted at the rates set forth in § 1063.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted uniform price shall not be less than the Class III price.

**§ 1063.76 Payments by handler operating a partially regulated distributing plant.**

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1063.30(b) and 1063.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1063.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1063.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1063.60 for such handler shall include, in lieu of the value of other source milk specified in § 1063.60(f) less the value of such other source milk specified in § 1063.71(a)(2)(ii), a value of milk determined pursuant to § 1063.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1063.7(b) subject to the following conditions:

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1063.30(b) and 1063.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1063.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1063.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1063.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

**§ 1063.77 Adjustment of accounts.**

Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in moneys due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due; and payment thereof shall be made on or before the next date for making payment set forth in the provisions under which such error occurred.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

**§ 1063.85 Assessment for order administration.**

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 3 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to: (a) Producer milk, (b) other source milk allocated to Class I pursuant to § 1063.44(a)(7) and (11) and the corresponding steps of § 1063.44(b), except such other source milk that is excluded from the computations pursuant to § 1063.60(d) and (f); and (c) Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1063.76(a)(2).

**§ 1063.86 Deduction for marketing services.**

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1063.73, shall deduct 6 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all milk received by such handler from such producer (except such handler's own farm production), during the month, and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of milk received by handlers from such producers during the month and to provide such producers with market information.

(b) In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and, on or before the 15th day after the end of each month, pay over such deductions to the association rendering such services.

## PART 1064—MILK IN THE GREATER KANSAS CITY MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1064.1 General provisions.

DEFINITIONS

1064.2 Greater Kansas City marketing area.
1064.3 Route disposition.
1064.4 [Reserved]
1064.5 Distributing plant.
1064.6 Supply plant.
1064.7 Pool plant.
1064.8 Nonpool plant.
1064.9 Handler.
1064.10 Producer-handler.
1064.11 [Reserved]
1064.12 Producer.
1064.13 Producer milk.
1064.14 Other source milk.
1064.15 Fluid milk product.
1064.16 Fluid cream product.
1064.17 Filled milk.
1064.18 Cooperative association.

HANDLER REPORTS

1064.30 Reports of receipts and utilization.
1064.31 Payroll reports.

1064.121 Duties of the market administrator.
1064.122 Liquidation.

AUTHORITY: The provisions of this Part 1064 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

## GENERAL PROVISIONS

### § 1064.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

## DEFINITIONS

### § 1064.2 Greater Kansas City marketing area.

"Greater Kansas City marketing area," hereinafter called "marketing area," means all the territory within the boundaries of the counties listed below, including territory within such boundaries occupied by government (municipal, State, or Federal) reservations, installations, institutions, or other similar establishments:

MISSOURI COUNTIES

| | |
|---|---|
| Andrew. | Henry. |
| Atchison. | Holt. |
| Bates. | Jackson. |
| Buchanan. | Johnson. |
| Cass. | Lafayette. |
| Clay. | Nodaway. |
| Clinton. | Pettis. |
| Daviess. | Platte. |
| De Kalb. | St. Clair. |
| Gentry. | Worth. |

KANSAS COUNTIES

| | |
|---|---|
| Atchison. | Marshall. |
| Brown. | Miami. |
| Clay. | Morris. |
| Cloud. | Nemaha. |
| Dickinson. | Ottawa. |
| Donlphan. | Pottawatomie. |
| Douglas. | Republic. |
| Geary. | Riley. |
| Jackson. | Saline. |
| Jefferson. | Shawnee. |
| Johnson. | Wabaunsee. |
| Leavenworth. | Washington. |
| Lyon. | Wyandotte. |

### § 1064.3 Route disposition.

"Route disposition" means a delivery (either direct or through a distributing facility such as a distribution point, a plant store, a vendor, or vending machine), other than a delivery to a pool plant or a nonpool plant, of a fluid milk product classified as Class I milk.

### § 1064.4 [Reserved]

### § 1064.5 Distributing plant.

"Distributing plant" means a plant from which during the month there is route disposition in the marketing area of Grade A fluid milk products that are processed or packaged in such plant.

### § 1064.6 Supply plant.

"Supply plant" means a plant from which a Grade A fluid milk product is shipped during the month to a pool plant.

### § 1064.7 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant from which during the month or the immediately preceding month there is:

(1) Route disposition, except filled milk, in the marketing area that is not less than 15 percent of the total Grade A fluid milk products, except filled milk, received at such plant, including producer milk diverted to other plants pursuant to § 1064.13 by the handler operating such plant; and

(2) Route disposition, except filled milk, that is not less than the following percentage of the total Grade A fluid milk products, except filled milk, received at such plant, including producer milk diverted to other plants pursuant to § 1064.13 by the handler operating such plant: *Provided,* That the combined receipts and disposition of each handler who operates more than one distributing plant, each of which meets the performance requirements of paragraph (a)(1) of this section, shall be used in determining the percentages specified in this subparagraph:

(i) April through June, 35 percent;

(ii) September and October, 50 percent; and

(iii) All other months, 45 percent.

(b) A supply plant from which during the month 50 percent or more of the Grade A milk received at such plant from dairy farmers (including receipts from handler described in § 1064.9(c), except receipts of milk diverted pusuant to § 1064.13) is disposed of as fluid milk products (except filled milk) in one or both of the following ways: (1) Shipped to and received at pool distributing plants, or (2) as a route disposition sale in the marketing area. A supply plant which is a pool plant under this paragraph during each month of September through January shall be pooled for the following months of February through August, if the required percentage pursuant to this paragraph is not met, unless the plant operator files written request with the market administrator that such plant not be a pool plant, such nonpool status to be effective the first month following such request and thereafter until the plant qualifies as a pool plant on the basis of shipments.

(c) A supply plant operated by a cooperative association in any month in which the member producer milk of such cooperative association received at pool distributing plants during the current month, or immediately preceding 12-month period ending with the current month, either by transfer from such supply plant or directly from member producers' farms, is 50 percent or more of such cooperative's total member producer milk. Such direct deliveries from member producers' farms shall be considered as having been received first at the plant of such cooperative association for the purpose of determining the qualification of such plant as a pool plant pursuant to this paragraph. If two or more cooperative associations desire to qualify a supply plant operated by one of the associations as a pool plant on the basis of their combined deliveries to pool distributing plants and have filed a written request to this effect with the market administrator on or before the first day of the month the agreement is effective, such a supply plant shall be a pool plant during the month if the above specified percentage of the total member producer milk of such cooperative associations was received at pool distributing plants during the current month, or the immediately preceding 12-month period ending with the current month.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A distributing plant or supply plant operated by a State educational institution;

(3) A plant from which there is route disposition in the marketing area of less than an average of 600 pounds per day;

(4) A distributing plant qualified pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal order and from which during the month a greater volume of fluid milk products, except filled milk, was disposed of as route disposition in such other marketing area and to pool plants qualified on the basis of route disposition in such other marketing area than was so disposed of in this marketing area except that if such plant was subject to all the provisions of this part in the immediately preceding month, it shall continue to be subject to all the provisions of this part until the third consecutive month in which a greater proportion of its fluid product disposition, except filled milk, is made in the above described manner in such other marketing area, unless, notwithstanding the provisions of this subparagraph, it is regulated under such other order;

(5) A distributing plant qualified pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal order and from which during the month a greater volume of fluid milk products, except filled milk, was disposed of as route disposition in this marketing area and to pool plants qualified on the basis of route disposition in this marketing area than was so disposed of in such other Federal order marketing area but which plant is, nevertheless, fully regulated under such other Federal order;

(6) A supply plant meeting the pooling requirements of paragraph (b) of this section which also meets the pooling requirements of another Federal order, and which has greater direct marketing area route disposition, except filled milk, and qualifying shipments to plants regulated under such other order than are made under this order, unless during any month of February through August automatic pool plant status for such plant is retained under this part for such month; and

(7) A supply plant which would be subject to the classification and pricing provisions of another order issued pursuant to the Act, unless such plant also qualified as a pool plant pursuant to paragraph (c) of this section.

### § 1064.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant (except the plant of a handler pursuant to § 1064.9(h), an other order plant, or a producer-handler plant) from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant which is not an other order plant, a producer-handler plant, or a plant of a handler pursuant to § 1064.9(h) from which a fluid milk product is shipped during the month to a pool plant.

### § 1064.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any cooperative association with respect to producer milk which it causes to be diverted pursuant to § 1064.13 for the account of such cooperative association;

(c) Any cooperative association with respect to the milk of its producers which is received by the cooperative from the farm for delivery to the pool plant of another handler in a tank truck owned or operated by or under contract to such cooperative association if the cooperative association, prior to delivery, notifies the market administrator in writing that it will be the handler for the milk. Such milk shall be considered to have been received at the location of the pool plant to which delivery is made;

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler;

(f) Any person who operates an other order plant that is either a distributing plant or a supply plant;

(g) Any person who operates an unregulated supply plant; and

(h) A State educational institution which operates either a nonpool distributing plant or supply plant.

### § 1064.10 Producer-handler.

"Producer-handler" means a person who operates both a dairy farm and a distributing plant at which each of the following conditions is met during the month:

(a) Milk is received from the dairy farm of such person but from no other dairy farm;

(b) The butterfat or skim milk disposed of in the form of a fluid milk product does not exceed the butterfat or skim milk, respectively, received in the form of milk from the dairy farm of such person and in the form of a fluid milk product from pool plants of other handlers; and

(c) Such person shall furnish proof satisfactory to the market administrator that the care and management of the dairy animals and other resources necessary for the production of milk in his name and the operation of the processing and packaging business are the personal enterprise and risk of such person.

### § 1064.11 [Reserved]

### § 1064.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority, which milk is received at a pool plant or diverted pursuant to § 1064.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act or a handler pursuant to § 1064.9(h);

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allcoated to Class II or Class III utilization pursuant to § 1064.44(a)(8)(iii) and the corresponding step of § 1064.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

### § 1064.13 Producer milk.

"Producer milk" means the skim milk and butterfat contained in Grade A milk of a producer which is:

(a) Received at a pool plant directly from a producer or a handler described in § 1064.9(c);

(b) Received by a handler described in § 1064.9(c) from producers in excess of the quantity delivered to pool plants; or

(c) Diverted, subject to the following conditions, from a pool plant to a pool supply plant or to a nonpool plant that is not a producer-handler plant. "Diverted milk" is milk normally received at a pool distributing plant but which is moved directly from a dairy farm to a nonpool plant as specified in this paragraph or to a pool supply plant for the account of a handler operating a pool distributing plant or a handler described in § 1064.9(b). Such milk shall be deemed to have been received by the diverting handler at the location of the pool plant from which diverted except that milk diverted to a plant located more than 125 miles by the shortest highway distance as determined by the market administrator from the nearest of the City Halls of Kansas City, Mo., or Topeka, Kans., shall be deemed to have been received at the location of the plant to which diverted in applying §§ 1064.52 and 1064.75:

(1) A handler described in § 1064.9(b) may divert for its account the milk of any member producer whose milk is received at a pool distributing plant for at least 1 day's delivery during the month, without limit during the other days of the month. The total quantity of milk so diverted may not exceed the larger of the following amounts:

(i) The total quantity of its member producer milk received at all pool dis-

V 38 177 SEP 13 73 XUM

tributing plants during the current month, or

(ii) The average daily quantity of its member producer milk received at pool distributing plants during the previous month, multiplied by the number of days in the current month.

(2) A handler operating a pool distributing plant may divert for his account the milk of any producer, other than a member of a cooperative association which has diverted milk pursuant to paragraph (c)(1) of this section, whose milk is received at his pool distributing plant for at least 1 day's delivery during the month, without limit during the other days of the month. However, the total quantity of milk so diverted may not exceed the larger of the following amounts:

(i) The total quantity of milk received at such plant during the current month from producers who are not members of a cooperative association that has diverted milk pursuant to paragraph (c)(1) of this section; or

(ii) The average daily quantity of milk received at such plant during the previous month from producers who are not members of a cooperative association that has diverted milk in the current month pursuant to paragraph (c)(1) of this section, multiplied by the number of days in the current month.

(3) Diversions in excess of the applicable percentages pursuant to paragraph (c)(1) and (2) of this section shall first be assigned to diversions to nonpool plants and any excess quantity assigned to nonpool plants shall not be producer milk and shall not be deemed to have been received by the diverting handler. The diverting handler shall specify the dairy farmers whose milk shall not be included as producer milk pursuant to this subparagraph. Excess diversions to a pool supply plant shall be producer milk at the supply plant in applying §§ 1064.52, and 1064.75.

**§ 1061.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1064.40(b)(1) from any source other than producers, handlers described in § 1064.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1064.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1064.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1064.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1061.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1064.40 (b) or (c)(1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1064.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1064.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1061.13 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines after application by the association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or milk products for its members.

HANDLER REPORTS

**§ 1064.30 Reports of receipts and utilization.**

On or before the seventh day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1064.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1064.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1064.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1061.31 Payroll reports.**

(a) On or before the 23d day after the end of each month, each handler described in § 1064.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1064.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1064.32 Other reports.**

In addition to the reports required pursuant to §§ 1064.30 and 1064.31, the following shall be reported to the market administrator:

(a) On or before the seventh day after the end of each month with respect to receipts at each plant of milk from each producer, each handler described in § 1064.9 (a) and (b) shall report the average butterfat test, the pounds of butterfat contained therein, the number of days on which milk was received from such producer and for each of the months of February through July, the pounds of base and excess milk received from each producer;

(b) On or before the seventh day after the end of each month of February through July, each handler described in § 1064.9(c) shall report the quantities of skim milk and butterfat in producer milk for which it is the handler that is base milk and excess milk; and

(c) Each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1064.40 Classes of utilization.**

Except as provided in § 1064.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1064.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(*) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1064.15; and

(6) In shrinkage assigned pursuant to § 1064.41(a) to the receipts specified in § 1064.41(a)(2) and in shrinkage specified in § 1064.41 (b) and (c).

**§ 1064.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1064.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in subparagraph the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1064.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1064.9(c) and in milk diverted to such plant from another pool plant, except that, in either case, if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)(1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1064.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1061.12 Classification of transfers and diversions.**

(a) *Transfers and diversions to pool plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant (to a pool supply plant, in the case of diversion) shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of

V 38-177 SEP 13 73 XUM

such transfers or diversions shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant or divertee-plant after the computations pursuant to § 1064.44 (a)(12) and the corresponding step of § 1064.44(b);

(2) If the transferor-plant or divertor-plant received during the month other source milk to be allocated pursuant to § 1064.44(a)(7) or the corresponding step of § 1064.44(b), the skim milk or butterfat so transferred or diverted shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler or divertor-handler received during the month other source milk to be allocated pursuant to § 1064.44(a) (11) or (12) or the corresponding steps of § 1064.44(b), the skim milk or butterfat so transferred or diverted, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant or divertee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators; transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1064.40.

(c) *Transfers to producer-handlers and transfers and diversions to a State educational institution plant.* Skim milk or butterfat in the following forms that is transferred from a pool plant to a producer-handler under this or any other Federal order or transferred or diverted from a pool plant to a plant of a handler described in § 1064.9(h) shall be classified:

(1) As Class I milk, if so moved in the form of a fluid milk product, except that if a handler described in § 1064.9(h) certifies that the fluid milk product is acquired for use in Class II or Class III products for research or educational purposes, such fluid milk product shall be classified in the applicable lower class; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, a producer-handler plant, or a plant of a handler pursuant to § 1064.9(h) shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or divertor-handler claims such classification in his report of receipts and utilization filed pursuant to § 1064.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of package fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

### § 1064.43 General classification rules.

In determining the classification of producer milk pursuant to § 1064.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1064.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1064.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1064.40, 1064.41, and 1064.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1064.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

### § 1064.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1064.9(a) for each of his pool plants separately and of each handler described in § 1064.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1064.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1064.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1064.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1064.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1064.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order and from a handler described in § 1064.9(h);

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1064.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to subskim milk subtracted pursuant to paragraph (a)(1) of this section;

V 38-177 SEP 13 73 XUM

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8) (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph a(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12) (ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1064.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1064.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1064.44(a)(14) and the corresponding step of § 1064.44(b).

**§ 1064.45 Market administrator's reports and announcements concerning classification.**

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1064.44(a)(12) and the corresponding step of § 1064.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1064.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 14th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler from such cooperative association in its capacity as a handler described in § 1064.9(c) and directly from members of such cooperative association. For the purpose of this report, the milk so received shall be prorated to each class in proportion to the utilization by such handler in each class remaining after the allocation pursuant to § 1064.44(a) (1) through (13) and the corresponding steps of § 1064.44(b).

CLASS PRICES

**§ 1064.50 Class prices.**

Subject to the provisions of § 1064.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.74.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

**§ 1064.51 Basic formula price.**

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

**§ 1064.52 Plant location adjustments for handlers.**

(a) For milk received from producers at a pool plant located outside the marketing area and more than 50 miles but not more than 70 miles by shortest highway distance as measured by the market administrator, from the nearer of the City Halls in Kansas City, Mo., or Topeka, Kans., which is classified as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price computed pursuant to § 1064.50(a) shall be reduced by 10 cents, and by an additional 1.5 cents for each 10 miles or fraction thereof that such plant is more than 70 miles from such City Hall.

(b) For purposes of calculating such adjustment, bulk transfers between pool plants shall be assigned to the Class I disposition at the transferee-plant prorated with the sum of receipts at such plant of producer milk and the pounds assigned as Class I to receipts from other order plants and unregulated supply plants.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

**§ 1064.53 Announcement of class prices.**

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

**§ 1064.54 Equivalent price.**

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

UNIFORM PRICES

**§ 1064.60 Handler's value of milk for computing uniform price.**

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1064.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1064.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1064.44(a)(14) and the corresponding step of § 1064.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1064.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1064.44(a)(9) and the corresponding step of § 1064.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1064.44(a)(7) (i) through (iv) and the corresponding step of § 1064.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1064.44(a)(7) (v) and (vi) and the corresponding step of § 1064.44 (b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1064.44 (a)(11) and the corresponding step of § 1064.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

**§ 1064.61 Computation of uniform price (including weighted average price and base and excess prices).**

(a) For each month the market administrator shall compute the "uniform price" per hundredweight of milk of 3.5 percent butterfat content received from producers (or "weighted average price") as follows:

(1) Combine into one total the values computed pursuant to § 1064.60 for all handlers who filed the reports prescribed by § 1064.30 for the month and who made the payments pursuant to §§ 1064.71 and 1064.73 for the preceding month;

(2) Add an amount equal to the total value of the location adjustments computed pursuant to § 1064.75;

(3) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(4) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a)(1) of this section by 5 cents;

(5) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(i) The total hundredweight of producer milk; and

(ii) The total hundredweight for which a value is computed pursuant to § 1064.60(f); and

(6) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "weighted average price" and for the months of August through January shall be the "uniform price" for milk received from producers.

(b) For each month of February through July, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk as follows:

(1) Subtract from the amount resulting from the computations made pursuant to paragraph (a) (1) through (4) of this section an amount computed by multiplying the weighted average price plus 5 cents times the hundredweight of milk specified in paragraph (a)(5)(ii) of this section;

(2) Determine the value of excess milk by multiplying the hundredweight of producer milk determined to be excess milk in series beginning with Class III by the respective class prices minus 5 cents and adding together the resulting amounts;

(3) Divide the total value of excess milk obtained in paragraph (b)(2) of this section by the total hundredweight of such milk and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 3.5 percent butterfat content received from producers;

(4) Subtract the value of excess milk obtained in paragraph (b)(2) of this section from the aggregate value of milk obtained in paragraph (b)(1) of this section and adjust by any amount involved in adjusting the uniform price of excess milk to the nearest cent;

(5) Divide the amount obtained in paragraph (b)(4) of this section by the total hundredweight of producer milk determined to be base milk; and

(6) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (b)(5) of this section. The resulting figure shall be the uniform price for base milk of 3.5 percent butterfat content received from producers.

**§ 1061.62 Announcement of uniform prices and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform prices for such month.

PAYMENTS FOR MILK

**§ 1064.70 Producer-settlement fund.**

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all funds received pursuant to paragraph (a) of this section and out of which he shall make all payments required pursuant to paragraph (b) of this section.

(a) Payments made by handlers pursuant to §§ 1064.71, 1064.76, and 1064.77.

(b) Payments due handlers pursuant to §§ 1064.72 and 1064.77: *Provided*, That payments due any handler shall be offset by payments due from such handler pursuant to §§ 1064.71, 1064.76, 1064.77, 1064.85, and 1064.86.

**§ 1064.71 Payments to the producer-settlement fund.**

(a) On or before the 14th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount

V 38-177 SEP 13 73 XUM

specified in paragraph (a) (1) of this section exceeds the amount specified in paragraph (a) (2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1064.60.

(2) The sum of:

(i) The amount required to be paid producers (including payments to producers through cooperative associations) pursuant to § 1064.73 before adjustment for butterfat content and before deductions authorized by the producer or cooperative association or for marketing services pursuant to § 1064.86; and

(ii) The value at the weighted average price applicable at the location of the plant from which received plus 5 cents of other source milk for which a value is computed pursuant to § 1064.60(f).

(b) During each month of February through July each handler pursuant to § 1064.9(c), on or before the 14th day after the end of the month, shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (b) (1) of this section exceeds the amount specified in paragraph (b) (2) of this section:

(1) The total value of such association's member producer milk at the applicable weighted average price computed pursuant to § 1064.61; and

(2) The total value of such association's member producer base and excess milk at the applicable uniform base and excess prices computed pursuant to § 1064.61.

(c) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (c) (1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

### § 1061.72 Payments from the producer-settlement fund.

On or before the 14th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1064.71 (a) (2) or (b) (2) exceeds the amount computed pursuant to § 1064.71 (a) (1) or (b) (1). If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payment and shall complete such payments as soon as the necessary funds are available.

### § 1064.73 Payments to producers and to cooperative associations.

Each handler shall make payment as follows:

(a) On or before the 15th day after the end of each month during which the milk was received, to each producer for whom payment is not made pursuant to paragraph (c) or (d) of this section, at not less than the applicable uniform price(s) pursuant to § 1064.61, adjusted by the butterfat differential computed pursuant to § 1064.74 and the location adjustment to producers pursuant to § 1064.75, and less the following amounts: (1) the payments made pursuant to paragraph (b) of this section, (2) deductions for marketing services made pursuant to § 1064.86, and (3) any deductions authorized by the producer: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 1064.72 he may reduce his total payment to all producers uniformly by not less than the amount of reduction in payment from the market administrator; the handler shall, however, complete such payments not later than the date for making such payments pursuant to this paragraph next following receipt of the balance from the market administrator.

(b) On or before the 25th day of each month to each producer (1) for whom payment is not received from the handler by a cooperative association pursuant to paragraphs (c) and (d) of this section; and (2) who had not discontinued shipping milk to such handler before the 18th day of the month, a partial payment with respect to milk received from such producer during the first 15 days of the month at the approximate value of such milk, not to be less than the Class III price for the preceding month, without deduction for hauling.

(c) To a cooperative association which has filed a written request for such payment with such handler and with respect to producers for whose milk the market administrator determines such cooperative association is authorized to collect payment as follows:

(1) On or before the 20th day of the month, an amount equal to not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (b) of this section less any deductions authorized in writing by such cooperative association; and

(2) On or before the 14th day after the end of each month an amount equal to not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (a) of this section, less proper deductions authorized in writing by such cooperative association.

(d) To a cooperative association with respect to milk for which such association is acting in the capacity of a handler pursuant to § 1064.9(c):

(1) On or before the 20th day of the month an amount equal to the rate specified in paragraph (b) of this section times the volume received during the first 15 days of the month; and

(2) On or before the 14th day after the end of each month an amount equal to not less than the value of such milk at the applicable weighted average or uniform price pursuant to § 1064.61(a) (5), as adjusted pursuant to §§ 1064.74 and 1064.75, less payment made pursuant to paragraph (d) (1) of this section.

(e) In making payments to producers pursuant to paragraph (a) of this section, each handler shall furnish each producer with a supporting statement in such form that it may be retained by the producer, which shall show:

(1) The month and the identity of the handler and of the producer;

(2) The pounds per shipment, the total pounds, and the average butterfat test of milk delivered by the producer;

(3) The minimum rate or rates at which payment to the producer is required under the provisions of §§ 1064.73, 1064.74, and 1064.75;

(4) The rate which is used in making payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, including any deduction claimed under paragraph (b) of this section and § 1064.86 together with a description of the respective deductions; and

(6) The net amount of payment to the producer.

(f) Each handler who receives milk from producers, payment for which is to be made to a cooperative association pursuant to paragraph (c) of this section, shall report to such cooperative association with respect to each such producer, on forms approved by the market administrator, as follows:

(1) On or before the 23d day of the month, the total pounds of milk received during the first 15 days of the month; and

(2) On or before the seventh day after the end of the month:

(i) The pounds per shipment, the total pounds of milk and the average butterfat test of milk received from such producer during the month;

(ii) The amount or rate and nature of any deductions; and

(iii) The amount of any payments due such producer pursuant to § 1064.77.

### § 1064.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform prices shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

### § 1064.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price pursuant to § 1064.61(a) and the uniform price for base milk pursuant to § 1064.61(b) for producer milk received at a pool plant or diverted from a pool plant shall be reduced according to the location of the pool plant at the rate set forth in § 1064.52, subject to § 1064.13(c).

(b) For purposes of computations pursuant to §§ 1064.71 and 1064.72 the weighted average price shall be adjusted at the rates set forth in § 1064.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted weighted average price plus 5 cents shall not be less than the Class III price.

### § 1064.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant, except a plant described in § 1064.7(d) (3), shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1064.30(b) and 1064.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the weighted average price plus 5 cents, both prices to be applicable at the location of the partially regulated distributing plant (except that the Class I price and the weighted average price plus 5 cents shall not be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a) (3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1064.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b) (1) (i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1064.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1064.60 for such handler shall include, in lieu of the value of other source milk specified in § 1064.60(f) less the value of such other source milk specified in § 1064.71(a) (2) (ii), a value of milk determined pursuant to § 1064.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1064.7(b), subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1064.30(b) and 1064.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1064.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b) (1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1064.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b) (1) (iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1964.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b) (1) (iii) of this section applies.

### § 1064.77 Adjustment of accounts.

Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in moneys due the market administrator or any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of the amount due and payment therefor shall be made within 5 days if such amount is due the market administrator, or on or before the next date for making payments to producers or a cooperative association, if such amount is due them. Whenever such audit discloses errors resulting in moneys due such handler from the market administrator, payment shall be made within 5 days.

### § 1064.78 Charges on overdue accounts.

Any unpaid obligation of a handler pursuant to §§ 1064.71, 1064.73, 1064.77, 1064.85, and 1064.86 shall be increased one-half of 1 percent on the first day of the month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

### § 1064.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 12th day after the end of the month 3 cents per hun-

V 38-177
SEP 13 73
XUM

dredweight, or such lesser amount as the Secretary may prescribe, of:

(a) Producer milk (including such handler's own production);

(b) Other source milk allocated to Class I pursuant to § 1064.44(a) (7) and (11) and the corresponding steps of § 1064.44(b), except such other source milk that is excluded from the computations pursuant to § 1064.60 (d) and (f); and

(c) Class I milk disposed of from a partially regulated distributing plant (except from a plant described in § 1064.7(d)(3)) as route disposition in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1064.76(a)(2).

### § 1061.86 Deduction for marketing services.

(a) *Deductions.* Except as set forth in paragraph (b) of this section, each handler in making payments to producers other than himself pursuant to § 1064.73(a), shall deduct 6 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all milk received by such handler from producers during the month, and shall pay such deductions to the market administrator on or before the 12th day after the end of such month. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received from and to provide market information to such producers.

(b) *Deductions with respect to members of a cooperative association.* In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall, in lieu of the deductions specified in paragraph (a) of this section, make such deductions from the payments to be made directly to producers pursuant to § 1064.73(a), as are authorized by such producers, and on or before the 12th day after the end of each month, pay over such deductions to the association of which such producers are members, accompanied by a statement showing the amount of the deduction and the quantity of milk for which it was computed for each such producer.

## BASE-EXCESS PLAN

### § 1061.90 Base milk and excess milk.

(a) "Base milk" means that producer milk received by a handler from a producer in each month of February through July that is not in excess of such producer's daily base computed pursuant to § 1064.91 multiplied by the number of days of production in the month that such milk was received by the handler.

(b) "Excess milk" means that producer milk received by a handler from a producer in each month of February through July that is in excess of base milk received from such producer in such month and shall include all milk received from a producer for whom no daily base can be computed pursuant to § 1064.91.

### § 1061.91 Computation of daily base for each producer.

The daily base for each producer applicable during each month of February through July, inclusive, shall be determined by the market administrator as follows: Divide the total pounds of milk received by a handler at a pool plant from such producer during the immediately preceding months of September through December by the number of days during such period on which milk was received from such producer or by 90 whichever is greater. In the case of producers delivering milk to a plant which first became a pool plant during or after the end of the base-forming period, the daily average base for each producer at such plant shall be that which would have been calculated for such producers for the entire base-forming period if the handler's plant had been a pool plant during such period.

### § 1061.92 Daily base rules.

(a) Except as provided in paragraph (b) of this section, a daily base shall apply only to milk produced by the producer in whose name such milk was delivered to the handler(s) during the base-forming period.

(b) A producer may transfer his daily base during the period of February through July by notifying the market administrator in writing before the last day of any delivery period that such base is to be transferred to the person named in such notice but under the following conditions only:

(1) In the event of the death or entry into military service of a producer, the entire daily base may be transferred to a member of such producer's immediate family who carries on the dairy operation on the same farm; and

(2) If a base is held jointly and such joint holding is terminated on the basis of written notice to the market administrator from the joint holders the entire daily base may be transferred to one of the joint holders, or divided in accordance with such notice between the former joint holders if they continue dairy operations.

### § 1061.93 Announcement of bases.

On or before February 1 of each year the market administrator shall notify in writing each producer who made deliveries of milk during the previous September through December and the handler receiving milk from such producer of the daily base established by such producer.

## ADVERTISING AND PROMOTION PROGRAM

### § 1061.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1064.121 (b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

### § 1061.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1064.113(b), is authorized one agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers that have elected not to combine pursuant to § 1064.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group of participating producers, in total, pursuant to § 1064.113 (c), one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent but not less than 1 percent of the total participating producers, it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1064.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives but not less than five.

### § 1061.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

### § 1061.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1064.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

### § 1061.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

### § 1061.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1064.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1064.110 and 1064.117.

### 1061.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1064.110 and 1064.117;

(c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of power and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

### § 1061.117 Advertising, research, education, and promotion program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

### § 1061.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1064.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

### § 1061.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

### § 1061.120 Procedure for requesting refunds.

Any producer may apply for refund subject to the applicable conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1064.61(a)(4): *Provided*, That such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refund with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1064.61(a)(4).

### § 1061.121 Duties of the market administrator.

Except as specified in § 1064.116, the market administrator, in addition to other duties specified by this part, shall

V 38-177 SEP 13 73 XUM

perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1064.113(c);

(b) Set aside the amounts subtracted under § 1064.61(a)(4) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to paragraph (b) (2) and (3) of this section, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1064.61(a)(4).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1064.120. Such refund shall be computed at the rate of 5 cents per hunderdweight of such producer's milk pooled for which deductions were made pursuant to § 1064.61(a)(4) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to paragraph (b)(2) of this section.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1064.110 through 1064.122).

(d) Make necessary audit to establish that all Agency funds are used only for authorized purposes.

**§ 1064.122 Liquidation.**

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1064.70.

## PART 1065—MILK IN THE NEBRASKA-WESTERN IOWA MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1065.1 General provisions.

DEFINITIONS

1065.2 Nebraska-Western Iowa marketing area.
1065.3 Route disposition.
1065.4 [Reserved]
1065.5 Distributing plant.
1065.6 Supply plant.
1065.7 Pool plant.
1065.8 Nonpool plant.
1065.9 Handler.
1065.10 Producer-handler.
1065.11 [Reserved]
1065.12 Producer.
1065.13 Producer milk.
1065.14 Other source milk.
1065.15 Fluid milk product.
1065.16 Fluid cream product.
1065.17 Filled milk.
1065.18 Cooperative association.

HANDLER REPORTS

1065.30 Reports of receipts and utilization.
1065.31 Payroll reports.
1065.32 Other reports.

CLASSIFICATION OF MILK

1065.40 Classes of utilization.
1065.41 Shrinkage.
1065.42 Classification of transfers and diversions.
1065.43 General classification rules.
1065.44 Classification of producer milk.
1065.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1065.50 Class prices.
1065.51 Basic formula price.
1065.52 Plant location adjustments for handlers.
1065.53 Announcement of class prices.
1065.54 Equivalent price.

UNIFORM PRICES

1065.60 Handler's value of milk for computing uniform prices.
1065.61 Computation of uniform prices.
1065.62 Announcement of uniform prices and butterfat differential.

PAYMENTS FOR MILK

1065.70 Producer-settlement fund.
1065.71 Payments to the producer-settlement fund.
1065.72 Payments from the producer-settlement fund.
1065.73 Payments to producers and to cooperative associations.
1065.73a Payments to producers and to cooperative associations under a Class I base plan.
1065.74 Butterfat differential.
1065.75 Plant location adjustments for producers and on nonpool milk.
1065.76 Payments by handler operating a partially regulated distributing plant.
1065.77 Adjustment of accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1065.85 Assessment for order administration.
1065.86 Deduction for marketing services.

CLASS I BASE PLAN

1065.90 Production history base and Class I base.
1065.91 Base milk and excess milk.
1065.92 Computation of production history base for each producer.
1065.93 New producers.
1065.94 Updating of production history base.
1065.95 Computation of Class I base for each producer.
1065.96 Transfer of bases.
1065.97 Miscellaneous base rules.
1065.98 Hardship provisions.

ADVERTISING AND PROMOTION PROGRAM

1065.110 Agency.
1065.111 Composition of Agency.
1065.112 Term of office.
1065.113 Selection of Agency members.
1065.114 Agency operating procedure.
1065.115 Powers of the Agency.
1065.116 Duties of the Agency.
1065.117 Advertising, Research, Education and Promotion Program.
1065.118 Limitation of expenditures by the Agency.
1065.119 Personal liability.
1065.120 Procedure for requesting refunds.
1065.121 Duties of the market administrator.
1065.122 Liquidation.

AUTHORITY: The provisions of this Part 1065 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1065.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1065.2 Nebraska-Western Iowa marketing area.**

The "Nebraska-Western Iowa marketing area" (hereinafter referred to as the "marketing area") means all the territory within the boundaries of the counties and townships listed below, including such territory as is now occupied and as may be occupied in the future by Government (municipal, State or Federal) reservations, installations, institutions, or other similar establishments. Where such establishment is partly within and partly without the designated boundaries, the marketing area shall include the entire area encompassed by such establishment.

(a) *Zone 1.*

IOWA COUNTIES

Fremont. Monona.
Harrison. Mills.
Pottawattamie (only the townships of Boomer, Crescent, Garner, Hardin, Hazel Dell, Kane, Keg Creek, Lake, Lewis, Minden, Neola, Norwalk, Rockford, Silver Creek, Washington, and York.)
Woodbury.

NEBRASKA COUNTIES

Antelope. Madison.
Boone. Merrick.
Burt. Nance.
Butler. Nemaha.
Cass. Nuckolls.
Cedar. Otoe.
Clay. Pierce.
Colfax. Platte.
Cuming. Polk.
Dakota. Saline.
Dixon. Sarpy.
Dodge. Saunders.
Douglas. Seward.
Fillmore. Stanton.
Gage. Thayer.
Hamilton. Thurston.
Jefferson. Washington.
Johnson. Wayne.
Knox. York.
Lancaster.

SOUTH DAKOTA

That portion of Union County comprising Jefferson Township, North Sioux City, and the unorganized territory adjacent thereto, as defined and mapped in the United States 1960 Census of Population.

(b) *Zone 2.*

IOWA COUNTIES

Cass. Sac.
Cherokee. Shelby.
Crawford. Sioux.
Ida. Pottawattamie (that portion not otherwise included in Zone 1).
Montgomery.
O'Brien.
Page.
Plymouth.

(c) *Zone 3.*

NEBRASKA COUNTIES

Adams. Harlan.
Banner. Howard.
Box Butte. Kearney.
Buffalo. Keith.
Cheyenne. Kimball.
Custer. Lincoln.
Dawes. Morrill.
Dawson. Phelps.
Deuel. Red Willow.
Franklin. Scotts Bluff.
Frontier. Sheridan.
Furnas. Sherman.
Garden. Sioux.
Gosper. Valley.
Greeley. Webster.
Hall.

**§ 1065.3 Route disposition.**

"Route disposition" means a delivery (including delivery by a vendor or through a distribution point, or sale from a plant store) of a fluid milk product classified as Class I to retail or wholesale outlets other than a delivery in bulk to a milk plant.

**§ 1065.4 [Reserved]**

**§ 1065.5 Distributing plant.**

"Distributing plant" means a plant which is approved by a duly constituted health authority for the processing or packaging of Grade A milk and from which there is route disposition of any fluid milk product during the month in the marketing area.

**§ 1065.6 Supply plant.**

"Supply plant" means a plant from which milk or skim milk acceptable to a duly constituted health authority for distribution in the marketing area under a Grade A label, is shipped during the month to a pool plant qualified pursuant to § 1065.7.

**§ 1065.7 Pool plant.**

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant from which during the month there is:

(1) Route disposition, except filled milk, in the marketing area equal to not less than 15 percent of the Grade A milk received at such plant from dairy farmers, supply plants (exclusive of plants qualifying as pool plants pursuant to this paragraph), and handlers described in § 1065.9(c); and

(2) Total route disposition, except filled milk, equal to not less than 35 percent of the Grade A milk received at the plant from the sources specified in paragraph (a)(1) of this section.

(b) A supply plant from which the volume of fluid milk products, except filled milk, shipped during the month to pool plants qualified pursuant to paragraph (a) of this section is not less than 50 percent of the Grade A milk received at such plant from dairy farmers and handlers described in § 1065.9(c) during such month. A supply plant that qualifies as a pool plant in each of the immediately preceding months of August through December shall be a pool plant for the succeeding months of January through July, unless the plant operator requests the market administrator, in writing, that such plant not be a pool plant, such nonpool plant status to be effective the first month following such notice and thereafter until the plant again qualifies as a pool plant on the basis of shipments.

(c) A supply plant operated by a cooperative association if, during the month, 51 percent or more of the producer milk of members of the association is received at a pool distributing plant(s) of another handler(s), or is transferred to such plant(s) from the association's supply plant.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A plant qualified pursuant to paragraph (a) of this section from which a lesser volume of fluid milk products (not including filled milk) is disposed of in the Nebraska-Western Iowa marketing area than in the marketing area of another marketing agreement or order issued pursuant to the Act and which is fully subject to the classification and pricing provisions of such other agreement or order;

(3) Any plant qualified pursuant to paragraph (b) of this section for any portion of the period of January through July, inclusive, that producer milk at such plant is subject to the classification and pricing provisions of another order issued pursuant to the Act; and

(4) That portion of a plant that is physically apart from the Grade A portion of such plant, is operated separately and is not approved by a duly constituted health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

**§ 1065.8 Nonpool plant.**

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant from which fluid milk products are shipped during the month to a pool plant.

**§ 1065.9 Handler.**

"Handler" means:

(a) Any person who operates a pool plant. In case a corporation with recognized divisions which are operated as separate business units operates two or more pool plants, each such division shall be the handler with respect to the pool plant(s) it operates;

(b) Any cooperative association with respect to milk of its member producers which is diverted pursuant to § 1065.13 for the account of such association;

(c) A cooperative association with respect to milk of its member producers which is delivered from the farm to the pool plant of another handler in a tank truck owned and operated by, or under contract to, such cooperative association. The milk shall be deemed to have been received from producers by the cooperative association at the location of the plant to which it is delivered;

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler; and

(f) Any person who operates an other order plant described in § 1065.7(d).

**§ 1065.10 Producer-handler.**

"Producer-handler" means any person who is both a dairy farmer and the operator of a distributing plant, and who meets all of the following conditions:

(a) Receipts of fluid milk products at his plant are solely milk of his own production and fluid milk products from pool plants of other handlers;

(b) Receives no milk products other than fluid milk products for reconstituting into fluid milk products;

(c) The maintenance, care, and management of the dairy animals and other resources necessary to produce the milk, and the processing, packaging, and distribution of the milk (including filled milk) are the personal enterprise and the personal risk of such person; and

(d) Has met the requirements pursuant to § 1065.97(c).

**§ 1065.11 [Reserved]**

**§ 1065.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority and whose milk is received at a pool plant or by a handler described in § 1065.9 (b) or (c) or is diverted as producer milk pursuant to § 1065.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1065.44 (a)(8)(iii) and the corresponding step of § 1065.44(b);

V 38-177 SEP 13 73 XUM

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk; and

(4) Any person in any month in which he holds a Class I base if any portion of his milk is delivered, other than as producer milk, to a nonpool plant at which there is Class I disposition.

**§ 1065.13 Producer milk.**

"Producer milk" of each handler means all skim milk and butterfat contained in milk from producers that is:

(a) Received from producers at a pool plant;

(b) Received from producers by a cooperative association handler described in § 1065.9(c);

(c) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant pursuant to paragraph (c) (1) or (2) of this section, subject to the conditions set forth in paragraph (c) (3) and (4) of this section;

(1) A cooperative association handler described in § 1065.9(b) may divert for its account the milk of any member-producer if at least 2 days' production of such producer is received at a pool plant(s) during the month. The total quantity of milk so diverted by the cooperative association handler shall not exceed, in each of the months of January, February, March, September, October, and November, 30 percent, and in any other month 40 percent, of the larger of:

(i) The total quantity of milk of member-producers received at all pool plants during the current month; or

(ii) The average daily quantity of milk of member-producers received at all pool plants during the immediately preceding month, multiplied by the number of days in the current month;

(2) A handler, other than a cooperative association, in his capacity as the operator of a pool plant, may divert for his account the milk of any producer other than a member of a cooperative association, if at least 2 days' production of such producer is received at the handler's pool plant(s) during the month. The total quantity of milk so diverted by the handler shall not exceed, in each of the months of January, February, March, September, October, and November, 30 percent, and in any other month 40 percent, of the larger of:

(i) The total quantity of milk of producers received at his pool plant(s) during the current month exclusive of milk received from producers who are members of a cooperative association; or

(ii) The average daily quantity of milk of producers received at his pool plant(s) during the immediately preceding month, exclusive of milk received from producers who are members of a cooperative association, multiplied by the number of days in the current month;

(3) In the event the quantity of milk diverted is in excess of the applicable quantity specified in paragraph (c) (1) and (2) of this section, the diverting handler shall designate the dairy farmers whose milk was overdiverted. If the handler fails to make such designation, no milk diverted by him shall be producer milk for such month; and

(4) For the purposes of location adjustments pursuant to §§ 1065.52 and 1065.75, milk so diverted shall be priced at the location of the plant to which diverted.

**§ 1065.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1065.40(b) (1) from any source other than producers, handlers described in § 1065.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1065.40(b) (1);

(c) Products (other than fluid milk products, products specified in § 1065.40 (b) (1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1065.40(b) (1)) for which the handler fails to establish a disposition.

**§ 1065.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, low-fat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a) (1) of this section or in § 1065.40(b) or (c) (1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1065.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixtured) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1065.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1065.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application of the association:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) Has full authority in the sale of milk of its members and is engaged in making collective sales of, or marketing, milk or its products for its members; and

(c) Has its entire activities under the control of its members.

HANDLER REPORTS

**§ 1065.30 Reports of receipts and utilization.**

On or before the seventh day, excluding holidays, after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1065.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1065.40(b) (1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1065.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1065.31 Payroll reports.**

(a) On or before the 20th day after the end of each month, each handler described in § 1065.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1065.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1065.32 Other reports.**

In addition to the reports required pursuant to §§ 1065.30 and 1065.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1065.40 Classes of utilization.**

Except as provided in § 1065.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1065.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b) (1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, low fat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, low fat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b) (1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b) (1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b) (1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1065.15; and

(6) In shrinkage assigned pursuant to § 1065.41(a) to the receipts specified in § 1065.41(a) (2) and in shrinkage specified in § 1065.41(b) and (c).

**§ 1065.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1065.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a) (1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1065.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1065.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

V 38-177 SEP 13 73 XUM

§ 1065.12 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant or by a handler described in § 1065.9(c) to another handler's pool plant shall be classified as follows:

(1) Such transfers from a pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(i) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1065.44(a)(12) and the corresponding step of § 1065.44(b);

(ii) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1065.44(a)(7) or the corresponding step of § 1065.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(iii) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1065.44(a) (11) or (12) or the corresponding steps of § 1065.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant; and

(2) Such transfers by a handler described in § 1065.9(c) shall be classified pro rata to the respective quantities of skim milk and butterfat remaining in each class after the computations pursuant to § 1065.44(a)(13)(i) and the corresponding step of § 1065.44(b).

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1065.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2)(ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1065.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

§ 1065.43 General classification rules.

In determining the classification of producer milk pursuant to § 1065.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1065.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1065.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1065.40, 1065.41, and 1065.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1065.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

§ 1065.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1065.9(a) for each of his pool plants separately and of each handler described in § 1065.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1065.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1065.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1065.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1065.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1065.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section;

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant; and

(vii) Receipts of fluid milk products from persons described in § 1065.12(b)(4);

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk from a handler described in § 1065.9(c), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1065.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to

V 38 177 SEP 13 73 XUM

paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8) (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12) (ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(a) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1065.45(a); or

(b) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract in the following order from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from:

(i) Another pool plant according to the classification of such products pursuant to § 1065.42(a)(1); and

(ii) A handler described in § 1065.9(c) according to the classification of such products pursuant to § 1065.42(a)(2); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1065.44(a)(14) and the corresponding step of § 1065.44(b).

### § 1065.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1065.44(a)(12) and the corresponding step of § 1065.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1065.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of the month, report to each cooperative association, which so requests, the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report, the milk so received shall be prorated to each class in the proportion that the total receipts of milk from producers by such handler were used in each class.

### § 1065.50 Class prices.

Subject to the provisions of § 1065.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.60 for pool plants located in Zone 1, plus $1.50 in Zone 2, and plus $1.75 in Zone 3.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

### § 1065.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

### § 1065.52 Plant location adjustments for handlers.

(a) For producer milk received at a pool plant (or diverted to a nonpool plant) located outside the marketing area and disposed of as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section the Class I price shall be that effective pursuant to § 1065.50(a) at the nearest of the pricing zones as set forth in § 1065.2, subject to a reduction of 1.5 cents for each 10 road miles or fraction thereof that such plant is located more than 100 miles from the nearest of the city halls in Chadron, Grand Island, Lincoln, Norfolk, North Platte, Omaha, and Scottsbluff, all in the State of Nebraska, and Sioux City, Iowa.

(b) For the purpose of calculating such adjustments:

(1) All distances shall be by shortest hard-surfaced highways and/or all-weather roads, as determined by the market administrator; and

(2) Transfers between pool plants shall be assigned Class I disposition at the transferee-plant, in excess of the sum of receipts at such plant from producers and handlers described in § 1065.9 (c), and the volume assigned as Class I to receipts from other order plants and unregulated supply plants, such assignment to be made first to transferor-plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

### § 1065.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

### § 1065.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

## Uniform Prices

### § 1065.60 Handler's value of milk for computing uniform prices.

For the purpose of computing the uniform prices, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1065.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1065.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1065.44(a)(14) and the corresponding step of § 1065.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1065.74, that are applicable at the location of the pool plant;

(c) Add the following:

(1) The amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1065.44(a)(9) and the corresponding step of § 1065.44(b); and

(2) The amount obtained from multiplying the difference between the Class III price for the preceding month and the Class II price for the current month by the lesser of:

(i) The hundredweight of skim milk and butterfat subtracted from Class II pursuant to § 1065.44(a)(9) and the corresponding step of § 1065.44(b) for the current month; or

(ii) The hundredweight of skim milk and butterfat remaining in Class III after the computations pursuant to § 1065.44(a)(12) and the corresponding step of § 1065.44(b) for the preceding month, less the hundredweight of skim milk and butterfat specified in paragraph (c)(1) of this section;

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1065.44(a)(7) (i) through (iv) and (vii) and the corresponding step of § 1065.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1065.44(a)(7) (v) and (vi) and the corresponding step of § 1065.44(b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1065.44(a)(11) and the corresponding step of § 1065.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

### § 1065.61 Computation of uniform prices.

(a) For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.5 percent butterfat content which is received from producers as follows:

(1) Combine into one total the values computed pursuant to § 1065.60 for all handlers who filed the reports prescribed by § 1065.30 for the month and who made the payments pursuant to §§ 1065.71 and 1065.73 for the preceding month;

(2) Subtract an amount equal to the total value of the plus location adjustments computed pursuant to § 1065.75;

(3) Add an amount equal to the total value of the minus location adjustments computed pursuant to § 1065.75;

(4) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(5) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a)(1) of this section by 5 cents;

(6) Divide the resulting amount by the sum of the following for all handlers included in these computations;

(i) The total hundredweight of producer milk; and

(ii) The total hundredweight for which a value is computed pursuant to § 1065.60 (f); and

(7) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "weighted average price," and, except for any month in which a Class I base plan is effective, shall be the "uniform price" for milk received from producers.

(b) For each month in which a base plan is effective the market administrator shall compute the uniform prices per hundredweight for base milk and excess milk of 3.5-percent butterfat content received from producers as follows:

(1) From the net amount computed pursuant to paragraph (a)(1) through (6) of this section subtract the amounts specified in paragraph (b)(1) (i) through (v) of this section:

(i) The amount computed by multiplying the hundredweight of milk specified in paragraph (a)(6)(ii) of this section by the weighted average price plus 5 cents for all milk;

(ii) The amount obtained by multiplying by the Class III price, less 5 cents, the total hundredweight of milk delivered by all producers who have no Class I base;

(iii) The amount computed by multiplying the hundredweight of excess milk by the Class III price, less 5 cents, provided that the quantity of milk to which the Class III price, less 5 cents, is applied pursuant to this subdivision plus the quantity pursuant to paragraph (b)(1)(ii) of this section shall not exceed the quantity of producer milk in Class III;

(iv) An amount computed by multiplying any remaining hundredweight of excess milk by the Class II price, less 5 cents, to the extent that producer milk in Class II is available for such assignment; and

(v) An amount computed by multiplying any remaining hundredweight of excess milk by the Class I price, less 5 cents;

(2) Divide the net amount obtained in paragraph (b)(1) of this section by the total hundredweight of base milk and subtract not less than 4 cents but less than 5 cents. This result shall be known as the uniform base price per hundredweight of milk; and

V 38-177 SEP 13 73 XUM

(3) Divide the amount obtained in paragraph (b)(1)(iii), (iv) and (v) of this section by the hundredweight of excess milk, and subtract any fractional part of 1 cent. This result shall be known as the uniform excess price per hundredweight of milk.

**§ 1065.62 Announcement of uniform prices and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the applicable uniform prices for such month.

PAYMENTS FOR MILK

**§ 1065.70 Producer-settlement fund.**

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1065.71, 1065.76, and 1065.77, and out of which he shall make all payments pursuant to §§ 1065.72 and 1065.77.

**§ 1065.71 Payments to the producer-settlement fund.**

(a) On or before the 13th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1065.60.

(2) The sum of:

(i) The value at the applicable uniform prices, as adjusted pursuant to § 1065.75, of such handler's receipts of producer milk; and

(ii) The value at the weighted average price applicable at the location of the plant from which received plus 5 cents of other source milk for which a value is computed pursuant to § 1065.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

**§ 1065.72 Payments from the producer-settlement fund.**

On or before the 14th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1065.71(a)(2) exceeds the amount computed pursuant to § 1065.71(a)(1). The market administrator shall offset any payment due any handler against payments due from such handler.

**§ 1065.73 Payments to producers and to cooperative associations.**

Except in each month in which § 1065.73a applies, each handler shall make payment as follows:

(a) On or before the 15th day after the end of each month during which the milk was received, to each producer for whom payment is not made pursuant to paragraph (c) or (d) of this section, at not less than the applicable uniform price pursuant to § 1065.61, as adjusted pursuant to §§ 1065.74 and 1065.75, and less the following amounts:

(1) The payments made pursuant to paragraph (b) of this section;

(2) Deductions for marketing services pursuant to § 1065.86; and

(3) Any proper deductions authorized by the producer: *Provided*, That, if by such date such handler has not received full payment for such month pursuant to § 1065.72, he may reduce his total payment to all producers uniformly by not more than the amount of reduction in payment from the market administrator; the handler shall, however, complete such payments not later than the date for making such payments pursuant to this paragraph next following receipt of the balance from the market administrator:

(b) On or before the 27th day of each month to each producer:

(1) For whom payment is not received from the handler by a cooperative association pursuant to paragraph (c) or (d) of this section; and

(2) Who had not discontinued shipping milk to such handler, an advance payment with respect to milk received from such producer during the first 15 days of the month an amount per hundredweight not to be less than the uniform price for the preceding month;

(c) To a cooperative association which has filed a written request for such payment with such handler and with respect to producers for whose milk the market administrator determines such cooperative association is authorized to collect payment as follows:

(1) On or before the 26th day of the month, an amount not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (b) of this section, less any deductions authorized in writing by such cooperative association; and

(2) On or before the 14th day after the end of each month an amount not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (a) of this section, less proper deductions authorized in writing by such cooperative association;

(d) To a cooperative association with respect to receipts of milk for which such cooperative association is the handler pursuant to § 1065.9 (b) or (c) as follows:

(1) On or before the 26th day of the month, for milk received during the first 15 days of the month an amount per hundredweight equal to not less than the weighted average price for the preceding month; and

(2) On or before the 14th day after the end of each month not less than the value of such milk at the class prices, as adjusted by the butterfat differential specified in § 1065.74, that are applicable at the location of the receiving handler's pool plant, less payment made pursuant to paragraph (d)(1) of this section;

(e) In making payments to producers pursuant to paragraphs (a) and (c) of this section, each handler shall furnish each producer or cooperative association with a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month and the identity of the handler and of the producer;

(2) The pounds per shipment, the total pounds, and the average butterfat test of milk delivered by the producer;

(3) The minimum rate or rates at which payment to the producer is required under the provisions of §§ 1065.61 (a), 1065.74, and 1065.75;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, including any deduction claimed under paragraph (b) of this section and § 1065.86 together with a description of the respective deductions; and

(6) The net amount of payment to the producer; and

(f) Nothing in this section shall abrogate the right of a cooperative association to make payments to its member producers in accordance with the payment plan of such cooperative association.

**§ 1065.73a Payments to producers and to cooperative associations under a Class I base plan.**

For each month in which a Class I base plan is effective each handler shall make payment as follows:

(a) On or before the 15th day after the end of each month during which the milk was received, to each producer for whom payment is not made pursuant to paragraphs (c) and (d) of this section, at not less than the uniform base price for the quantity of base milk received, as adjusted pursuant to §§ 1065.74 and 1065.75, at not less than the uniform excess price for the quantity of excess milk received, as adjusted pursuant to § 1065.74 and at not less than the Class III price, less 5 cents, as adjusted pursuant to § 1065.74 for the quantity of milk received from producers for whom no base milk is computed, less the following amounts: (1) The payments made pursuant to paragraph (b) of this section; (2) Deductions for marketing services made pursuant to § 1065.86; and (3) Any proper deductions authorized by the producer: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 1065.72, he shall not be deemed to be in violation of this paragraph if he reduces uniformly for all producers his payments per hundredweight pursuant to this paragraph by a total amount not in excess of the reduction in payment from the market administrator; however, the handler shall make such balance of payment uniformly to those producers to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payments is received from the market administrator;

(b) On or before the 27th day of each month to each producer for whom payment is not received from the handler by a cooperative association pursuant to paragraph (c) or (d) of this section and who has not discontinued shipping milk to such handler, a partial payment with respect to milk received from such producer during the first 15 days of the month in an amount per hundredweight not to be less than the weighted average price for the preceding month:

(c) To a cooperative association which has filed a written request for such payment with such handler with respect to producers for whose milk the market administrator determines such cooperative association is authorized to collect payment as follows:

(1) On or before the 26th day of the month, an amount not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (b) of this section, less any deductions authorized in writing by such cooperative association:

(2) On or before the 14th day after the end of each month an amount not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (a) of this section, less proper deductions authorized in writing by such cooperative association;

(d) To a cooperative association with respect to receipts of milk for which such cooperative association is the handler pursuant to § 1065.9 (b) or (c) as follows:

(1) On or before the 26th day of the month, for milk received during the first 15 days of the month an amount per hundredweight equal to not less than the weighted average price for the preceding month; and

(2) On or before the 14th day after the end of each month not less than the value of such milk at the class prices, as adjusted by the butterfat differential specified in § 1065.74, that are applicable at the location of the receiving handler's pool plant less payment made pursuant to paragraph (d)(1) of this section;

(e) In making payments to producers pursuant to paragraphs (a) and (c) of this section, each handler shall furnish each producer or cooperative association with a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month and the identity of the handler and of the producer;

(2) The pounds per shipment, the total pounds, and the average butterfat test of milk delivered by the producer;

(3) The minimum rate or rates at which payment to the producer is required under the provisions of §§ 1065.61 (b), 1065.74, and 1065.75;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, including any deduction claimed under paragraph (b) of this section and § 1065.86 together with a description of the respective deductions; and

(6) The net amount of payment to the producer.

**§ 1065.74 Butterfat differential.**

For milk containing more or less than 3.5 percent butterfat, the applicable uniform prices shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

**§ 1065.75 Plant location adjustments for producers and on nonpool milk.**

(a) The applicable uniform prices computed pursuant to § 1065.61 shall be decreased 10 cents per hundredweight for producer milk received at a pool plant located in Zone 2, and shall be increased 15 cents per hundredweight at pool plants located in Zone 3.

(b) For producer milk received at a pool plant or diverted to a nonpool plant located outside the marketing area the applicable uniform prices shall be that effective at the nearest of the pricing zones as set forth in § 1065.2, subject to a reduction at the rates set forth in § 1065.52.

(c) For purposes of computations pursuant to §§ 1065.71 and 1065.72 the weighted average price shall be adjusted at the rates set forth in § 1065.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted weighted average price plus 5 cents shall not be less than the Class III price.

(d) For any month in which a base plan is effective, if the milk of a producer is delivered as producer milk to plants at which different base prices apply, then for purposes of location adjustment the base milk of the producer shall be prorated to plants in proportion to deliveries of the producer's milk to such plants.

**§ 1065.76 Payments by handler operating a partially regulated distributing plant.**

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1065.30(b) and 1065.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the weighted average price plus 5 cents, both prices to be applicable at the location of the partially regulated distributing plant (except that the Class I price and the weighted average price plus 5 cents shall not be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1065.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the

V 38-177 SEP 13 73 XUM

partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1065.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1065.60 for such handler shall include, in lieu of the value of other source milk specified in § 1065.60(f) less the value of such other source milk specified in § 1065.71(a)(2)(ii), a value of milk determined pursuant to § 1065.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1065.7(b), subject to the following conditions:

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1065.30(b) and 1065.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1065.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1065.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1065.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

### § 1065.77 Adjustment of accounts.

Adjustments of accounts shall be made as follows:

(a) Whenever verification by the market administrator of reports or payments of any handler discloses errors made in payments to or from the producer-settlement fund pursuant to §§ 1065.71 and 1065.72, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days, make payment to the market administrator of the account so billed. Whenever verification discloses that payment is due from the market administrator to any handler, the market administrator shall, within 5 days, make such payment to such handler; and

(b) Whenever verification by the market administrator of the payments by a handler to any producer or cooperative association, discloses payments of less than is required by § 1065.73 or § 1065.73a, the handler shall make up such payment to the producer or cooperative association not later than the time of making payments next following such disclosure.

## Administrative Assessment and Marketing Service Deduction

### § 1065.85 Assessment for order administration.

As his pro rata share of the expense of administering the order, each handler shall pay to the market administrator on or before the 14th day after the end of the month 3 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk (including that classified pursuant to § 1065.42(a)(2)) and such handler's own production;

(b) Other source milk allocated to Class I pursuant to § 1065.44(a) (7) and (11) and the corresponding steps of § 1065.44(b), except such other source milk that is excluded from the computation pursuant to § 1065.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant that exceeds the skim milk and butterfat subtracted pursuant to § 1065.76(a)(2).

### § 1065.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1065.73 or § 1065.73a shall deduct 6 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to producer milk received by such handler (except such handler's own farm production) during the month and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of producer milk and to provide producers with market information. Such service shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him; and

(b) In the case of producers for whom a cooperative association is performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and on or before the 15th day after the end of each month, pay over such deductions to the association rendering such services.

## Class I Base Plan

### § 1065.90 Production history base and Class I base.

For purposes of determination and assignment of Class I base of each producer:

(a) "Production history base" as assigned to each producer means a quantity of milk in pounds per day as computed pursuant to §§ 1065.92, 1065.93, or 1065.94.

(b) "Production history period" means the period to be used for the computation of production history base. Subject to the conditions of paragraph (b) (1), (2), and (3) of this section, a production history period for a producer shall be a 1-year, 2-year, or 3-year production history period depending on whether milk deliveries by the producer began on or before July 1 in the first, second, or third calendar year, respectively, preceding the February 1 on which the production history base is being determined or preceding the most recent February 1.

(1) The production history period of a producer who has forfeited his Class I base pursuant to § 1065.97(a) or has disposed of all of his Class I base shall begin on the later of the following dates:

(i) The first day of the 13th month after the month in which the producer ceased deliveries of producer milk or disposed of his Class I base, or

(ii) The first day of production delivered when the producer resumes deliveries of producer milk.

(2) Except as provided in paragraph (b)(1) of this section, if the milk deliveries of any dairy farmer are interrupted for 90 days or more during the period prior to the effective date of this provision or prior to the dairy farmer qualifying as a producer, only the period of milk deliveries following such interruption shall be included in the producer's production history period.

(3) In the case of a producer who has acquired the herd of a member of his immediate family (either before or after the effective date of this provision) and has continued production with such herd, the deliveries made by the previous producer during the production history period shall be assumed to have been delivered by the current producer for use in computing a production history base, unless the previous owner transferred the Class I base to a third person.

(c) "Class I base" means a quantity of milk in pounds per day as computed pursuant to § 1065.95 for which a producer may receive the uniform price for base milk;

(d) "Average daily milk deliveries" of a producer in any specified period used for computing production history bases means the total pounds of milk delivered during the period by the producer to pool plants and to nonpool plants excluding milk delivered other than as a producer pursuant to § 1065.12(b)(4) divided by the greater of the number of days pursuant to paragraph (d) (1) or (2) of this section.

(1) The number of days' production delivered; or

(2) The calendar days from the first day of delivery through the last day of the period less the number of days' production the producer is prevented from delivering because of storm conditions: *Provided*, That the subtraction for storm conditions shall not exceed 8 days in any calendar year or exceed 4 days if a period of 6 months or less is involved.

### § 1065.91 Base milk and excess milk.

(a) "Base milk" means milk received from a producer during a month which is not in excess of his Class I base multiplied by the number of days in the month, except that if milk is received from a producer for only part of a month, base milk shall be milk received from such producer which is not in excess of his Class I base multiplied by the number of days of production of producer milk delivered during the month; and

(b) "Excess milk" means producer milk other than that defined under paragraph (a) of this section from producers delivering base milk.

### § 1065.92 Computation of production history base for each producer.

A production history base shall be determined by the market administrator pursuant to this section and § 1065.93 for each producer eligible for such base on the effective date of this provision and on February 1 of each year thereafter, respectively. Subject to the conditions of paragraph (h) of this section, a production history base for each producer on the effective date of this provision shall be determined by the market administrator as follows:

(a) The production history base for each producer who began milk deliveries not later than July 1, 1971, shall be calculated by adding the average daily milk deliveries during 1971 to the average daily milk deliveries in 1972 and dividing by two.

(b) The production history base for each producer who began delivery after July 1, 1971, but not later than July 1, 1972, shall be the average daily milk deliveries during the period beginning with the first delivery and through the end of the year 1972.

(c) The production history base for each producer not specified in paragraphs (a) and (b) of this section who began milk deliveries before October 1, 1972, shall be the average daily milk deliveries during the period beginning with the first delivery and through the end of such year multiplied by 0.80.

(d) The production history base for each producer who began milk deliveries on or after October 1, 1972, shall be computed pursuant to § 1065.93(c).

(e) For each producer who became a producer for this market before the effective date of this provision because the plant to which he regularly delivered milk became a fully regulated plant pursuant to this order, a production history base shall be determined, if possible, pursuant to paragraph (a), (b), (c), or (d) of this section, based on his deliveries of milk as if the nonpool plant(s) to which he delivered had been a pool plant(s) during the representative period;

(f) A producer not described pursuant to paragraph (e) of this section who delivered milk to a nonpool plant(s) prior to becoming a producer shall be assigned a production history base if such base can be computed pursuant to paragraph (a), (b), (c), or (d) of this section from deliveries of milk from the same farm on which he is a producer at time of base assignment as if the plant(s) to which he delivered had been a pool plant(s) during the production history period.

(g) For a producer who held producer-handler status at any time subsequent to January 1, 1971, a production history base shall be calculated as described in paragraph (a), (b), (c), or (d) of this section as if the milk of his own production received at his producer-handler plant had been received at a pool plant;

(h) The determination of a production history base pursuant to this section shall be subject to the following conditions:

(1) If a producer operated more than one farm at the same time, a separate production history base shall be determined with respect to the average daily producer milk deliveries from each farm, except that only one production history base shall be determined with respect to milk production resources and facilities of a producer handler; and

(2) Only one production history base shall be allowed with respect to milk produced by one or more persons at a single location where the land, building, and equipment, are jointly used, owned, or operated.

### § 1065.93 New producers.

The market administrator shall determine a production history base for each producer for whom a production history base was not determined pursuant to § 1065.92 as follows:

(a) Any producer who delivered his milk to a nonpool plant that became a pool plant shall be assigned a production history base on the same basis as other producers under the order as though the deliveries to the nonpool plant had been deliveries to a pool plant, except that assignment of base in the case of any producer who previously forfeited base or disposed of base by transfer will be subject to the provisions of paragraph (d) of this section.

(b) A producer other than a producer pursuant to paragraph (a) of this section who delivered milk to a nonpool plant prior to becoming a producer as defined in this order and who has at least a 1-year production history period shall be assigned a production history base, effective on the first day of the second month following the month in which he began deliveries of producer milk to a pool plant, on the same basis as if he had been a producer under the order and his milk deliveries to the nonpool plant had been deliveries to a pool plant: *Provided*, That the production history base effective for such producer pursuant to this paragraph in any month before updating shall not exceed the average daily milk deliveries of such producer during the first 2 months of producer milk deliveries from the same production facilities from which milk deliveries were made during his production history period.

(c) A producer whose production history period is less than a 1-year production history period, except a producer assigned production history base pursuant to § 1065.92(c), shall be assigned a production history base on the effective date of this provision or on the first day of the second month following the month in which as a producer he began milk deliveries in an amount equal to 50 percent of his average daily milk deliveries during the immediately preceding 2-month period. Such production history base shall be effective for such producer unless a production history base is acquired by transfer, in which case the greater of the acquired or the base computed from his own production shall be the effective production history base.

(d) A producer who, after having forfeited or disposed of all his Class I base, either continues as a producer on the market or discontinues deliveries to the market and thereafter returns to the market as a producer, shall be assigned a production history base in the manner provided in paragraph (c) of this section, such assignment to be effective not earlier than the first day of the 15th month after the month in which the producer who forfeits his base ceases deliveries or a producer who disposes of all his Class I base makes such disposition. In the application of this provision, use of the same production facilities by another person (or the same person under a different name) to produce milk after the above described forfeiture or transfer of base shall be considered as a continuation of the operation by the previous operator if the new operator is a member of the immediate family of the previous operator. This provision shall be applied also to any production facility to which a Class I base has not been assigned that is operated by a person in which the producer who forfeited or transferred his base has a financial interest if such facility commences produc-

V 38-177 SEP 13 73 XUM

tion on or after the effective date of the transfer or forfeiture, or such producer acquired his financial interest in such person later than 3 months prior to the effective date of the base transfer or forfeiture: *Provided*, That in the case of a producer who forfeited his base because he continued to deliver his milk to a plant that had been a pool plant but lost its pool plant qualification, assignment of base pursuant to paragraph (a) of this section will not be subject to delay to the first day of the 15th month after forfeiture, and deliveries by such producer during the period of forfeiture shall not be excluded from production history by reason of such forfeiture.

**§ 1065.94 Updating of production history bases.**

The production history base for each producer who has neither disposed of his entire base by transfer nor forfeited his base pursuant to § 1065.97(a), or after having disposed of his entire base by transfer or forfeiture has met the delivery requirement prescribed in § 1065.93 (d) for determination of new production history base, shall be determined by the market administrator on February 1, 1974, and each February 1 thereafter as follows:

(a) In updating a production history base as described in this paragraph, adjustments to a producer's previously assigned production history base and or average daily milk deliveries in prior years shall be made as follows:

(1) The prior production history base assigned to such producer shall be changed in proportion to the change in Class I base due to adjustment for hardship or loss of Class I base because of underdelivery of base. In the case of transfer of base production history base shall be adjusted as specified in § 1065.96 (a).

(2) The average daily milk deliveries of a producer in any calendar year that is part of his production history period prior to any net disposal of Class I base by transfers since January 31 of the preceding year or any underdelivery causing reduction of Class I base, shall be reduced in proportion to the net change in Class I base. For the purpose of this subparagraph disposal of base in January shall be treated as if disposed of in the preceding December.

(3) If the average daily milk deliveries of the producer in the preceding year are less than 90 percent of the Class I base assigned to such producer in the preceding year as adjusted for hardship and less any net disposal of base by transfer, then the producer's Class I base shall be reduced by the amount of the difference between such average daily milk deliveries and such Class I base as adjusted for hardship and disposal of base by transfer, and the production history base of such producer shall be reduced in the same proportion as the reduction of Class I base: *Provided*, That this subparagraph shall not apply in any year in which total producer milk is 135 percent or more of the Class I disposition described in § 1065.95(a)(1).

(4) If the net effect of all adjustments for any period is a reduction greater than the production history base or average daily deliveries prior to adjustment, then the resulting amount shall be zero and such period shall not be a production history period.

(b) Effective February 1, 1974, the market administrator shall update the production history base of each producer who has a production history period of 1 year or more as follows: Add (1) the average daily milk deliveries of such producer during the year 1973 and (2) twice the production history base previously assigned to such producer as adjusted pursuant to paragraph (a) of this section, and divide the sum by 3. If such result is less than the production history base previously assigned to such producer as adjusted pursuant to paragraph (a) of this section, then such previous production history base as adjusted shall be the effective production history base.

(c) Effective February 1, 1975, and February 1 in each year thereafter the market administrator shall update the production history base for specified producers as follows:

(1) For each producer who has a 3-year production history period, add (i) the average daily milk deliveries during the preceding calendar year and (ii) the average daily milk deliveries during each of the second and third preceding calendar years (or portion of a year) reduced by any adjustment pursuant to paragraph (a) of this section, and divide such total by 3. If such result is less than the production history base assigned to such producer on or after February 1 of the preceding year as adjusted pursuant to paragraph (a) of this section then such previously assigned production history base, as adjusted, shall be the effective production history base.

(2) For each producer who has a 2-year production history period who did not acquire Class I base by transfer add (i) the average daily milk deliveries in the preceding year, (ii) the average daily milk deliveries in the second preceding year reduced by any adjustment pursuant to paragraph (a) of this section, and (iii) the initial production history base assigned to (or computed for) such producer pursuant to § 1065.92 (c) or (d) or § 1065.93(c) adjusted pursuant to paragraph (a) of this section, and divide the sum by 3. If such result is less than the production history base assigned to such producer on or after February 1 of the preceding year as adjusted pursuant to paragraph (a) of this section, then such previously assigned production history base, as adjusted, shall be the effective production history base.

(3) For each producer who has a 1-year production history period add (i) the average daily milk deliveries of such producer during such 1-year period and (ii) twice the initial production history base assigned to (or computed for) such producer pursuant to § 1065.93(c) adjusted pursuant to paragraph (a) of this section, and divide the sum by 3. If such result is less than the initial production history base assigned to (or computed for) such producer as adjusted pursuant to paragraph (a) of this section, then such initial production history base, as adjusted, shall be the effective production history base.

(4) For each producer who has a 2-year production history period and who has acquired Class I base by transfer, add (i) the average daily milk deliveries of such producer during the preceding year and (ii) twice the production history base assigned to such producer on or after February 1 of the preceding year adjusted pursuant to paragraph (a) of this section, and divide the sum by 3. If such result is less than the production history base previously assigned to such producer as adjusted pursuant to paragraph (a) of this section, then such previously assigned production history base, as adjusted, shall be the effective production history base.

(d) For a producer who is assigned an initial history of production pursuant to § 1065.92 (e), (f), (g) and § 1065.93 the market administrator shall update his history of production from year to year in the manner applicable to a producer delivering to a pool plant as provided in paragraphs (b) and (c) of this section.

**§ 1065.95 Computation of Class I base for each producer.**

On the effective date of this provision and on February 1, 1974, and February 1 of each subsequent year the market administrator shall assign a Class I base to each producer who has a production history base. Class I bases shall be assigned to producers described in § 1065.93 when they are issued production history bases. On February 1 of each year Class I bases shall be computed as follows:

(a) Compute a "Class I base percentage" as follows:

(1) Determine the sum of Class I dispositions during the preceding calendar year specified in paragraph (a)(1) (i), (ii), and (iii) of this section:

(i) Class I producer milk pursuant to § 1065.44;

(ii) The Class I disposition of plants during the period when they were nonpool plants, if such plants were pool plants in the preceding December; and

(iii) The Class I disposition of a person who was a producer-handler during a portion of the year and who held producer status in the preceding December.

(2) Multiply the quantity computed pursuant to paragraph (a)(1) of this section by 1.20 and divide such result by the number of days in such year.

(3) Divide the quantity computed pursuant to paragraph (a)(2) of this section by a quantity which is the total of production history bases computed pursuant to §§ 1065.92, 1065.93, and 1065.94, whichever is applicable. The result shall be converted to a percentage by multiplying by 100 and rounding to the third decimal place. Such percentage shall be known as the "Class I base percentage."

(b) The Class I base of each producer with a production history base shall be determined by multiplying his production history base by the "Class I base percentage" and rounding the result to the nearest pound: *Provided*, That with respect to a producer with a production history period of less than 3 years beginning after the effective date of this provision, 20 percent shall be subtracted from the result of the preceding calculation, and: *Provided further*, That such 20 percent reduction shall be effective continuously with respect to a producer for a period not exceeding 36 months from the beginning of such production history period. With respect to a producer who has acquired production history base by transfer, such 20 percent reduction shall apply only to base exclusive of that acquired by transfer.

**§ 1065.96 Transfer of bases.**

Production history base and Class I base may be transferred pursuant to the following rules and conditions:

(a) A transfer of base means the disposal of Class I base and production history base by a transferor and the associated acquisition of Class I base and production history base by transferee. Disposal of base means disposal of Class I base and disposal of a proportionate amount of the production history base held by the transferor. Acquisition of base means the acquisition of Class I base and an amount of production history base which is the quantity of Class I base acquired multiplied by the reciprocal of the Class I base percentage. A transfer may be made only to a person who is a dairy farmer. The amount of Class I base credited to the transferee shall be two-thirds of the Class I base disposed of by the transferor: *Provided*, That such one-third reduction shall not apply to:

(1) An intrafamily transfer (including transfer to an estate and from an estate to a member of the immediate family);

(2) The division of base except as provided pursuant to paragraph (h) of this section; and

(3) The combining of bases of two or more producers for purpose of joint enterprise operated by such producers.

(b) A person receiving base by transfer must notify the market administrator in writing of the name of the producer transferring the base, the effective date of the transfer and the amount of base to be transferred. Application for transfer must be made to the market administrator on forms approved by the market administrator and signed by the transferor, his heirs, executor, or trustee and by the person to whom such base is to be transferred;

(c) Subject to paragraphs (a) and (k) of this section, transfers of an entire base or transfers other than pursuant to paragraph (d) of this section may not be made except in the case of:

(1) Death of the baseholder;

(2) Intrafamily transfers;

(3) Termination of the dairy enterprise of base holder;

(4) The baseholder entering the armed services;

(5) Transfer to a partnership or corporation in which the transferor has a material management interest; and

(6) Transfers allowed as a hardship adjustment.

(d) Subject to paragraphs (a) and (k) of this section, a producer may transfer a portion of his Class I base, in multiples of 150 pounds, as follows:

(1) Not more than the larger of 150 pounds or 30 percent of the Class I base assigned to a producer on the most recent of the effective date, February 1 of any year, or the initial assignment of base to such producer, may be disposed of by transfer prior to the February 1 following.

(2) A jointly held base may be divided among individuals engaged in a joint enterprise.

(e) Subject to paragraph (k) of this section a transfer of an entire base may be made effective on any day of the month if application for such transfer is filed with the market administrator within 5 days thereafter. Otherwise such transfer shall be effective on the first day of the month following that in which application is made;

(f) A transfer of a portion of a base shall be effective the first day of the month following that in which application for which such transfer is made to the market administrator;

(g) A base which is jointly held or in a partnership may be transferred subject to limitations otherwise provided in this section only upon application signed by each joint holder or partner, his heirs, executors, or trustee and by the person to whom such base is to be transferred;

(h) A base which has been established by two or more persons operating a dairy farm jointly or as a partnership may be divided among the joint holders or partners if written notification of the agreed division of base signed by each joint holder or partner, his heirs, executor, or trustee, is filed with the market administrator prior to the first day of the month for which such division is to be effective: *Provided*, That, however, a one-third lapse of base shall apply to base to the extent it constitutes a transfer by a person leaving a joint enterprise of base held by such person as an individual not more than 12 months prior to leaving such enterprise.

(i) It must be established to the satisfaction of the market administrator that the conveyance of base is bona fide and not for the purpose of evading any provision of this order, and comes within the remaining provisions of this section;

(j) In the case of an intrafamily transfer (including transfers to an estate and from an estate to a member of the immediate family), or any transfer not subject to the one-third lapse, all restrictions on transferring base applicable to the transferor producer shall also apply to the transferee;

(k) A producer who receives a base pursuant to § 1065.92 (c), (d), (e), (f), or (g) or § 1065.93 (a), (b), or (c) may not transfer such base, for 1 year from the date of receipt, provided, however, that such limitation shall not apply to:

(1) Intrafamily transfers; or

(2) The quantity of base such producer acquires by transfer.

(l) If a base is held by a corporation, a change in ownership of the stock which transfers control to a new person or persons other than a member of the immediate family of the person transferring such stock will be considered to result in a transfer of base and in this case compliance with all base rules affecting transfers will be required: *Provided*, That if the transferor(s) is the sole holder of the stock and transfers such stock to a member or members of the immediate family, there will be no lapse of base.

(m) A dairy farmer who has ceased deliveries of producer milk because he is delivering milk to a plant formerly a pool plant that no longer has pool plant qualification shall not be permitted to dispose of Class I base.

**§ 1065.97 Miscellaneous base rules.**

The following base rules shall be observed in the determination of bases.

(a) A person who discontinues delivery of producer milk for a period of 90 consecutive days after a Class I base is issued to him or fails to begin delivery of producer milk within 90 days of receipt of a Class I base by transfer shall forfeit his production history, together with any Class I base and production history base held pursuant to the provisions of this order, except that a person entering the military service may retain such production history, Class I base and production history base until 1 year after being released from active military service;

(b) As soon as production history bases and Class I bases are computed by the market administrator, notice of the amount of each producer's production history base and Class I base shall be given by the market administrator to the producer, to the handler receiving such producer's milk if the producer is not a member of a qualified cooperative association, and to the cooperative association of which the producer is a member;

(c) As a condition for designation as a producer-handler pursuant to § 1065.10, any person (including any member of the immediate family of such a person, any affiliate of such a person or any business of which such a person is a part) who has held Class I base any time during the 12-month period prior to such designation shall forfeit the maximum amount of Class I and production history base held at any time during such 12-month period; and

(d) In assigning Class I base to a producer, the market administrator shall round such base to the nearest pound.

**§ 1065.98 Hardship provisions.**

Requests of producers for relief from hardship or inequity arising under the provisions of §§ 1065.92 through 1065.97 will be subject to the following:

(a) After bases are first issued under this plan and after bases are issued on each succeeding February 1, a producer may request review of the following circumstances because of alleged hardship or inequity:

V 38 177 SEP 13 73 XUM

(1) He was not issued a Class I base;
(2) His production history base is not appropriate because of unusual conditions during the base-earning period such as loss of building, herds, or other facilities by fire, flood or storms, official quarantine, disease, pesticide residue, condemnation of milk, military service of the producer or his son;
(3) Loss or potential loss of Class I base pursuant to § 1065.97(a);
(4) Loss or potential loss of Class I base because of underdeliveries pursuant to § 1065.94(a)(3).
(5) Inability to transfer base.

(b) The producer shall file with the market administrator a request in writing for review of hardship or inequity not later than 45 days after notice pursuant to § 1065.97(b) with respect to requests pursuant to paragraph (a) (1) or (2) of this section, or not later than 45 days after the occurrence with respect to request pursuant to paragraph (a) (3), (4), or (5) of this section, setting forth:
(1) Conditions that caused the alleged hardship or inequity;
(2) The extent of the relief or adjustment requested;
(3) The basis upon which the amount of adjustment requested was determined; and
(4) Reasons why the relief or adjustment should be granted.

(c) One or more producer base committees shall be established and function as follows:
(1) Each producer base committee shall consist of five producers appointed by the market administrator;
(2) Each committee shall review the requests for relief from hardship or inequity referred to it by the market administrator at a meeting in which the market administrator or his representative serves as recording secretary and at which the applicant may appear in person if he so requests.
(3) Recommendations with respect to each such request shall be endorsed at the meeting by at least three committee members and shall:
(i) With respect to requests pursuant to paragraph (a) (1), (3), (4), or (5) of this section, grant or adjust production history bases and average daily producer milk deliveries for prior years where it appears appropriate, delay forfeiture of Class I base, restore forfeited base or reduced average daily producer milk deliveries where appropriate, and permit transfer of base not otherwise possible under the order provisions.
(ii) With respect to requests pursuant to paragraph (a)(2) of this section, either reject the request or provide adjustment in the form of additional production history base and average daily producer milk deliveries for prior years where it appears appropriate and the effective date thereof of such adjustment. In considering such requests the loss of milk production due to the following shall not be considered a basis for hardship adjustment:
(a) Loss of milk due to mechanical failure of farm tank or other farm equipment; and
(b) Inability to obtain adequate labor to maintain milk production, except that hardship adjustment may be granted in the case of a producer or the son of a producer who entered into military service directly from employment in milk production;
(4) Recommendation of the producer base committee shall:
(i) If to deny the request, be final upon notification to the producer, subject only to appeal by the producer to the Director; Dairy Division, within 45 days after such notification; or
(ii) If to grant the request in whole or in part, be transmitted to the Director, Dairy Division, and shall become final unless vetoed by such Director within 15 days after transmitted.
(5) Committee members shall be reimbursed by the market administrator from the funds collected under § 1065.85 for their services at $30 per day or portion thereof, plus necessary travel and subsistence expense incurred in the performance of their duties as committee members.

(d) The market administrator shall maintain files of all requests for alleviation of hardship and the disposition of such requests. These files shall be open to the inspection of any interested person during the regular office hours of the market administrator.

ADVERTISING AND PROMOTION PROGRAM

**§ 1065.110 Agency.**

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1065.121(b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

**§ 1065.111 Composition of Agency.**

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1065.113(b), is authorized one agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers that have elected not to combine pursuant to § 1065.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group of participating producers, in total, pursuant to § 1065.113(c), one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent but not less than 1 percent of the total participating producers it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1065.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives, but not less than five.

**§ 1065.112 Term of office.**

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

**§ 1065.113 Selection of Agency members.**

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1065.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:
(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

**§ 1065.114 Agency operating procedure.**

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

**§ 1065.115 Powers of the Agency.**

The Agency is empowered to:
(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1065.110;
(b) Make rules and regulations to effectuate the purposes of Public Law 91-670;
(c) Recommend amendments to the Secretary; and
(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1065.110 and 1065.117.

**§ 1065.116 Duties of the Agency.**

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:
(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;
(b) Develop programs and projects pursuant to §§ 1065.110 and 1065.117;
(c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;
(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;
(e) When desirable, establish an advisory committee(s) of persons other than Agency members;
(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;
(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and
(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

**§ 1065.117 Advertising, research, education, and promotion program.**

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:
(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;
(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and
(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

**§ 1065.118 Limitation of expenditures by the Agency.**

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1065.121(b)(1) shall be utilized for administrative expense of the Agency.
(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.
(c) Agency funds may not be expended to solicit producer participation.
(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

**§ 1065.119 Personal liability.**

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

**§ 1065.120 Procedure for requesting refunds.**

Any producer may apply for refund subject to the applicable conditions set forth in this section.
(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.
(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.
(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1065.61(a)(5): *Provided;* That, such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.
(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refunds with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1065.61(a)(5).

**§ 1065.121 Duties of the market administrator.**

Except as specified in § 1065.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:
(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1065.113(c);
(b) Set aside the amounts subtracted under § 1065.61(a)(5) into an advertising and promotion fund, separately accounted for, from which shall be disbursed;
(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to paragraph (b) (2) and (3) of this section, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).
(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that ex-

V 38 177 SEP 13 73 XUM

ceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1065.61(a)(5).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1065.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1065.61(a)(5) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to paragraph (b)(2) of this section.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1065.110 through 1065.122).

(d) Make necessary audits to establish that all agency funds are used only for authorized purposes.

**§ 1065.122 Liquidation.**

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1065.70.

## PART 1068—MILK IN MINNEAPOLIS-ST. PAUL, MINN., MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1068.1 General provisions.

DEFINITIONS

Sec
1068.2 Minneapolis-St. Paul, Minn., marketing area.
1068.3 Route disposition.
1068.4 Plant.
1068.5 [Reserved]
1068.6 [Reserved]
1068.7 Pool plant.
1068.8 Nonpool plant.
1068.9 Handler.
1068.10 Producer-handler.
1068.11 [Reserved]
1068.12 Producer.
1068.13 Producer milk.
1068.14 Other source milk.
1068.15 Fluid milk product.
1068.16 Fluid cream product.
1068.17 Filled milk.
1068.18 Cooperative association.

HANDLER REPORTS

1068.30 Reports of receipts and utilization.
1068.31 Payroll reports.
1068.32 Other reports.

CLASSIFICATION OF MILK

1068.40 Classes of utilization.
1068.41 Shrinkage.
1068.42 Classification of transfers and diversions.
1068.43 General classification rules.
1068.44 Classification of producer milk.
1068.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1068.50 Class prices.
1068.51 Basic formula price.
1068.52 Plant location adjustments for handlers.

Sec.
1068.53 Announcement of class prices.
1068.54 Equivalent price.

UNIFORM PRICE

1068.60 Handler's value of milk for computing uniform price.
1068.61 Computation of uniform price.
1068.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1068.70 Producer-settlement fund.
1068.71 Payments to the producer-settlement fund.
1068.72 Payments from the producer-settlement fund.
1068.73 Payments to producers and to cooperative associations.
1068.74 Butterfat differential.
1068.75 Plant location adjustments for producers and on nonpool milk.
1068.76 Payments by handler operating a partially regulated distributing plant.
1068.77 Adjustment of accounts.
1068.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1068.85 Assessment for order administration.
1068.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1068 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1068.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1068.2 Minneapolis-St. Paul, Minn., marketing area.**

"Minneapolis-St. Paul, Minn., marketing area" (referred to in this part as the "marketing area") means all the territory within the boundaries of the townships and counties listed below. The marketing area shall include all territory that is now, or in the future, occupied by Government (municipal, State, or Federal) reservations, installations, institutions, or other similar establishment if any part of such territory is within the designated geographical limits of the marketing area.

MINNESOTA COUNTIES

| | |
|---|---|
| Anoka. | Mille Lacs. |
| Benton. | Pine. |
| Carver. | Ramsey. |
| Chisago. | Renville. |
| Dakota. | Scott. |
| Hennepin. | Sherburne. |
| Isanti. | Sibley. |
| Kanabec. | Stearns. |
| Kandiyohi. | Washington. |
| McLeod. | Wright. |
| Meeker. | |

WISCONSIN COUNTIES

In Pierce County, the townships of:
Clifton. River Falls.

In St. Croix County, the townships of:

| | |
|---|---|
| Hudson. | Stanton. |
| Kinnickinnic. | Star Prairie. |
| Richmond. | Troy. |
| St. Joseph. | Warren. |
| Somerset. | |

**§ 1068.3 Route disposition.**

"Route disposition" means any delivery either inside or outside the marketing area (including disposition by a vendor or from a plant store or from vending machines) of any fluid milk product classified as Class I milk to a wholesale or retail shop, including any governmentally operated institution, but excluding any disposition of skim milk or butterfat not eligible for sale in fluid form as Grade A milk in the marketing area from a nonpool plant to any other plant or to a commercial processor of foods.

**§ 1068.4 Plant.**

"Plant" means the entire land, buildings, surroundings, facilities and equipment, whether owned or operated by one or more persons, maintained and operated at the same location primarily for the receiving, processing or other handling of milk or milk products (including filled milk). Under this definition any separate portion of a premises or facilities qualified under § 1068.7(b) used to receive, process, or otherwise handle milk shall be deemed to be a separate plant. This definition shall not include any building, premises, facilities, or equipment used primarily (a) to hold or store bottled milk or milk products (including filled milk) in finished form in transit for wholesale or retail distribution on a route(s), or (b) to transfer milk from one conveyance to another in transit from farm to plant of first receipt.

**§ 1068.5 [Reserved]**

**§ 1068.6 [Reserved]**

**§ 1068.7 Pool plant.**

"Pool plant" means any plant meeting the conditions of paragraph (a) or (b) of this section, but not any plant withdrawn pursuant to paragraph (c) of this section, or any plant exempt pursuant to paragraph (d) of this section.

(a) A plant in which milk is processed or packaged and from which not less than 15 percent of its total disposition of Class I milk (except filled milk) during the month either by the operator of such plant or by another person is route disposition within the marketing area: *Provided,* That the total quantity of Class I milk (except filled milk) disposed of from such plant during the month either inside or outside the marketing area, is equal to 30 percent or more of such plant's total receipts of skim milk and butterfat eligible for sale in fluid form as Grade A milk within the marketing area in any of the months of January through June, or to 50 percent or more of such total receipts in any of the months of July through December.

(b) Any plant from which during any month 30 percent or more of such plant's total receipts for such month from farms of skim milk or butterfat eligible for sale in fluid form as Grade A milk within the marketing area is delivered (except as filled milk) to (1) a plant(s) which has qualified pursuant to paragraph (a) of this section, (2) any other plants located within the marketing area from

which route disposition is made within the marketing area, or (3) a governmentally owned and operated institution which disposes of Class I milk solely for use on its own premises or to its own facilities: *Provided,* That if during each of the months of September, October, and November, 30 percent or more of such plant's receipts of skim milk or butterfat for such month as described above is delivered as provided in this paragraph, it shall be a pool plant through the following August: *And provided further,* That any deliveries of milk by a cooperative association during the months of September, October, and November directly from a farm(s) of its producer member(s) to a plant(s) described in paragraph (a) of this section may be considered, for purposes of this paragraph, as having been received first at a plant of such cooperative association.

(c) Upon written request by the handler to the market administrator, received or postmarked on or before the last day of any month, any plant qualified as a pool plant pursuant to paragraph (b) of this section may be withdrawn from pool plant status beginning with the next month. Any such plant withdrawn from automatic pool plant status may not regain such status prior to the next September 1 and then only by meeting the requirements set forth in the first proviso of paragraph (b) of this section in the same manner as a plant qualifying for pool plant status for the first time.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A plant withdrawn pursuant to paragraph (c) of this section; or

(3) A plant qualified as a pool plant pursuant to paragraph (a) or (b) of this section if the conditions of paragraph (d)(3) (i) and (ii) of this section are met. Such plant shall be exempt from the provisions of this part except for reports that may be required pursuant to § 1068.30(d) and verification of such reports by the market administrator in accordance with § 1000.5 of this chapter:

(i) The Secretary determines that a greater quantity of milk in fluid form is disposed of from such plant to a regulated marketing area as defined in another order issued pursuant to the Act either as route disposition, excluding filled milk, or to pool plants qualified on the basis of route disposition than is disposed of from such plant in the Minneapolis-St. Paul marketing area either as route disposition, excluding filled milk, or to pool plants qualified on the basis of route disposition.

(ii) Such milk would be subject to the class price and producer payment provisions of the other marketing agreement or order upon being made exempt from this part.

**§ 1068.8 Nonpool plant.**

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant and from which fluid milk products eligible for sale as Grade A in consumer-type packages or dispenser units or filled milk are disposed of as route disposition in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant and from which a Grade A fluid milk product or filled milk is shipped during the month to a pool plant.

**§ 1068.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant(s);

(b) Any cooperative association with respect to milk of its members diverted for its account pursuant to § 1068.13;

(c) Any cooperative association qualifying as a handler pursuant to paragraph (a) of this section shall be, for the purposes of making payments pursuant to § 1068.71, the handler also with respect to producer milk caused to be delivered for the account of such association from the farms of producers to the pool plant(s) of an other handler(s);

(d) Any person in his capacity as the operator of a partially regulated distributing plant. This definition shall not apply to a governmentally owned and operated institution which disposes of Class I milk solely for use on its own premises or to its own facilities;

(e) A producer-handler,

(f) Any person in his capacity as the operator of an other order plant from which during the month there is route disposition in the marketing area or fluid milk products are shipped to a pool plant; or

(g) Any person in his capacity as the operator of an unregulated supply plant.

**§ 1068.10 Producer-handler.**

(a) "Producer-handler" means any person who meets all of the following conditions:

(1) Operates a dairy farm and a distribution plant at which Grade A milk of his own production is processed and packaged, and from which there is route disposition in the marketing area;

(2) Receives no milk or fluid milk products from the farms of other dairy farmers nor from any other source, except receipts of not more than 50,000 pounds of milk (3.5 percent milk equivalent of butterfat) during the month by transfer from pool plants of other handlers;

(3) Receives no nonfluid milk products from any source for use in reconstituting fluid milk products;

(4) Has route disposition consisting only of skim milk and butterfat obtained from his own farm production except that received pursuant to the exception set forth in paragraph (a)(2) of this section; and

(5) The maintenance, care and management of the dairy animals and other resources necessary to produce such milk and the processing, packaging, or distribution of such milk are the personal enterprise, and the personal risk, of such person.

(b) Any handler claiming producer-handler status shall furnish to the market administrator, for verification, evidence of his qualifications as a producer-handler pursuant to this section and shall furnish evidence of subsequent changes made in the manner of producing securing, or distributing milk that affect such qualifications as a producer-handler. Such verification by the market administrator shall be made within 15 days of receipt of the evidence and shall be effective as of the first day of the month during which verification is made.

**§ 1068.11 [Reserved]**

**§ 1068.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, and whose milk is received at a pool plant as producer milk directly from the farm or diverted pursuant to § 1068.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1068.44(a)(8)(iii) and the corresponding step of § 1068.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1068.13 Producer milk.**

"Producer milk" means the skim milk and butterfat in Grade A milk of a producer which is:

(a) Received at a pool plant directly from a producer; or

(b) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant, subject to the following conditions:

(1) Such milk shall be priced at the location of the nonpool plant to which diverted;

(2) In any month that less than 6 days' production of a producer is delivered to pool plants the quantity of milk of the producer diverted during the month that exceeds that delivered to pool plants shall not be producer milk;

(3) During the months of September

V 38-177 SEP 13 73 XUM

through November, a cooperative association handler may divert for his account the milk of any member producer. The total quantity of producer milk diverted by such handler in excess of 10 percent of the milk received from member producers at pool plants during the month shall not be producer milk;

(4) During the months of December through August, a cooperative association handler may divert for his account the milk of any member producer. The total quantity of producer milk diverted by such handler in excess of 25 percent of the milk received from member producers at pool plants during the month shall not be producer milk;

(5) During the months of September through November, the operator of a pool plant, other than a cooperative association, may divert for his account the milk of any producer other than a member of a cooperative association. The total quantity of producer milk diverted by such handler in excess of 10 percent of the milk received at such pool plant during the month from producers who are not members of a cooperative association shall not be producer milk;

(6) During the months of December through August, the operator of a pool plant, other than a cooperative association may divert for his account the milk of any producer other than a member of a cooperative association. The total quantity of producer milk diverted by such handler in excess of 25 percent of the milk received at such pool plant during the month from producers who are not members of a cooperative association shall not be producer milk; and

(7) The diverting handler shall designate the dairy farmers whose milk is not producer milk pursuant to paragraph (b) (3), (4), (5), and (6) of this section. If the handler fails to make such designation, no milk diverted by him shall be producer milk.

**§ 1068.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1068.40 (b)(1) from any source other than producers, handlers described in § 1068.9 (c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1068.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1068.40 (b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1068.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1068.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1068.40 (b) or (c)(1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1068.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1068.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1068.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act;"

(b) Has full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or its products for its members; and

(c) Has its entire activities under the control of its members.

HANDLER REPORTS

**§ 1068.30 Reports of receipts and utilization.**

On or before the 10th day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1068.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1068.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1068.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1068.31 Payroll reports.**

(a) On or before the last day of each month, each handler described in § 1068.9 (a), (b), and (c) shall report to the market administrator his producer payroll for the preceding month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1068.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1068.32 Other reports.**

In addition to the reports required pursuant to §§ 1068.30 and 1068.31, the following shall be reported to the market administrator:

(a) Each handler specified in § 1068.9 (g) who operates an unregulated supply plant shall report as required in § 1068.30, except that the receipts of skim milk and butterfat in Grade A milk shall be reported in lieu of those in producer milk.

(b) Each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1068.40 Classes of utilization.**

Except as provided in § 1068.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1068.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1068.15; and

(6) In shrinkage assigned pursuant to § 1068.41(a) to the receipts specified in § 1068.41(a)(2) and in shrinkage specified in § 1068.41 (b) and (c).

**§ 1068.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1068.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1068.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1068.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1068.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1068.44(a)(12) and the corresponding step of § 1068.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1068.44(a)(7) or the corresponding step of § 1068.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1068.44(a)(11) or (12) or the corresponding steps of

V 38-177 SEP 13 73 XUM

§ 1068.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1068.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1068.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

§ 1068.43 General classification rules.

In determining the classification of producer milk pursuant to § 1068.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1068.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1068.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1068.40, 1068.41, and 1068.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall

be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids;

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1068.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association; and

(d) For classification purposes, pursuant to §§ 1068.40 through 1068.45, butterfat in skim milk either disposed of to others or used in the manufacture of milk products shall be accounted for at a butterfat content of 0.065 percent, unless the handler has adequate records of the actual butterfat content of such skim milk.

§ 1068.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1068.9(a) for each of his pool plants separately and of each handler described in § 1068.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1068.41 (b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1068.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1068.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1068.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1068.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2)(7)(v) and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk from a handler described in § 1068.9(c), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1068.40(b)(1) in inventory at the begining of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8) (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of

V 38 177 SEP 13 73 XUM

skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12) (ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1068.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12) (i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1068.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1068.44(a)(14) and the corresponding step of § 1068.44(b).

### § 1068.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1068.44(a)(12) and the corresponding step of § 1068.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1068.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

## Class Prices

### § 1068.50 Class prices.

Subject to the provisions of § 1068.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.06.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

### § 1068.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

### § 1068.52 Plant location adjustments for handlers.

(a) The Class I price for producer milk received at a plant located at least 35 miles (as determined by the market administrator) from the Minnesota Transfer Viaduct at University Avenue in St. Paul, Minn., shall be reduced by an amount indicated below:

| Plant location (miles) | Amount of deduction (cents) |
|---|---|
| Less than 35 | 0 |
| 35 but less than 45 | 6 |

For distances of 45 miles or more, an additional 1.5 cents for each 10 miles or fraction thereof beyond 45 miles.

(b) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

### § 1068.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

### § 1068.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

## Uniform Price

### § 1068.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1068.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1068.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1068.44(a)(14) and the corresponding step of § 1068.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1068.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1068.44(a)(9) and the corresponding step of § 1068.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1068.44(a)(7) (i) through (iv) and the corresponding step of § 1068.44 (b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1068.44(a)(7) (v) and (vi) and the corresponding step of § 1068.44(b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1068.44(a)(11) and the corresponding step of § 1068.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) For the first month that this paragraph is effective, subtract the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class II price, both for the preceding month, by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1068.40 (b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

### § 1068.61 Computation of uniform price.

For each month the market administrator shall compute a uniform price per hundredweight of milk of 3.5 percent butterfat content as follows:

(a) Combine into one total the values computed pursuant to § 1068.60 for all handlers who filed reports pursuant to § 1068.30 for the month and who made the payments pursuant to § 1068.71 for the preceding month;

(b) Add an amount equal to the total value of the location adjustments computed pursuant to § 1068.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1068.60(f); and

(f) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

### § 1068.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 15th day after the end of each month the uniform price for such month.

## Payments for Milk

### § 1068.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1068.71, 1068.76, and 1068.77 and out of which he shall make all payments due handlers pursuant to §§ 1068.72 and 1068.77: *Provided*, That the market administrator shall offset any payments due any handler against payments due from such handler.

### § 1068.71 Payments to the producer-settlement fund.

(a) On or before the 18th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section: *Provided*, That payment made by a cooperative association as a handler pursuant to this paragraph with respect to milk transferred to another handler from the pool plant of such cooperative association or caused to be delivered to such handler from the farms of producers for the account of such cooperative association shall not relieve the transferee-handler of any obligation on any such milk which is due the cooperative association, or otherwise due pursuant to §§ 1068.70 through 1068.75, §§ 1068.77 and 1068.78, and §§ 1068.85 and 1068.86:

(1) The total value of milk of the handler for such month as determined pursuant to § 1068.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1068.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1068.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each other according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

### § 1068.72 Payments from the producer-settlement fund.

On or before the 19th day after the end of each month, the market administrator shall pay, subject to the proviso of § 1068.70, to each handler the amount, if any, by which the amount computed pursuant to § 1068.71(a)(2) exceeds the amount computed pursuant to § 1068.71(a)(1).

### § 1068.73 Payments to producers and to cooperative associations.

Each handler shall make payment for milk received from producers or cooperative associations as follows:

(a) On or before the 11th day after the end of the month in which the skim milk or butterfat was received, to a cooperative association which is a handler, for all skim milk and butterfat received from a pool plant(s) operated by such cooperative association or caused by it to be delivered to such handler from pro-

V 38 I 177 SEP 13 73 XUM

ducers' farms, at not less than the class prices, as adjusted by the butterfat differential specified in § 1068.74, that are applicable at the location of the receiving handler's pool plant, less the amount of payment made pursuant to paragraph (c) of this section.

(b) On or before the 21st day after the end of the month during which the milk was received, to each producer for milk not caused to be delivered to such handler by a cooperative association which is a handler, as follows: *Provided*, That such payment shall be made, upon request, to a cooperative association which is not a handler, or to its duly authorized agent, with respect to milk received from each producer who has given such association authorization by contract or by other written instrument to collect the proceeds from the sale of his milk, and any payment made pursuant to this proviso shall be made on or before the 20th day after the end of such month:

(1) At not less than the uniform price computed pursuant to § 1068.61, subject to the butterfat and location differentials set forth in §§ 1068.74 and 1068.75, and less the amount of payment made pursuant to paragraph (c) of this section.

(c) Handlers (other than cooperative associations) shall make partial payments to producers and cooperative associations pursuant to paragraph (c) (1) and (2) of this section: *Provided*, That in the event any producer discontinues shipping to such handler during the month, such partial payment shall not be made and full payment for all milk received from such producer during such month shall be made pursuant to paragraphs (a) and (b) of this section.

(1) On or before the 25th day of each month, each handler shall make payment, except as set forth in paragraph (c)(2) of this section, to each producer, at not less than the applicable uniform price computed pursuant to § 1068.61 for the preceding month, for the milk of such producer received by such handler during the first 15 days of the current month;

(2) On or before the 20th day of each month, each handler shall make payment to a cooperative association which is not a handler for milk of producers from whom such association has received written authorization to collect payment, at not less than such uniform price for the preceding month, for all such milk received by such handler during the first 15 days of the current month; and

(3) On or before the 20th day of each month, each handler shall make payment to a cooperative association which is a handler, at not less than the Class I price for the current month pursuant to § 1068.50 for all skim and butterfat received from a pool plant(s) operated by such cooperative association, or caused by such association to be delivered from the producer's farms to such handler, during the first 15 days of the current month.

(4) All payments made pursuant to this paragraph shall be subject to the butterfat differential specified in § 1068.74 and location adjustments specified in § 1068.75 applicable at the location of the plant of the handler making the payment.

(d) In making payment to individual producers as required by this section, each handler shall furnish each producer from whom he received milk a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month involved, and the identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of the milk received from the producer;

(3) The minimum rate at which payment to the producer is required pursuant to this section;

(4) The rate used in making the payment if such rate is other than the applicable minimum;

(5) The amount (or rate) per hundredweight of each deduction claimed by the handler, including any deduction claimed under § 1068.86, together with a description of the respective deductions; and

(6) The net amount of the payment to the producer.

### § 1068.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

### § 1068.75 Plant location adjustments for producers and on nonpool milk.

(a) In making payments pursuant to § 1068.73 (b) and (c) for milk received at a pool plant located 35 miles or more from the Minnesota Transfer Viaduct at University Avenue in St. Paul, Minn., each handler shall deduct from the applicable price payable to such producers an amount in accordance with the location of the plant based on the rates set forth in § 1068.52; and

(b) For the purpose of computations pursuant to §§ 1068.71 and 1068.72, the uniform price shall be adjusted at the rates set forth in § 1068.52 applicable at the location of the nonpool plant from which the milk was received, except that the uniform price shall not be less than the Class III price.

### § 1068.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1068.30(b) and 1068.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1068.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1068.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1068.60 for such handler shall include, in lieu of the value of other source milk specified in § 1068.60(f) less the value of such other source milk specified in § 1068.71(a)(2)(ii), a value of milk determined pursuant to § 1068.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1068.7(b), subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1068.30(b) and 1068.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(*c*) The value of milk determined pursuant to § 1068.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1068.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1068.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

### § 1068.77 Adjustment of accounts.

(a) Whenever verification by the market administrator of reports or payments by any handler discloses errors in payments to the producer-settlement fund pursuant to §1068.71, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days of such billing, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, the market administrator shall, within 5 days, make payment to such handler.

(b) Whenever verification by the market administrator of the payments by a handler to any producer or cooperative association discloses payment of less than is required by §1068.73, the handler shall pay the balance due such producer or cooperative association not later than the time for making payments next following such disclosure.

### § 1068.78 Charges on overdue accounts.

Any unpaid obligation of a handler pursuant to §§1068.71, 1068.76, and 1068.77(a), for which remittance has not been made by the close of business on the next day following the date specified for such payment shall be increased three-fourths of 1 percent for each month and any remaining amount due shall be increased at a similar rate on the corresponding day of each month thereafter until paid. The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include any unpaid charges previously made pursuant to this section; and for the purpose of this section any obligation that was determined at a date later than prescribed by the order because of a handler's failure to submit a report to the market administrator when due, shall be considered to have been payable by the date it would have been due if the report had been filed when due.

### Administrative Assessment and Marketing Service Deduction

### § 1068.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 3 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk (including such handler's own production);

(b) Other source milk allocated to Class I pursuant to § 1068.44(a) (7) and (11) and the corresponding steps of § 1068.44(b), except such other source milk that is excluded from the computations pursuant to § 1068.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant that exceeds the skim milk and butterfat subtracted pursuant to § 1068.76(a)(2).

### § 1068.86 Deduction for marketing services.

(a) *Deductions for marketing services.* Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than himself) pursuant to § 1068.73, shall make a deduction of 6 cents per hundredweight, or such lesser deduction as the Secretary from time to time may prescribe, with respect to all milk received from producers' farms during the month, and shall pay such deductions to the market administrator on or before the 18th day after the end of such month. Such moneys shall be expended by the market administrator for market information to, and for the verification of weights, sampling, and testing of milk received from, said producers.

(b) *Producers' cooperative associations.* In the case of producers for whom a cooperative association which the Secretary determines to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, no such deduction shall be made.

## PART 1069—MILK IN DULUTH-SUPERIOR MARKETING AREA

### Subpart—Order Regulating Handling

General Provisions

Sec.
1069.1 General provisions.

Definitions

1069.2 Duluth-Superior marketing area.
1069.3 Route disposition.
1069.4 [Reserved]
1069.5 Distributing plant.
1069.6 Supply plant.
1069.7 Pool plant.
1069.8 Nonpool plant.
1069.9 Handler.
1069.10 Producer-handler.
1069.11 [Reserved]
1069.12 Producer.
1069.13 Producer milk.
1069.14 Other source milk.
1069.15 Fluid milk product.
1069.16 Fluid cream product.
1069.17 Filled milk.
1069.18 Cooperative association.

Handler Reports

1069.30 Reports of receipts and utilization.
1069.31 Payroll reports.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1069.85 Assessment for order administration.
1069.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1069 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1069.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1069.2 Duluth-Superior marketing area.**

"Duluth-Superior marketing area", hereinafter called the "marketing area", means all of the territory within Carlton County and the city of Duluth, in the State of Minnesota; and all of the territories within the counties of Ashland, Bayfield, and Douglas, in the State of Wisconsin.

**§ 1069.3 Route disposition.**

"Route disposition" means any delivery to retail or wholesale outlets (including delivery by a vendor or a sale from a plant or plant store) of any fluid milk product classified as Class I milk, other than a delivery in bulk form to a pool plant or nonpool plant.

**§ 1069.4 [Reserved]**

**§ 1069.5 Distributing plant.**

"Distributing plant" means a plant in which any Grade A fluid milk product is pasteurized or packaged and from which there is route disposition during the month in the marketing area.

**§ 1069.6 Supply plant.**

"Supply plant" means a plant from which Grade A milk is shipped during the month to a pool plant.

**§ 1069.7 Pool plant.**

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) Any plant, hereinafter referred to as a "distributing pool plant", in which fluid milk products are pasteurized or packaged and from which there is route disposition during the month, except filled milk, equal to 50 percent or more of total receipts of Grade A milk at such plant from dairy farmers, from other plants, and from cooperative associations in their capacity as handlers and from which there is route disposition, except filled milk, in the marketing area equal to 10 percent or more of such total receipts: *Provided*, That such route disposition (not including filled milk) in the marketing area averages at least 500 pounds per day.

(b) Any plant, hereinafter referred to as a "supply pool plant", from which during the month 50 percent or more of its supply of Grade A milk from dairy farmers is moved to a distributing pool plant(s): *Provided*, That any supply plant which has qualified as a pool plant in each of the months of September, October, and November, shall be a pool plant for each of the following months of December through August unless written request for nonpool status is furnished in advance to the market administrator.

(c) A plant(s) (1) which is approved by a duly constituted health authority for the handling of Grade A milk, (2) which is operated by a cooperative association, and (3) from which the quantity of milk transferred by the association to plants specified in paragraph (a) of this section or delivered directly from the farm to such plants is equal to at least the following percentages, in the months indicated, of the quantity of Grade A milk delivered by all producers who are members of such association:

| Month | Minimum percentage |
|---|---|
| September, October, November | 40 |
| April, May, June | 20 |
| All other months | 30 |

The association shall furnish written notice to the market administrator specifying the plant(s) to be qualified pursuant to this paragraph (c) and the period during which such consideration shall apply. Such notice, and notice of any change in designation, shall be furnished on or before the 7th day following the month to which such notice applies.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant; and

(2) A plant which would be subject to the classification and pricing provisions of another order issued pursuant to the Act unless:

(i) Such plant is qualified as a pool plant pursuant to paragraph (a), (b), or (c) of this section and a greater volume of Class I milk, except filled milk, is disposed of from such plant in the Duluth-Superior marketing area than in the marketing area regulated pursuant to such other order, or

(ii) The Secretary determines that the applicable order should more appropriately be determined on some other basis.

**§ 1069.8 Nonpool plant.**

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant and from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products are shipped during the month to a pool plant.

**§ 1069.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant.

(b) Any cooperative association with respect to the milk of producers which is diverted pursuant to § 1069.12 for the account of such cooperative association.

(c) Any cooperative association which chooses to report as a handler with respect to the milk of its member producers which is delivered to the pool plant of another handler in a tank truck owned or operated by or under contract to such cooperative association for the account of such cooperative association. Such milk shall be considered as having been received by such cooperative association at the plant to which it is delivered.

(d) Any person who operates a partially regulated distributing plant.

(e) A producer-handler.

(f) Any person in his capacity as the operator of an other order plant that is either a distributing plant or a supply plant.

**§ 1069.10 Producer-handler.**

"Producer-handler" means a person who operates both a dairy farm(s) and a milk processing or bottling plant at which each of the following conditions are met during the month:

(a) Milk is received from the dairy farm(s) of such person but from no other dairy farm;

(b) There is route disposition in the marketing area; and

(c) The butterfat or skim milk disposed of in the form of fluid milk products does not exceed the butterfat or skim milk, respectively, received in the form of milk from the dairy farm(s) of such person and in the form of fluid milk products in bulk or in packaged form from pool plants of other handlers: *Provided*, That such person shall furnish to the market administrator for his verification, subject to review by the Secretary, evidence that the maintenance, care and management of the dairy animals and other resources necessary for the production of milk in his name are and continue to be the personal enterprise of and at the personal risk of such producer and the processing, packaging and distribution of the milk are and continue to be the personal enterprise of and at the personal risk of such person in his capacity as a handler.

**§ 1069.11 [Reserved]**

**§ 1069.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of, or acceptable to, a duly constituted health authority, and whose milk is:

(1) Received at a pool plant; or

(2) Diverted from a pool plant to a nonpool plant by a handler or cooperative association for the account of such handler or cooperative association. Milk so diverted shall be deemed to have been received by the diverting handler at the plant from which it is diverted.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1069.44(a)(8)(iii) and the corresponding step of § 1069.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1069.13 Producer milk.**

"Producer milk" means all skim milk and butterfat in milk produced by a producer and received at a pool plant directly from producers or diverted pursuant to § 1069.12.

**§ 1069.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1069.40(b)(1) from any source other than producers, handlers described in § 1069.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1069.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1069.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in §1069.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1069.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1069.40 (b) or (c)(1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1069.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1069.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1069.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association, to be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act."

HANDLER REPORTS

**§ 1069.30 Reports of receipts and utilization.**

On or before the seventh day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1069.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1069.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1069.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1069.31 Payroll reports.**

(a) On or before the 25th day after the end of each month, each handler described in § 1069.9(a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1069.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1069.32 Other reports.**

In addition to the reports required pursuant to §§ 1069.30 and 1069.31, each handler shall report such other informa-

V 38-177 SEP 13 73 XUM

tion as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

§ 1069.40 Classes of utilization.

Except as provided in § 1069.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1069.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1069.15;

(6) In shrinkage assigned pursuant to § 1069.41(a)(2) and in shrinkage specified in § 1069.41 (b) and (c).

§ 1069.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1069.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1069.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraphs (b) (1), (2), (4), (5), and (6), of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1069.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1069.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1069.44(a)(12) and the corresponding step of § 1069.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1069.44(a)(7) or the corresponding step of § 1069.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1069.44(a) (11) or (12) or the corresponding steps of § 1069.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b) (3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1069.40.

(c) *Transfers and diversions to producer-handlers.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred or diverted in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraphs (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraphs (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or divertor-handler claims such classification in his report of receipts and utilization filed pursuant to § 1069.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

§ 1069.43 General classification rules.

In determining the classification of producer milk pursuant to § 1069.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1069.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1069.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1069.40, 1069.41, and 1069.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1069.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

V 38 I 177 SEP 13 73 XUM

§ 1069.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1069.9(a) for each of his pool plants separately and of each handler described in § 1069.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1069.41 (b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1069.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1069.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1069.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1069.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (a) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(a) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(b) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk from a handler described in § 1069.9(c), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1069.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(a) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1069.45(a); or

(b) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1069.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1069.44(a)(14) and the corresponding step of § 1069.44(b).

§ 1069.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1069.44(a)(12) and the corresponding step of § 1069.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1069.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

CLASS PRICES

§ 1069.50 Class prices.

Subject to the provisions of § 1069.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.10.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1069.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest 0.1 cent) per 0.1 percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1069.52 Plant location adjustments for handlers.

(a) For producer milk which is received at a plant located more than 55 miles by the shortest highway distance, as determined by the market administrator, from the Courthouse at Duluth, Minn., or Ashland, Wis., whichever is closer, and which is classified as Class I milk, the price specified in § 1069.50(a) shall be reduced by 8 cents if such plant is located more than 55 miles but not more than 65 miles from such courthouse and by an additional 1.3 cents for each 10 miles or fraction thereof that such distance exceeds 65 miles.

(b) For the purpose of calculating location adjustments, receipts of fluid milk products from pool plants shall be assigned any remainder of Class I milk at the transferee-plant that is in excess of the sum of producer milk receipts at such plant and that assigned as Class I to receipts from other order plants and unregulated supply plants. Such assignment shall be made first to transferor-plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

§ 1069.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

§ 1069.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

UNIFORM PRICE

§ 1069.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1069.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1069.44 by the applicable class prices and add the resulting amounts;

V 38-177 SEP 13 73 XUM

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1069.44(a)(14) and the corresponding step of § 1069.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1069.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1069.44(a)(9) and the corresponding step of § 1069.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1069.44(a)(7) (i) through (iv) and the corresponding step of § 1069.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1069.44(a)(7) (v) and (vi) and the corresponding step of § 1069.44(b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1069.44(a)(11) and the corresponding step of § 1069.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

**§ 1069.61 Computation of uniform price.**

For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1069.60 for all handlers who filed the reports prescribed by § 1069.30 for the month and who made the payments pursuant to §§ 1069.71 and 1069.73 for the preceding month;

(b) Add an amount equal to the total value of the location adjustments computed pursuant to § 1069.75;

(c) Add an amount equal to one-half the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1069.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price".

**§ 1069.62 Announcement of uniform price and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

**§ 1069.70 Producer-settlement fund.**

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1069.71, 1069.76, and 1069.77, and out of which he shall make payments to handlers pursuant to §§ 1069.72 and 1069.77: *Provided*, That any payments due to any handler shall be offset by any payments due from such handler.

**§ 1069.71 Payments to the producer-settlement fund.**

(a) On or before the 15th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1069.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1069.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1069.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

**§ 1069.72 Payments from the producer-settlement fund.**

On or before the 17th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1069.71(a)(2) exceeds the amount computed pursuant to § 1069.71(a)(1). If at such time the balance in the producer-settlement fund is insufficient to make all payments required by this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the appropriate funds are available.

**§ 1069.73 Payments to producers and to cooperative associations.**

On or before the 20th day after the end of each month, each handler shall make payments as follows:

(a) To each producer from whom milk was received during the month at not less than the uniform price per hundredweight computed pursuant to § 1069.61 subject to the butterfat differential computed pursuant to § 1069.74 and the location adjustment computed pursuant to § 1069.75 and less (1) deductions for marketing services pursuant to § 1069.86, and (2) other proper deductions: *Provided*, That with respect to each deduction for hauling, or for any other purpose, made from such payment, the burden shall rest upon the handler making the deduction to prove that each deduction is authorized, and properly chargeable to the producer: *And provided further*, That if by such date such handler has not received full payment from the market administrator pursuant to § 1069.72, he may reduce pro rata his payment to producers by not more than the amount of such underpayment. Payment to producers shall be completed thereafter not later than the date for making payment pursuant to this paragraph next following after receipt of the balance due from the market administrator;

(b) A handler who has not received on the 20th day after the end of each month the balance of the payments due him from the market administrator shall not be deemed to be in violation of paragraph (a) of this section if he reduced his payments to producers by not more than the amount of the reduction payment from the producer-settlement fund. The handler shall, however, complete such payments not later than the date for making such payments next following receipt of the balance from the market administrator; and

(c) On or before the 15th day after the end of each month, to each cooperative association with respect to receipts of milk for which such cooperative association is defined as the handler not less than the value of such milk at the class prices, as adjusted by the butterfat differential specified in § 1069.74, that are applicable at the location of the receiving handler's pool plant.

**§ 1069.74 Butterfat differential.**

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

**§ 1069.75 Plant location adjustments for producers and on nonpool milk.**

(a) For milk which is received at a pool plant located more than 55 miles but not more than 65 miles by shortest highway distance, as determined by the market administrator, from the courthouse at Duluth, Minn., or at Ashland, Wis., whichever is closer, there should be deducted 8 cents per hundredweight and an additional 1.3 cents should be deducted for each 10 miles or fraction thereof that such distance exceeds 65 miles; and

(b) For purposes of computations pursuant to §§ 1069.71 and 1069.72 the uniform price shall be adjusted at the rates set forth in § 1069.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted uniform price shall not be less than the Class III price.

**§ 1069.76 Payments by handler operating a partially regulated distributing plant.**

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1069.30(b) and 1069.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1069.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1069.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1069.60 for such handler shall include, in lieu of the value of other source milk specified in § 1069.60(f) less the value of such other source milk specified in § 1069.71(a)(2)(ii), a value of milk determined pursuant to § 1069.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1069.7(b), subject to the following conditions:

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1069.30(b) and 1069.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1069.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1069.74 for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1069.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

**§ 1069.77 Adjustment of accounts.**

Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in moneys due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount due and payment thereof shall be made on or before the next date for making payments set forth in the provision under which such error occurred.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

**§ 1069.85 Assessment for order administration.**

As his pro rata share of the expense of administration of the order, each han-

V 38 1177 SEP 13 73 XUM

dler shall pay to the market administrator on or before the 15th day after the end of the month 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk (including such handler's own production);

(b) Other source milk allocated to Class I pursuant to § 1069.44(a) (7) and (11) and the corresponding steps of § 1069.44(b), except such other source milk that is excluded from the computations pursuant to § 1069.60 (d) and (f); and

(c) Class I milk disposed of in the marketing area from a partially regulated distributing plant that exceeds the skim milk and butterfat subtracted pursuant to § 1069.76(a)(2).

**§ 1069.86 Deduction for marketing services.**

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers pursuant to § 1069.73, with respect to all milk received from each producer at a plant not operated by a cooperative association qualified under paragraph (b) of this section of which such producer is a member, shall deduct an amount not exceeding 3 cents per hundredweight (the exact amount to be determined by the market administrator subject to review by the Secretary) from the payments made direct to such producers and such handler shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be used by the market administrator to provide market information and to verify the accuracy of weights, sampling and testing of milk received from such producers.

(b) In the case of milk of producers who are members of a cooperative association which is actually performing the services described in paragraph (a) of this section, which is received at a plant not operated by such cooperative association, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from the payments to be made direct to such producers pursuant to § 1069.73, as are authorized by such producers and, on or before the 15th day after the end of such month, pay such deductions to such cooperative association.

## PART 1070—MILK IN THE CEDAR RAPIDS-IOWA CITY MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1070.1 General provisions.

DEFINITIONS

1070.2 Cedar Rapids-Iowa City marketing area.
1070.3 [Reserved]
1070.4 [Reserved]
1070.5 Distributing plant.
1070.6 Supply plant.
1070.7 Pool plant.
1070.8 Nonpool plant.
1070.9 Handler.
1070.10 Producer-handler.
1070.11 [Reserved]
1070.12 Producer.
1070.13 Producer milk.
1070.14 Other source milk.
1070.15 Fluid milk product.
1070.16 Fluid cream product.
1070.17 Filled milk.
1070.18 Cooperative association.

HANDLER REPORTS

1070.30 Reports of receipts and utilization.
1070.31 Payroll reports.
1070.32 Other reports.

CLASSIFICATION OF MILK

1070.40 Classes of utilization.
1070.41 Shrinkage.
1070.42 Classification of transfers and diversions.
1070.43 General classification rules.
1070.44 Classification of producer milk.
1070.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1070.50 Class prices.
1070.51 Basic formula price.
1070.52 Plant location adjustments for handlers.
1070.53 Announcement of class prices.
1070.54 Equivalent price.

UNIFORM PRICE

1070.60 Handler's value of milk for computing uniform price.
1070.61 Computation of uniform price.
1070.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1070.70 Producer-settlement fund.
1070.71 Payments to the producer-settlement fund.
1070.72 Payments from the producer-settlement fund.
1070.73 Payments to producers and to cooperative associations.
1070.74 Butterfat differential.
1070.75 Plant location adjustments for producers.
1070.76 Payments by handler operating a partially regulated distributing plant.
1070.77 Adjustment of accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1070.85 Assessment for order administration.
1070.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1070 issued under secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

GENERAL PROVISIONS

**§ 1070.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1070.2 Cedar Rapids-Iowa City marketing area.**

"Cedar Rapids-Iowa City marketing area", called the "marketing area" in this part, means all the territory within the corporate limits of the cities of Cedar Rapids and Iowa City, both in the State of Iowa.

**§ 1070.3 [Reserved]**

**§ 1070.4 [Reserved]**

**§ 1070.5 Distributing plant.**

"Distributing plant" means a plant in which any Grade A fluid milk product is processed or packaged and disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) located in the marketing area.

**§ 1070.6 Supply plant.**

"Supply plant" means a plant from which Grade A milk or skim milk is shipped during the month to a pool plant qualified pursuant to § 1070.7.

**§ 1070.7 Pool plant.**

Except as provided in paragraph (e) of this section, "pool plant" means:

(a) A distributing plant from which a volume of Class I milk, except filled milk, equal to not less than 35 percent of the Grade A milk received at such plant from dairy farmers and from other plants is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) and not less than 15 percent of such receipts are so disposed of to such outlets in the marketing area.

(b) A supply plant from which the volume of fluid milk products, except filled milk, shipped during the month to pool plants qualified pursuant to paragraph (a) of this section is not less than 35 percent of the Grade A milk received at such plant from dairy farmers during such month: *Provided*, That if such shipments are not less than 50 percent of the receipts of Grade A milk at such plant during the immediately preceding period of September through November, such plant may, upon written application to the market administrator on or before March 1 of any year, be designated as a pool plant for the months of March through June of such year.

(c) A plant (1) which is approved by a duly constituted health authority for the handling of Grade A milk; (2) which is operated by a cooperative association; and (3) from which the milk transferred by the association to plants of other handlers specified in paragraph (a) of this section plus that delivered by such association pursuant to paragraph (d) of this section and that delivered directly from the farms of members of such association to such plants is Grade A milk delivered by producers who are members of the association. If written application is filed with the market administrator on or before the 5th day of any month, such plant may be designated a nonpool plant for such month and for any subsequent months, except as provided in paragraph (e) of this section.

(d) A cooperative association with respect to Grade A milk received from dairy farmers at their farms in a tank truck owned or operated by such cooperative association and delivered in such tank truck to a pool plant: *Provided*, That such milk shall be deemed

to have been received by the cooperative association at the location of the pool plant to which it is delivered by the tank truck and such location shall be deemed to be the location of such cooperative association in its capacity as the operator of a pool plant.

(e) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant; and

(2) A plant specified in paragraph (a), (b), (c), or (d) of this section during any month in which such plant would be subject to the classification and pricing provisions of another order issued pursuant to the act unless the disposition of fluid milk products, except filled milk, from such plant to pool plants qualified under this section and to retail and wholesale outlets in the Cedar Rapids-Iowa City marketing area exceeds such disposition to retail and wholesale outlets in such other marketing area and to pool plants regulated by such other order.

**§ 1070.8 Nonpool plant.**

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products in consumer-type packages or dispenser units are distributed on routes in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant from which fluid milk products are shipped during the month to a pool plant.

**§ 1070.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) A cooperative association with respect to producer milk diverted by the association for its account pursuant to § 1070.13;

(c) [Reserved]

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler; and

(f) Any person who operates an other order plant described in § 1070.7(e).

**§ 1070.10 Producer-handler.**

"Producer-handler" means any person who operates a dairy farm and a distributing plant but who receives no milk from other dairy farmers or from a cooperative association in its capacity as the operator of a pool plant pursuant to § 1070.7(d) and whose disposition of fluid milk products does not exceed that (a) received from a pool plant, (b) processed from milk of his own production, or (c) processed from fluid milk products received from a pool plant.

**§ 1070.11 [Reserved]**

**§ 1070.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, and whose milk is received at a pool plant.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1070.44(a)(8)(iii) and the corresponding step of § 1070.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1070.13 Producer milk.**

"Producer milk" means all skim milk and butterfat produced by producers which is:

(a) Received at a pool plant directly from producers; or

(b) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant for the account of the operator of a pool plant or a cooperative association, subject to the following:

(1) Such diversions may be without limit during the months of April through August, but not be for more than 25 days' production of any producer during any other month and milk diverted in excess of this limit shall not be producer milk;

(2) Milk so diverted for the account of the operator of a pool plant shall be deemed to have been received at the plant from which diverted; and

(3) Milk so diverted from the plant of another handler for the account of a cooperative association shall be priced at the location of the plant from which diverted.

**§ 1070.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1070.40(b)(1) from any source other than producers, pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1070.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1070.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1070.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1070.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1070.40(b) or (c)(1)(i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1070.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1070.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1070.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged

V 38 I 177 SEP 13 73 XUM

in making collective sales of or marketing milk or its products for its members.

HANDLER REPORTS

**§ 1070.30 Reports of receipts and utilization.**

On or before the 7th day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) [Reserved]

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1070.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition of fluid milk products in the marketing area.

(c) Each handler described in § 1070.9(b) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1070.31 Payroll reports.**

(a) On or before the 20th day after the end of each month, each handler described in § 1070.9 (a) and (b) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1070.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1070.32 Other reports.**

In addition to the reports required pursuant to §§ 1070.30 and 1070.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1070.40 Classes of utilization.**

Except as provided in § 1070.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1070.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1070.15; and

(6) In shrinkage assigned pursuant to § 1070.41(a) to the receipts specified in § 1070.41(a)(2) and in shrinkage specified in § 1070.41 (b) and (c).

**§ 1070.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1070.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) [Reserved]

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)(1), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1070.9(b), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1070.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1070.44(a)(12) and the corresponding step of § 1070.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1070.44(a)(7) or the corresponding step of § 1070.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1070.44(a)(11) or (12) or the corresponding steps of § 1070.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers or diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1070.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1070.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition of fluid milk products in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

V 38 177 SEP 13 73 XUM

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possbile first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plants' utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

**§ 1070.43 General classification rules.**

In determining the classification of producer milk pursuant to § 1070.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1070.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1070.9(b) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1070.40, 1070.41, and 1070.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1070.9(b) shall be determined separately from the operations of any pool plant operated by such cooperative association.

**§ 1070.44 Classification of producer milk.**

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1070.9(a) for each of his pool plants separately and of each handler described in § 1070.9(b) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1070.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1070.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1070.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1070.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1070.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i), of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in

receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1070.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provsiions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received;

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1070.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1070.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1070.44(a)(14) and the corresponding step of § 1070.44(b).

**§ 1070.45 Market administrator's reports and announcements concerning classification.**

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1070.44(a)(12) and the corresponding step of § 1070.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1070.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 10th day after the end of each month, report to each cooperative association which so requests, the percentage of the milk caused to be delivered by the cooperative association or its members to the pool plant(s) of each handler during the month, which was utilized in each class. For the purpose of this report, the milk so delivered shall be allocated to each class for each handler in the same ratio as all producer milk received by such handler during the month.

CLASS PRICES

**§ 1070.50 Class prices.**

Subject to the provisions of § 1070.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.33.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

V 38 I 177 SEP 13 73 XUM

§ 1070.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1070.52 Plant location adjustments for handlers.

(a) For milk received from producers at a pool plant located 50 miles or more by shortest hard-surfaced highway distance as measured by the market administrator, from the nearer of the City Halls in Cedar Rapids and Iowa City, Iowa, and disposed of as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price computed pursuant to § 1070.50(a) shall be reduced by 10 cents, plus 1.5 cents for each 10 miles or fraction thereof that such distance exceeds 65 miles.

(b) For purposes of calculating such adjustment, transfers between pool plants shall be assigned to Class I utilization remaining at the transferee-plant after computations pursuant to § 1070.44 (a)(12) and the corresponding step of § 1070.44(b) which is in excess of 95 percent of receipts at such plant from producers, such assignment to be made first to transferor-plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

§ 1070.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

§ 1070.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

UNIFORM PRICE

§ 1070.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1070.9(b) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1070.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1070.44(a)(14) and the corresponding step of § 1070.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1070.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1070.44 (a)(9) and the corresponding step of § 1070.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1070.44(a)(7) (i) through (iv) and the corresponding step of § 1070.44 (b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1070.44(a)(7) (v) and (vi) and the corresponding step of § 1070.44 (b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1070.44(a)(11) and the corresponding step of § 1070.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

§ 1070.61 Computation of uniform price.

For each month the market administrator shall compute a uniform price for producer milk of 3.5 percent butterfat content f.o.b. pool plants located within 50 miles of the city hall of Cedar Rapids or Iowa City, Iowa, as follows:

(a) Combine into one total the values computed pursuant to § 1070.60 for all handlers who filed the reports prescribed by § 1070.30 for the month and who made the payments pursuant to § 1070.71 for the preceding month;

(b) Add an amount equal to the total value of the location adjustments computed pursuant to § 1070.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations;

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1070.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

§ 1070.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 10th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

§ 1070.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1070.71, 1070.76, and 1070.77, and out of which he shall make all payments to handlers pursuant to §§ 1070.72 and 1070.77.

§ 1070.71 Payments to the producer-settlement fund.

(a) On or before the 12th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1070.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1070.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1070.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such

route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

§ 1070.72 Payments from the producer-settlement fund.

On or before the 12th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1070.71(a)(2) exceeds the amount computed pursuant to § 1070.71(a)(1): *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. A handler who has not received the balance of such payments from the market administrator shall not be considered in violation of § 1070.73 if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

§ 1070.73 Payments to producers and to cooperative associations.

Each handler shall make payment as follows:

(a) On or before the 15th day after the end of each month during which the milk was received, to each producer for milk received from him and for which payment is not made to a cooperative association pursuant to paragraph (b) of this section, at not less than the uniform price computed in accordance with § 1070.61, subject to the butterfat differential computed pursuant to § 1070.74 and less location adjustments pursuant to § 1070.75.

(b) On or before the 12th day after the end of each month during which the milk was received, to a cooperative association for milk which it caused to be delivered to such handler from producers, if such cooperative association is authorized to collect such payments for its member producers and exercises such authority, an amount equal to the sum of the individual payments otherwise payable to such producers.

(c) On or before the 11th day after the end of each month during which milk was received at a pool plant from a cooperative association in its capacity as the operator of a pool plant pursuant to § 1070.7(d), at not less than the class prices for such milk, as adjusted by the butterfat differential specified in § 1070.74, that are applicable at the location of the receiving handler's pool plant, plus an amount equal to that payable on the same quantity of producer milk pursuant to § 1070.85.

§ 1070.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1070.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price for producer milk received at a pool plant shall be reduced according to the location of the pool plant, at the rates set forth in § 1070.52; and

(b) For purposes of computations pursuant to §§ 1070.71 and 1070.72 the uniform price shall be adjusted at the rates set forth in § 1070.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted uniform price shall not be less than the Class III price.

§ 1070.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1070.30(b) and 1070.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1070.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated pant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1070.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant( but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1070.60 for such handler shall include, in lieu of the value of other source milk specified in § 1070.60(f) less the value of such other source milk specified in § 1070.71(a)(2)(ii), a value of milk determined pursuant to § 1070.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1070.7(b), subject to the following conditions:

V 38-177 SEP 13 73 XUM

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1070.30(b) and 1070.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1070.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1070.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1070.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(ii) of this section applies.

**§ 1070.77 Adjustment of accounts.**

Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in money due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due; and payment thereof shall be made on or before the next date for making payment set forth in the provisions under which such error occurred.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

**§ 1070.85 Assessment for order administration.**

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 12th day after the end of the month 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk;

(b) Other source milk allocated to Class I pursuant to § 1070.44(a) (7) and (11) and the corresponding steps of § 1070.44(b), except such other source milk that is excluded from the computations pursuant to § 1070.60 (d) and (f); and

(c) Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1070.76(a)(2).

**§ 1070.86 Deduction for marketing services.**

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1070.73 shall deduct 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all milk received by such handler from such producer (except such handler's own farm production) during the month, and shall pay such deductions to the market administrator not later than the 12th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of milk received by handlers from such producers during the month and to provide such producers with market information.

(b) In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall, in lieu of the deductions specified in paragraph (a) of this section, make such deductions as are authorized by such producers and, on or before, the 12th day after the end of each month, pay over such deductions to the association rendering such services.

---

## PART 1076—MILK IN EASTERN SOUTH DAKOTA MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1076.1 General provisions.

DEFINITIONS

1076.2 Eastern South Dakota marketing area.
1076.3 Route disposition.
1076.4 [Reserved]
1076.5 Distributing plant.
1076.6 Supply plant.
1076.7 Pool plant.
1076.8 Nonpool plant.
1076.9 Handler.
1076.10 Producer-handler.
1076.11 [Reserved]
1076.12 Producer.
1076.13 Producer milk.
1076.14 Other source milk.
1076.15 Fluid milk product.
1076.16 Fluid cream product.
1076.17 Filled milk.
1076.18 Cooperative association.

HANDLER REPORTS

1076.30 Reports of receipts and utilization.
1076.31 Payroll reports.
1076.32 Other reports.

CLASSIFICATION OF MILK

1076.40 Classes of utilization.
1076.41 Shrinkage.
1076.42 Classification of transfers and diversions.
1076.43 General classification rules.
1076.44 Classification of producer milk.
1076.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1076.50 Class prices.
1076.51 Basic formula price.
1076.52 Plant location adjustments for handlers.
1076.53 Announcement of class prices.
1076.54 Equivalent price.

UNIFORM PRICE

1076.60 Handler's value of milk for computing uniform price.
1076.61 Computation of uniform price.
1076.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1076.70 Producer-settlement fund.
1076.71 Payments to the producer-settlement fund.
1076.72 Payments from the producer-settlement fund.
1076.73 Payments to producers and to cooperative associations.
1076.74 Butterfat differential.
1076.75 Plant location adjustments for producers and on nonpool milk.
1076.76 Payments by handler operating a partially regulated distributing plant.
1076.77 Adjustment of accounts.
1076.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT

1076.85 Assessment for order administration.

AUTHORITY: The provisions of this Part 1076 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1076.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1076.2 Eastern South Dakota marketing area.**

"Eastern South Dakota marketing area," hereinafter called the "marketing area," means all of the territory within the counties listed below, including all territory within such counties which is occupied by government (municipal, State or Federal) reservations, installations, institutions, or other establishments:

IOWA COUNTY

Lyon.

MINNESOTA COUNTY

Rock.

SOUTH DAKOTA COUNTIES

Aurora.
Beadle.
Bon Homme.
Brown.
Clark.
Clay.
Codington.
Davison.
Day.
Douglas.
Edmunds.
Hamlin.
Hanson.
Hutchinson.
Jerauld.
Kingsbury.
Lake.
Lincoln.
McCook.
McPherson.
Miner.
Minnehaha.
Moody.
Sanborn.
Spink.
Turner.
Union (except Jefferson Township and the city of North Sioux City and the unorganized territory adjacent thereto).
Walworth.
Yankton.

**§ 1076.3 Route disposition.**

"Route disposition" means a delivery (including delivery by a vendor or a sale from a plant store, or distribution center) of any fluid milk product classified as Class I milk to retail or wholesale outlets, except a delivery in bulk form to a milk (including filled milk) processing plant. The route disposition of a handler shall be attributed to the processing and packaging plant from which the Class I milk is moved to retail or wholesale outlets without intermediate movement to another processing plant.

**§ 1076.4 [Reserved]**

**§ 1076.5 Distributing plant.**

"Distributing plant" means a plant which is approved by an appropriate health authority for the processing or packaging of Grade A milk and from which there is route disposition during the month in the marketing area.

**§ 1076.6 Supply plant.**

"Supply plant" means a plant from which milk or skim milk acceptable to an appropriate health authority for distribution in the marketing area under a Grade A label, is shipped during the month to a pool plant qualified pursuant to § 1076.7(a).

**§ 1076.7 Pool plant.**

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant from which route disposition, except filled milk, equals not less than 35 percent of the Grade A milk received at such plant from dairy farmers, handlers described in § 1076.9(c), and supply plants and not less than 15 percent of such receipts is disposed of as route disposition, except filled milk, in the marketing area.

(b) A supply plant from which the volume of fluid milk products, except filled milk, shipped during the month to pool plants qualified pursuant to paragraph (a) of this section is not less than 35 percent of the Grade A milk received at such plant from dairy farmers and handlers described in § 1076.9(c) during such month. If such shipments are not less than 50 percent of such receipts during each of the immediately preceding months of September through November, such plant shall be a pool plant for the months of March through June, unless the operator of such plant requests the market administrator in writing that such plant not be a pool plant, such nonpool status to be effective the first month following such notice and such plant shall thereafter be a nonpool plant until it again qualifies as a pool plant on the basis of the shipping requirements set forth in this paragraph.

(c) A plant, other than a distributing plant, operated by a cooperative association if more than 50 percent of the total milk supply of producer members of such cooperative association is shipped to pool distributing plants of other handlers during the month, either directly from the farm or by transfer from the plant of the cooperative association: *Provided*, That if a portion of such association's plant is physically apart from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition, it shall not be considered as part of a pool plant pursuant to this section.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A plant qualified pursuant to paragraph (a) of this section from which a lesser volume of fluid milk products, except filled milk, is disposed of in the eastern South Dakota marketing area than in the marketing area of another marketing agreement or order issued pursuant to the Act and which is fully subject to the classification and pricing provisions of such other agreement or order;

(3) Any plant qualified pursuant to paragraph (b) of this section for any portion of the period of March through June, inclusive, that producer milk at such plant is subject to the classification and pricing provisions of another order issued pursuant to the Act; and

(4) That portion of a plant that is physically apart from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

**§ 1076.8 Nonpool plant.**

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, and from which fluid milk products are shipped during the month to a pool plant.

**§ 1076.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) Any cooperative association with respect to the milk of producers diverted by the association for the account of such association pursuant to § 1076.13;

(c) A cooperative association with respect to milk of its member producers which is delivered from the farm to the pool plant of another handler in a tank truck owned and operated by, or under contract to, such cooperative association if the cooperative association notifies the market administrator and the handler to whom the milk is delivered, in writing prior to the first day of the month in which the milk is delivered, that it wishes to be the handler for the milk. In this case, the milk is received from producers by the cooperative association at the location of the plant to which it is delivered;

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler; and

(f) Any person who operates an other order plant described in § 1076.7(d).

**§ 1076.10 Producer-handler.**

"Producer-handler" means any person who is both a dairy farmer and the operator of a distributing plant, and who meets all of the following conditions:

(a) Receipts of fluid milk products at his plant are solely milk of his own production and from pool plants of other handlers;

(b) Receives no milk products other than fluid milk products from any source for use in reconstituting fluid milk products; and

(c) The maintenance, care and management of the dairy animals and other resources necessary to produce the milk and the processing, packaging, and distribution of the milk (including filled milk) are the personal enterprise and the personal risk of such person.

**§ 1076.11 [Reserved]**

**§ 1076.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, and whose milk is (1) received at a pool plant, or (2) diverted as producer milk pursuant to § 1076.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1076.44(a)(8)(iii) and the corresponding step of § 1076.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1076.13 Producer milk.**

"Producer milk" of each handler means all skim milk and butterfat produced by producers:

(a) With respect to receipts at a pool plant:

(1) Received directly from such producers; and

V 38-177 SEP 13 73 XUM

(2) Diverted from such pool plant to a nonpool plant that is not a producer-handler plant for the account of the operator of the pool plant, subject to the limitations and conditions of paragraph (c) of this section;

(b) With respect to receipts of a cooperative association:

(1) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant, subject to the limitations and conditions of paragraph (c) of this section; and

(2) For which the cooperative association is the handler as described in § 1076.9(c); and

(c) With respect to diversions to nonpool plants pursuant to paragraphs (a)(2) and (b)(1) of this section:

(1) A cooperative handler may divert for its account the milk of any member producer, whose milk is delivered to a distributing pool plant on at least 3 days during the month without limit during the other days of such month. The total quantity of milk so diverted may be without limit during the months of March, April, May, and June, but shall not exceed 35 percent of its member producer milk received at all pool plants during any other month of the year. Diversions in excess of such percentage shall not be considered producer milk, and the diverting cooperative shall specify the dairy farmers whose milk is ineligible as producer milk. If the cooperative association fails to designate such dairy farmers whose milk is ineligible, producer milk status shall be forfeited with respect to all milk diverted to a nonpool plant by such cooperative association;

(2) A handler in his capacity as the operator of a distributing pool plant may divert for his account the milk of any producer, other than a member of a cooperative association which has diverted milk pursuant to paragraph (c)(1) of this section, whose milk is received at a pool plant on at least 3 days during the month, without limit during the other days of such month. The total quantity of milk so diverted may be without limit during the months of March, April, May, and June, but during any other month of the year shall not exceed 35 percent of the milk received from producers who are not members of a cooperative association which has diverted milk pursuant to paragraph (c)(1) of this section. Diversions in excess of such percentage shall not be considered producer milk, and the diverting handler shall specify the dairy farmers whose milk is ineligible as producer milk. If the handler fails to designate such dairy farmers whose milk is ineligible, producer milk status shall be forfeited with respect to all milk diverted to a nonpool plant by such handler; and

(3) For the purpose of location adjustments pursuant to §§ 1076.52 and 1076.75, milk so diverted shall be priced at the location of the plant from which diverted.

**§ 1076.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1076.40(b)(1) from any source other than producers, handlers described in § 1076.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1076.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1076.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1076.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1076.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1076.40(b) or (c)(1) (i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1076.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1076.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1076.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association which the Secretary determines, after application by the association:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) Has full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk or its products for its members; and

(c) Has its entire activities under the control of its members.

HANDLER REPORTS

**§ 1076.30 Reports of receipts and utilization.**

On or before the 7th day (excluding holidays) after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1076.9(c);

(3) Receipts of fluid milk products and bulk fluid cream producs from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1076.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1076.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1076.31 Payroll reports.**

(a) On or before the 20th day after the end of each month, each handler described in § 1076.9(a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1076.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1076.32 Other reports.**

In addition to the reports required pursuant to §§ 1076.30 and 1076.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1076.40 Classes of utilization.**

Except as provided in § 1076.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1076.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragrapl (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1076.15; and

(6) In shrinkage assigned pursuant to § 1076.41(a) to the receipts specified in § 1076.41(a)(2) and in shrinkage specified in § 1076.41 (b) and (c).

**§ 1076.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1076.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1076.9(c), except that, if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests, determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from other order plants, excluding milk received by diversion and the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)(1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1076.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1076.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant or by a handler described in § 1076.9(c) to another handler's pool plant shall be classified as follows:

(1) Such transfers from a pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such

V 38 I 177 SEP 13 73 XUM

transfers shall be subject to the following conditions:

(i) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1076.44(a)(12) and the corresponding step of § 1076.44(b);

(ii) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1076.44(a)(7) or the corresponding step of § 1076.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(iii) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1076.44 (a)(11) or (12) or the corresponding steps of § 1076.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee plant; and

(2) Such transfers by a handler described in § 1076.9(c) shall be classified pro rata to the respective quantities of skim milk and butterfat remaining in each class after the computations pursuant to § 1076.44(a)(13)(i) and the corresponding step of § 1076.44(b).

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1076.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2)(ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1076.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at

the second plant that are set forth in this subparagraph.

**§ 1076.43 General classification rules.**

In determining the classification of producer milk pursuant to § 1076.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1076.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1076.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1076.40, 1076.41, and 1076.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1076.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

**§ 1076.44 Classification of producer milk.**

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1076.9(a) for each of his pool plants separately and of each handler described in § 1076.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1076.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1076.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1076.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1076.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1076.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i), of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk from a handler described in § 1076.9(c), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1076.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step

V 38 177 SEP 13 73 XUM

at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8) (i) and (ii), of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received;

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1076.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract in the following order from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from:

(i) Another pool plant according to the classification of such products pursuant to § 1076.42(a)(1); and

(ii) A handler described in § 1076.9(c) according to the classification of such products pursuant to § 1076.42(a)(2); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1076.44(a)(14) and the corresponding step of § 1076.44(b).

**§ 1076.45 Market administrator's reports and announcements concerning classification.**

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1076.44(a)(12) and the corresponding step of § 1076.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1076.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of each month, report to each cooperative association, which so requests, the percentage of the milk caused to be delivered by the cooperative association or its members to the pool plant(s) of each handler during the month, which was utilized in each class. For the purpose of this report, the milk so delivered shall be allocated to each class for each handler in the same ratio as all producer milk received by such handler during the month.

CLASS PRICES

**§ 1076.50 Class prices.**

Subject to the provisions of § 1076.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.50.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

**§ 1076.51 Basic formula price.**

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

**§ 1076.52 Plant location adjustments for handlers.**

(a) For milk received from producers at a pool plant located 100 miles or more by shortest hard-surfaced highway distance as measured by the market administrator, from the nearest of the Post Offices of Aberdeen, Huron, Mitchell, Sioux Falls, and Watertown, S. Dak., and disposed of as Class I milk, the price computed pursuant to § 1076.50(a) shall be reduced 15 cents, plus 1.5 cents for each 10 miles or fraction thereof that such distance exceeds 110 miles.

(b) For purposes of calculating such adjustment, transfers between pool plants shall be assigned to Class I disposition remaining at the transferee-plant after computations pursuant to § 1076.44(a)(12) and the corresponding step of § 1076.44(b) in excess of 95 percent of receipts at such plant of milk from producers and handlers described in § 1076.9(c), such assignment to be made first to transferor-plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

**§ 1076.53 Announcement of class prices.**

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

**§ 1076.54 Equivalent price.**

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

UNIFORM PRICE

**§ 1076.60 Handler's value of milk for computing uniform price.**

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1076.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1076.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1076.44(a)(14) and the corresponding step of § 1076.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1076.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1076.44(a)(9) and the corresponding step of § 1076.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1076.44(a)(7) (i) through (iv) and the corresponding step of § 1076.44 (b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1076.44(a)(7) (v) and (vi) and the corresponding step of § 1076.44 (b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1076.44(a)(11) and the corresponding step of § 1076.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

**§ 1076.61 Computation of uniform price.**

For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.5 percent butterfat content which is received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1076.60 for all handlers who filed the reports prescribed in § 1076.30 for such month, except those in default of payments required pursuant to § 1076.71 and 1076.73 for the preceding month;

(b) Add an amount equal to the total value of the location adjustments computed pursuant to § 1076.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the aggregate value computed pursuant to paragraphs (a), (b), and (c) of this section by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1076.60 (f); and

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The result shall be the uniform price for milk received from producers.

**§ 1076.62 Announcement of uniform price and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

**§ 1076.70 Producer-settlement fund.**

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1076.71, 1076.76, and 1076.77 and out of which he shall make all payments to handlers pursuant to §§ 1076.72 and 1076.77: *Provided*, That the market administrator shall offset the payment due to a handler against payments due from each handler.

**§ 1076.71 Payments to the producer-settlement fund.**

(a) On or before the 13th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1076.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1076.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1076.60(f).

(b) On or before the 25th day after the end of the month each handler who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

**§ 1076.72 Payments from the producer-settlement fund.**

On or before the 14th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1076.71(a)(2) exceeds the amount computed pursuant to § 1076.71(a)(1): *Provided*, That if the balance in the producer-settlement

V 38 177 SEP 13 73 XUM

fund is insufficient to make all payments pursuant to this section the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. A handler who has not received the balance of such payments from the market administrator shall not be considered in violation of § 1076.73 if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

**§ 1076.73 Payments to producers and to cooperative associations.**

(a) Each handler shall pay each producer for producer milk for which payment is not made to a cooperative association pursuant to paragraph (b) or (c) of this section, as follows:

(1) On or before the last day of each month, for producer milk received during the first 15 days of the month, at not less than the Class III price for the preceding month; and

(2) On or before the 15th day after the end of each month, for milk received during such month, an amount computed at not less than the uniform price per hundredweight, as adjusted pursuant to §§ 1076.74 and 1076.75, plus or minus adjustments for errors made in previous payments to such producer; and less

(i) Payment made pursuant to paragraph (a)(1) of this section;

(ii) Location adjustment deductions pursuant to § 1076.75; and

(iii) Proper deductions authorized by such producer;

(b) Except as provided in paragraph (c) of this section each handler shall make payment to a cooperative association for producer milk which it caused to be delivered to such handler, if such cooperative association is authorized to collect such payments for its members and exercises such authority, an amount equal to the sum of the individual payments otherwise payable for such producer milk, as follows:

(1) On or before the 26th day of each month an amount equal to not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (a)(1) of this section; and

(2) On or before the 13th day after the end of each month, an amount equal to not less than the sum of the individual payments otherwise payable to producers pursuant to paragraph (a)(2) of this section;

(c) To a cooperative association with respect to receipts of milk for which such cooperative association is the handler as described in § 1076.9(c) as follows:

(1) On or before the 26th day of the month, for milk received during the first 15 days of the month an amount per hundredweight equal to not less than the uniform price for the preceding month; and

(2) On or before the 13th day after the end of each month not less than the value of such milk at the class prices, as adjusted by the butterfat differential specified in § 1076.74, that are applicable at the location of the receiving handler's pool plant, and less payment made pursuant to paragraph (c)(1) of this section; and

(d) In making the payments for producer milk pursuant to this section, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement in such form that it may be retained by the recipient, that shall show:

(1) The month and identity of the handler and of the producer;

(2) The pounds per shipment, the total pounds and the average butterfat content of milk received from the producer;

(3) The minimum rate or rates at which payment to the producer is required pursuant to the order;

(4) The rate that is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer or cooperative association.

**§ 1076.74 Butterfat differential.**

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

**§ 1076.75 Plant location adjustments for producers and on nonpool milk.**

(a) The uniform price computed pursuant to § 1076.61 for producer milk received at a pool plant shall be reduced according to the location of the pool plant, at the rates set forth in § 1076.52; and

(b) For purposes of computations pursuant to §§ 1076.71 and 1076.72 the uniform price shall be adjusted at the rates set forth in § 1076.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted uniform price shall not be less than the Class III price.

**§ 1076.76 Payments by handler operating a partially regulated distributing plant.**

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1076.30(b) and 1076.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations;

(1) Determine the value that would have been computed pursuant to § 1070.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1076.60 shall be priced at the uniform price (or at the weighted average price if such

is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(ii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1076.60 for such handler shall include, in lieu of the value of other source milk specified in § 1076.60(f) less the value of such other source milk specified in § 1076.71(a)(2)(ii), a value of milk determined pursuant to § 1076.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1076.7(b), subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1076.30(b) and 1076.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(*c*) The value of milk determined pursuant to § 1076.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1076.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1076.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

**§ 1076.77 Adjustment of accounts.**

(a) Whenever verification by the market administrator of reports of payments of any handler discloses errors made in payments to or from the producer-settlement fund, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 15 days of such billing make payments to the market administrator of the amount so billed and whenever verification discloses that payment is due from the market administrator to any handler, the market administrator shall, within 15 days make such payment to such handler.

(b) Whenever verification by the market administrator of the payment by a handler to any producer or cooperative association discloses payment of less than is required by § 1076.73, the handler shall make up such payment to the producer or cooperative association not later than the time of making payment next following such disclosure.

**§ 1076.78 Charges on overdue accounts.**

Any unpaid obligation of a handler pursuant to § 1076.71(a) shall be increased by one-half of 1 percent for each month or portion thereof that such payment is overdue.

ADMINISTRATIVE ASSESSMENT

**§ 1076.85 Assessment for order administration.**

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 5 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk, including such handler's own production;

(b) Other source milk allocated to Class I pursuant to § 1076.44(a)(7) and (11) and the corresponding steps of § 1076.44(b), except such other source milk that is excluded from the computations pursuant to § 1076.60(d) and (f); and

(c) Route disposition from a partially regulated distributing plant in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1076.76(a)(2).

# PART 1078—MILK IN NORTH CENTRAL IOWA MARKETING AREA

## Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1078.1 General provisions.

DEFINITIONS

1078.2 North Central Iowa marketing area.
1078.3 [Reserved]
1078.4 [Reserved]
1078.5 Distributing plant.
1078.6 Supply plant.
1078.7 Pool plant.
1078.8 Nonpool plant.
1078.9 Handler.
1078.10 Producer-handler.
1078.11 [Reserved]
1078.12 Producer.
1078.13 Producer milk.
1078.14 Other source milk.
1078.15 Fluid milk product.
1078.16 Fluid cream product.
1078.17 Filled milk.
1078.18 Cooperative association.

HANDLER REPORTS

1078.30 Reports of receipts and utilization.
1078.31 Payroll reports.
1078.32 Other reports.

CLASSIFICATION OF MILK

1078.40 Classes of utilization.
1078.41 Shrinkage.
1078.42 Classification of transfers and diversions.
1078.43 General classification rules.
1078.44 Classification of producer milk.
1078.45 Market administrator's reports concerning classification.

CLASS PRICES

1078.50 Class prices.
1078.51 Basic formula price.
1078.52 Plant location adjustments for handlers.
1078.53 Announcement of class prices.
1078.54 Equivalent price.

UNIFORM PRICE

1078.60 Handler's value of milk for computing uniform price.
1078.61 Computation of uniform price for each handler.
1078.62 Announcement of uniform price for each handler and butterfat differential.

PAYMENTS FOR MILK

1078.73 Payments to producers and to cooperative associations.
1078.74 Butterfat differential.
1078.75 Plant location adjustments for producers.
1078.76 [Reserved]
1078.77 Adjustment of accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1078.85 Assessment for order administration.
1078.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1078 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

**§ 1078.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

**§ 1078.2 North Central Iowa marketing area.**

"North Central Iowa marketing area" (hereinafter called the "marketing area") means all the territory within the boundaries of the city of Osage and the counties of Black Hawk, Bremer, Buchanan, Butler, Cerro Gordo, Chickasaw, Fayette, Floyd, Franklin, Grundy, Hamilton, Hancock, Hardin, Humboldt, Marshall, Tama, Webster, and Wright, all in the State of Iowa, including territory within such boundaries which is occupied by government (Municipal, State, or Federal) reservations, installations, institutions or other establishments.

V 38-177
SEP 13 73
XUM

§ 1078.3 [Reserved]

§ 1078.4 [Reserved]

§ 1078.5 Distributing plant.

"Distributing plant" means a plant which is approved by an appropriate health authority for the processing or packaging of Grade A milk from which any fluid milk product is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except other plants) located in the marketing area.

§ 1078.6 Supply plant.

"Supply plant" means a plant from which milk or skim milk which is acceptable to the appropriate health authority for distribution in the marketing area under a Grade A label is shipped during the month to a pool plant qualified pursuant to § 1078.7.

§ 1078.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) A distributing plant from which a volume of Class I milk, except filled milk, equal to more than an average of 1,000 pounds per day or not less than 15 percent of the Grade A milk received at such plant from dairy farmers and from other plants is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except other plants) in the marketing area.

(b) A supply plant for the month in which shipments of milk or skim milk are made to distributing plants which are pool plants on not less than 10 days in any of the months of September, October, and November and on not less than 5 days in other months: *Provided*, That a supply plant which was not a pool plant for each of the immediately preceding months of September, October, and November shall not be a pool plant for any month during which none of the milk or skim milk from such plant would be allocated to Class I milk pursuant to the procedure specified in § 1078.44(a)(13), and the corresponding step of § 1078.44(b) at a distributing plant which is a pool plant.

(c) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant; and

(2) A distributing plant or a supply plant during any month in which such plant would be subject to the classification and pricing provisions of another order issued pursuant to the Act unless such plant is qualified as a pool plant pursuant to paragraph (a) or (b) of this section and a greater volume of fluid milk products, except filled milk, is disposed of from such plant to retail or wholesale outlets and to pool plants in the North Central Iowa marketing area than in the marketing area regulated pursuant to such other order.

§ 1078.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products in consumer-type packages or dispenser units are distributed on routes in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant from which fluid milk products are shipped during the month to a pool plant.

§ 1078.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more distributing or supply plants.

(b) [Reserved]

(c) A cooperative association with respect to Grade A milk received from dairy farmers in a tank truck, the operation of which is under the control of such cooperative association, and delivered in such tank truck to a pool plant: *Provided*, That such milk shall be deemed to have been received directly from producers at the location of the pool plant by the operator of the pool plant to which it is delivered by the tank truck.

§ 1078.10 Producer-handler.

"Producer-handler" means any person who operates a dairy farm and a distributing plant but who receives no milk from other dairy farmers.

§ 1078.11 [Reserved]

§ 1078.12 Producer.

Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, and whose milk is (1) received at a pool plant, or (2) diverted from a pool plant to a nonpool plant that is not a producer-handler plant for the account of the operator of the pool plant (i) any day during the months of April through June, and (ii) on not more than one-half the days on which milk was delivered from a farm during any of the months of July through March.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1078.44(a)(8)(iii) and the corresponding step of § 1078.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

§ 1078.13 Producer milk.

"Producer milk" means only that skim milk or butterfat contained in milk of producers that is (a) received at a pool plant directly from producers, or (b) diverted from a pool plant to a nonpool plant in accordance with the conditions set forth in § 1078.12.

§ 1078.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1078.40(b)(1) from any source other than producers, handlers described in § 1078.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1078.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1078.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1078.40(b)(1)) for which the handler fails to establish a disposition.

§ 1078.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1078.40 (b) or (c)(1)(i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1078.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

§ 1078.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

§ 1078.18 Cooperative association.

"Cooperative association" means any cooperative marketing association which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk or its products for its members.

HANDLER REPORTS

§ 1078.30 Reports of receipts and utilization.

On or before the seventh day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1078.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1078.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler described in § 1078.9(c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(c) Each handler not specified in paragraphs (a) and (b) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

§ 1078.31 Payroll reports.

On or before the 20th day after the end of each month, each handler described in § 1078.9 (a) and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(a) His name and address;

(b) The total pounds of milk received from such producer;

(c) The average butterfat content of such milk; and

(d) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

§ 1078.32 Other reports.

(a) Each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator:

(1) On or before the first day other source milk is received in the form of any fluid milk product at his pool plant(s), his intention to receive such product and on or before the last day such product is received, his intention to discontinue receipt of such milk; and

(2) Prior to his diversion of producer milk to a nonpool plant, his intention to divert such milk, the proposed date or dates of such diversion and the plant to which such milk is to be diverted.

(b) In addition to the reports required pursuant to §§ 1078.30 and 1078.31 and paragraph (a) of this section, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

§ 1078.40 Classes of utilization.

Except as provided in § 1078.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1078.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, low fat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, low fat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1078.15; and

(6) In shrinkage assigned pursuant to § 1078.41(a) to the receipts specified in § 1078.41(a)(2) and in shrinkage specified in § 1078.41 (b) and (c).

§ 1078.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to §1078.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section

V 38 177 SEP 13 73 XUM

on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a) (1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1078.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1078.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1078.9(c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1078.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1078.44(a)(12) and the corresponding step of § 1078.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1078.44(a)(7) or the corresponding step of § 1078.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1078.44(a)(11) or (12) or the corresponding steps of § 1078.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section;

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1078.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1078.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition of fluid milk products in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence;

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the folowing sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plaint's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

**§ 1078.43 General classification rules.**

In determining the classification of producer milk pursuant to § 1078.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1078.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1078.9(c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1078.40, 1078.41, and 1078.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1078.9(c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

**§ 1078.44 Classification of producer milk.**

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1078.9(a) for each of his pool plants separately and of each handler described in § 1078.9(c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1078.41 (b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid products received in packaged form from an other order plant as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1078.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1078.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Substract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1078.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1078.40(b)(1) that was not subtracted pursuant to paragraph (a) (4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order; and

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a) (2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not

V 38 177 SEP 13 73 XUM

subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraphs (a)(8)(ii) (a) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(a) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(b) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1078.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraphs (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and 8 (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk remaining in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subject to the provisions of paragraph (a)(12)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that were not subtracted pursuant to paragraph (a)(8)(iii) of this section and that are in excess of bulk fluid milk products transferred or diverted to such plant:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pood plant according to the classification of such products pursuant to § 1078.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1078.44(a)(14) and the corresponding step of § 1078.44(b).

**§ 1078.45 Market administrator's reports concerning classification.**

The market administrator shall make the following reports concerning classification:

(a) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1078.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(b) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report:

CLASS PRICES

**§ 1078.50 Class prices.**

Subject to the provisions of § 1078.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.25.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

**§ 1078.51 Basic formula price.**

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

**§ 1078.52 Plant location adjustments for handlers.**

(a) The following zones are defined for the purpose of determining location adjustments:

(1) "Zone 1" means all the territory in the Iowa counties of Humboldt, Wright, Franklin, Butler, Bremer, Webster, Hamilton, Hardin, Grundy, Black Hawk, and Buchanan.

(2) "Zone 2" means all the territory in the Iowa counties of Marshall, Tama, Linn, and Johnson.

(3) "Zone 3" means all the territory in the Iowa counties of Hancock, Cerro Gordo, Floyd, and Chickasaw and the city of Osage, Iowa.

(4) "Zone 4" means all the territory in Fayette County, Iowa, and the Minnesota counties of Freeborn and Mower.

(b) For milk received from producers at a pool plant located in Zone 2, 3, or 4 and classified as Class I milk, the price specified in § 1078.50(a) shall be adjusted by the following amount:

(1) Zone 2—plus 8 cents.
(2) Zone 3—minus 5 cents.
(3) Zone 4—minus 10 cents.

(c) For milk received from producers at a pool plant located outside Zones 1, 2, 3, and 4 and classified as Class I milk, the price specified in § 1078.50(a) shall be reduced 10 cents and, if the plant is located 65 miles or more by the shortest hard-surfaced highway distance as determined by the market administrator from the city halls of each of the cities of Fort Dodge, Marshalltown, Mason City, and Waterloo, Iowa, shall be reduced an additional 1.5 cents for each 10 miles or fraction thereof in excess of 65 miles that such plant is from the nearest of such city halls.

(d) For purposes of calculating the location adjustment applicable pursuant to this section, fluid milk products which are transferred between pool plants shall be assigned to the Class I milk remaining in the transferee-plant after calculations pursuant to § 1078.44(a)(12) and the corresponding step of § 1078.44(b) that is in excess of receipts at such plant from producers and handlers described in § 1078.9(c), such assignment to transferor-plants to be made first to plants at which a plus location adjustment is applicable, next at which no location adjustment is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

**§ 1078.53 Announcement of class prices.**

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

**§ 1078.54 Equivalent price.**

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

UNIFORM PRICE

**§ 1078.60 Handler's value of milk for computing uniform price.**

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1078.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1078.44(a)(14) and the corresponding step of § 1078.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1078.74, that are applicable at the location of the pool plant;

(c) Add the following:

(1) The amount obtained from multiplying the difference between the Class III price for the preceding month and the the Class I price applicable at the location of the pool plant for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1078.44(a)(9) and the corresponding step of § 1078.44(b); and

(2) The amount obtained from multiplying the difference between the Class III price for the preceding month and the Class II price for the current month by the lesser of:

(i) The hundredweight of skim milk and butterfat subtracted from Class II pursuant to § 1078.44(a)(9) and the corresponding step of § 1078.44(b) for the current month; or

(ii) The hundredweight of skim milk and butterfat remaining in Class III (exclusive of shrinkage) after the computations pursuant to § 1078.44(a)(11) and the corresponding step of § 1078.44(b) for the preceding month, less the hundredweight of skim milk and butterfat specified in paragraph (c)(1) of this section; and

(d) Add or subtract, as the case may be, an amount necessary to correct errors discovered by the market administrator in the verification of reports of such handler of his receipts and utilization of skim milk and butterfat for previous months.

**§ 1078.61 Computation of uniform price for each handler.**

For each month the market administrator shall compute a uniform price for the producer milk received by each handler as follows:

(a) Add to and subtract from the amount computed pursuant to § 1078.60, the totals of the location adjustments to be made pursuant to § 1078.75;

(b) Add if a deduction was made, or subtract if an addition was made, in computing the uniform price for such handler to the nearest cent for the preceding month the amount of such adjustment; and

(c) Divide the resulting amount by the total hundredweight of producer milk received by such handler. The quotient, adjusted to the nearest cent, shall be the uniform price for such handler for producer milk of 3.5 percent butterfat content received at plants in Zone 1. Uniform prices at plants outside Zone 1 shall be adjusted pursuant to § 1078.75.

**§ 1078.62 Announcement of uniform price for each handler and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 10th day after the end of each month the uniform price for each handler for such month.

PAYMENTS FOR MILK

**§ 1078.73 Payments to producers and to cooperative associations.**

Each handler shall make payment to each producer for milk received from such producer as follows:

(a) On or before the 14th day after the end of each month, for milk received during such month, an amount computed at not less than the uniform price per hundredweight pursuant to § 1078.61, as adjusted pursuant to § 1078.74, plus or minus adjustments for errors made in previous payments to such producer; and less (1) location adjustments pursuant to § 1078.75, (2) deductions for marketing services pursuant to § 1078.86, and (3) proper deductions authorized by such producer: *Provided*, That with respect to producers whose milk was caused to be delivered to such handler by a cooperative association which is authorized to collect payment for such milk the handler shall, if requested by the cooperative association, pay such cooperative association on or before the 12th day after the end of each month an amount equal to the sum of the individual payments otherwise payable to such producers in accordance with this paragraph;

(b) In making the payments to producers pursuant to paragraph (a) of this section, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement in such form that it may be retained by the producer, which shall show for each month:

(1) The month and identity of the handler and of the producer;

(2) The daily and total pounds and the average butterfat content of milk received from such producer;

(3) The minimum rate or rates at which payment to such producer is required pursuant to the order;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer or cooperative association.

V 38 I 177 SEP 13 73 XUM

§ 1078.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1078.75 Plant location adjustments for producers.

The uniform prices for milk received from producers at a pool plant shall be adjusted according to the location of the pool plant at the rates set forth in § 1078.52.

§ 1078.76 [Reserved]

§ 1078.77 Adjustment of accounts.

Whenever verification by the market administrator of payment by a handler discloses errors resulting in money due a producer, a cooperative association, or the market administrator from such handler, or due such handler from the market administrator, the market administrator shall notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments, as set forth in the provisions under which such error occurred.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

§ 1078.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to (a) producer milk, (b) other source milk allocated to Class I pursuant to § 1078.44 (a) (7) and (11) and the corresponding steps of § 1078.44(b), and (c) Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds the hundredweight of Class I milk received during the month at such plant from pool plants and other order plants.

§ 1078.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1078.73, shall deduct 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all milk received by such handler from such producer (except such handler's own farm production) during the month, and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of milk received by handlers from such producers during the month and to provide such producers with market information. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and, on or before the 15th day after the end of each month, pay over such deductions to the association rendering such services.

## PART 1079—MILK IN DES MOINES, IOWA, MARKETING AREA

### Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1079.1 General provisions.

DEFINITIONS

1079.2 Des Moines, Iowa.
1079.3 [Reserved]
1079.4 [Reserved]
1079.5 Distributing plant.
1079.6 Supply plant.
1079.7 Pool plant.
1079.8 Nonpool plant.
1079.9 Handler.
1079.10 Producer-handler.
1079.11 [Reserved]
1079.12 Producer.
1079.13 Producer milk.
1079.14 Other source milk.
1079.15 Fluid milk product.
1079.16 Fluid cream product.
1079.17 Filled milk.
1079.18 Cooperative association.

HANDLER REPORTS

1079.30 Reports of receipts and utilization.
1079.31 Payroll reports.
1079.32 Other reports.

CLASSIFICATION OF MILK

1079.40 Classes of utilization.
1079.41 Shrinkage.
1079.42 Classification of transfers and diversions.
1079.43 General classification rules.
1079.44 Classification of producer milk.
1079.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1079.50 Class prices.
1079.51 Basic formula price.
1079.52 Plant location adjustments for handlers.
1079.53 Announcement of class prices.
1079.54 Equivalent price.

UNIFORM PRICE

1079.60 Handler's value of milk for computing uniform price.
1079.61 Computation of uniform price.
1079.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1079.70 Producer-settlement fund.
1079.71 Payments to the producer-settlement fund.
1079.72 Payments from the producer-settlement fund.
1079.73 Payments to producers and to cooperative associations.
1079.74 Butterfat differential.
1079.75 Plant location adjustments for producers and on nonpool milk.
1079.76 Payments by handler operating a partially regulated distributing plant.
1079.77 Adjustment of accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1079.85 Assessment for order administration.
1079.86 Deduction for marketing services.

AUTHORITY: The provisions of this Part 1079 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

§ 1079.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and make a part of this order.

§ 1079.2 Des Moines, Iowa, marketing area.

"Des Moines, Iowa, marketing area" (hereinafter called the "marketing area"), means all the territory within the boundaries of the city of Grinnell and the counties of Adair, Appanoose, Bonne, Clarke, Dallas, Decatur, Greene, Guthrie, Jasper, Lucas, Madison, Mahaska, Marion, Monroe, Polk, Story, Union, Warren, Wappello, and Wayne, all in the State of Iowa, including territory within such boundaries which is occupied by government (municipal, State or Federal) reservations, installations, institutions, or other establishments.

§ 1079.3 [Reserved]

§ 1079.4 [Reserved]

§ 1079.5 Distributing plant.

"Distributing plant" means a plant which is approved by an appropriate health authority for the processing or packaging of Grade A milk and from which any fluid milk product is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) located in the marketing area.

§ 1079.6 Supply plant.

"Supply plant" means a plant from which milk or skim milk which is acceptable to the appropriate health authority for distribution in the marketing area under a Grade A label is shipped during the month to a pool plant qualified pursuant to § 1079.7.

§ 1079.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) A distributing plant from which a volume of Class I milk, except filled milk, equal to not less than 35 percent of the Grade A milk received at such plant from dairy farmers and from other plants is disposed of during the month on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets (except pool plants) and not less than 15 percent of such receipts or an average of not less than 7,000 pounds per day, whichever is less, is so disposed of to such outlets in the marketing area.

(b) A supply plant from which the volume of fluid milk products, except filled milk, shipped during the month to pool plants qualified pursuant to paragraph (a) of this section is equal to not less than 35 percent of the Grade A milk received at such plant from dairy farmers during such month: *Provided*, That if such shipments are not less than 50 percent of the receipts of Grade A milk directly from dairy farmers at such plant during the immediately preceding period of September through November, such plant shall be a pool plant for the months of March through June, unless written application is filed with the market administrator on or before the 15th day of any of the months of March, April, May, or June to be designated a nonpool plant for such month and for each subsequent month through June of the same year.

(c) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A distributing plant or a supply plant during any month in which such plant would be subject to the classification and pricing provisions of another order issued pursuant to the Act unless the disposition of fluid milk products, except filled milk, from such plant to pool plants qualified pursuant to this section and to retail and wholesale outlets in the Des Moines, Iowa, marketing area exceeds such disposition to retail and wholesale outlets in such other marketing area and to pool plants regulated by such other order except in the following circumstances:

(i) If a distributing plant were qualified pursuant to paragraph (a) of this section during each of the 3 immediately preceding months, it would continue to be subject to all the provisions of this part until after the third consecutive month in which it remains so qualified and has a greater proportion of its fluid milk product disposition, except filled milk, made in the above-described manner in such other marketing area, unless, notwithstanding the provisions of this paragraph, it is regulated under such other order; or

(ii) A distributing plant qualified pursuant to paragraph (a) of this section that is fully regulated under another Federal order but which has greater fluid milk product (except filled milk) disposition during the month on routes in the Des Moines marketing area and to pool plants qualified on the basis of route distribution in the Des Moines marketing area than in such other Federal order marketing area; and

(3) That portion of a plant that is physically apart from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

§ 1079.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products in consumer-type packages or dispenser units are distributed on routes in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant from which fluid milk products are shipped during the month to a pool plant.

§ 1079.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) Any cooperative association with respect to the milk of producers diverted pursuant to § 1079.13 by the association for the account of such association;

(c) [Reserved]

(d) Any person as the operator of a partially regulated distributing plant.

§ 1079.10 Producer-handler.

"Producer-handler" means any person who operates a dairy farm and a distributing plant but who receives no milk from other dairy farmers or from sources other than pool plants and whose disposition of fluid milk products does not exceed that (a) received from a pool plant, (b) processed from milk of his own production, or (c) processed from fluid milk received from a pool plant.

§ 1079.11 [Reserved]

§ 1079.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority which milk is received by a handler as producer milk.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1079.44 (a) (8) (iii) and the corresponding step of § 1079.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

§ 1079.13 Producer milk.

"Producer milk" means the skim milk and butterfat contained in Grade A milk received at a pool plant directly from a producer: *Provided*, That milk diverted under the conditions set forth in paragraphs (a), (b), and (c) of this section from a pool distributing plant to a nonpool plant that is not a producer-handler plant for the account of either the operator of the pool distributing plant or a cooperative association shall also be producer milk and shall be deemed to have been received by the diverting handler at the plant to which diverted.

(a) A handler described in § 1079.9(b) may divert for its account without limit during the other days of the month the milk of any member producer whose milk is received at a pool distributing plant for at least one delivery during the month. The total quantity of milk so diverted may not exceed 50 percent in September through March and 100 percent in April through August of the larger of the following amounts: (1) The total quantity of its member milk received at all pool distributing plants during the current month, or (2) the average daily quantity of its member milk received at all pool distributing plants during the previous month multiplied by the number of days in the current month.

(b) A handler in his capacity as the operator of a pool distributing plant may divert for his account the milk of any producer other than a member of a cooperative association which has diverted milk pursuant to paragraph (a) of this section whose milk is received at his pool distributing plant for at least one delivery during the month without limit during the other days of such month. However, the total quantity of milk so diverted may not exceed 50 percent in September through March and 100 percent in April through August of the larger of the following amounts: (1) The total quantity of producer milk received at such plant during the current month from producers who are not members of a cooperative association which has diverted milk pursuant to paragraph (a) of this section, or (2) the average daily quantity of producer milk received at such plant during the previous month multiplied by the number of days in the current month from producers who are not members of a cooperative association which has diverted milk in the current month pursuant to paragraph (a) of this section.

(c) Any milk so diverted by the operator of a pool plant or by a handler described in § 1079.9(b) in excess of the limits prescribed pursuant to paragraphs (a) and (b) of this section shall not be producer milk and if the diverting handler fails to designate the dairy farmers whose milk is not producer milk,

V 38 I 177 SEP 13 73 XUM

then no milk diverted by such handler during the month shall be producer milk.

**§ 1079.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk specified in § 1079.40(b)(1) from any source other than producers, pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1079.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1079.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1079.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1079.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1079.40 (b) or (c)(1)(i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1079.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (in-and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1079.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1079.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association which the Secretary determines after application by the association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act" and

(b) To have full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or its products for its members.

HANDLER REPORTS

**§ 1079.30 Reports of receipts and utilization.**

On or before the seventh day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) [Reserved]

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1079.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition of fluid milk products in the marketing area.

(c) Each handler described in § 1079.9 (b) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1079.31 Payroll reports.**

(a) On or before the 20th day after the end of each month, each handler described in § 1079.9 (a) and (b) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1079.76 (b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1079.32 Other reports.**

(a) Each handler, except a producer-handler, shall report to the market administrator in detail and on forms prescribed by the market administrator:

(1) On or before the first day other source milk is received in the form of any fluid milk product at his pool plant his intention to receive such product, and on or before the last day such product is received, his intention to discontinue receipt of such product; and

(2) Prior to his diversion of producer milk to a nonpool plant, his intention to divert such milk, the proposed date or dates of such diversion and the plant to which such milk is to be diverted.

(b) In addition to the reports required pursuant to §§ 1079.30 and 1079.31 and paragraph (a) of this section, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1079.40 Classes of utilization.**

Except as provided in § 1079.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1079.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, low fat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, low fat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1079.15; and

(6) In shrinkage assigned pursuant to § 1079.41(a) to the receipts specified in § 1079.41(a)(2) and in shrinkage specified in § 1079.41 (b) and (c).

**§ 1079.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1079.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) [Reserved]

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)(1), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1079.9(b), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1079.42 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1079.44(a)(12) and the corresponding step of § 1079.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1079.44(a)(7) or the corresponding step of § 1079.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1079.44(a)(11) or (12) or the corresponding steps of § 1079.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2) or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other

V 38 I 177 SEP 13 73 XUM

classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1079.40

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i)(*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2)(ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1079.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition of fluid milk products in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

### § 1079.43 General classification rules.

In determining the classification of producer milk pursuant to to § 1079.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1079.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1079.9(b) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1079.40, 1079.41, and 1079.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1079.9(b) shall be determined separately from the operations of any pool plant operated by such cooperative association.

### § 1079.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk for each handler described in § 1079.9(a) for each of his pool plants separately and of each handler described in § 1079.9(b) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1079.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1079.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1079.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in

Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1079.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1079.40(b)(1) that was not subtracted pursuant to paragraph (a) (4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii)(*a*) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III shall be increased (increasing Class III first to the extent permitted by the handler's total Class III utilization at his other pool plants) by an amount equal to such quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler;

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section. If Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1079.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from any class pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section;

(i) Subject to the provisions of paragraph (a)(12)(ii) and (iii) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1079.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler;

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received; and

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from any class that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in such class shall be increased by an amount equal to such quantity to be subtracted and the pounds of skim milk in the other classes (beginning with the higher-priced class) shall be decreased by a like amount. In such case, the

V 38 I 177
SEP 13 73
XUM

pounds of skim milk remaining in each class at this allocation step at other pool plants of the handler shall be adjusted to the extent possible in the reverse direction by a like amount. Such adjustment shall be made at the other plants in sequence beginning with the plant having the least minus location adjustment;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1079.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1079.44(a)(14) and the corresponding step of § 1079.44(b).

**§ 1079.45 Market administrator's reports and announcements concerning classification.**

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1079.44(a)(12) and the corresponding step of § 1079.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from another order plant, the class to which such receipts are allocated pursuant to § 1079.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 10th day after the end of each month, report to each cooperative association, which so requests, the percentage of the milk caused to be delivered by the cooperative association or by its members to the pool plant of each handler during the month that was utilized in each class. For the purpose of this report the milk so delivered shall be allocated to each class in the same ratio as all producer milk received at such plant during the month.

CLASS PRICES

**§ 1079.50 Class prices.**

Subject to the provisions of § 1079.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.40.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

**§ 1079.51 Basic formula price.**

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

**§ 1079.52 Location adjustments for handlers.**

(a) For producer milk received at a plant located outside the marketing area, and 60 miles or more by the shortest hard-surfaced highway distance, as measured by the market administrator from the main post offices of Des Moines and Ottumwa, Iowa, which is classified as Class I or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price specified in § 1079.50(a) shall be reduced 10 cents, and shall be reduced an additional 1.5 cents for each 10 miles or fraction thereof in excess of 75 miles from the designated post offices.

(b) For purposes of calculating such adjustment, transfers between pool plants shall be assigned to Class I disposition remaining at the transferee-plant after computations pursuant to § 1079.44(a)(12) and the corresponding step of § 1079.44(b) in excess of 95 percent of receipts of producer milk at such plant, such assignment to be made first to transferor-plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

**§ 1079.53 Announcement of class prices.**

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

**§ 1079.54 Equivalent price.**

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

UNIFORM PRICE

**§ 1079.60 Handler's value of milk for computing uniform price.**

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1079.9(b) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1079.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1079.44(a)(14) and the corresponding step of § 1079.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1079.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1079.44(a)(9) and the corresponding step of § 1079.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1079.44(a)(7)(i) through (iv) and the corresponding step of § 1079.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1079.44(a)(7)(v) and (vi) and the corresponding step of § 1079.44(b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1079.44(a)(11) and the corresponding step of § 1079.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order.

**§ 1079.61 Computation of uniform price.**

For each month the market administrator shall compute an aggregate value from which to determine the uniform price per hundredweight for producer milk of 3.5 percent butterfat content, f.o.b. plants located within the marketing area, as follows:

(a) Combine into one total the values computed pursuant to § 1079.60 for all pool plants for which the reports prescribed in § 1079.30 for such month were made, except those in default of payments required pursuant to § 1079.71 for the preceding month;

(b) Add an amount equal to the sum of the location adjustment deductions to be made pursuant to § 1079.75;

(c) Add an amount equal to one-half of the unobligated cash balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1079.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The result shall be known as the uniform price for milk received from producers.

**§ 1079.62 Announcement of uniform price and butterfat differential.**

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 10th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

**§ 1079.70 Producer-settlement fund.**

The market administrator shall maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made to such fund pursuant to §§ 1079.71, 1079.76, and 1079.77, and out of which he shall make all payments from such fund pursuant to §§ 1079.72 and 1079.77: *Provided*, That the market administrator shall offset the payment due to a handler against payments due from such handler.

**§ 1079.71 Payments to the producer-settlement fund.**

(a) On or before the 12th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1079.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1079.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1079.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. It there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price), and the Class III price.

**§ 1079.72 Payments from the producer-settlement fund.**

On or before the 13th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1079.71(a)(2) exceeds the amount computed pursuant to § 1079.71(a)(1): *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. A handler who has not received the balance of such payments from the market administrator shall not be considered in violation of § 1079.73 if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

**§ 1079.73 Payments to producers and to cooperative associations.**

(a) Each handler shall pay each producer for producer milk for which payment is not made to a cooperative association pursuant to paragraph (b) of this section, as follows:

(1) On or before the last day of each month, for producer milk received during the first 15 days of the month, at not less than the Class III price for the preceding month; and

(2) On or before the 15th day after the end of each month, for producer milk received during such month, an amount computed at not less than the uniform price pursuant to § 1079.61 adjusted pursuant to §§ 1079.74, 1079.75, and 1079.86, and less the payment made pursuant to paragraph (a)(1) of this section.

(b) Each handler shall make payment to a cooperative association for producer milk which it caused to be delivered to such handler, if such cooperative association is authorized to collect such payments for its members and exercises such authority, an amount equal to the sum of the individual payments otherwise payable for such producer milk, as follows:

(1) On or before the 26th day of each month for producer milk received during the first 15 days of the month; and

(2) On or before the 13th day after the end of each month for milk received during such month.

(c) In making the payments for producer milk pursuant to this section, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement in such form that it may be retained by the recipient, which shall show:

(1) The month and identity of the handler and of the producer;

(2) The daily and total pounds and the average butterfat content of producer milk;

(3) The minimum rate or rates at which payment to the producer is required pursuant to the order;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer or cooperative association.

**§ 1079.74 Butterfat differential.**

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

V 38 177 SEP 13 73 XUM

**§ 1079.75 Location adjustments for producers and on nonpool milk.**

(a) The uniform price for producer milk pursuant to § 1079.61 received at a pool plant or diverted from a pool plant shall be reduced according to the location of the plant of actual receipt at the rates set forth in § 1079.52.

(b) For purposes of computations pursuant to §§ 1079.71 and 1079.72 the uniform price shall be adjusted at the rates set forth in § 1079.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted uniform price shall not be less than the Class III price.

**§ 1079.76 Payments by handler operating a partially regulated distributing plant.**

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1079.30(b) and 1079.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1079.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1079.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1079.60 for such handler shall include, in lieu of the value of other source milk specified in § 1079.60(f) less the value of such other source milk specified in § 1079.71(a)(2)(ii), a value of milk determined pursuant to § 1079.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1079.7(b) subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1079.30(b) and 1079.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1079.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1079.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1079.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

**§ 1079.77 Adjustment of accounts.**

Whenever verification by the market administrator of reports or payments of any handler discloses errors in payments to or from the producer-settlement fund pursuant to §§ 1079.71 and 1079.72, the market administrator shall promptly bill such handler for any unpaid amounts and such handler shall, within 15 days of such billing, make payments to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, the market administrator shall, within 15 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer or to a cooperative association discloses payment of an amount less than is required by § 1079.73 the handler shall make up such payment to the producer or cooperative association not later than the time of making payment next following such disclosure.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

**§ 1079.85 Assessment for order administration.**

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 4 cents per hundredweight, or such less amount as the Secretary may prescribe, with respect to:

(a) Producer milk;

(b) Other source milk allocated to Class I pursuant to § 1079.44(a)(7) and (11) and the corresponding steps of § 1079.44(b), except such other source milk that is excluded from the computations pursuant to § 1079.60 (d) and (f); and

(c) Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1079.76(a)(2).

**§ 1079.86 Deduction for marketing services.**

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1079.73 shall deduct 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to producer milk received by such handler (except such handler's own farm production) during the month, and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of producer milk and to provide producers with market information. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and, on or before the 15th day after the end of each month, pay over such deductions to the association rendering such services.

Signed at Washington, D.C., on August 27, 1973.

### Office of Education

### GUIDELINES FOR STATE ADULT EDUCATION PROGRAMS

Pursuant to the authority contained in the Adult Education Act (84 Stat. 159–164, 20 U.S.C. 1201–1211), notice is hereby given that the U.S. Commissioner of Education is establishing guidelines which apply to State plans for Federal assistance under the Adult Education Act. The guidelines will read as set forth below.

The regulations governing such programs were published in the FEDERAL REGISTER, Vol. 38, No. 118, pp. 16133–16138.

*Effective date.*—These guidelines shall take effect on October 15, 1973.

(Catalog of Federal Domestic Assistance No. 13.400, Adult Education—Grants to States.)

Dated September 7, 1973.

JOHN OTTINA,
*U.S. Commissioner of Education.*

GUIDELINES

ADULT EDUCATION PROGRAMS

TITLE III, P.L. 91–230

STATE PLAN PROGRAMS

PART 1—INTRODUCTION

*Sec.*

1.1 Scope of guidelines.
1.2 Applicable statutes and regulations.
1.3 Purpose of the State plan.

PART 2—ADMINISTRATIVE RECOMMENDATIONS

2.1 Compliance with Civil Rights Act of 1964.
2.2 Submission procedures.
2.3 Administrative organizations.

PART 3—ANNUAL PROGRAM PLAN

3.1 Overview of the planning process.
3.2 Adult learning needs survey.
3.3 Resource inventory.
3.4 Determining program priorities.
3.5 Allocating resources.
3.6 Program evaluation.
3.7 Annual program plan format.

PART 4—APPLICATION AND PROJECT REPORT FORMS

4.1 Application form.

### PART 1—INTRODUCTION

SECTION 1.1 *Scope of guidelines.*—(a) The guidelines contained in this document are recommendations and suggestions for meeting the legal requirements which apply to State plans for Federal assistance under the Adult Education Act. The guidelines are not to be construed as requirements. However, where the guidelines set forth a permissible means of meeting a legal requirement, the guidelines may be relied upon.

(20 U.S.C. 1208; 113 Cong. Rec. 5936, 5939 (daily ed. May 23, 1967); United States v. Jefferson County Board of Education, 372 F. 2d 836, 857 (1966).)

(b) Where a guideline is issued in connection with or affecting a provision in the regulations, the pertinent regulation will be cited after the citation of legal authority for the guideline, in the parentheses following the guideline. For example, if the legal authority for the guideline is section 306(b) of the Act (20 U.S.C. 1205(b)), and the guideline affects Section 166.7 of the regulations (45 CFR 166.7), the following citation will be placed on the line immediately following the guideline (20 U.S.C. 1205(b); 45 CFR 166.7). If no particular section of the regulations is affected, no citation to the Code of Federal Regulations (CFR) will be made.

(20 U.S.C. 1232(a).)

SEC. 1.2 *Applicable statutes and regulations.*—State plans for adult education are to be proposed and conducted in accordance with applicable Federal statutes and regulations. Pertinent provisions include the Adult Education Act (20 U.S.C. 1201–1211), the General Education Provisions Act (20 U.S.C. 1221 et seq.), the Adult Education Regulations (45 CFR, Part 166), the General Provisions for Office of Education Programs (45 CFR, Part 100), and Office of Management and Budget Circular No. A–102. The State educational agency should carefully review the above references prior to preparing the State plan for adult education.

(20 U.S.C. 1201–1211; 20 U.S.C. 1221 et seq.; 45 CFR, Part 166; 45 CFR, Part 100b; and OMB Circulation No. A–102.)

SEC. 1.3 *Purpose of the State plan.*—(a) The State plan is a standard requirement used in connection with several cooperative Federal-State programs. The State plan under the Adult Education Act provides, among other things:

(1) The basis on which the State, through its State educational agency, will qualify to participate in and receive Federal funds for programs under the Adult Education Act;

(2) Assistance in planning, justifying, and organizing the proposed allocation of funds;

(3) A basis for common understanding and communication among the State educational agency, other participating agencies, the U.S. Office of Education, and the program reviewers and auditors; and

(4) A basis for both immediate and long-range planning and for continuous, systematic evaluation.

(b) If local adult education teachers and administrators are involved in developing the plan and it is widely shared with other State and local decisionmakers, it may also serve to facilitate communication and program support.

(20 U.S.C. 1205; 45 CFR 166.11.)

### PART 2—ADMINISTRATIVE RECOMMENDATIONS

SEC. 2.1 *Compliance with Civil Rights Act of 1964.*—(a) Federal financial assistance is subject to the regulations in part 80 of this title, issued by the Secretary of Health, Education, and Welfare and approved by the President, to effectuate the provisions of Title VI of the Civil Rights Act of 1964 (Pubic Law 88–352).

(42 U.S.C. 2000d.)

(b) Federal financial assistance is also subject to the provisions of Title IX of the Education Amendments of 1972 (prohibition of sex discrimination), and any regulations issued thereunder.

(Public Law 92–318, Title IX.)

SEC. 2.2 *Submission procedures.*—(a) *General.*—Subpart B of the regulations contained at 45 CFR, Part 166 describes certain requirements with regard to submitting the State plan for adult education. Appendix A of those regulations also contains the required cover sheet and State-Federal agreement.

(b) *Transmittal.*—(1) The State educational agency must submit the cover sheet and State-Federal agreement to the Regional Commissioner of Education for his review as required in Appendix A of the regulations. After the Regional Commissioner reviews and approves the documents, he will recommend approval to the U.S. Commissioner of Education. After the U.S. Commissioner has approved the State plan, two copies of the cover sheet and the State-Federal agreement will be returned to the appropriate Regional Office of Education. One approved copy will be returned to the State educational agency.

(2) Although the regulations provide the State agency with the option of attaching the annual program plan to the State-Federal agreement or incorporating by reference and making it available for inspection by the U.S. Commissioner at the State educational agency, attaching the annual program plan has been found to facilitate communication at all levels.

(c) *Preparation of annual program plan.*—In the preparation of the annual program plan for adult education, the following should be observed:

(1) Copy should be typed or duplicated on 8½ x 11" bond paper. It is recommended that tissue not be used for copies.

(2) Each major plan section should begin on a new page.

(3) Each page should carry in the upper right-hand corner the following information.

Plan Section Number _____
State _____

(4) Pages need not be numbered, but the numerical indexing of sections and subsections in the guide should be followed.

(20 U.S.C. 1205; 45 CFR 166.11–.16.)

SEC. 2.3 *Administrative organizations.*—(a) *State administrative agency.*—(1) *Map.*—It is often helpful for the annual program plan to include a map of the pertinent administrative agencies within the State (for example, local educational agencies) and the geographical areas for which each such administrative agency is responsible. Such a map could assist the State educational agency in assuring that substantial progress can be made with respect to all segments of the adult population and all areas of the State toward carrying out the purpose of the Act and applicable

regulations, particularly when used in conjunction with the adult needs survey referred to in section 3.2 of these guidelines.

(2) *Organizational chart.*—It is also often helpful to include a current organizational chart of the State educational agency in the annual program plan. The chart could reflect the number of people, by title, serving the State educational agency in the adult education program.

(b) *Local and State advisory councils.*—(1) *Possible activities.*—Local and State advisory or planning councils can often be a valuable asset, and a description of any involvement of such groups would be appropriate for inclusion in the annual program plan. Such councils may include members of the client group, such as teachers and students. Councils may, for example, be appointed by the State educational agency or local administrative agency. The program plan could describe how such a council might assist in activities such as the following:

(i) Local project design;
(ii) Project review and approval;
(iii) Evaluation and monitoring;
(iv) State plan devleopment;
(v) Dissemination and reporting;
(vi) Policy development; and
(vii) Needs assessment.

(2) *Allowable costs.*—Salaries, wages, and other costs incurred by members serving on such advisory councils for activities such as those listed above which are reasonably related to the State adult education program may be charged to State or local administration, in compliance with regulations contained in 45 CFR, Part 100b, Subpart G.

(20 U.S.C. 1205, 1231d; 45 CFR, Part 100b, Subpart G.)

(c) *Other organizations.*—It is often helpful to hold public hearings and meetings periodically to encourage the participation of any other concerned groups and of members from the general public.

### PART 3—ANNUAL PROGRAM PLAN

SEC. 3.1 *Overview of the planning process.*—(a) The following sequence illustrates some of the essential steps in the planning process: (1) Identify adult learning needs; (2) Inventory resources; (3) Establish program priorities; and (4) Allocate resources.

(b) Since the above steps are dependent upon each other, it is important that the developmental process be approached in a sequential manner. The desired end product is an adult education program plan that provides the State educational agency with the philosophy, operating plan, and rationale for funding decisions on an annual basis. The program plan should identify precisely the objectives for the ensuing fiscal year and describe how they will be met. Such a description would include the pertinent program and fiscal considerations required to conduct the program. The intent of such a description is to encourage the State educational agency to chart a plan in advance so that, for example, during the planning process relevant program requirements such as teacher training, curriculum, and instructional materials can be prepared prior to beginning instructional activities.

Since the resources and delivery systems of each State differ, it is realized that the plans will vary and that each State will want to develop a plan that is responsive to the unique requirements of its adult population and educational system.

(c) Subsequent sections of this part will offer guidelines for each of the above steps in the planning process.

(d) Copies of planning charts and forms referred to in these guidelines may be obtained from the Division of Adult Education, U.S. Office of Education, Washington, D.C. 20202.

(20 U.S.C. 1205.)

SEC. 3.2 *Adult learning needs survey.*—(a) It is suggested that a needs survey be taken initially without regard to fiscal constraints or anticipated revenues from State, Federal, or local sources, in order to determine the full extent of adult learning needs in the State. A survey chart, such as that included in adult program planning chart A, may be used by the administrative agency or by the local educational agency to achieve compatibility in identifying the needs and annual program accomplishments.

(b) Charts similar to adult program planning chart A may also be useful for surveying the needs in the two other priority levels established by regulation at section 166.12(b)(8) (grades 4 through 8 and 9 through 12).

(c) Since this survey will affect subsequent decisions, it is suggested that the county breakdown reflected in the 1970 Census also be examined carefully and compared with the survey data. The general social and economic characteristics column of the State Census provides the years of school completed for females and males over 25 years of age according to county. Educational attainment data regarding the age group between 16 and 25 are also available as State summary data.

(d) In addition to the State Census data, the State educational agency might find the following publications useful in preparing the annual program plan:

(1) Adult Education Annual Program Report (OE Form 3058);

(2) Publications of the National Center for Educational Statistics, U.S. Office of Education, concerning adult education data;

(3) Reports of the Systems Development Corporation concerning the longitudinal study of adult basic education students (the final report will be available in the fall of 1973);

(4) Teacher training studies produced by the University of Missouri at Kansas City;

(5) State evaluations;

(6) The Adult Basic Education Evaluation Model produced by Teachers College, Columbia University; and

(7) Regional staff development plan.

(20 U.S.C. 1205.)

SEC. 3.3 *Resource inventory.*—(a) *General.*—Compiling an inventory of those resources that can be applied toward meeting the identified learning needs is a next step. At this point in planning it is recommended that fiscal constraints again not be allowed to enter in the planning since this step is designed to encourage the State educational agency to identify resources in each administrative agency that are available or could be made available and the additional resources required to help meet the previously identified learning needs. It is suggested that the State educational agency conduct such planning with regard to such resources as personnel, facilities, instructional materials, and community resources. If this task has already been performed in conjunction with the regional staff development program, the data might be transferred to the annual plan or the staff development plan might be attached or incorporated by reference.

(b) *Personnel.*—In order to clarify the extent of personnel currently available for adult education, and those desired, a chart along the lines of adult program planning chart B might be included in the annual program plan.

(c) *Community resources.*—Experience indicates that the adult education program will succeed in relation to the degree that it utilizes total community resources with a view toward maximizing services required by the individual rather than operating in isolation as a single-purpose adult education program. Of course, if the local applicant can share in the cost of the program, it enables the State to render service to more people. Community resources such as the following should be surveyed to determine their availability for adult instructional programs: Local educational agencies, public libraries, museums, media, transportation, recreation, cultural, business, industry, public health, social security, food stamps, day care, nonprofit organizations, hospitals, correctional institutions, learning centers, colleges or community colleges, technical institutes, and other appropriate organizations. During the planning survey an effort might also be made to identify facilities that are convenient to adult learners and, if possible, adjacent to other services they may require, such as health and welfare services.

(20 U.S.C. 1205.)

SEC. 3.4 *Determining program priorities.*—(a) The State educational agency also faces the task of establishing program priorities and allocating resources. The annual program plan must include a statement of the priorities established, as required by the regulations at section 166.12(b). Such a statement should include a clear description of each of the precise priorities established and should give the rationale for establishing each such priority, relating it to prior steps

V 38 I 177 SEP 13 73 XUM

in the planning process, such as the needs survey and resource inventory. For example, a priority for classes for migrant adults functioning at the fourth grade level or below might have been identified by the adult needs survey.

(b) It is suggested that the State educational agency formulate and disseminate its policies, procedures, criteria, and priorities in order to guide agencies in applying for program support, consistent with sections 166.12(b) and 166.13 of the regulations.

(c) Every effort should be made to provide a coordinated statewide program which focuses upon the established priorities. However, the State educational agency should also consider the unique priorities of particular applicants. For example, if the learning needs survey indicates that a particular school district or location has a large population of adults that require English as a second language classes to gain employment or meet their adult responsibilities, then the State educational agency might wish to encourage the appropriate agency to submit an application for a special project (as described in section 306(a)(4) of the Act) focusing on this particular program area.

(20 U.S.C. 1205 45 CFR 166.11–.13.)

SEC. 3.5 *Allocating resources*—(a) *Expenditures for administration of State plan and project activities.*—Program planning chart C may be used to assist in allocating resources and prorating expenditures.

(b) *Fiscal resources in relation to the three instructional priorities.*—(1) The State educational agency must consider the instructional priorities provided in section 166.12(b) with regard to the allocation of funds. In many instances it appears that certain geographical areas have been providing substantial instructional services for lower priorities when adequate emphasis has not yet been accorded to higher priority levels within the geographical area. The distribution of resources described in the above regulation is required in accord with the intent of the Act.

(2) Relating these priorities to the major cost categories might also be useful. For example, if the learning needs survey indicates that a substantial proportion of the population in a particular location was functioning below the fourth grade level and the personnel resource inventory reflected a lack of teachers prepared to teach reading at grades 1–4, the State educational agency may want to consider assigning additional teacher training resources at this level. Of course, this procedure could also apply to instructional materials, special projects, and research or demonstration projects.

(20 U.S.C. 1205; 45 CFR 166.11–.13.)

SEC. 3.6 *Program evaluation.*—Program evaluations, as described in 45 CFR 166.13(b)(8), might address the following issues:

(1) To what degree does the plan provide for cooperation with special projects and teacher training grants that may be operating in the State and supported from section 309 resources;

(2) Do the local instructional programs that the State funded reflect the findings of the learning needs survey and agree with the priorities in section 3.5(b);

(3) Do local programs of instruction provide opportunities for State reviews on a recurring basis? This is very important since the State educational agency or Office of Education regional office may be able to provide technical assistance which could strengthen a component;

(4) Is the regional staff development capability employed effectively to assist local programs;

(5) Do evaluations performed by the State educational agency include management concerns such as maintaining adequate financial records and providing for audits and retention of records; and

(6) Has the State-Federal agreement been provided to all participating agencies to apprise them of the State assurances to implement the Act?

(20 U.S.C. 1205; 45 CFR 166.47.)

SEC. 3.7 *Annual program plan format.*—In order to reflect the above suggestions and the requirements contained in the Act and pertinent regulations, State educational agencies may wish to use an annual program plan format such as the following:

(a) *General program goal statements.*—This portion of the plan might contain a brief introductory overview or summary of the general program goals.

(b) *Needs survey and resource inventory.*—This portion of the plan might contain a description of the conclusions of a needs survey and a resource inventory, including information and planning charts such as those discussed in sections 3.2 and 3.3

(c) *Specific program priorities and objectives.*—This portion of the program plan might describe the specific program priorities established in accordance with section 3.4. Examples of such priorities include:

(1) To review project applications to assure their compliance with Federal and State guidelines.

(2) To provide ____ on-site visitations by State agency staff for technical assistance and evaluation.

(3) To provide ____ preservice and inservice training activities.

(4) To formulate a State advisory council which will meet ____ times a year.

(5) To increase adult enrollment in ____ program by ____ percent.

(6) To add ____ new programs during the program year.

(7) To complete required reports by the deadline date.

(d) *Activities and procedures.*—(1) This portion of the program plan might describe the activities and procedures proposed to address each priority or objective. It is suggested that each priority or objective be discussed individually, as follows:

(i) Objective 1: Procedures and activities A, B, and C.

(ii) Objective 2: Procedures and activities X, Y, and Z.

(2) This portion of the program plan might also, where appropriate, utilize the suggestions and planning charts referred to in Section 3.5.

(e) *Evaluation.*—This portion of the annual program plan might include a discussion of evaluation activities, including

(1) Evaluation activities proposed to be conducted in the year for which application is made (See Section 3.6.); and

(2) The extent to which past evaluation activities have indicated strengths and weaknesses in past programs, and how these strengths and weaknesses have affected the design of the proposed activities and procedures.

## PART 4—APPLICATIONS AND PROJECT REPORT FORMS

SEC. 4.1 *Application form.*—It would be very helpful for the purpose of aggregating compatible data if all applicants to the State educational agency used application and reporting forms which were comparable. To accomplish this purpose, States may wish to recommend the use of all or portions of a form entitled "Application and Project Report Form," which may be obtained from the Division of Adult Education, U.S. Office of Education, Washington, D.C. 20202.

## HIGHLIGHTS OF THIS ISSUE

**This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.**

**HEATING OIL**—CLC allows refiner-retailers to increase ceiling prices for retail sales on monthly basis; effective 8–19–73 ..... 25686

**GROSS DEMAND DEPOSITS**—FRS proposes to apply reserve criteria against certain accounts classified among "other liabilities"; comments by 10–12–73 ..... 25703

**TRAFFIC NOISE**—DOT invites comments on proposed guidelines; comments by 11–1–73 ..... 25696

**AIR QUALITY STANDARDS**—
EPA proposal regarding selective use of supplementary control systems; comments by 10–15–73.. ..... 25697
EPA revokes secondary sulfur dioxide criteria and revises criteria for sulfur oxides.. ..... 25678

**WATER QUALITY**—EPA provides management programs for control; effective 9–14–73.. ..... 25681

**STEEL WIRE ROPE FROM JAPAN**—Tariff Commission determination of injury ..... 25724

**FOOD AND DRUGS**—
FDA provides for safe use of certain animal drugs (4 documents); effective 9–147–3..... 25673, 25674
FDA provides for certification of certain antibiotic drugs and updating of test organisms used in potency assay of carbenicillin (3 documents); effective 9–24–73 ..... 25674
FDA revision and revocation of certain standards for margarine; effective 10–11–73 ..... 25671

**VETERANS LOANS**—VA clarifies prepayment of guaranteed mortgage loans; effective 9–10–73 ..... 25678

(Continued inside)

**PART II:**

**MILK ORDERS**—USDA proposed revision of milk classification and pricing; exceptions due 10–15–73 ..... 25755

**PART III:**

**MINIMUM WAGE**—Labor Department determinations and monthly index for federally assisted construction ..... 25845

Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

# Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## Title 7—Agriculture

## CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

## PART 201—FEDERAL SEED ACT REGULATIONS

### Certifying Agency Standards and Procedures to Assure Genetic Purity and Identity of Certified Seed

On October 17, 1969, section 101(a)(25) of the Federal Seed Act was amended, in part, to provide that a "seed certifying agency" must have "standards and procedures approved by the Secretary (after due notice, hearings, and full consideration of the views of farmer users of certified seed and other interested parties) to assure the genetic purity and identity of the seed certified."

Following passage of this legislation the Association of Official Seed Certifying Agencies appointed an Advisory Board consisting of representatives of the seed trade, regulatory agencies, research agencies, State seed certifying agencies, and certified seed growers associations to recommend a minimum set of standards and procedures to assure genetic purity and identity of certified seed. The recommendations of the Advisory Board were adopted by the Association of Official Seed Certifying Agencies in August 1970.

The following amendments to the rules and regulations under the Federal Seed Act essentially consist of the minimum standards and procedures adopted by that Association.

Pursuant to section 402 of the Federal Seed Act, as amended (7 U.S.C. 1551 et seq.) and the administrative procedure provisions of 5 U.S.C. section 553, there was published in the FEDERAL REGISTER (37 FR 10572) on May 25, 1972, a notice of rulemaking and hearing with respect to proposed amendments to the regulations (7 CFR, Part 201, as amended) relating to standards and procedures to assure genetic purity and identity of certified seed under the Act.

Interested persons were given an opportunity to present views orally at a hearing and to submit written comments regarding the proposals. Over 3,000 copies of the proposals were distributed to trade and Government organizations. Oral comments were made by 10 persons and written comments were submitted by 6 persons, groups, or organizations.

On the basis of comments received, the hearing record and all other information available to the Department, it is concluded that, with the changes noted below, the amendments to the regulations as proposed on May 25, 1972, are in the public interest and should be implemented.

A. *Definition of "off-type".* Improved wording was suggested for describing an "off-type" plant or seed. The suggestion is adopted.

B. *Definition of "inbred line."* A written comment proposed a delay in decision pending further comment. Further comments were not received. The proposal is adopted as originally worded.

C. *Rights of State agencies to refuse to certify seed.* One party recommended that wording be included to require State agencies to certify seed upon application by a grower. The Act does not provide for such authority. Further, the recommendation involves a substantive change that was not included in the proposal. The recommendation is not adopted.

D. *Eligibility requirements.* The proposal provides that certain information on new varieties be furnished to the Secretary. The concensus of the comments is that the information should go to the agency (or agencies) being requested to certify the new variety. The wording is so amended.

The proposal also contains the wording "Evidence of the performance of the variety * * *." Suggestions were made to change this provision, to read "Evidence supporting the identity of the variety * * *" so that relative performance of the variety is not a requirement for approval of the variety for certification. The suggestion is adopted.

E. *Limitation of generations.* Suggestions were made to delete the wording regarding scientific data and legal requirement. This suggestion is adopted.

F. *Production.* One source suggested "field" be changed to "area." The word "field," as defined in a standard dictionary, appears to be adequate. The suggestion is not adopted.

G. *Addition of a kind to the table of standards.* During the oral hearing it was proposed that the kind "milkvetch" and standards therefor be added to the table of standards. Nineteen hundred and seventy-two was the first year that this kind was certified and standards had only recently been developed. There was no objection. There is no known reason why anyone would be adversely affected by the inclusion of these standards at this time. The proposal is therefore adopted.

H. *Footnote Number 38.* New wording was suggested to clarify the isolation requirement for the production of hybrid seed from male sterile parents. The suggestion is adopted.

I. *Length of stand requirement for alfalfa.* A provision whereby the originating plant breeder could specify the length of stand was not shown in the proposal. The provision is added.

J. *Editorial changes.* Editorial changes have been made for purposes of clarity.

In accordance with the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that further public rulemaking proceedings on the matter are unpractical and unnecessary.

Accordingly, the amendments are promulgated as follows:

(Sec. 402, 53 Stat. 1285 (7 U.S.C. 1592); 37 FR 28464, 28476.)

1. Section 201.2: The following definitions are added to § 201.2:

**§ 201.2 Terms defined.**

* * * * *

(bb) *Breeder seed.* Breeder seed is a class of certified seed directly controlled by the originating or sponsoring plant breeding institution, or person, or designee thereof, and is the source for the production of seed of the other classes of certified seed.

(cc) *Foundation seed.* Foundation seed is a class of certified seed which is the progeny of Breeder or Foundation seed and is produced and handled under procedures established by the certifying agency, in accordance with this part, for producing the Foundation class of seed, for the purpose of maintaining genetic purity and identity.

(dd) *Registered seed.* Registered seed is a class of certified seed which is the progeny of Breeder or Foundation seed and is produced and handled under procedures established by the certifying agency, in accordance with this part, for producing the Registered class of seed, for the purpose of maintaining genetic purity and identity.

(ee) *Certified seed.* Certified seed is a class of certified seed which is the progeny of Breeder, Foundation, or Registered seed, except as provided in § 201.70 and is produced and handled under procedures established by the certifying agency, in accordance with this part, for producing the Certified class of seed, for the purpose of maintaining genetic purity and identity.

(ff) *Off-type.* The term "off-type" means a plant or seed which deviates in one or more characteristics from that which has been described in accordance with § 201.68(c) as being usual for the strain or variety.

(gg) *Inbred line.* The term "inbred line" means a relatively true-breeding strain resulting from at least five successive generations of controlled self-fertilization or of backcrossing to a recurrent parent with selection, or its equivalent, for specific characteristics.

V 38 178 SEP 14 73 XUM

(hh) *Single cross.* The term "single cross" means the first generation hybrid between two inbred lines.

(ii) *Foundation single cross.* The term "foundation single cross" means a single cross used in the production of a double cross, a three-way, inbred lines.

(jj) *Double cross.* The term "double cross" means the first generation hybrid between two single crosses.

(kk) *Top cross.* The term "top cross" means the first generation hybrid of a cross between an inbred line and an open-pollinated variety or the first-generation hybrid between a single cross and an open-pollinated variety.

(ll) *Three-way cross.* The term "three-way cross" means a first generation hybrid between a single cross and an inbred line.

(mm) *Open-pollination.* The term "open-pollination" means pollination that occurs naturally as opposed to controlled pollination, such as by detasselling, cytoplasmic male sterility, self-incompatibility or similar processes.

2. The following §§ 201.67–201.78 are added to read as follows:

CERTIFIED SEED

**§ 201.67 Seed certifying agency standards and procedures.**

In order to qualify as a seed certifying agency for purposes of section 101(a)(25) of the Federal Seed Act (7 U.S.C. 1551(a)(25)) an agency must enforce standards and procedures, as conditions for its certification of seed, that meet or exceed the standards and procedures specified in §§ 201.68 through 201.78.

**§ 201.68 Eligibility requirements for certification of varieties.**

The certifying agency shall require the originator, developer, or owner of the variety, or agent thereof, to make the following available when eligibility for certification is requested:

(a) The name of the variety.

(b) A statement concerning the variety's origin and the breeding procedure used in its development.

(c) A detailed description of the morphological, physiological, and other characteristics of the plants and seed that distinguish it from other varieties.

(d) Evidence supporting the identity of the variety, such as comparative yield data, insect and disease resistance, or other factors supporting the identity of the variety.

(e) A statement delineating the geographic area or areas of adaptation of the variety.

(f) A statement on the plans and procedures for the maintenance of seed classes, including the number of generations through which the variety may be multiplied.

(g) A description of the manner in which the variety is constituted when a particular cycle of reproduction or multiplication is specified.

(h) Any additional restrictions on the variety, specified by the breeder, with respect to geographic area of seed production, age of stand or other factors affecting genetic purity.

(i) A sample of seed representative of the variety as marketed.

**§ 201.69 Classes of certified seed.**

(a) Classes of certified seed are as follows:

(1) Breeder.
(2) Foundation.
(3) Registered.
(4) Certified.

**§ 201.70 Limitations of generations for certified seed.**

The number of generations through which a variety may be multiplied shall be limited to that specified by the originating breeder or owner and shall not exceed two generations beyond the Foundation seed class with the following exceptions which may be made with the permission of the originating or sponsoring plant breeder, institution, or his designee:

(a) Recertification of the Certified class may be permitted when no Foundation seed is being maintained.

(b) The production of an additional generation of the Certified class may be permitted on a 1-year basis only, when an emergency is declared prior to the planting season by any official seed certifying agency stating that the Foundation and Registered seed supplies are not adequate to plant the needed Certified acreage of the variety. The additional generation of Certified seed to meet the emergency need is ineligible for recertification.

**§ 201.71 Establishing the source of all classes of certified seed.**

The certifying agency shall have evidence of the class and source of seed used to plant each crop being considered for certification.

**§ 201.72 Production of all classes of certified seed.**

(a) Each certifying agency shall determine that genetic purity and identity are maintained at all stages of certification including seeding, harvesting, processing, and labeling of the seed.

(b) The unit of certification shall be a clearly defined field or fields.

(c) One or more field inspections shall be made (1) previous to the time a seed crop of any class of certified seed is to be harvested, and (2) when genetic purity and identity can best be determined. The field shall be in suitable condition to permit an adequate inspection to determine genetic purity and identity.

(d) A certification sample shall be drawn in a manner approved by the certifying agency from each cleaned lot of seed eligible for certification. Evidence that any lot of seed has not been protected from contamination which might affect genetic purity, or is not properly identified, shall be cause for possible rejection of certification.

**§ 201.73 Processors and processing of all classes of certified seed.**

The following requirements must be met by processors of all classes of certified seed:

(a) Facilities shall be available to perform processing without introducing admixtures.

(b) Identity of the seed must be maintained at all times.

(c) Records of all operations relating to certification shall be complete and adequate to account for all incoming seed and final disposition of seed.

(d) Processors shall permit inspection by the certifying agency of all records pertaining to all classes of certified seed.

(e) Processors shall designate an individual who shall be responsible to the certifying agency for performing such duties as may be required by the certifying agency.

(f) Seed lots of the same variety and class may be blended and the class retained. If lots of different classes are blended, the lowest class shall be applied to the resultant blend. Such blending can only be done when authorized by the certifying agency.

**§ 201.74 Labeling of all classes of certified seed.**

(a) All classes of certified seed when offered for sale shall have an official certification label affixed to each container clearly identifying the certifying agency, the reference number, the variety name (if certified as to variety) and the kind and class of seed.

(b) In the case of seed sold in bulk, the invoice or accompanying document shall identify the certifying agency, the crop kind, variety (if certified as to variety), class of seed, and the identifying number.

(c) The official certification label may be printed directly on the container when an accounting of the containers is required by the certifying agency.

(d) Labels other than those printed on the containers shall be attached to containers in a manner that prevents removal and reattachment without tampering being obvious.

**§ 201.75 Interagency certification.**

Interagency certification may be accomplished by participation of more than one official certifying agency in performing the services required to certify a lot of seed.

(a) The certifying agency issuing labels for all classes certified seed shall require the seed on which the labels are used to meet standards at least equal to the minimum genetic standards for the seed in question as specified in table 5 of this part.

(b) Seed to be recognized for interagency certification must be received in containers carrying official certification labels, or if shipped for processing, evidence of its eligibility from another official certifying agency, together with the following information:

(1) Variety (if certified as to variety) and kind;

(2) Quantity of seed (pounds or bushels);

(3) Class of certified seed;

(4) Inspection or lot number traceable to the previous certifying agency's records.

(c) Each label used in interagency certification shall be serially numbered or carry the certification identity number and clearly identify the certifying agencies involved, and the variety (if certified as to variety), kind and class of certified seed.

**§ 201.76 Minimum Land, isolation, field and seed standards.**

In the following table the columns of figures mean for "Land" the number of years that must elapse between the destruction of a stand of a kind and establishment of a stand of a specified class of a variety of the same kind. "Isolation" means distance in feet from any contaminating source. "Field" means minimum number of plants or heads in which one plant or head of another variety is permitted. "Seed" means the maximum percentage of seed of other varieties or off-types permitted in the cleaned seed.

TABLE 5

| Crop kind | Foundation | | | | Registered | | | | Certified | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Land | Isolation | Field | Seed | Land | Isolation | Field | Seed | Land | Isolation | Field | Seed |
| Alfalfa | [1] [4] 1 | [4] [5] 600 | 1,000 | 0.1 | [1] 3 | [3] [4] 300 | 400 | 0.25 | [1] 1 | [3] [4] 165 | 100 | 1.0 |
| Barley | [7] 1 | [23] 0 | 3,000 | 0.05 | [7] 1 | [23] 0 | 2,000 | 0.1 | [7] 1 | [23] 0 | 1,000 | 0.2 |

| Hybrid | [30] 1 | [21] [22] 660 | 3,000 | 0.05 | [30] 1 | [21] [22] 660 | [7] 2,000 | 0.1 | [30] 1 | [21] [22] 330 | 1,000 | 0.2 |

[1] The land must be free of volunteer plants of the crop kind during the year immediately prior to establishment and no manure or other contaminating material shall be applied the year previous to seeding or during the establishment and productive life of the stand.

[2] At least 2 years must elapse between destruction of indistinguishable varieties or varieties of dissimilar adaptation and establishment of the stand for the production of the Certified class of seed.

[3] Isolation distance for certified seed production shall be at least 500 feet from varieties of dissimilar adaptation.

[4] Isolation between classes of the same variety may be reduced to 25 percent of the distance otherwise required.

[5] This distance applies when fields are 5 acres or larger in area. For smaller fields, the distances are 900 feet and 450 feet for the Foundation and Registered classes, respectively.

[6] Fields of less than 5 acres require 330 feet.

[7] Requirement is waived if the previous crop was grown from certified seed of the same variety.

[8] Requirement is waived if the previous crop was of the same variety and of a certified class equal or superior to that of the crop seeded.

[9] Reseeding varieties of crimson clover may be allowed to volunteer back year after year on the same ground. If a new variety is being planted where another variety once grew, the field history requirements apply.

[10] No isolation is required for the production of hand-pollinated seed.

[11] When the contaminant is of the same color and texture, the isolation distance may be modified by (1) adequate natural barriers, or (2) differential maturity dates, provided there are no receptive silks in the seed parent at the time the contaminant is shedding pollen. In the case of inbred lines and foundation single crosses, these modifications may apply only for fertile seed production.

[12] Where the contaminating source is corn of the same color and texture as that of the field inspected, the isolation distance is 410 feet and may be modified by the planting of pollen parent border rows according to the following table:

MINIMUM NUMBERS OF BORDER ROWS REQUIRED

| Minimum distance from contaminant | Field size, up to 20 acres | Field size, 20 acres or more |
|---|---|---|
| 410 | 0 | 0 |
| 370 | 2 | 1 |
| 330 | 4 | 2 |
| 290 | 6 | 3 |
| 245 | 8 | 4 |
| 205 | 10 | 5 |
| 165 | 12 | 6 |
| 125 | 14 | 7 |
| 85 | 16 | 8 |
| 0 | (Not permitted) | 10 |

[13] Refers to off-type plants in the pollen parent that have shed pollen or to the off-type plants in the seed parent at the time of the last inspection.

[14] The required minimum isolation distance for sweet corn is 660 feet from the contaminating source, plus four border rows when the field to be inspected is 10 acres or less in size. This distance may be decreased by 15 feet for each increment of 4 acres in the size of the field to a maximum of 40 acres, and further decreased 40 feet for each additional border row to a maximum of 16 rows. These border rows are for pollen-shedding purposes only.

[15] Refers to off-type ears. Ears with off-colored kernels are limited to 0.2 percent.

[16] The Merion variety of Kentucky bluegrass is allowed 3 percent.

[17] All cross-pollinating varieties must be 400 feet from any contaminating source.

V 38-1178 SEP 14 73 XUM

[14] Isolation between diploids and tetraploids shall be at least 15 feet.

[15] Minimum isolation shall be at least 100 feet if the cotton plants in the contaminating source differ by easily observable morphological characteristics from the field to be inspected. Isolation distance between upland and Egyptian types shall be at least 1,320, 1,320, and 660 feet for Foundation, Registered, and Certified classes, respectively.

[16] These distances apply when there is no border removal. Removal of a 9-foot border (after flowering) decreases the required distance for Foundation, Registered, and Certified seed to 600, 225, and 100 feet, respectively, for cross-pollinated species, and to 30, 15, and 15 feet, respectively, for apomictic and self-pollinated species. Removal of a 15-foot border allows a further decrease to 150, 150, and 75 feet, respectively, for cross-pollinated species.

[17] Isolation distances between two fields of the same kind may be reduced to a distance adequate to prevent mechanical mixture, if the sum of percentages of plants in bloom in both fields does not exceed 5 percent at a time when more than 1 percent of the plants in either field are in bloom.

[18] Refers to bulbs.

[1] Distance adequate to prevent mechanical mixture is necessary.

[2] Required isolation between classes of the same variety is 10 feet.

[3] The minimum distance may be reduced by 50 percent if different classes of the same variety are involved.

[4] The minimum distance may be reduced by 50 percent if the field is adequately protected by natural or artificial barriers.

[5] These ratios are for definite other varieties. The ratios for doubtful other varieties are:

| | Foundation | Registered | Certified |
|---|---|---|---|
| Millet | 1:10,000 | 1:5,000 | 1:2,500 |
| Sorghum | 1:20,000 | 1:10,000 | 1:1,000 |
| Hybrid sorghum | 1:20,000 | (Not applicable) | 1:1,000 |
| Okra | None | 1:750 | 1:500 |

[6] White heart fruits may not exceed 1 per 100, 10, and 20 redfruits for Foundation, Registered, and Certified classes, respectively. Ufton or hard rind is not permitted in Foundation or Registered classes and may not exceed 1 per 1,000 fruits in the Certified class.

[7] This distance applies if the contaminating source does not (genetically differ in height from the pollinator parent or has a different chromosome number. If the contaminating source does (genetically) differ and has the same chromosome number, the distance shall be 900 feet. The minimum isolation from grass sorghum or broomcorn with the same chromosome number shall be 1,320 feet.

[8] Requirement is waived for the production of pollinator lines if the previous crop was grown from a certified class of seed of the same variety. Sterile lines and crossing blocks must be on land free of contaminating plants.

[9] If the contaminating source is similar to the hybrid in all important characteristics, the isolation may be reduced by 66 feet for each pair of border rows of the pollinator parent down to a minimum of 330 feet. These rows must be located directly opposite or diagonally to the contaminating source. The pollinator border rows must be shedding pollen during the entire time 5 percent or more of the seed parent flowers are receptive.

[10] An unplanted strip at least 2 feet in width shall separate male sterile plants and pollinator rows in inter-planted blocks.

[11] Unless the preceding soybean crop was planted with a class of certified seed of the same variety or unless the variety planted is of a contrasting pubescence or hilum color, in which case, no time need elapse.

[12] May include not more than 0.01 percent purple or white seeds.

[13] Standards apply equally to seed parents and pollen parents which may include up to 1:1,000 plants each of wild-type branching, purple or white-seeded plants.

[14] A new plant bed must be used each year unless the bed is properly treated with a soil sterilant prior to seeding.

[15] This distance is applied between varieties of the same type and may be waived if four border rows of each variety are allowed to bloom and set seed between the two varieties but are not harvested for seed. Isolation between varieties of different types shall be 1,320 feet except if protected by bagging or by topping all plants in the contaminating source before bloom.

[16] When male sterile and male fertile plants of the same type are planted adjacent in a field, this requirement may be waived; provided, four border rows of male sterile plants are allowed to bloom and set seeds. The seed from these border rows shall not be harvested as part of the certified lot of seed produced by the male sterile plants. When plants are of different types, the distance shall be 1,320 feet except if protected by bagging or by topping all plants in the contaminating source before bloom.

[17] Not used.

[18] Isolation between varieties shall be 100 feet.

[1] Isolation between millets of different genera shall be 6 feet.

ADDITIONAL REQUIREMENTS FOR THE CERTIFICATION OF PLANT MATERIALS OF CERTAIN CROPS

**§ 201.77 Length of stand requirements.**

(a) *Alfalfa.* Limitations on the age of stand and certified seed classes through which a given variety may be multiplied both inside and outside its region of adaptation shall be specified by the originator or his designee. Certified seed production outside the region of adaptation shall not exceed 6 years if not otherwise specified by the originator, or his designee.

(b) *Red clover.* Only two seed crops are permitted of all certified seed classes.

(c) *White and alsike clover.* Only two successive seed crops are permitted following the year of establishment for Foundation and Registered classes, but 2 additional years are permitted if the field is reclassified to the next lower class. Four successive seed crops following seeding are permitted if the first and succeeding crops are of the Certified class, provided the stand of perennial plants is maintained.

(d) *Sainfoin.* All certified seed classes are eligible to produce five successive seed crops following seeding.

**§ 201.78 Pollen control for hybrids.**

(a) *Wheat and barley.* Shedders in the seed parent, at any one inspection, are limited to 1:200 heads for Foundation A Line and 1:100 heads for Registered A Line, except that when the A Line is increased outside the area of the anticipated A x R production in order to utilize self-fertility produced by environmental effects, only isolation and genetic purity standards will be in effect. (An A Line is a cytoplasmic male sterile female line used to produce hybrid seed. An R Line is a pollinator line used to pollinate an A Line and to restore fertility in the resulting hybrid seed.)

(b) *Corn.* When 5 percent or more of the seed parent plants have receptive silks, shedding tassels in the seed parent plants shall be limited to 1 percent at any one inspection, or a total of 2 percent at any three inspections on different dates. Shedding tassels are those which have 2 inches or more of the central stem or branches, or any combination thereof, shedding pollen.

(c) *Sorghum.* Shedders in the seed parent, at any one inspection, are limited to 1:3,000 plants for Foundation class and 1:1,500 plants for Certified class.

(d) *Sunflowers.* Seed parents flowering and shedding pollen before the male parents are shedding pollen must be removed. At least 50 percent of the male plants must be producing pollen when the seed parent is in full bloom.

*Effective date.*—These amendments shall become effective November 1, 1973.

Done at Washington, D.C., on September 6, 1973.

JOHN C. BLUM,
*Deputy Administrator, Regulatory Programs.*

## CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

## PART 301—DOMESTIC QUARANTINE NOTICES

### Subpart—Cereal Leaf Beetle

TERMINATION OF QUARANTINE AND REGULATIONS

On July 2, 1973, a notice of public hearing and proposed rulemaking to determine whether to terminate the Cereal Leaf Beetle Quarantine and regulations (7 CFR 301.84, 301.84-1 et seq.) was published in the FEDERAL REGISTER (38 FR 17501) under the administrative procedure provisions of 5 U.S.C. 553, and sections 8 and 9 of the Plant Quarantine Act of 1912, as amended, and section 106 of the Federal Plant Pest Act (7 U.S.C. 161, 162, 150ee). After public hearing and due consideration of all relevant matter presented, it has been determined in the best interest of the public to terminate the Cereal Leaf Beetle Quarantine and regulations thereunder.

Therefore, the Cereal Leaf Beetle Quarantine and regulations, 7 CFR 301.84, 301.84-1 through 301.84-10, are hereby terminated effective October 1, 1973. However, such provisions shall be deemed to continue in full force and effect for the purpose of sustaining any action or other proceeding with respect to any right that accrued, liability that was incurred, or violation that occurred prior to said date.

The Cereal Leaf Beetle Quarantine was established to prevent the artificial spread of the beetle to noninfested areas. Therefore, the movement of certain articles which presented a hazard of spread was regulated. The beetle has now reached the Mississippi River, and eventual natural spread to the major grain-growing areas of the Midwest seems inevitable. The extensive natural rate of spread has to a great degree negated the effectiveness of the Quarantine in preventing the artificial spread of the cereal leaf beetle. Also, it has now been determined that there is minimal threat of long-distance spread through movement of the regulated articles since the general trend of marketing practices is movement of these articles to the east and south. There is limited movement of the regulated articles to the grain-growing areas of the Midwest.

The lessening of the quarantine effort is not meant to imply that this is not an important insect capable of causing serious damage to small grains. Therefore, the Department of Agriculture will continue to cooperate with the States and farmers in a pest management program including control measures such as the use of insecticides by individual farmers, the use of parasites, development of resistant varieties of small grains, and development of certain cultural practices to reduce overwinter survival of adult beetles.

This action relieves restrictions and it does not appear that further public participation in rulemaking procedures concerning this action would make additional relevant information available to the Department. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that such public participation with respect to this action is impracticable and unnecessary, and this action may be made effective less than 30 days after publication hereof in the FEDERAL REGISTER.

(Secs. 8 and 9, 37 Stat. 318, as amended, sec. 106, 71 Stat. 33 (7 U.S.C. 161, 162, 150ee), 37 FR 28464, 28477.)

*Effective date.*—The termination of the Cereal Leaf Beetle Quarantine and regulations thereunder shall become effective October 1, 1973.

Done at Washington, D.C., this 7th day of September 1973.

G. H. WISE,
*Acting Administrator, Animal and Plant Health Inspection Service.*

## PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

### Grade and Size Regulations

These regulations specify minimum grade and size requirements for the period September 17, 1973, through October 14, 1973, applicable to the handling of oranges, grapefruit, tangerines, and tangelos grown in the production area in Florida. These regulatory requirements are designed to promote orderly marketing and provide consumers with an ample supply of acceptable quality fruit.

*Findings.*—(1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR, Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, including Navel, Temple, and Murcott Honey oranges, grapefruit, tangerines, and tangelos, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The minimum grade and size requirements specified herein reflect the Department's appraisal of the need for regulation of shipments of the specified varieties of oranges, grapefruit, tangerines, and tangelos during the period September 17, through October 14, 1973, based on the available supply and current and prospective market demand conditions. Available data indicate that during the 1973–74 season fresh market outlets will take about 19,500 carlots of round oranges, 4,250 carlots of Temple oranges, 3,000 carlots of tangelos, 4,200 carlots of tangerines, 1,250 carlots of murcotts, 150 carlots of seeded grapefruit, and 32,500 carlots of seedless grapefruit. The minimum grade and size requirements specified for Early and Midseason type oranges are prescribed during the present stage of maturity and development of such oranges to guard against the shipment of lower quality and smaller size fruit which tends to demoralize the market for later shipments of such fruit. The U.S. No. 1 Golden grade requirement specified herein for Navel oranges is consistent with the fact that when the Navel orange attains maturity the fruit often does not possess the color required for the U.S. No. 1 grade.

The specified grade and size limitations for shipments of seeded and seedless grapefruit are necessary to provide consumers with grapefruit of desirable grades and sizes consistent with the overall quality and size composition of the crops.

The size and grade requirements specified herein for tangerines and tangelos are necessary during the early part of the season to prevent the handling of such fruits that are of a lower grade or smaller size in order to provide good quality fruit to consumers and promote orderly marketing.

The specified grade and size requirements for export shipments of the named varieties of oranges, grapefruit, tangerines, and tangelos are necessary to assure the exportation of good quality fruit and thereby aid the expansion of export markets.

These regulations are therefore designed to permit shipment of ample supplies of fruit of the more desirable grades and sizes in the interest of consumers and producers, guard against the shipment of undersiable grades and sizes of such fruit, and provide orderly marketing conditions, consistent with objectives of the act.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of these regulations until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which these regulations are based became available and the time when these regulations must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of oranges, grapefruit, tangerines, and tangelos, grown in the production area, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on September 6, 1973, such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of these regulations, including the effective time hereof, are identical with the aforesaid recommendations of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such fruits; it is necessary to make these regulations effective on September 17, 1973, to preclude the shipment of lower quality oranges, grapefruit, tangerines, and tangelos, as hereinafter set forth, and to otherwise effectuate the declared policy of the act; and compliance with these regulations will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

**§ 905.550 Orange Regulation 72.**

*Order.*—(a) Orange Regulation 71 (37 FR 21799, 24432, 25036, 27619, 28606; 38 FR 3396, 4569, 7565, 8169, 9075, 10151, 18360) is hereby terminated on September 17, 1973.

(b) During the period September 17, 1973, through October 14, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(1) Any oranges, except Navel oranges, Temple oranges, Murcott Honey oranges and Valencia, Lue Gim Cong, and similar late maturing oranges of the Valencia type, grown in the production

V 38-178 SEP 14 73 XUM

area, which do not grade at least U.S. No. 1;

(2) Any oranges, except Navel oranges, Temple oranges, Murcott Honey oranges, and Valencia, Lue Gim Gong and similar late maturing oranges of the Valencia type, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos: *Provided*, That in determining the percentage of oranges in any lot which are smaller than 2$^{2}/_{16}$ inches in diameter, such percentage shall be based only on those oranges in such lot which are of a size 2$^{11}/_{16}$ inches in diameter or smaller;

(3) Any Navel oranges, grown in the production area, which do not grade at least U.S. No. 1 Golden;

(4) Any Navel oranges, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize Navel oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(5) Any Temple oranges, grown in the production area, which do not grade at least U.S. No. 1;

(6) Any Temple oranges, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize Temple oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(7) Any Murcott Honey oranges, grown in the production area, which do not grade at least Florida No. 1 grade for murcotts;

(8) Any Murcott Honey oranges, grown in the production area, which are of a size smaller than 2$^{11}/_{16}$ inches in diameter, except that a tolerance for undersize Murcott Honey oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(9) Any Valencia, Lue Gim Gong, and similar late maturing oranges of the Valencia type, grown in the production area, which do not grade at least U.S. No. 2; and

(10) Any Valencia, Lue Gim Gong, and similar late maturing oranges of the Valencia type, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos: *Provided*, That in determining the percentage of oranges in any lot which are smaller than 2$^{2}/_{16}$ inches in diameter, such percentage shall be based only on those oranges in such lot which are of a size 2$^{11}/_{16}$ inches in diameter or smaller.

(c) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; Florida No. 1 grade for murcotts shall have the same meaning as provided in sec. (1)(b) of Regulation 105–1.02, as amended, effective January 19, 1972, of the Regulations of the Florida Citrus Commission, and all other terms relating to grade and diameter, as used herein, shall have the same meaning as is given to the respective term in the revised United States Standards for Florida Oranges and Tangelos (7 CFR 51.1140–51.1180).

### § 905.551 Grapefruit Regulation 74.

*Order.*—(a) Grapefruit Regulation 73 (37 FR 21799, 24432, 27619; 38 FR 10151, 12201, 13547, 18026) is hereby terminated on September 17, 1973.

(b) During the period September 17, 1973, through October 14, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(1) Any seeded grapefruit, grown in the production area, which do not grade at least U.S. No. 1;

(2) Any seeded grapefruit, grown in the production area, which are of a size smaller than 3$^{11}/_{16}$ inches in diameter, except that a tolerance for undersize grapefruit shall be permitted as specified in § 51.761 of the United States Standards for Florida Grapefruit;

(3) Any seedless grapefruit, grown in the production area, which do not grade at least Improved No. 2; or

(4) Any seedless grapefruit, grown in the production area, which are of a size smaller than 3$^{9}/_{16}$ inches in diameter, except that a tolerance for undersize grapefruit shall be permitted as specified in § 51.761 of the United States Standards for Florida Grapefruit.

(c) Terms used in the amended marketing agreement and order, including Improved No. 2 grade, shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade, except Improved No. 2 grade, and diameter, as used herein, shall have the same meaning as is given to the respective term in the revised United States Standards for Florida Grapefruit (7 CFR 51.750–51.784), except that the minimum diameter requirement specified in paragraph (b)(2) of this regulation shall correspond to size standards provided in sec. (1)(b)(3) of Regulation 105–1.03, as amended, effective September 1, 1973, of the Regulations of the Florida Citrus Commission.

### § 905.552 Tangerine Regulation 45.

*Order.*—(a) Tangerine Regulation 44 (37 FR 21799, 24432, 24189, 25914, 27619; 38 FR 8170) is hereby terminated on September 17, 1973.

(b) During the period September 17, 1973, through October 14, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(1) Any tangerines, grown in the production area, which do not grade at least U.S. No. 1; or

(2) Any tangerines, grown in the production area, which are of a size smaller than 2$^{1}/_{16}$ inches in diameter, except that a tolerance for undersize tangerines shall be permitted as specified in § 51.1818 of the United States Standards for Florida Tangerines.

(c) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade and diameter, as used herein, shall have the same meaning as is given to the respective term in the revised United States Standards for Florida Oranges and Tangelos (7 CFR 51.1140–51.1180).

### § 905.553 Tangelo Regulation 45.

*Order.*—(a) Tangelo Regulation 44 (37 FR 21799, 24432, 27619; 38 FR 10152) is hereby terminated on September 17, 1973.

(b) During the period September 17, 1973, through October 14, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

(1) Any tangelos, grown in the production area, which do not grade at least U.S. No. 1; or

(2) Any tangelos, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize tangelos shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos.

(c) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order; and terms relating to grade and diameter, as used herein, shall have the same meaning as is given to the respective term in the revised United States Standards for Florida Oranges and Tangelos (7 CFR 51.1140–51.1180).

### § 905.554 Export Regulation 23.

*Order.*—(a) Export Regulation 22 (37 FR 20036; 38 FR 1354, 18360) is hereby terminated on September 17, 1973.

(b) During the period September 17, 1973, through October 14, 1973, no handler shall ship to any destination outside the continental United States other than to Canada or Mexico:

(1) Any oranges, except Navel oranges, Temple oranges, Murcott Honey oranges, and Valencia, Lue Gim Gong and similar late maturing oranges of the Valencia type, grown in the production area, which do not grade at least U.S. No. 1;

(2) Any oranges, except Navel oranges, Temple oranges, Murcott Honey oranges, and Valencia, Lue Gim Gong and similar late maturing oranges of the Valencia type, grown in the production area, which are of a size smaller than 2$^{1}/_{16}$ inches in diameter, except that a tolerance for undersize oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(3) Any Navel oranges, grown in the production area, which do not grade at least U.S. No. 1 Golden;

(4) Any Navel oranges, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize Navel oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(5) Any Temple oranges, grown in the production area, which do not grade at least U.S. No. 1;

(6) Any Temple oranges, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize Temple oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(7) Any Murcott Honey oranges, grown in the production area, which do not grade at least Florida No. 1 grade for murcotts;

(8) Any Murcott Honey oranges, grown in the production area, which are of a size smaller than 2$^{8}/_{16}$ inches in diameter, except that a tolerance for undersize Murcott Honey oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(9) Any Valencia, Lue Gim Gong, and similar late maturing oranges of the Valencia type, grown in the production area, which do not grade at least U.S. No. 2;

(10) Any Valencia, Lue Gim Gong, and similar late maturing oranges of the Valencia type, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize oranges shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos;

(11) Any seeded grapefruit, grown in the production area, which do not grade at least U.S. No. 1;

(12) Any seeded grapefruit, grown in the production area, which are of a size smaller than 3$^{9}/_{16}$ inches in diameter, except that a tolerance for undersize grapefruit shall be permitted as specified in § 51.761 of the United States Standards for Florida Grapefruit;

(13) Any seedless grapefruit, grown in the production area, which do not grade at least Improved No. 2;

(14) Any seedless grapefruit, grown in the production area, which are smaller than 3$^{5}/_{16}$ inches in diameter, except that a tolerance for undersize grapefruit shall be permitted as specified in § 51.761 of the United States Standards for Florida Grapefruit;

(15) Any tangerines, grown in the production area, which do not grade at least U.S. No. 1;

(16) Any tangerines, grown in the production area, which are of a size smaller than 2$^{2}/_{16}$ inches in diameter, except that a tolerance for undersize tangerines shall be permitted as specified in § 51.1818 of the United States Standards for Florida Tangerines;

(17) Any tangelos, grown in production area, which do not grade at least U.S. No. 1; or

(18) Any tangelos, grown in production area, which are of a size smaller than 2$^{4}/_{16}$ inches in diameter, except that a tolerance for undersize tangelos shall be permitted as specified in § 51.1152 of the United States Standards for Florida Oranges and Tangelos.

(c) Terms used in the amended marketing agreement and order, including Improved No. 2 grade, shall, when used herein, have the same meanings as are given to the respective terms in said amended marketing agreement and order; Florida No. 1 grade for murcotts shall have the same meaning as provided in sec. (1)(b) of Regulation 105–1.02, as amended, effective January 19, 1972, of the Regulations of the Florida Citrus Commission, and all other terms relating to grade, except Improved No. 2 grade, and diameter, as used herein shall have the same meanings as are given to the respective terms in the following United States Standards, as applicable: United States Standards for Florida Oranges and Tangelos (7 CFR 51.1140–51.1180), United States Standards for Florida Grapefruit (7 CFR 51.750–51.784), or the United States Standards for Florida Tangerines (7 CFR 51.1810–51.1835).

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated September 12, 1973.

[FR Doc.73-19716 Filed 9-13-73;8:45 am]

## PART 948—IRISH POTATOES GROWN IN COLORADO

### Handling Regulation—Area No. 2

This regulation, designed to promote orderly marketing of Colorado Area No. 2 potatoes, imposes minimum quality standards and requires inspection of fresh shipments to keep undesirable low quality potatoes from being shipped to consumers.

Notice of rule making with respect to a proposed handling regulation to be made effective under Marketing Agreement No. 97 and Order No. 948, both as amended (7 CFR, Part 948), regulating the handling of Irish potatoes grown in Colorado, Area No. 2, was published in the FEDERAL REGISTER August 28, 1973 (38 FR 22964). This program is issued under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et. seq.). Interested persons were afforded an opportunity to file written data, views, or arguments through September 4, 1973. None was filed. However, as a result of an early freeze the Colorado Area No. 2 Committee held a second public meeting September 6 and recommended that the size requirement for long varieties be relaxed to 1$^{7}/_{8}$ inches minimum diameter.

After consideration of all relevant matters presented, and other available information, it is hereby found that the following handling regulation will tend to effectuate the declared policy of the act.

The recommendations of the committee reflect its appraisal of the composition of the 1973 crop of Colorado potatoes and of the marketing prospects for this season. These grade, size, and maturity requirements are necessary to prevent potatoes of lesser maturities, low quality, or undesirable sizes from being distributed in fresh market channels. They will also provide consumers with good quality potatoes consistent with the overall quality of the crop.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

Shipments may be made to certain special purpose outlets without regard to the grade, size, maturity, and inspection requirements, provided that safeguards are met to prevent such potatoes from reaching unauthorized outlets. Certified seed is so exempted because requirements for this outlet differ greatly from those for fresh market. Shipments for use as livestock feed are likewise exempt. Since no purpose would be served by regulating potatoes used for relief or charity purposes, such shipments are exempt. Exemption of potatoes for most processing uses is mandatory under the legislative authority for this part and therefore shipments to processing outlets are unregulated.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after its publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of potatoes grown in the production area will begin on or about the effective date specified herein, (2) to maximize benefits to producers, this regulation should apply to as many shipments as possible during the marketing season, (3) information regarding the provisions of this regulation, which are similar to those which were in effect during the previous marketing season, has been made available to producers and handlers in the production area, and (4) compliance with this regulation will not require any special preparation on the part of persons subject thereto which cannot be completed by such effective date.

### § 948.370 Handling regulation.

During the period September 17, 1973, through June 30, 1974, no person shall handle any lot of potatoes grown in Area No. 2 unless such potatoes meet the requirements of paragraphs (a), (b), and (c) of this section, or unless such potatoes are handled in a accordance with paragraphs (d), (e), or (f) of this

V 38-178 SEP 14 73 XUM

section. The maturity requirements specified in paragraph (b) shall terminate October 31, 1973, at 11:59 p.m. m.s.t.

(a) *Minimum grade and size requirements*—(1) *Round varieties.*—U.S. No. 2, or better grade, 2 inches minimum diameter.

(2) *Long varieties.*—U.S. No. 2, or better grade, 1⅞ inches minimum diameter.

(3) *All varieties.*—Size B, if U.S. No. 1, or better, grade.

(b) *Maturity (skinning) requirements*—(1) *Russet Burbank and Red McClure varieties.*—For U.S. No. 2 grade not more than "moderately skinned" and for other grades not more than "slightly skinned."

(2) *All other varieties.*—Not more than "moderately skinned."

(c) *Inspection.*—(1) No handler shall handle any potatoes for which inspection is required unless an appropriate inspection certificate has been issued with respect thereto and the certificate is valid at the time of shipment. For purposes of operation under this part it is hereby determined pursuant to paragraph (d) of § 948.40, that each inspection certificate shall be valid for a period not to exceed 5 days following the date of inspection as shown on the inspection certificate.

(2) No handler may transport or cause the transportation by motor vehicle of any shipment of potatoes for which an inspection certificate is required unless each shipment is accompanied by a copy of the inspection certificate applicable thereto and the copy is made available for examination at any time upon request.

(d) *Special purpose shipments.*—(1) The grade, size, maturity, and inspection requirements of paragraphs (a), (b), and (c) of this section and the assessment requirements of this part shall not be applicable to shipments of potatoes for:

(i) Livestock feed;

(ii) Relief or charity; or

(iii) Canning, freezing, and "other processing" as hereinafter defined.

(2) The grade, size, maturity and inspection requirements of paragraphs (a), (b) and (c) of this section shall not be applicable to shipments of seed pursuant to § 948.6 but such shipments shall be subject to assessements.

(e) *Safeguards.*—Each handler of potatoes which do not meet the grade, size, and maturity requirements of paragraphs (a) and (b) of this section and which are handled pursuant to paragraph (d) for any of the special purposes set forth therein shall,

(1) Prior to handling, apply for and obtain a Certificate of Privilege from the committee.

(2) Furnish the committee such reports and documents as requested, including certification by the buyer or receiver as to the use of such potatoes, and

(3) Bill each shipment directly to the applicable processor or receiver.

(f) *Minimum quantity.*—For purposes of regulation under this part, each person may handle up to but not to exceed 1,000 pounds of potatoes without regard to the requirements of paragraphs (a), (b), and (c) of this section, but this exception shall not apply to any shipment which exceeds 1,000 pounds of potatoes.

(g) *Definitions.*—The terms "U.S. No. 1," "U.S. No. 2," "slightly skinned," and "moderately skinned" shall have the same meaning as when used in the U.S. Standards for Potatoes (§§ 51.1540–1566 of this title, effective September 1, 1971, as amended), including the tolerances set forth therein. The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, or dicing, or the application of material to prevent oxidation does not constitute "other processing." Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97, as amended, and this part.

(h) *Applicability to imports.*—Pursuant to section 8e of the act and § 980.1, *Import regulations* (7 CFR 980.1), Irish potatoes of the red skinned round type, except certified seed potatoes, imported into the United States during the period September 17, 1973, through June 30, 1974, shall meet the grade, size, and quality requirements specified in paragraph (a) of this section, and during the period September 17, 1973, through October 31, 1973, shall be not more than "moderately skinned."

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated September 12, 1973, to become effective September 17, 1973.

CHARLES R. BRADER,
*Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

## • PART 981—ALMONDS GROWN IN CALIFORNIA

### Expenses of Almond Control Board and Rate of Assessment for 1973–74 Crop Year

Notice of proposed expenses of the Almond Control Board, and rate of assessment, for the 1973–74 crop year was published in the August 28, 1973, issue of the FEDERAL REGISTER (38 FR 22965). This action is pursuant to §§ 981.80 and 981.81 of the marketing agreement, as amended, and Order No. 981, as amended (7 CFR Part 981), regulating the handling of almonds grown in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The notice afforded interested persons an opportunity to submit written data, views, or arguments with respect to the proposal. None were received.

The proposal was based on a unanimous recommendation of the Almond Control Board. Expenses of the Board for the 1973–74 crop year were proposed at $1,945,481. The assessment rate was proposed at 1.250 cent per pound of almonds (kernel weight basis).

After consideration of all relevant matter presented, including that in the notice, the information and recommendation submitted by the Control Board, and other available information, it is found that the expenses of the Control Board and rate of assessment for the crop year beginning July 1, 1973, shall be as follows:

### § 981.323 Expenses of the Control Board and rate of assessment for the 1973–74 crop year.

(a) *Expenses.*—Expenses in the amount of $1,945,481 are reasonable and likely to be incurred by the Control Board during the crop year beginning July 1, 1973, for its maintenance and functioning and for such purposes as the Secretary may, pursuant to the provisions of this part, determine to be appropriate.

(b) *Rate of assessment.*—The rate of assessment for said crop year, payable by each handler in accordance with § 981.81, less any amount credited pursuant to § 981.41 but not to exceed 1 cent per pound of almonds (kernel weight basis), is fixed at 1.250 cent per pound of almonds (kernel weight basis).

It is further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) The relevant provisions of said marketing agreement and this part require that the rate of assessment fixed for a particular crop year shall be applicable to all almonds received by handlers for their own accounts during such crop year; and (2) the current crop year began July 1, 1973, and the rate of assessment herein fixed will automatically apply to all such almonds beginning with that date.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated September 10, 1973.

CHARLES R. BRADER,
*Acting Deputy Director, Fruit and Vegetable Division.*

[FR Doc.73-19610 Filed 9-13-73;8:45 am]

## CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

### SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1973 Crop Rye Supplement, Amdt. 1]

## PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

### 1973 Crop Rye Loan and Purchase Program

The regulations issued by Commodity Credit Corporation published in the FEDERAL REGISTER at 38 FR 19669 containing provisions for loans and purchases applicable to the 1973 crop of rye are amended as follows.

In § 1421.354 which relates to county loan and purchase rates for rye the following changes are made: (1) The rate for Polk County, Minnesota, should be 88 cents per bushel instead of 95 cents per bushel; (2) The rates for twenty-five South Dakota counties were incorrectly listed with the North Dakota counties. The corrections should read as follows:

### § 1421.354 Loan and purchase rates.

(a) *Basic loan and purchase rates.*

Because these changes are merely corrections of previously approved loan rates, it is determined that compliance with the notice of proposed rulemaking procedure at this time is not necessary. Therefore, this amendment is being issued without following such proposed rulemaking procedure and shall be effective on September 14, 1973.

(Sec. 4, 62 Stat. 1070, as amended; (15 U.S.C. 714b). Interpret or apply sec. 5, 62 Stat. 1072, secs. 105, 401, 63 Stat. 1051, as amended; (15 U.S.C. 714c, 7 U.S.C. 1421, 1444l))

Effective date: September 14, 1973.

Signed at Washington, D.C., on September 6, 1973.

KENNETH E. FRICK,
*Executive Vice President, Commodity Credit Corporation.*

[FR Doc.73-19559 Filed 9-13-73;8:45 am]

## Title 9—Animals and Animal Products

## CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

### SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

## PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

### Prohibitions and Restrictions on Importation of Swine, Pork and Pork Products

*Statement of consideration.*—There was published in the FEDERAL REGISTER August 2, 1973 (38 FR 20610–20611) an amendment to the regulations in 9 CFR Part 94 which: (1) Designates countries of the world which are considered not to be infected with swine vesicular disease; (2) designates certain countries which are considered not to be infected with swine vesicular disease but which have a common land border with swine vesicular disease infected countries, or which carry out trade prices with swine vesicular disease infected countries which are less restrictive than are acceptable to the United States; (3) requires certification by officials of the country of origin of domestic swine that such country is free of swine vesicular disease, hog cholera and African swine fever; and (4) prohibits the importation of live domestic swine, and restricts the importation of fresh, chilled, frozen or processed pork and pork products and wild swine from countries not considered to be free of swine vesicular disease.

Among restrictions imposed on importation of pork or pork products from countries declared free of swine vesicular disease and specified in § 94.13 was an additional certificate relating to the origin, processing and handling of such products offered for importation into the United States from such countries.

Additional certifications required in § 94.13(b) should not be applicable to commercially canned sterile pork products or commercially canned perishable and cured and dried pork and pork products since the commercial processing of these types of products is adequate to prevent the introduction of animal diseases into the United States.

The additional certification required in § 94.13(b) for all pork and pork products is more restrictive than necessary for commercially canned sterile or commercially canned perishable and cured and dried pork and pork products when these products are in compliance with the provisions of § 94.12 of this part. Therefore, the regulation is hereby amended to delete the additional certification when these products are in compliance with the provisions of § 94.12 of this part.

Pursuant to the provisions of section 2 of the Act of February 2, 1903, as amended, and sections 2, 3, 4, and 11 of the Act of July 2, 1962 (21 U.S.C. 111, 134a, 134b, 134c, and 134f), Part 94, Title 9, Code of Federal Regulations, is hereby amended as follows:

In § 94.13(b), the first sentence is amended by adding the phrase ", unless they are in compliance with applicable provisions of § 94.12(b)," after the term "United States."

(Sec. 2, 32 Stat. 792, as amended; secs. 2, 3, 4, and 11, 76 Stat. 129, 130, 132 (21 U.S.C. 111, 134a, 134b, 134c, 134f); 37 FR 28464, 28477.)

*Effective date.*—The foregoing amendment shall become effective September 14, 1973.

The amendment relieves certain restrictions presently imposed but no longer deemed necessary to prevent the introduction of disease, and must be made effective immediately to be of benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 11th day of September 1973.

F. J. MULHERN,
*Administrator, Animal and Plant Health Inspection Service.*

[FR Doc.73-19561 Filed 9-13-73;8:45 am]

## Title 14—Aeronautics and Space

## CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airworthiness Docket No. 73-SW-60; Amdt. 39-1717]

## PART 39—AIRWORTHINESS DIRECTIVES

### Bell Model 47B, 47B–3, 47D, 47D–1, 47E, 47G, 47G–2 and 47H–1 Helicopters

There have been two reports of accidents in which fatigue failure of the Model 47G–2 tail rotor hub yoke, P/N 47–641–057–9, was noted. An inflight

V 38-178 SEP 14 73 XUM

failure of this yoke will result in loss of a tail rotor blade and could result in loss of directional control. This yoke is also eligible for installation on the Bell Models 47B, 47B-3, 47D, 47D-1, 47E, 47G and 47H-1 helicopters.

Since this condition is likely to occur on other helicopters of the Model 47 series type design equipped with certain serial numbered tail rotor hub yokes, an airworthiness directive is being issued to reduce the service life of certain serial numbered tail rotor yokes, P/N 47-641-057-9, from 2500 to 400 hours.

Since a situation exists that requires an immediate adoption of this regulation, it is found notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BELL. Applies to Bell Models 47B, 47B-3, 47D, 47D-1, 47E, 47G, 47G-2 and 47H-1 helicopters certificated in all categories.

Compliance required as indicated.

To prevent possible fatigue failure of the tail rotor yoke, P/N 47-641-057-9, remove and replace tail rotor yokes having S/N N29-1246 through N29-1266, N29-1298 through N29-1452, N29-10453 through N29-10488, and N29-10501 through N29-10525, as specified below.

(a) Replace those yokes with 390 or more hours total time in service on the effective date of this AD, within 10 hours time in service.

(b) Replace those yokes with less than 390 hours total time in service on the effective date of this AD, prior to accumulating 400 hours total time in service.

The requirements of this AD do not affect other Model 47 series helicopter tail rotor yokes.

(Bell Helicopter Co. Service Bulletin No. 47-05-73-1 dated August 22, 1973 pertains to this subject.)

This amendment becomes effective to owners and operators on receipt of the mailed amendment and becomes effective to all other persons on September 14, 1973.

This amendment is made under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Texas, on August 30, 1973.

HENRY L. NEWMAN,
*Director,*
*Southwest Region.*

---

[Airworthiness Docket No. 73-SW-61; Amdt. 39-1718]

## PART 39—AIRWORTHINESS DIRECTIVES

### Bell Model 206A, 206B, and 206A-1 and 206B-1 Helicopters

There have been several cases of corrosion or cracks occurring in the upper and lower ends of the main rotor pitch link tubes, P/N 206-010-330, adjacent to the locks or nut of the pitch link assembly that could result in possible failure of the tube and loss of control of one main rotor blade on the Bell Model 206A and 206B helicopters. Since this condition is likely to exist or develop in other helicopters of the same type design and in other Model 206A-1 and 206B-1 helicopters an airworthiness directive is being issued to require a repetitive inspection for corrosion and cracks in the main roto blade pitch link tube ends and application of corrosion preventative compound, as necessary, to the top surface of the nuts and exposed clevis threads on Bell Model 206A, 206B, 206A-1, and 206B-1 helicopters. Since a situation exists that requires an immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BELL. Applies to Model 206A, 206B, 206A-1 and 206B-1 helicopters equipped with main rotor blade pitch link assemblies, P/N 206-010-330 and 206-010-342, as applicable, certificated in all categories.

Compliance required within 25 hours time in service after the effective date of this A.D., unless previously accomplished and thereafter at intervals not to exceed 50 hours time in service from the last inspection.

To detect and prevent possible corrosion and cracks in the main rotor blade pitch link tubes, P/N 206-010-330, all dash numbers, accomplish the following:

(a) Inspect the ends and outside diameter surface of each tube for corrosion and cracking, using a 3 power or higher magnifying glass.

(b) Replace corroded or cracked tubes prior to next flight except a helicopter with corroded tubes may be flown in accordance with FAR 21.197 to a base where replacement may be accomplished.

(c) If tubes are replaced or adjusted, track the main rotor blades in accordance with the appropriate model maintenance and overhaul information manual.

(d) Apply corrosion preventive compound, MIL-C-16173, Grade 2, or equivalent, to the exposed threads of the upper and lower clevises, the ends of each tube, the mating faces of the locks and nuts and the top surfaces of the nuts after the nuts are properly torqued on each pitch link assembly.

(e) Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, Southwest Region, may adjust the repetitive inspection interval specified in this A.D. to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

(Bell Helicopter Company Service Bulletin No. 206-04-2-73-1 dated May 7, 1973 pertains to this subject.)

This amendment becomes effective September 17, 1973.

This amendment is made under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Texas, on September 4, 1973.

HENRY L. NEWMAN,
*Director,*
*Southwest Region.*

[FR Doc.73-19579 Filed 9-13-73;8:45 am]

---

[Docket No. 73-EA-74; Amdt. 39-1719]

## PART 39—AIRWORTHINESS DIRECTIVE

### Grumman Aircraft

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to issue an airworthiness directive applicable to Grumman G-164 type airplanes.

There have been reports of corroded and loose bolts which attach the elevator control horn to the elevators. This condition, if permitted to continue, could result in failure of the control system. Since this deficiency can exist or develop in other aircraft of similar type design, an airworthiness directive is being issued which will require a periodic inspection and replacement, where necessary, of the subject bolts.

As the foregoing deficiency affects air safety, expeditious adoption of this amendment is required. Thus, notice and public procedure hereon are impractical, and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new Airworthiness Directive:

GRUMMAN AIRCRAFT: Applies to all G-164 type aircraft in all certificated categories.

Compliance required as indicated.

1. Within the next 25 hours in service or two weeks, whichever occurs first, inspect the AN4-12A bolts attaching the Elevator Control Horn, P/N A1841-3, to the left and right side elevator, P/N A1201-5A and A1201-4A respectively, for a standard torque rating of 50-70 in.-lb. and for corrosion and thereafter at intervals not to exceed 100 hours in service or 60 days, whichever occurs first.

2. If any looseness is detected, the bolts must be removed and inspected for wear.

3. Replace any worn or corroded bolts with bolts of the same part number or an equivalent as approved by the Chief, Engineering and Manufacturing Branch, FAA Eastern Region, except that the aircraft may be flown in accordance with FAR 21.197.

4. The subject bolts AN4-12A (2), must be replaced at intervals not exceeding 1000 hours in service or one year, whichever ocurs first.

5. Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA Eastern Region, may adjust the inspection intervals specified in this AD. (Grumman American Aviation Corporation AgCat Service Bulletin No. 51 pertains to this subject.)

This amendment is effective September 21, 1973.

This amendment is made under the authority of sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 [49 U.S.C. 1354(a), 1421 and 1423], and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on September 7, 1973.

ROBERT H. STANTON,
*Director,*
*Eastern Region.*

## Title 21—Food and Drugs

## CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### SUBCHAPTER B—FOOD AND FOOD PRODUCTS

## PART 45—MARGARINE, OLEOMARGARINE

### Order Amending Margarine Standard and Revoking Standard for Liquid Margarine

In the FEDERAL REGISTER of May 3, 1973 (38 FR 10952) the Commissioner of Food and Drugs, in accordance with the procedure established in § 10.8 (FEDERAL REGISTER, May 11, 1973, 38 FR 12396), published a proposed revision of the margarine standard, taking into consideration the recommended international standard for margarine prepared by the Codex Alimentarius Commission. The proposed revision of the margarine standard included a proposal to revoke the existing standard for the liquid form of margarine § 45.2 (21 CFR 45.2), and to incorporate that portion of the standard into a broader definition and standard covering all margarine.

Eleven comments were received from trade associations, industry representatives, a consumer group, a Federal agency, and a State regulatory agency. Each of the suggested modifications and requests for clarification has been reviewed, and the Commissioner's conclusions concerning the proposal are as follows:

1. Two comments objected to the Commissioner's proposed exclusion of fats and oils of marine origin from margarine. However, no additional toxicological data have been submitted in support of the use of marine oils in the concentrated amounts which would be added to make margarine. Consequently, the Commissioner has determined that at this time the provisions for the optional fat ingredients in § 45.1(a)(1) (21 CFR 45.1) will remain as proposed, and, thus, marine oils will not be permitted. This determination will not prejudice the evaluation of subsequent data which may be submitted, as facts are compiled concerning the safety of marine oils. If at a later date, sufficient data are submitted, the Commissioner will reconsider this issue.

2. One comment thought the animal fats and oils permitted in § 45.1(a)(1) should be subject to appropriate tests for sanitation and safety before being allowed in margarine. The comment added that esters which could be used in the interesterification of the fat and oil ingredients should either be specified or be subject to toxicological evaluation. Because sections 402 and 409 of the Federal Food, Drug, and Cosmetic Act regulate the safety of ingredients used in standardized foods, no change is warranted.

3. One comment asked if the term "milk products" in § 45.1(a)(2)(i) included butter in unlimited amounts, as long as the 80 percent fat content minimum was observed. The Commissioner agrees that butter may be added without limit as a milk and/or milk product ingredient, providing that some other fat or oil ingredient under § 45.1(a)(1) is also used as part of the 80 percent fat minimum.

4. One comment requested clarification of the form of whey and whey-modified products permitted as optional aqueous phase ingredients. The Commissioner intended to provide for all forms of whey and/or whey-modified products in margarine and § 45.1(a)(2)(ii) has been revised to reflect this clarification.

5. One comment disagreed with the requirement in § 45.1(a)(2)(iv) for the mandatory pasteurization of the milk ingredients permitted. The respondent stated that unpasteurized ingredients should be permissible, providing they are of satisfactory bacteriological quality. The Commissioner is of the opinion that the pasteurization of milk ingredients is necessary as a public health measure and to insure bacteriological quality. These ingredients do not receive a heat treatment in the processing of margarine which is comparable to pasteurization times and temperatures. Therefore, no change is justified in this requirement.

6. One comment objected to the mandatory addition of vitamin A to margarine and suggested instead that it be provided as an optional ingredient. The comment stated that for years the industry has volunteered to add vitamin A to margarine, making the proposed mandatory use unnecessary. The comment further stated that in commercial use, the amount of margarine added to food products is not of sufficient significance to require mandatory vitamin A fortification. The Commissioner has concluded that since margarine is used as a substitute for butter in the home for table spread, cooking, and baking, and in commercial usage as a sauce and seasoning ingredient for processed foods, it should be substantially equivalent to butter in its nutrient value. The Commissioner therefore is making no change in the requirement for mandatory addition of vitamin A to margarine.

7. Two comments requested the addition of vitamin E as an optional ingredient. One comment urged its optional fortification at a level not to exceed the Recommended Daily Allowance (RDA) per quarter pound for those margarines which are made primarily with polyunsaturated oils. The other comment recommended the addition of 60 international units of the stable acetate form of vitamin E per pound of margarine. The Commissioner is of the opinion that the reasons presented in the respondents' requests are insufficient for him to conclude that vitamin E should be permitted as an optional ingredient in the margarine standard. No clear evidence exists that the proposed fortification will be of significant health benefit.

8. One comment opposed as unnecessary the addition of nutritive sweeteners to margarine. Some countries desire nutritive sweeteners in margarine, particularly where margarine is used as an ingredient in other foods. This fact was recognized in providing for nutritive sweeteners in the proposed Codex standard. In accordance with the desire to accept Codex standards as completely as possible, and in consideration of the requirement that all ingredients in margarine be listed on the label, the Commissioner is making no change.

9. One comment requested that § 45.1(b)(5) refer to BHT and BHA as the common or usual names for the optional antioxidant ingredients, butylated hydroxytoluene and butylated hydroxyanisole, with the chemical names placed in parentheses. The Food and Drug Administration agrees that after a number of years of using the chemical names butylated hydroxytoluene and butylated hydroxyanisole and placing their abbreviated forms in parentheses, the initials BHA and BHT may be considered the common or usual names. A review of the literature and chemical dictionaries indicates that BHA and BHT are now accepted as the common or usual names for these antioxidants. A similar situation exists for calcium disodium EDTA (ethylenediaminetetraacetate). The Commissioner has revised the proposed standard to reflect these changes.

10. One comment requested that the tolerance for the combination of the preservatives benzoic acid or its salts with sorbic acid or its salts be increased to a maximum of 0.2 percent in order to bring the proposed standard into conformity with the provision in the existing regulation. The Commissioner concurs with this request and has revised § 45.1(b)(5) accordingly.

11. One comment requested that the antioxidants permitted be limited to citric acid, that color be limited to beta-carotene, and that flavoring be limited to natural flavors, rather than permitting any such ingredients which are "safe and suitable" as was proposed.

In the FEDERAL REGISTER of April 26, 1973 (38 FR 10274), the Commissioner proposed to amend § 10.1 (21 CFR 10.1) to define "safe and suitable" as that phrase applies to ingredients of all standardized foods. The Commissioner concludes that there is no valid reason for not permitting the use of any preservative, color or flavor which has been shown to be safe and suitable as an ingredient of margarine.

12. One comment requested that the principal display panel of the label include a declaration of the nutritive sweeteners, salt, the percentage of polyunsaturated fats, and the milk source for milk other than cow's milk used. The

V 38-178 SEP 14 73 XUM

Commissioner has promulgated regulations for the optional declaration of the fat and cholesterol contents of foods in §§ 1.17 and 1.18 (21 CFR 1.17 and 1.18). Nutritive sweeteners, salt, and milk sources other than cow's milk are to be declared in the ingredient statement. The Commissioner does not believe that the declaration of these ingredients on the principal display panel is necessary, as long as they appear in the ingredient statement as provided in § 1.8d (21 CFR 1.8d).

13. One comment requested that every ingredient used be declared by its specific or common name on the label. The Commissioner is of the opinion that all optional ingredients used, except for spices, flavorings, and colorings, as provided by section 403(g) of the act, are to be declared by tehir specific or common name. Since there are no mandatory ingredients, all ingredients will be labeled.

14. One comment requested that the descriptive term "liquid" be omitted from the food name "liquid margarine" for the fluid form of margarine. The comment, in view of the Commissioner's proposed deletion of § 45.2 for liquid margarine, thought undue attention was given to the fluid form. The comment cited examples of other forms which do not include a descriptive prefix in the food name. The Commissioner is of the opinion that such a request is reasonable, and accordingly, has revised § 45.1(c).

15. Nonfat dry milk and skim milk are presently optional ingredients in the standard of identity and are widely used. The Commissioner has been advised that there is a significant shortage of nonfat dry milk and skim milk at this time and that the shortage and resulting high price have created problems in the domestic margarine industry. The Codex provision for suitable edible protein has been incorporated into the revised U.S. standard. This provision to permit use of additional ingredients similar in function (i.e., body) to nonfat dry milk and skim milk should reduce some of the problems resulting from the shortage. The Commissioner has been advised that the shortage may soon reach critical proportions and that any amendment of the United States food standard to provide for the use of these ingredients should go into effect as soon as practicable.

In consideration of the reports of a shortage and that it is reasonable to eliminate, to the extent practicable, factors that may contribute to inflation, the Commissioner has concluded that compliance with this order may begin on or before October 15, 1973, unless stayed by the filing of a proper objection and that the order will become fully effective regarding all labeling ordered after December 31, 1973 and all labeling used for products shipped in interstate commerce after December 31, 1974.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 401, 701(e), 52 Stat. 1046, 1055, as amended by 70 Stat. 919 (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner (21 CFR 2.120), Part 45 is amended by revising the part heading, by revising § 45.1, and by revoking § 45.2 as follows:

1. The heading of Part 45 is revised to read as set forth above.

2. Section 45.1 is revised to read as follows:

**§ 45.1 Margarine, oleomargarine; identity; label statement of optional ingredients.**

(a) Margarine (or oleomargarine) is the food in plastic form or liquid emulsion, containing not less than 80 percent fat determined by the method prescribed under section 16.163 of the "Indirect Method," in "Official Methods of Analysis of the Association of Official Analytical Chemists," 11th edition 1970.[1] Margarine contains only safe and suitable ingredients. It is produced from one or more of the optional ingredients in subpargraph (1) of this paragraph, and one or more of the optional ingredients in subparagraph (2) of this paragraph, to which may be added one or more of the optional ingredients in paragraph (b) of this section. Margarine contains vitamin A as provided for in subparagraph (3) of this paragraph.

(1) Edible fats and/or oils, or mixtures of these, whose origin is vegetable or rendered animal carcass fats, any or all of which may have been subjected to an accepted process of physico-chemical modification. They may contain small amounts of other lipids such as phosphatides, or unsaponifiable constituents and of free fatty acids naturally present in the fat or oil.

(2) One or more of the following aqueous phase ingredients:

(i) Water and/or milk and/or milk products.

(ii) Suitable edible protein including, but not limited to the liquid, condensed, or dry form of whey, whey modified by the reduction of lactose and/or minerals, nonlactose containing whey components, albumin, casein, caseinate, vegtable proteins, or soy protein isolate, in amounts not greater than reasonably required to accomplish the desired effect.

(iii) Any mixture of two or more of the articles named under subdivisions (i) and (ii) of this subparagraph.

(iv) The ingredients in subdivisions (i), (ii), (iii) of this subparagraph shall be pasteurized and then may be subjected to the action of harmless bacterial starters. One or more of the articles designated in subdivisions (i), (ii), (iii) of this subparagraph is intimately mixed with the edible fat and/or oil ingredients to form a solidified or liquid emulsion.

(3) Vitamin A in such quantity that the finished margarine contains not less than 15,000 international units per pound.

(b) Optional ingredients: (1) Vitamin D in such quantity that the finished oleomargarine contains not less than 1,500 international units of vitamin D per pound.

(2) Salt (sodium chloride); potassium chloride for dietary margarine or oleomargarine.

(3) Nutritive sweeteners.

(4) Any safe and suitable emulsifiers including but not limited to the following.

(b) Optional ingredients: (1) Vitamin D in such quantity that the finished oleomargarine contains not less than 1,500 international units of vitamin D per pound.

(2) Salt (sodium chloride); potassium chloride for dietary margarine or oleomargarine.

(3) Nutritive carbohydrate sweeteners.

(4) Emulsifiers including but not limited to the following within these maximum amounts in percent by weight of the finished food: Mono- and diglycerides of fatty acids esterified with the following acids; acetic, acetyltartaric, citric, lactic, tartaric, and their sodium and calcium salts, 0.5 percent; such mono- and diglycerides in combination with the sodium sulfo-acetate derivatives thereof, 0.5 percent; polyglycerol esters of fatty acids, 0.5 percent; 1,2-propylene glycol esters of fatty acids; 2 percent; lecithin. 0.5 percent.

(5) Preservatives including, but not limited to the following within these maximum amounts in percent by weight of the finished food: Sorbic acid, benzoic acid and their sodium, potassium, and calcium salts, individually, 0.1 percent, or in combination, 0.2 percent, expressed as the acids; calcium disodium EDTA, 0.0075 percent; propyl, acetyl, and dodecyl gallates, BHT, BHA, ascorbyl palmitate, ascorbyl stearate, all individually or in combination, 0.02 percent: stearyl citrate, 0.15 percent; isopropyl citrate mixture, 0.02 percent.

(6) Color additives. For the purpose of this subparagraph, provitamin A (beta-carotene) shall be deemed to be a color additive.

(7) Flavoring substances. If the flavoring ingredients impart to the food a flavor other than in semblance of butter, the characterizing flavor shall be declared as part of the name of the food in accordance with § 1.12 of this chapter.

(8) Acidulants.

(9) Alkalizers.

(c) The name of the food for which a definition and standard of identity are prescribed in this section is "margarine" or "oleomargarine".

(d) Each of the optional ingredients used shall be declared on the label as required by the applicable sections of Part 1 of this chapter.

For the purposes of this section the use of the term milk unqualified means milk from cows. If any milk other than cow's milk is used in whole or in part, the animal source shall be identified in conjunction with the word milk in the ingredient statement. Colored margarine shall be subject to the provisions of section 407 of the Federal Food, Drug and Cosmetic Act as amended.

[1] Copies may be obtained from: Association of Official Analytical Chemists, P.O. Box 540, Benajamin Franklin Station, Washington, D.C. 20044.

**§ 45.2 [Revoked]**

3. In Part 45, existing § 45.2 is hereby revoked.

Any person who will be adversely affected by the foregoing order may at any time on or before October 15, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6-86, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

*Effective date.*—Unless stayed by the filing of proper objections, compliance with this order, which shall include any labeling changes required, may begin on or before October 15, 1973, and all labeling ordered after December 31, 1973, and all labeling used for products shipped in interstate commerce after December 31, 1974, shall comply with these regulations.

(Secs. 401, 701, 52 Stat. 1046, 1055, as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 341, 371).)

Dated September 7, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

SUBCHAPTER C—DRUGS

## PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

### Sulfadimethoxine

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (41-245V) filed by Hoffmann-La Roche, Inc., Nutley, NJ 07110, proposing safe and effective use of sulfadimethoxine injection for the treatment of cattle. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), § 135b.15 is amended by adding new paragraphs (a)(3)(iii) and (d) to read as follows:

**§ 135b.15 Sulfadimethoxine injection.**

(a) • • •

(3) • • •

(iii) It is used or intended for use in cattle as follows:

(*a*) For the treatment of shipping fever complex, bacterial pneumonia, calf diphtheria, and foot rot.

(*b*) It is administered by intravenous injection at an initial dose of 25 milligrams per pound of body weight followed by 12.5 milligrams per pound of body weight every 24 hours until the animal is asymptomatic for 48 hours.

(*c*) Milk taken from animals during treatment and for 60 hours (5 milkings) after the latest treatment must not be used for food. Do not administer within 5 days of slaughter.

(*d*) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

• • • • •

(d) *Related tolerances.*—See § 135g.57 of this chapter.

*Effective date.*—This order shall become effective September 14, 1973.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i).))

Dated September 7, 1973.

C. D. VAN HOUWELING,
*Director, Bureau of Veterinary Medicine.*

[FR Doc.73-19569 Filed 9-13-73;8:45 am]

## PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

### Pyrantel Tartrate

The Commissioner of Food and Drugs has evaluated a new animal drug application (92-150V) filed by Ralston-Purina Co., Checkerboard Square, St. Louis, MO 63199, proposing the safe and effective use of pyrantel tartrate pellets for oral dosage administration to colts and horses. The application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), § 135c.59 is amended by revising the section heading and paragraphs (a) and (b) and adding a new paragraph (d)(3) to read as follows:

**§ 135c.59 Pyrantel tartrate powder; pyrantel tartrate pellets.**

(a) *Specifications.*—(1) Pyrantel tartrate powder horse wormer contains 11.3 percent and swine wormer 10.6 percent pyrantel tartrate.

(2) Pyrantel tartrate pellets colt and horse wormer contains 1.25 percent pyrantel tartrate.

(b) *Sponsor.*—(1) See code No. 030 in § 135.501(c) of this chapter, for conditions of use provided for in paragraph (d)(1) and (2) of this section.

(2) See code No. 047 in § 135.501(c) of this chapter, for conditions of use provided for in paragraph (d)(3) of this section.

• • • • • •

(d) • • •

(3) Horses and colts:

(i) For the removal and control of infections from the following mature parasites: Large strongyles (*Strongylus vulgaris, Strongylus edentatus, Strongylus equinus*), small strongyles (*Trichonema spp., Triodontophorus*), pinworms (*Oxyuris*), and large roundworms (*Parascaris*).

(ii) It is administered as a single dose at 12.5 milligrams of pyrantel tartrate per 2.2 pounds of body weight mixed with the usual grain ration.

(iii) It is recommended that severely debilitated animals not be treated with this drug.

(iv) Warning: Do not use in horses or colts intended for food.

*Effective date.*—This order shall become effective September 14, 1973.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i).))

Dated September 7, 1973.

C. D. VAN HOUWELING,
*Director, Bureau of Veterinary Medicine.*

[FR Doc.73-19570 Filed 9-13-73;8:45 am]

## PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

### Diethylcarbamazine Citrate Syrup

A new animal drug regulation (21 CFR 135c.52) providing for use of diethylcarbamazine citrate syrup for treatment of dogs was published in the FEDERAL REGISTER of October 7, 1971 (36 FR 19497). Following publication of this regulation a supplemental new animal drug application (46-147V) was filed by Babineaux Veterinary Products, Inc., and a new animal drug application (91-628V) was filed by American Cyanamid Co. Amendments to the regulation were published in the FEDERAL REGISTER of April 24, 1973 (38 FR 10079), and June 27, 1973 (38 FR 16859). Because these two amendments were published out of sequence, paragraph redesignations and amendments to the original regulation were incorrectly reflected.

Accordingly, to reflect the changes in the original regulation intended by the above-cited amendments, 21 CFR 135c.52 is published in its entirety as set forth below.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), § 135c.52 is revised to read as follows:

**§ 135c.52 Diethylcarbamazine citrate syrup.**

(a)(1) *Specifications.*—Each milliliter of syrup contains 60 milligrams of diethylcarbamazine citrate.

(2) *Sponsor.*—See code No. 061 in § 135.501(c) of this chapter.

(3) *Conditions of use.*—(i) The drug is indicated for use in dogs for the prevention of infection with *Dirofilaria immitis* and *T. canis* and *T. leonina*. It is also indicated for treatment of ascarid infections of *T. canis* and *T. leonina* in dogs and *T. cati* in cats.

(ii) For prevention of heartworm and ascarid infections in dogs, the drug may be added to the daily diet at a dosage rate of 3.0 milligrams per pound of body weight per day or given directly by mouth at the same dosage rate. For

V 38-178 SEP 14 73 XUM

treatment of ascarid infections in dogs and cats, the drug is administered at a dosage level of 25 to 50 milligrams per pound of body weight preferably administered immediately after feeding.

(iii) Older dogs should be proven negative for the presence of *Dirofilaria immitis* infection before administration of the drug. Those with proven infection of *Dirofilaria immitis* should be rendered negative using adulticidal and microfilaricidal durgs before administration of this drug.

(iv) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(b) (1) *Specifications.*—Each milliliter of syrup contains 60 milligrams of diethylcarbamazine citrate.

(2) *Sponsor.*—See code No. 004 in § 135.501(c) of this chapter.

(3) *Conditions of use.*—(i) It is used for the prevention of infection with *Dirofilaria immitis* in dogs.

(ii) The drug may be added to the daily ration at a dosage rate of 3.0 milligrams per pound of body weight or given directly by mouth at the same dosage rate.

(iii) Older dogs should be proven negative for the presence of *Dirofilaria immitis* infection before administration of the drug. Those with proven infection of *Dirofilaria immitis* should be rendered negative using adulticidal and microfilaricidal drugs before administering this drug.

(iv) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

*Effective date.*—This order shall be effective September 14, 1973.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated September 7, 1973.

C. D. VAN HOUWELING,
*Director, Bureau of Veterinary Medicine.*

[FR Doc.73-19585 Filed 9-13-73;8:45 am]

## PART 135e—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

### Clopidol and Roxarsone

New animal drug application No. 91-815V filed by Central Soya Co., McMillan Feed Division, Fort Wayne, IN 46805, was approved and, subsequently, an order published in the FEDERAL REGISTER of April 4, 1973 (38 FR 8597), for a premix containing 0.0345 percent clopidol for use in formulating complete feed for chickens. Approval of new animal drug application No. 43-430V filed by Central Soya Co. was given, and an order published in the FEDERAL REGISTER of April 5, 1973 (38 FR 8653), provided for use of a premix containing 0.0345 percent clopidol and 0.0138 percent roxarsone in formulating complete feed for broiler chickens. These orders amending 21 CFR 135e.46 (b) were published out of sequence, and the Commissioner of Food and Drugs has concluded that paragraph (b) should be published in its entirety to reflect the intent of both orders.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360(i))) and under authority delegated to the Commissioner (21 CFR 2.120), § 135e.46(b), is revised to read as follows:

§ 135e.46 Clopidol.

* * * * *

(b) *Approvals.*—(1) Premix level 25 percent granted to firm No. 012 as identified in § 135.501(c) of this chapter.

(2) Premix level 0.0345 percent clopidol with or without 0.0138 percent roxarsone granted to firm No. 006 as identified in § 135.501(c) of this chapter.

* * * * *

*Effective date.*—This order shall be effective September 14, 1973.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360(i)).)

Dated September 7, 1973.

C. D. VAN HOUWELING,
*Director, Bureau of Veterinary Medicine.*

[FR Doc.73-19586 Filed 9-13-73;8:45 am]

## PART 141—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

### Subpart C—Microbiological Assay Methods

CARBENICILLIN; UPDATING THE TEST ORGANISM USED IN POTENCY ASSAY METHOD

The Commissioner of Food and Drugs concludes that the antibiotic drug regulations (21 CFR Part 141) should be amended as set forth below to update the test organism used in the potency assay of carbenicillin.

The organism listed in § 141.104 as "Test organism W—*Pseudomonas pyocyanea* (ATCC 23389)" is no longer available from the American Type Culture Collection. It was replaced by a different strain of the same organism, *Pseudomonas aeruginosa* (ATCC 25619),[1] which gives satisfactory results in the assay of carbenicillin.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 2.120), § 141.104 *Test organisms* is amended in the table in paragraph (a) by changing the item "Test organism W—*Pseudomonas pyocyanea* (ATCC 23389)" to read "Test organism W—*Pseudomonas acruginosa* (ATCC 25619)."

Since this order merely updates the regulations to reflect a change of test organism used in the potency assay of carbenicillin, I find that notice and public procedure and delayed effective date are not necessary prerequisites to its promulgation.

*Effective date.*—This order shall become effective September 24, 1973.

[1] Test organism available from: American Type Culture Collection, 12301 Parklawn Drive, Rockville, MD 20852.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated September 7, 1973.

MARY A. MCENIRY,
*Assistant to the Director for Regulatory Affairs, Bureau of Drugs.*

[FR Doc.73-19588 Filed 9-13-73;8:45 am]

## PART 146—ANTIBIOTIC DRUGS; PROCEDURAL AND INTERPRETATIVE REGULATIONS

## PART 149b—AMPICILLIN

### Ampicillin Trihydrate-Probenecid for Oral Suspension

The Commissioner of Food and Drugs has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act, with respect to approval of the antibiotic drug ampicillin trihydrate-probenecid for oral suspension.

The Commissioner has concluded that data supplied by the manufacturer concerning the subject antibiotic drug is adequate to establish its safety and efficacy when used as directed in the labeling and that the regulations should be amended to provide for the certification of this drug.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 146 and 149b (21 CFR Parts 146 and 149b) are amended as follows:

1. Part 146 is amended in § 146.8(b)(1) by alphabetically inserting a new item in the fee schedule, as follows:

§ 146.8 Fees.

* * * * *

(b) * * *

(1) * * *

| | Chargeable fee per test |
|---|---|
| * * * * * | |
| Probenecid content | 34 |
| * * * * * | |

2. Part 149b is amended by adding the following new section:

§ 149b.25 Ampicillin trihydrate-probenecid for oral suspension.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.*—Ampicillin trihydrate and probenecid for oral suspension is a dry mixture of ampicillin trihydrate and probenecid with suitable flavorings, lubricants, colorings, and suspending agents packaged in a single dose container. When reconstituted as directed in the labeling, each single dose will contain ampicillin trihydrate equivalent to 3.5 grams of ampicillin and 1.0 gram of probenecid. Its ampicillin content is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of grams of ampicillin that it is represented to contain. Its probenecid content is satisfactory if it is not less than 90 percent and not more than 110 percent of the number of grams of probenecid that it is represented to contain. Its moisture content is not more than 5.0 percent. When reconstituted as directed in the labeling, its pH is not less than 5.0 and not more than 7.5. The ampicillin trihydrate used conforms to the standards prescribed by § 146a.6(a) of this chapter. The probenecid used conforms to the standards prescribed by the USP XVIII.

(2) *Labeling.*—In addition to the labeling requirements prescribed by § 148.3 of this chapter, this drug shall be labeled "ampicillin-probenecid for oral suspension".

(3) *Requests for certification; samples.*—In addition to complying with the requirements for § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The ampicillin trihydrate used in making the batch for potency, safety, loss on drying, pH, ampicillin content, and identity.

(*b*) The probenecid used in making the batch for all USP XVIII specifications.

(*c*) The batch for ampicillin content, probenecid content, moisture, and pH.

(ii) Samples required:

(*a*) The ampicillin trihydrate used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of 10 immediate containers.

(b) *Tests and methods of assay—*(1) *Ampicillin content—*(i) *Sample preparation.*—Reconstitute as directed in the labeling and mix well. Drain the suspension from the bottle for 30 seconds into a high-speed glass blender jar containing sufficient sterile distilled water to obtain a total volume of 500 milliliters. Blend for 10 minutes.

(ii) *Assay procedures.*—Use any of the following methods; however, the results obtained from the microbiological agar diffusion assay shall be conclusive.

(*a*) *Microbiological agar diffusion assay.*—Proceed as directed in § 141.110 of this chapter, diluting an aliquot of the aqueous solution with 0.1*M* potassium phosphate buffer, pH 8.0 (solution 3), to the reference concentration of 0.1 microgram of ampicillin per milliliter (estimated).

(*b*) *Iodometric assay.*—Proceed as directed in § 141.506 of this chapter, diluting an aliquot of the aqueous solution to the prescribed concentration.

(2) *Probenecid content—*(i) *Preparation of standard solution.*—Transfer approximately 25 milligrams of U.S.P. probenecid reference standard, accurately weighed, to a 25-milliliter volumetric flask. Disolve and dilute to volume with 1 percent aqueous sodium carbonate solution.

(ii) *Preparation of sample solution.*—Reconstitute the sample as directed in the labeling and mix well. Drain the suspension from the bottle for 30 seconds into a 1,000-milliliter volumetric flask. Dilute to volume with 1 percent aqueous sodium carbonate solution, shake well, and filter through Whatman No. 6 filter paper. Discard the first 10-milliliter portion.

(iii) *Procedure.*—Transfer 2.0 milliliters of the clear filtrate to a 125-milliliter separatory funnel and add 8.0 milliliters of 1.0*N* hydrochloric acid. Extract the solution with four 20-milliliter portions of chloroform, filtering each extract through a glass wool pledget into a 100-milliliter volumetric flask. Wash the pledget with chloroform, dilute to volume with chloroform and mix. Treat 2.0 milliliters of the standard solution in the same manner. Using a suitable spectrophotometer equipped with a 1-centimeter cell and chloroform washed with 1 percent aqueous sodium carbonate solution as a blank, determine the absorbance of the sample and standard solutions at the peak near 257 nanometers.

(iv) *Calculations.*—Calculate the probenecid content as follows:

$$\text{Grams probenecid per container} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{percent purity of standard}}{\text{Absorbance of standard} \times 2.5 \times 100}$$

(3) *Moisture.*—Proceed as directed in § 141.502 of this chapter.

(4) *pH.*—Proceed as directed in § 141.503 of this chapter, using the drug reconstituted as directed in the labeling.

As the conditions prerequisite to providing for certification of subject antibiotic have been complied with, and as the matter is noncontroversial, notice and public procedure and delayed effective date are not prerequisites to this promulgation.

*Effective date.*—This order shall become effective September 14, 1973.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: September 7, 1973.

MARY A. MCENIRY,
*Assistant to the Director for Regulatory Affairs, Bureau of Drugs.*

[FR Doc.73-19587 Filed 9-13-73;8:45 am]

## PART 149d—NAFCILLIN

### Nafcillin Sodium Monohydrate Tablets

The Commissioner of Food and Drugs has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act, as amended, with respect to approval of the antibiotic drug nafcillin sodium monohydrate tablets.

The Commissioner concludes that data supplied by the manufacturer concerning the subject antibiotic drug is adequate to establish its safety and efficacy when used as directed in the labeling and that the regulations should be amended to provide for the certification of this drug.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 149d is amended to provide for the certification of the antibiotic nafcillin sodium monohydrate tablets by adding the following new section:

§ 149d.11 Nafcillin sodium monohydrate tablets.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.*—Nafcillin sodium monohydrate tablets are composed of nafcillin sodium monohydrate with one or more suitable buffers, binders, disintegrants, diluents, and lubricants. Each tablet contains nafcillin sodium monohydrate equivalent to 500 milligrams of nafcillin. Its potency is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of nafcillin that it is represented to contain. Its moisture content is not more than 5 percent. It shall disintegrate within 20 minutes. The nafcillin sodium monohydrate used conforms to the standards prescribed by § 149d.1(a)(1).

(2) *Labeling.*—In addition to the labeling requirements prescribed by § 148.3 of this chapter, this drug shall be labeled "nafcillin sodium tablets".

(3) *Requests for certification; samples.*—In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The nafcillin sodium monohydrate used in making the batch for potency, safety, moisture, pH, crystallinity, nafcillin sodium monohydrate content, and identity.

(*b*) The batch for potency, moisture, and disintegration time.

(ii) Samples required:

(*a*) The nafcillin sodium monohydrate used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of 36 tablets.

(b) *Tests and methods of assay—*(1) *Potency—*(i) *Sample preparation.*—Place a representative number of tablets into a high-speed glass blender jar containing sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a stock solution of convenient concentration. Blend for 3 to 5 minutes.

(ii) *Assay procedures.*—Assay for potency by any of the following methods; however, the results obtained from the microbiological agar diffusion assay shall be conclusive.

(*a*) *Microbiological agar diffusion assay.*—Proceed as directed in § 141.110 of this chapter, diluting an aliquot of the stock solution with solution 1 to the reference concentration of 2.0 micrograms of nafcillin per milliliter (estimated).

(*b*) *Iodometric assay.*—Proceed as directed in § 141.506 of this chapter, diluting an aliquot of the stock solution with solution 1 to the prescribed concentration.

V 38-178 SEP 14 73 XUM

(c) *Hydroxylamine colorimetric assay.*—Proceed as directed in § 141.507 of this chapter.

(2) *Moisture.*—Proceed as directed in § 141.502 of this chapter.

(3) *Disintegration time.*—Proceed as directed in § 141.540 of this chapter, using the method described in paragraph (e)(1) of that section, except use distilled water in lieu of simulated gastric fluid as the immersion fluid.

As the conditions prerequisite to providing for certification of subject antibiotic have been complied with and since the matter is noncontroversial in nature, notice and public procedure and delayed effective date are not prerequisites to this promulgation.

*Effective date.*—This order shall be effective September 14, 1973.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: September 7, 1973.

MARY A. MCENIRY,
*Assistant to the Director for Regulatory Affairs, Bureau of Drugs.*

**Title 24—Housing and Urban Development**

**CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT—FEDERAL HOUSING COMMISSIONER [FEDERAL HOUSING ADMINISTRATION], DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**

**SUBCHAPTER B—MORTGAGE AND LOAN INSURANCE PROGRAMS UNDER NATIONAL HOUSING ACT**

[Docket No. R-73-195]

## PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

### Manufacturer's Warranty

On October 31, 1972, a notice of proposed rulemaking was published in the FEDERAL REGISTER (37 FR 23190) proposing amendment of the property improvement and mobile home loan regulations to require that a manufacturer's warranty be furnished to a buyer of a mobile home that is purchased with a loan made under this part.

One comment questioned the provision requiring that a copy of the warranty instrument be retained in the loan file by the insured lending institution. The warranty form is proposed to be in a carbon snap-out form and a carbon can easily be placed in the loan file without significant expense to insured lenders.

Other comments suggested that the warranty cover only substantial defects in given instances of nonconformity to construction standards. The addition of the words "substantial" and "proven" to the warranty would not make the warranty any clearer and could needlessly complicate resolution of legitimate complaints by consumers.

It was also suggested that the warranty should commence to run from the date of delivery of the mobile home to the purchaser rather than the date of purchase. This change has been made.

Objection was made to the requirement that notification to the manufacturer of a defect be in writing. While this requirement could cause difficulty for some unwary consumers, that disadvantage is outweighed by the evidentiary problems it will create by permitting oral notice.

It was also suggested that the warranty provide that the notice could be given to either the manufacturer or the dealer. Since it is the manufacturer's warranty the manufacturer should not be required to rely upon dealers to relay complaints to the manufacturer since in some instances this might not occur, and the manufacturer would not receive notice that a complaint has been registered but would be charged with that notice.

Suggestion was also made with regard to a provision requiring corrective action within a certain period of time. The difficulty in establishing required time periods is that in some instances the period would be too short, in others it might be too long. Therefore, no time period has been provided, but the warranty has been amended to require corrective action within a reasonable period of time.

Suggestion was also made that the warranty extend to furnishings included in the mobile home. There are no HUD standards for construction of furniture, and furniture was therefore not included in the scope of the express warranty covered in this regulation. Furniture sold would, of course, be covered under the implied warranties of the Uniform Commercial Code.

It was also suggested that the warranty provide for repairs to be made at the site of the mobile home or in the event the mobile home was required to be returned to the factory that the manufacturer would assume the financial cost of the transportation. Provision under the warranty requires the manufacturer to take appropriate corrective action. The warranty provides no authority for the manufacturer to assess charges against the mobile home purchaser for warranty repairs or transportation.

It was also suggested that incidental and consequential damages be paid by the manufacturer. Coverage for such damages would depend upon state law.

It was also suggested that the requirement that the warranty be delivered to the purchaser be amended to specify that the warranty be mailed to the purchaser. Delivery, of course, implies receipt and we see no useful purpose to be served in restricting the mode of delivery of the warranty to the purchaser to mailing which might give rise to a presumption of delivery which did not actually occur. We anticipate that in many instances the warranty would be delivered by the seller acting as the manufacturer's agent for this purpose to the consumer. Physical delivery would be the most effective method of insuring that the consumer actually receives the document, although of course the warranty could also be mailed. It should be noted, however, that the warranty form calls for the signature of the purchaser.

It was also suggested that some form of arbitration be provided for in the warranty in the event of a dispute between the manufacturer and the purchaser. Such a proposal is now under consideration. However, an initial difficulty in requiring compulsory arbitration would be the possible necessity for payment of the arbitrator's fee. See comments in this regard on a similar proposal made by the Federal Trade Commission in connection with door-to-door sales (37 FR 22956). If it is decided that an arbitration clause is appropriate, the regulation will be subsequently amended.

Objection was made to the statement that the warranty is offered as an inducement to the buyer or to the purchaser of a home. Deletion of this provision might remove the element of consideration necessary to make the warranty a binding legal contract. We believe it self-evident that such a warranty would be an inducement to a consumer who purchases a home covered by its provisions.

A professional testing organization recommended that the warranty indicate that a statement in the warranty by the manufacturer that construction of the mobile home conforms with the standards prescribed by the Secretary include a provision that the mobile home has been inspected by an independent third party testing organization. Such a requirement is being considered by the Department, but there would be no need to refer in the warranty to the mechanism utilized to determine whether the home had been constructed in accordance with HUD standards.

A trade organization suggested that the warranty should be executed jointly by the manufacturer and the selling dealer, pointing out that it is possible that some defects could arise by reason of default and negligence on the part of the dealer. This, of course, is a possibility but the determination of who is at fault as between the dealer and the manufacturer can best be resolved by agreement between the manufacturer and the dealer.

Accordingly, § 201.520(c) is redesignated as paragraph (d) and a new paragraph (c) is added to read:

§ 201.520 **Structural design and standards.**

* * * * *

(c) *Manufacturer's warranty.*—When a new mobile home purchased with financing insured under 12 U.S.C. 1703 is delivered to the purchaser, the manufacturer shall deliver to the purchaser a written warranty on a form prescribed by the Commissioner. Such warranty shall be in addition to, and not in derogation of, all other rights and privileges which the purchaser may have under any law or instrument and the warranty instrument shall so provide. A copy of the warranty instrument shall be retained in the loan file.

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

FEDERAL HOUSING ADMINISTRATION

MOBILE HOME WARRANTY

Mobile home description

---

Model

---

Number

---

Date of delivery to purchaser(s)

---

Name and address of dealer/seller

---

Purchaser(s)

For good and valuable consideration, and to induce purchase of the above identified mobile home by the above named Purchaser(s) and to further induce the Secretary of Housing and Urban Development to insure a loan to such Purchaser(s) under The National Housing Act, the undersigned manufacturer of the aforesaid mobile home does hereby warrant to the Purchaser(s) and to his (their) transferee(s), that:

The mobile home identified above complies with the mobile home standards prescribed by the Secretary of Housing and Urban Development that were in effect at the time the mobile home was manufactured and the mobile home is free from defects in material or workmanship. This warranty shall obligate the manufacturer to take appropriate corrective action within a reasonable period of time in instances of nonconformity to such standards and/or instances of defects in materials or workmanship which become evident within 1 year from the date of delivery of the mobile home and as to which the Purchaser(s) or his (their transferee(s)), give written notice to the manufacturer not later than 1 year and 10 days after the date of delivery set forth above. Such written notice shall be delivered to the manufacturer-warrantor at the address set forth herein. This warranty shall not obligate the manufacturer to correct defects or conditions in the mobile home that may occur as a result of abnormal usage or a lack of proper maintenance.

The term "mobile home" as used herein shall be deemed to include the mobile home structure including the plumbing, heating and electrical systems and all appliances and equipment installed or built-in by the manufacturer.

This warranty shall be in addition to, and not in derogation of, all other rights and privileges which such Purchaser(s) may have under any other law or instrument and the manufacturer agrees that the Purchaser(s) will not be required to execute a waiver of any warranty rights under the laws of the state of the purchaser's residence.

IN TESTIMONY WHEREOF, the manufacturer has signed and sealed this warranty this _____ day of _____, 19____.

## Title 38—Pensions, Bonuses, and Veterans' Relief

### CHAPTER I—VETERANS ADMINISTRATION

#### PART 36—LOAN GUARANTY

#### Prepayment of Mortgage Loans Interest Charges

The Veterans Administration is amending § 36.4310, Title 38, Code of Federal Regulations to make clear that on full prepayment of guaranteed mortgage loans interest may be charged only to date of such payment. This amendment is issued pursuant to the authority of section 210, Title 38, United States Code.

Prepayment in full of mortgage loans must be accepted and credited to the loan account on the date received and no interest may be charged thereafter. This has been the policy and interpretation of this regulation for many years. This amendment is intended to clearly set forth this policy and regulation interpretation.

The last sentence of § 36.4310 is to be deleted as obsolete. The Administrator no longer has authority to make an initial 4 percent payment, and has not had such authority for many years.

Compliance with the provisions of § 1.12, Title 38, Code of Federal Regulations, as to notice of the proposed regulatory development, is not recommended. There is no change in the policy of this Administration nor in the interpretation of this regulation. The change in wording is merely to make clear this long established practice.

**§ 36.4310 Prepayment.**

The debtor shall have the right to prepay at any time, without premium or fee, the entire indebtedness or any part thereof not less than the amount of one installment, or $100, whichever is less. Any prepayment in full of the indebtedness shall be credited on the date received, and no interest may be charged thereafter. Any partial prepayment made on other than an installment due date need not be credited until the next following installment due date or 30 days after such prepayment, whichever is earlier. The holder and the debtor may agree at any time that any prepayment not previously applied in satisfaction of matured installments shall be reapplied for the purpose of curing or preventing any subsequent default.

*Effective date.*—This VA Regulation is effective September 10, 1973.

Approved September 10, 1973.

By direction of the Administrator.

[SEAL] RUFUS H. WILSON,
*Associate Deputy Administrator.*

[FR Doc.73-19571 Filed 9-13-73;8:45 am]

## Title 40—Protection of Environment

### CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

#### SUBCHAPTER C—AIR PROGRAMS

#### PART 50—NATIONAL PRIMARY AND SECONDARY AMBIENT AIR QUALITY STANDARDS

#### Sulfur Oxides

On April 30, 1971 (36 FR 8186), the Administrator of the Environmental Protection Agency promulgated as 40 CFR Part 410, national primary and secondary ambient air quality standards under section 109 of the Clean Air Act, as amended. These regulations were republished November 25, 1971, as 40 CFR Part 50. This notice revokes the annual secondary sulfur dioxide standard, announces a revision to *Air Quality Criteria for Sulfur Oxides*, and announces the conclusions from a reevaluation of the basis for the secondary three-hour average sulfur dioxide standard.

REVOCATION OF THE ANNUAL SECONDARY $SO_2$ STANDARD

On May 7, 1973 (38 FR 11355), a notice of proposed rulemaking to revoke the annual secondary standard was published. Public comments were invited. Comments have been received from 23 organizations or individuals, and have been reviewed and considered prior to this rulemaking. EPA's reasons for revoking the annual secondary standard were set forth in the notice of proposed rulemaking and are further discussed herein.

The amendments set forth herein will revise 40 CFR Part 50.5 by revoking the annual National Secondary Ambient Air Quality Standard for Sulfur Dioxide which is 60 microwaves per cubic meter (0.02 p.p.m.). In addition, the amendments will delete from § 50.5 the maximum 24-hour concentrations of 260 micrograms per cubic meter (0.1 p.p.m.) published as a guide to be used in assessing implementation plans to achieve the annual standard. The secondary 3-hour standard, a maximum concentration of 1,300 micrograms per cubic meter (0.5 p.p.m.) not to be exceeded more than once per year, remains in effect.

Section 109 of the Clean Air Act requires the Administrator to establish national primary ambient air quality standards "to protect the public health" and national secondary ambient air quality standards "to protect the public welfare from any known or anticipated adverse effects." Section 302(h) defines effects as including, but not limited to, "effects on soils, water, crops, vegetation, man-made materials, animals, wildlife, weather, visibility, and climate, damage to and deterioration of property, and hazards to transportation, as well as effects on economic values and on personal comfort and well-being." Such national standards must be based on air quality criteria which, under section 108, must "reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health and welfare which may be expected from the presence [of air pollutants] in the ambient air, in varying quantities." Thus, secondary national standards are necessarily limited to demonstrable or predictable adverse effects which can be quantitatively related to pollutant concentrations in the ambient air. Currently, injury to vegetation is the only type of welfare effect of sulfur dioxide that can be quantitatively related to ambient concentrations of this pollutant.

EPA is aware that sulfur dioxide has or may have effects on other sectors of the public welfare, such as materials, visibility, soils, and water. To some extent, the primary standards for sulfur dioxide and the remaining secondary standard mitigate such effects. Sufficient data are not now available, however, to establish a quantitative relationship between specific sulfur dioxide concentrations and such effects. Furthermore, it is not clear that any such effects, to the extent that they may occur at concentrations below the current national standards, are adverse to the public welfare.

As stated in the notice of proposed rulemaking, the annual secondary standard was based on a study by Linzon, which is discussed in Air Quality Criteria for Sulfur Oxides. A reanalysis of the data on which the annual standard was based indicated that it could not properly be concluded that the injury reported in Linzon's study resulted from the average sulfur dioxide concentration over a full year or even the six-month growing season, as distinguished from short-term peak concentrations.

After a review of the public comments that were received as part of this rulemaking, the Administrator has concluded that there still is not adequate information on which to base any long-term secondary standard for sulfur dioxide. The comments that were received in opposition to this rulemaking did not identify a specific annual average level of sulfur dioxide that could be directly related to an adverse effect on the public welfare.

Twenty-three letters of public comment were received. Eleven indicated support of EPA's action; nine indicated opposition. The remaining three stated no preference.

Opposition to revoking the annual standard was based, in part, on the contention that it should be retained to protect against corrosion of materials, visibility reduction, and occurrence of acid rain. A response to these particular comments follows:

1. Although EPA is aware that high long-term average concentrations of sulfur dioxide, accompanied by high levels of particulate matter, will increase the corrosion rate of some materials, there are not adequate data relating such corrosion to long-term sulfur dioxide levels below those now prescribed by the primary standards.

2. The quantitative relationship between sulfur dioxide and reduction in visibility is not presently known. There is evidence that particulate sulfate and sulfuric acid mist may act with other particulate matter to reduce visibility. Insufficient knowledge of factors such as humidity, and of the indirect role that sulfur dioxide itself plays in reducing visibility, makes the formulation of a sulfur dioxide standard based on visibility impracticable.

3. The mechanism of the formation of acid rain; the long-term effect of acidic moisture on plants, materials, and soils; and the concentrations of sulfur dioxide that can result in the formation of rain of sufficient acidity to be a danger to the environment currently are being investigated throughout the world. The data needed for standard-setting are not now available. Furthermore, it is not clear that acid rain would be a problem following attainment of the national primary standards for sulfur dioxide.

EPA will be pleased to receive, at any time, data which relate specific ambient air concentrations of sulfur dioxide to quantified effects such as the formation of acid rain, corrosion of materials, reduction in visibility, damage to vegetation, or any adverse change to the ecosystem. The relationships between the specific ambient air concentrations of sulfur dioxide, either alone or in combination with other environmental factors, and the adverse effects caused by those concentrations must be demonstrable or predictable prior to establishing any national secondary ambient air quality standard.

Two organizations, the Native American Rights Fund and the Natural Resources Defense Council, Inc., submitted particularly detailed comments in opposition to the proposed revocation. Their comments cited a number of studies of sulfur dioxide effects on vegetation, all well known to EPA. Neither the studies cited nor the comments made by the Natural Resources Defense Council and the Native American Rights Fund identified, nor provided a basis for identifying, long-term concentrations of sulfur dioxide, the attainment of which is necessary to protect against adverse effects. In addition, neither the studies nor the comments indicated that vegetation damage during the course of a year was the result of an annual average level rather than high short-term peak exposures to sulfur dioxide.

A number of the comments in opposition to revoking the annual secondary standard suggested revision of the primary standards to more stringent levels than are now prescribed. EPA is aware of the results of the studies which were cited in support of these comments. At the present time, however, it is unclear to what extent sulfur dioxide acts as a precursor to health effects more adverse than those now noted in the Air Quality Criteria for Sulfur Oxides.

This revocation does not affect the acceptability and enforceability of currently approved implementation plans. These plans are considered adequate and necessary to attain and maintain the remaining sulfur dioxide standards.

REVISIONS TO SULFUR OXIDES CRITERIA DOCUMENT

Section 108(c) of the Clean Air Act as amended in 1970 provides that the Administrator will "from time to time review, and as appropriate, modify any criteria * * *." In keeping with this section of the Act, notice is given in this issue of the FEDERAL REGISTER of the publication of a revision to Chapter 5, "Effects of Sulfur Oxide in the Atmosphere on Vegetation," of Air Quality Criteria for Sulfur Oxides. This revision includes the results of a number of studies completed since initial publication of the Criteria Document in 1969, and also includes reanalysis of older data in the light of new information.

The revision has been reviewed by the National Air Quality Criteria Advisory Committee, composed of representatives from industry, universities, conservation groups, and all levels of government; by individuals specially selected for their competence, expertise, or special interest in the effects of air pollutants on vegetation; and by a Federal consultation committee, comprised of members from appropriate Federal departments and agencies.

V 38-178
SEP 14 73
XUM

At the present time, the Administrator judges that the revised vegetational portion of the Air Quality Criteria for Sulfur Oxides provides the only adequate basis for the secondary National Ambient Air Quality Standards for Sulfur Dioxide. More than 700 published scientific papers concerning vegetational response to exposure to sulfur dioxide were reviewed by the Environmental Protection Agency. From these papers, 141 were selected by EPA as presenting the most significant criteria information. These papers are referenced and cited in the revised criteria document.

The Administrator realizes there are limitations in the scientific knowledge of vegetational effects resulting from exposure to sulfur dioxide in combination with other ambient air pollutants. As an example, it is known that sulfur dioxide combined with other pollutants may cause visible injury on vegetation to occur at lower levels than if vegetation were exposed to sulfur dioxide alone. A few studies in the revised criteria document consider the combined effects, but most studies deal with single pollutant effects. Only interactions between sulfur dioxide and ozone, and sulfur dioxide and oxides of nitrogen, have been cited in the revised criteria document. The information on combined effects presented in the criteria document is not based on extensive studies. The results are from preliminary laboratory studies which point out some conflicting results requiring in-depth review. There are some cases where plants are apparently undamaged by pollutant mixtures although the sulfur dioxide level by itself would lead one to believe that damage would occur. The potential for damage at low concentrations of pollutant mixtures clearly exist; however, there is not at this time, in the judgment of the Administrator, adequate data on which to base a standard solely on the combined effects.

The revised vegetational criteria cite environmental factors which in some way influence the susceptibility of vegetation injury as the result of sulfur dioxide exposure. For example, vegetation is most easily injured when: (1) Adequate soil moisture for growth is present, (2) humidity is high, (3) temperatures are above 40° F., (4) the vegetation is actively growing, and (5) sunlight is present. Environmental factors such as these are interrelated and no study has been located to date which succeeds in adequately isolating the relative importance of each.

Those studies which exist in the revised criteria document concerning vegetational harm in the entire growing season do not adequately indicate whether the observed injury was caused by a long-term exposure to low levels of sulfur dioxide or by high exposures of sulfur dioxide which occurred during shorter time periods. In the absence of such information, the Administrator has determined that proposing a standard based on growing season exposures to sulfur dioxide is not warranted at this time.

Laboratory, field-chamber, and ambient air studies are cited in the revised criteria. Laboratory and field chamber studies tend to be artificial by design and never completely simulate ambient air conditions. The intent of most laboratory and field chamber studies is to discover the effects resulting from direct exposure to the pollutants without the interference of numerous environmental parameters including other pollutants. As a result, laboratory and field chamber studies tend to either overrestrict a number of environmental conditions which might make vegetation more sensitive, or condition the vegetation to be much more sensitive than would be found under natural conditions. For example, natural environmental conditions such as excess moisture and sunlight, which influence the sensitivity of plants, together with the random interactions with other pollutants, may cause injury to occur at lower ambient air concentrations of sulfur dioxide than those reported in laboratory or chamber studies where such conditions are absent. In ambient air studies, a single pollutant and its effects are difficult to isolate from similar effects caused by sensitive environmental conditions or other pollutants. However, if ambient air studies are complemented by laboratory and field chamber studies, effects can be better related to the pollutant.

The Environmental Protection Agency is well aware that sulfur dioxide has effects on non-vegetational sectors of the public welfare such as materials, visibility, odor, taste, and the acidification of rain. However, the current National Secondary Ambient Air Quality Standard is not intended to protect these sectors of the public welfare from long-term effects of $SO_2$ because either protection is afforded by the existing National Annual Primary Ambient Air Quality Standard (80 micrograms per cubic meter) or sufficient data are not presently available to develop criteria for standards based on these effects.

The Environmental Protection Agency is continuing to conduct research on the long-term effects of sulfur dioxide exposure. During the period of prolonged research, however, the Administrator invites any relevant comment on the existence of scientifically recognized sulfur dioxide effects information which provides a quantitative basis for a long-term National Secondary Ambient Air Quality Standard. Data are especially desired which can relate specific ambient air concentrations of sulfur dioxide to quantified effects in such areas as the formation of acid rain, corrosion of materials, reduction in visibility, or any adverse change to the ecosystem.

As an example of nonvegetation effects, it is known that high annual concentrations of sulfur dioxide accompanied by high particulate levels will increase the corrosion rate of some materials. The Environmental Protection Agency has inadequate data with which to relate the effects of corrosion to long-term ambient air sulfur dioxide levels which are below those now prescribed by the primary standards.

The direct quantitative relationship between sulfur dioxide and reduction in visibility is not presently known. There is evidence that particulate sulfate and sulfuric acid mist may act with other particulate matter to reduce visibility; however, insufficient knowledge of the effects of environmental factors such as humidity, and of the indirect role that sulfur dioxide itself plays in reducing visibility, make a standard based on visibility impossible to propose at this time.

In the case of acidification of rain, the mechanism of the acid rain formation; the long-term effects of acidic moisture on plants, materials, and soils; and the concentrations of sulfur dioxide which can result in the formation of rain of sufficient acidity to be an danger to the environment are not fully understood by the Environmental Protection Agency at this time. The Administrator solicits any additional information concerning these, or any other currently unquantified, effects of sulfur oxides in the ambient air.

### Reevaluation of the Three-Hour $SO_2$ Standard

In the May 7, 1973 proposal to revoke the annual secondary standard, it was stated that "there is some question as to whether * * * injury to vegetation may result from short-term exposure to $SO_2$ concentrations which do not exceed the three-hour standard * * *." The Environmental Protection Agency has evaluated the additional data as presented in the revised criteria document, and has determined that this data does not provide an adequate and appropriate basis for revision of the existing three-hour standard.

The revised criteria document presents the results of studies which indicate that visible injury to some types of vegetation (minor leaf spotting) can result from short-term concentrations of $SO_2$ which do not exceed the current standards. Evidence of this visible injury has occurred on generally sensitive vegetation grown under environmental conditions which tend to favor maximum sensitivity. However, the Clean Air Act requires that secondary standards be established to protect the public welfare from adverse effects. The Administrator has given careful consideration to the question of whether this degree of injury can be responsibly defined as an adverse effect within the meaning of the Clean Air Act. After consultation with other agencies and individuals, including the United States Department of Agriculture, the Administrator has determined that, in his judgment, standards developed solely to protect against minor visible injury are not necessarily requisite to protect the public welfare from adverse effects.

The data presented in the revised criteria document also provide additional information regarding the levels of $SO_2$ concentration which can cause growth retardation or yield reduction of vegetation. These data provide adequate evidence that the current secondary standard (1,300 ug/m³ maximum three-hour concentration) is adequate and necessary to protect the public welfare from these adverse effects.

The Administrator recognizes, and has considered, the opinion that national standards should be established to protect against all effects of air pollutants, rather than only adverse effects. However, this opinion is inconsistent with the language of the Clean Air Act which requires protection against adverse effects, and also fails to accommodate the fact that, for some pollutants, the concentration levels which result in perceptible effects may be dependent upon available measurement and observation techniques, i.e., as research techniques improve, the level at which "effects" become perceptible becomes progressively lower, even though the level at which these effects become adverse remains relatively constant.

Several States have been granted an extension of time pursuant to section 110 (b) for submittal of State plans for implementation of the secondary sulfur dioxide standards, and in some cases submittal of these plans has been delayed pending results of EPA's reevaluation of the standards. That reevaluation is now complete, with results as reported herein and in the revised criteria document. The Administrator therefore expects that all State plans for implementation of the sulfur dioxide standards will be submitted within four months from date of this notice.

This notice of rulemaking is issued under authority of sections 109 and 301 of the Clean Air Act (42 U.S.C. 1857c-4 and 1857g).

Dated September 6, 1973.

JOHN R. QUARLES, JR.,
*Acting Administrator,*
*Environmental Protection Agency.*

Part 50, Title 40, Code of Federal Regulations is amended by revising § 50.5 as follows:

**§ 50.5 National Secondary Ambient Air Quality Standards for Sulfur Oxides (Sulfur Dioxide).**

The National Secondary Ambient Air Quality Standard for sulfur oxide measured as sulfur dioxide by the reference method described in Appendix A to this part, or by any equivalent method is 1,300 micrograms per cubic meter (0.5 p.p.m.) maximum 3-hour concentration not to be exceeded more than once per year.

[FR Doc.73-19295 Filed 9-13-73;8:45 am]

## PART 126—AREAWIDE WASTE TREATMENT MANAGEMENT PLANNING AREAS AND RESPONSIBLE PLANNING AGENCIES

On May 30, 1973, notice was published in the FEDERAL REGISTER, 38 FR 14230, that the Environmental Protection Agency was proposing policies and procedures for the designation of areawide waste treatment management pursuant to section 208(a) of the Federal Water Pollution Control Act Amendments of 1972 (86 Stat. 816 (33 U.S.C. 1251, 1288 (a)(1))).

The regulations are designed to serve as guides for the Governors of the States and chief elected officials of general purpose local government in identifying areas which, as a result of urban-industrial concentrations or other factors, have substantial water quality control problems which require an areawide approach in planning for and implementing corrective action, and in designating agencies capable of developing waste treatment management plans for such areas.

In view of the intent of the legislation, the Environmental Protection Agency believes that an areawide water quality management program should be carried out to gain the following objectives:

Provide cost effective, point source treatment and control for areas of urban-industrial concentrations having substantial water quality control problems.

Provide for control of nonpoint sources in urban-industrial and other areas where such controls are required including prevention of water quality problems in the future.

Provide for coordinated waste treatment management in such areas.

Written comments on the proposed rulemaking were invited and received from interested parties. A number of verbal comments also were received. The Environmental Protection Agency has carefully considered all submitted comments. All written comments are on file with the Agency. Certain of these comments have been adopted or substantially satisfied by editorial change, deletions from, or additions to the regulations. These changes are discussed below.

(a) A substantial water quality control problem was further defined to indicate that the problem exists where water quality has been degraded to the extent that desired uses are impaired or precluded. The identification of water quality segments under 40 CFR Part 130 or groundwater pollution problems are measures of the extent of the problem.

(b) The definition of local units of government that may respond to indicate intent to join together in the planning process now includes both general purpose and other appropriate units of local government. (See § 126.10(c).)

(c) The criteria for designation of a planning agency now includes the consideration of an existing agency's capability for implementing the plan or having the plan implemented. (See § 126-11(b).).

(d) The requirements for the submission of information on 208 planning areas and agencies have been revised to require a statement relating the boundaries of the area to the SMSA but not to require conformance to SMSA boundaries. (See § 126.15.)

(e) The Governor's right to nondesignate in intrastate areas only is clarified. (See § 126.16.)

(f) Where 208 planning area and agency designations are made by local public officials, the Governor's views on these designations may be made to the Administrator.

(g) The Administrator's approval or disapproval actions of areas and agencies will be published in the FEDERAL REGISTER. (See § 126.17.)

(h) The requirements for public participation as set forth in 40 CFR, Part 105 shall be followed.

*Effective date.*—September 14, 1973.

Because of the importance of promptly making known to States, local units of government and other interests the contents of these regulations in order that area and agency designations may be made under section 208(a) of the Act, the Administrator finds good cause to declare the regulations effective on September 14, 1973.

Dated September 4, 1973.

JOHN QUARLES,
*Acting Administrator.*

AUTHORITY.—Sec. 208 and 501, 86 Stat., 816, (33 U.S.C. 1251, 1288(a)(1)).

### Subpart A—Scope and Purpose; Definitions

**§ 126.1 Scope and purpose.**

This part establishes regulations specifying procedural and other elements and criteria for the use of State Governors and chief elected officials of general purpose local government in the designation of the areas, including their

V 38-178
SEP 14 73
XUM

boundaries, requiring areawide planning for waste treatment management pursuant to section 208 of the Act and designation of agencies responsible for such planning. This part provides that each State should comply with the requirements of this Part not later than 180 days after the date of publication of this part.

**§ 126.2 Definitions.**

As used in this part, the following terms shall have the meanings set forth below:

(a) The term "Act" means the Federal Water Pollution Control Act Amendments of 1972 (86 Stat. 816 (33 U.S.C. 1251, 1288(a)(1)).

(b) The term "EPA" means the U.S. Environmental Protection Agency.

(c) The term "Administrator" means the Administrator of the U.S. Environmental Protection Agency.

(d) The term "208 planning areas" means the area designated under section 208(a) (2), (3), or (4) of the Act.

## Subpart B—Procedures for Designation of 208 Planning Areas and Agencies Responsible for Planning

**§ 126.10 Criteria for determination of 208 planning areas.**

The following criteria will be utilized in designation of 208 planning areas.

(a) A Preference will be given by the Administrator, in approving designation, to areas of urban-industrial concentrations, because of the Act's legislative history and in view of the institutional nature of urban-industrial concentrations. For this purpose an urban-industrial concentration is that portion of a standard metropolitan statistical area (SMSA—as defined by the Office of Management and Budget), or those portions of SMSA's, having substantial concentrations of population and manufacturing production or other factors which result in substantial water quality control problems. The entire SMSA(s) may be designated as the planning area. Such areas may be increased to include areas outside the SMSA(s) which have substantial water quality control problems resu' 'ng from concentrations of population and manufacturing activity or other factors and which are contiguous to the SMSA(s);

(b) The area must have a substantial water quality control problem. A substantial water quality control problem shall be considered to exist only where the complexity and nature of the water quality control problem requires an areawide waste treatment management plan, and where water quality has been degraded to the extent that desired uses are impaired or precluded. A measure of the extent of the problem includes those areas where:

(1) A substantial portion of the major receiving waters available for waste discharge from the area has been classified by the State as a water quality segment, after adequate analysis demonstrating this classification, under the requirements of Part 130 of this chapter, or;

(2) A substantial and extensive groundwater pollution problem exists; or where the dependence of an area on groundwater makes it essential that its ground water resource be given the necessary protection from pollution it requires.

(c) The affected general purpose or other appropriate units of local government within the boundaries of the 208 planning area must:

(1) Have in operation a coordinated waste treatment management system, or

(2) Show their intent, through formally adopted resolutions, to join together to develop and implement a plan which will result in a coordinated waste treatment management system for the area.

(d) Affected units of local government must have legal authority to enter into agreements for coordinated wastewater management in compliance with section 208 of the Act.

**§ 126.11 Criteria for designation of agencies responsible for planning.**

(a) The agency shall be a representative organization whose membership shall include but need not be limited to elected officials of local governments, or their designees, having jurisdiction in the designated planning area. The agency shall establish procedures for plan adoption and resolution of major issues. The agency shall have waste treatment planning jurisdiction in the entire designated area. Existing, capable regional agencies may be designated consistent with the policies in Title IV of the Intergovernmental Cooperation Act of 1968, as implemented by Part IV of OMB Circular A-95. A single qualified agency may be designated as being responsible for planning in more than one planning area.

(b) In the selection of the areawide planning agency, the Governor(s) must consider that such agency, pursuant to section 208(b)(1) of the Act, shall have the water quality management planning process fully underway no later than 1 year after its designation. Further, the agency must have the capability to complete, and shall complete, the initial water quality management plan no later than 2 years after the planning process is in operation or such earlier date as the State may require for incorporation into State plans required under section 303 (e) of the Act. The Governor or, in interstate cases, the Governors, shall in the designation process, consider:

(1) The general and specific legal authorities and prohibitions applicable to the agency with regard to water quality management planning, including but not limited to coordination with or participation in comprehensive planning, land use planning, water sewer planning, coastal zone planning, and other related planning and development activities and controls.

(2) The relationship of the agency (both formal and informal) with planning agencies of different levels of government including but not limited to Federal, State, interstate and Federal-State agencies as well as local government agencies.

(3) The relationship of the agency (both formal and informal) with management and regulatory agencies such as those that possess zoning and subdivision controls, and those that construct and operate wastewater facilities.

(4) Where an existing agency is designated:

(i) The agency's past record in water quality management planning with special regard to plan quality, technical, fiscal, political, and economic feasibility, and environmental soundness.

(ii) The agency's expertise, either in-house or readily available, with particular regard to water quality and comprehensive planning.

(iii) The agency's fiscal, manpower, data, and other resources in light of existing and proposed commitments in other areas.

(iv) The agency's capability for having the plan implemented, or of implementing all or portions of the plan itself.

**§ 126.12 Procedure for designation of intrastate 208 planning areas and agencies responsible for planning.**

The Governor of the State shall, after proper consultation with appropriate elected and other officials of local governments having jurisdiction in such area, and such State agencies as he may desire, and having complied with the requirements for public participation as set forth in § 126.30 of this regulation, designate the 208 planning area, including its boundaries, and a single representative agency to be responsible for the planning. In designating such planning areas and agencies, the Governor shall consider the criteria set forth in §§ 126.10 and 126.11.

**§ 126.13 Procedure for designation of interstate 208 planning areas and agencies responsible for planning.**

The Governors of the States shall, in interstate areas, after consultation with appropriate elected and other officials of all local governments having jurisdiction and with such State and interstate agencies as they may desire, or may be required by State legislation, and having complied with the requirements for public participation as set forth in § 126.30, mutually designate each 208 planning area including its boundaries, and for each area a single representative agency to be responsible for the planning. In designating such planning areas and agencies, the Governors shall consider the criteria set forth in §§ 126.10 and 126.11.

**§ 126.14 Nondesignation of 208 planning areas and/or agencies by Governor(s).**

In certain intrastate areas the Governor may determine not to designate a 208 planning area even though the criteria set forth in §§ 126.10 and 126.11 may be met. Specific nondesignation of a 208 planning area does not preclude later designation by the Governor.

NOTE.—Attention is called to the fact that the Governor has three specific choices of action. He may designate, remain silent, or may nondesignate specific areas. If the Governor remains silent, the chief elected officials of general purpose local government in the area may make such designations if they so choose. Upon approval by the Administrator, designation by local elected officials is binding upon the Governor.

**§ 126.15 Submissions of 208 planning areas and agencies responsible for planning.**

Within 180 days after issuance of this Part the Governor shall notify the Administrator of his actions regarding designation of 208 planning areas and agencies responsible for the planning. This notification shall be in writing and shall include:

(a) Identification of each area within the State determined to be eligible by the Governor under § 126.10.

(b) A list of all areas among those eligible which the Governor wishes to nondesignate at this time.

(c) A list of all areas among those eligible which the Governor wishes to designate at this time. For each area designated the following information shall be provided:

(1) An exact description of the boundaries of each area including a statement relating to boundaries of any area to the boundaries of the SMSA(s) contained within or contiguous to the area, or in those areas not within a SMSA a statement relating the boundaries of the area to the nearest SMSA, and a statement indicating:

(i) Population of the area,

(ii) Nature of the concentration and distribution of industrial activity in the area,

(iii) Degree to which it is anticipated that the area could improve its ability to control water quality problems were it designated as a planning 208 area, and

(iv) Factors responsible for designation.

(2) Identification and supporting analysis of each water quality segment included in each area, as developed in accordance with Part 130 of this chapter.

(3) For each area a copy of the charter of existing regional waste treatment management agencies or formally adopted resolutions which demonstrate that the general purpose units of local government involved will join together in the planning process to develop and implement a plan which will result in a coordinated waste treatment management system for the area. The resolutions shall also state that all proposals for grants for construction of a publicly owned treatment works will be consistent with the approved plan and will be made only by the designated management agency.

(4) For each area the name, address, and official contact for the agency designated to carry out the planning.

(5) A statement on the factors considered in agency designation as described in § 126.11.

(6) A summary of public participation in accordance with the requirements set forth in § 126.30.

**§ 126.16 Procedure for designation of 208 planning areas and agencies responsible for planning by the chief elected officials of general purpose local government.**

(a) In the case of any intrastate area, if the Governor of an affected area does not act to designate or nondesignate it as a 208 planning area, or in an interstate area if the Governors of an affected area do not act to designate it as a 208 planning area, the chief elected officials of general purpose local governments having jurisdiction in the area, after meeting the requirements for public participation as set forth in § 126.30, may designate such planning area, and a single representative agency responsible for the planning, which shall be based upon the criteria set forth in §§ 126.10 and 126.11.

(b) After making such designation, the chief local officials shall: (1) Notify the Governor(s) of the State(s) affected by their action, and (2) submit their designation to the Administrator in accordance with the requirements set forth in § 126.15. When the Governor receives notification he may submit his views regarding the designation to the Administrator.

**§ 126.17 Review of submissions.**

(a) The Administrator shall review each submission of designated 208 planning areas and agencies to determine compliance with the criteria set forth in this Part.

(b) Upon completion of his review, the Administrator shall publish notice in the FEDERAL REGISTER and shall notify in writing the appropriate Governor(s) or local officials making such designations of his approval or disapproval of each designation. In the event that the Administrator disapproves any of the designations, he shall specify his reasons with his notice of disapproval.

**§ 126.18 Revisions.**

(a) The appropriate Governor(s) or local officials (where the original designation was not made by the Governor(s)) may from time to time propose in writing a revision of the boundaries of any 208 planning area previously approved. The Administrator shall approve or disapprove such proposed revision pursuant to § 126.17. The effective date of designation is the date of the Administrator's approval.

(b) The Governor(s) may also designate from time to time previously nondesignated planning areas and agencies. In such cases the designation, submission, and approval shall follow the requirements set forth in this Part.

## Subpart C—State Planning in Nondesignated Areas

**§ 126.20 Determination of planning agencies in nondesignated areas.**

(a) The State shall act as the planning agency for all areas not designated under §§ 126.12, 126.13, or 126.16. Where the Governor determines, pursuant to section 208(b)(4) of the Act, that the requirements of section 208(b)(2) (F through K) should be applied on a statewide basis, the State may apply the planning process established pursuant to section 303 of the Act as the process for carrying out the requirements of the sections. Funds which may be available under section 106 of the Act may be utilized to conduct planning pursuant to this section.

(b) Assumption by the State of the planning responsibilities in these areas does not foreclose the establishment of other planning processes at the substate level.

## Subpart D—Public Participation

**§ 126.30 Public participation requirements in designation of 208 planning areas and designation of agencies responsible for planning.**

(a) The guidelines for public participation as set forth in Part 105 of this chapter implementing section 101(e) of the Act shall be followed.

(b) The Governor(s) shall consult with appropriate elected and other local officials prior to designating planning areas and agencies. The Governor(s), or in the case of designation by chief elected officials of general purpose local government, those officials shall, after adequate public notice, hold one or more public hearings or meetings within the proposed 208 planning area for the purpose of gaining public advice on the designation of the planning area and agency. All units of local government wishing to be heard and the general public shall be included.

(c) Record of such public meetings or hearings including notice of same shall be kept and made available to the Administrator upon request. A summary of comments and meeting notes shall be submitted to the Administrator with each designation.

## Subpart E—Assistance to Designated Agencies

**§ 126.40 Determination of eligibility.**

Assistance under section 208 (f)(1), (g), and (h) of the Act shall be provided only to those agencies designated under § 126.12, 126.13, or 126.16.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 21—COMMISSIONED OFFICERS

Involuntary Retirement of Officers

The present regulation permits the involuntary retirement of an officer only for cause. A reduction in strength of the Reserve Corps could become necessary during periods of program contraction. The amendment will permit the involuntary retirement of officers with 20 or more years of service during periods of

V 38 1178 SEP 14 73 XUM

program contraction and strength reduction. Public participation in this change was not solicited since the change involves only internal administration of the Commissioned Corps personnel system.

1. Section 21.165 of Part 21, Title 42, Code of Regulations is amended to read as follows:

**§ 21.165 Involuntary retirement of officers with 20 years of service.**

The Assistant Secretary for Health may recommend to the Secretary the retirement of any officer who has completed 20 or more years of active service as defined in section 211(d) of the Act if the Assistant Secretary for Health after consideration of the recommendation of a board pursuant to § 21.168, determines that the retirement of an officer would be in the best interests of the Service for one or more of the following reasons:

(a) An officer's performance of duty is at a level below that expected of an officer of his grade in his category;

(b) An officer is not suited for continued service for one or more of the following similar causes:

(1) Conduct contrary to laws, regulations, or administrative directives applicable to commissioned officers.

(2) Intentional omission or misrepresentation of facts in official statements, either oral or written.

(3) Act of intemperance and/or personal misconduct to the discredit of the Service.

(c) A reduction in the strength of the Reserve Corps is necessary by reasons of program contraction or numbers limitation. The services of a board of officers, as otherwise required by this subpart, may be dispensed with.

*Effective date.*—These amendments shall be effective September 14, 1973.

Approved: September 10, 1973.

CASPAR W. WEINBERGER,
*Secretary.*

[FR Doc 73-19600 Filed 9-13-73;8:45 am]

## Title 43—Public Lands: Interior

### CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

### APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5383]

[Oregon 8646]

### OREGON

### Partial Revocation of Reclamation Project Withdrawal

*Correction*

In FR Doc. 73-17788 appearing at page 22551 in the issue of Wednesday, August 22, 1973, in paragraph 2, the 10th line reading "requirements received on or before 10", should read "requirements of applicable law. All valid applications received on or before 10".

## Title 47—Telecommunication

### CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

### PART 13—COMMERCIAL RADIO OPERATORS

### Operating Authority

In the matter of amendment of Part 13 of the rules to conform the language of § 13.61 to that of §§ 83.159 and 81.152 (d), with respect to transmitter power limitations imposed upon radiotelephone operators.

1. Section 83.159 of the rules, which lists operator requirements for noncompulsory stations, indicates that the holder of a radiotelephone third-class operator permit is authorized to operate a public or limited ship telephone of not more than 250 watts carrier power or 1,000 watts peak envelope power. Section 13.61(g)(6), which sets forth one of several enumerated limitations on the scope of operating authority enjoyed by a radiotelephone third-class operator, also refers to the express transmitter power limitations under which the third-class operator must operate. However, rather than paralleling the language of § 83.159 with respect to power limitations, § 13.61 (g)(6) expresses such limitation merely in terms of antenna power of the unmodulated carrier wave, without any reference to alternative limitation on peak envelope power.

2. Although the actual power limitations referred to both in § 83.159 and in § 13.61(g)(6) are the same, there is a need, to avoid confusion, to make the language essentially identical in both sections and to simplify the phraseology of § 13.61(g)(6). The proposed rule changes in the attached Appendix will accomplish this by amending § 13.61(g)(6) so that it will not be inconsistent with the text of § 83.159, and so that its meaning will be clear.

3. Similarly, there is a need to amend § 13.61, subsections (g)(4), (g)(5), and (h)(7), in order to make the language of these sections correspond to the limitations on power imposed by and expressed in § 81.152(d), which sets forth operator requirements for shore stations. Although the actual power limitations referred to in § 81.151(d) on the one hand, and in §§ 13.61(g)(4), 13.61(g)(5), and 13.61(h)(7), on the other hand, are the same, the power limitations in § 81.152(d) are expressed in terms of carrier power and peak envelope power, whereas the power limitations in § 13.61 are expressed in terms of carrier power only. The proposed amendments to subsections (g)(4), (g)(5), and (h)(7) of § 13.61 would have the effect of making the language of these sections conform to the language utilized in § 81.152(d).

4. The amendments adopted herein are editorial in nature, and hence the prior notice, procedure, and effective date provisions of 5 U.S.C. 553 do not apply. Authority for the promulgation of the amendments is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.231(d) of the Commission's rules.

5. Accordingly, Part 13 of the Commission's rules is amended as shown below, effective September 21, 1973.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082 (47 U.S.C. 154, 303).)

Adopted September 5, 1973.

Released September 6, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN M. TORBET,
*Executive Director.*

Part 13 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 13.61(g)(4) (5) & (6) and paragraph (h)(7) are amended to read as follows:

**§ 13.61 Operating authority.**

* * * * * * *

(g) * * *

(4) Class I–B coast stations at which the power is authorized to exceed 250 watts carrier power or 1,000 watts peak envelope power, or

(5) Class II–B or Class III–B coast stations, other than those in Alaska, at which the power is authorized to exceed 250 watts carrier power or 1,000 watts peak envelope power, or

(6) Ship stations or aircraft stations at which the installation is not used solely for telephony, or at which the power is more than 250 watts carrier power or 1,000 watts peak envelope power:

* * * * * * *

(h) * * *

(7) Coast stations at which the power is authorized to exceed 250 watts carrier power or 1,000 watts peak envelope power;

* * * * * * *

[FR Doc.73 19594 Filed 9-13-73;8:45 am]

### PART 87—AVIATION SERVICES

### General Operator Requirements

In the matter of amendment of Part 87 of the rules to conform the language of § 87.133 to that of § 13.61(g)(6) with respect to transmitter power limitations imposed upon radiotelephone operators.

1. Section 13.61(g)(6) of the rules, which sets forth one of several enumerated limitations on the scope of operating authority enjoyed by a radiotelephone third-class operator, specifically prohibits a third-class radiotelephone permit holder from operating an aircraft station at which the installation is not used solely for telephony, or at which the power is more than 250 watts carrier power or 1,000 watts peak envelope power. Section 87.133 of the rules, which sets forth general operator requirements for stations in the Aviation Services, provides for certain limitations on the use of third-class radiotelephone permits with respect to the operation of such stations. However, the limitations set forth in § 87.133 do not explicitly include any limitations on transmitter power, comparable to the ones explicitly enumerated in § 13.61(g)(6).

2. Although it is clear that the scope of operating authority enjoyed by a third-class operator is limited by the transmitter restrictions found in §13.61 (g)(6), there is a need, for the convenience of the public, to explicitly include these restrictions as part of the language of § 87.133. The attached Appendix amends Part 87 by including in § 87.133 the restrictions found in § 13.61(g)(6), and fulfills this need.

3. The amendment adopted herein is editorial in nature, and hence the prior notice, procedure, and effective date provisions of 5 U.S.C. 553 do not apply. Authority for the promulgation of the amendment is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.231(d) of the Commission's rules.

4. Accordingly, Part 87 of the Commission's rules is amended as below, effective September 21, 1973.

Adopted September 5, 1973.

Released September 6, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN M. TORBET,
*Executive Director.*

Part 87 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 87.133 is amended to read as follows:

**§ 87.133 General operator requirements.**

(a) Except as provided for in §§ 87.135, 87.139 or as limited on the face of the operator license or permit, all stations in the Aviation Services shall be operated by persons holding any class of commercial radio operator license or permit issued by the Commission: *Provided,* That,

(1) Only a person holding a third-class or higher operator permit shall operate aircraft stations

(i) Utilizing frequencies below 30 MHz not exclusively allocated to the aeronautical mobile service, or

(ii) Utilizing frequencies above 30 MHz not allocated exclusively to aeronautical mobile serviecs and which are assigned for international use; and

(2) Only a person holding a second-class radiotelephone or higher operator permit shall operate an aircraft station at which the installation is not used solely for telephony, or at which the power is more than 250 watts carrier power or 1,000 watts peak envelope power.

(b) The licensed operator of a land or aeronautical public service station using telephony may permit other persons to transmit or to communicate under his direct supervision and responsibility over the facilities of the station in accordance with the terms of the station license.

## Title 49—Transportation

### CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-9; Notice 2]

### PART 570—VEHICLE IN USE INSPECTION STANDARD

*Correction*

In FR Doc. 73-18720, appearing at page 23949 in the issue for Wednesday, September 5, 1973, the paragraph that immediately follows § 570.5(c) should read as set forth below:

*Inspection procedure.*—Measure the distance (A) from the free pedal position to the floorboard or other object that restricts brake pedal travel. Depress the brake pedal, and with the force applied measure the distance (B) from the depressed pedal position to the floorboard or other object that restricts pedal travel.

Determine the percentage as $\frac{A-B}{A} \times 100$.

The engine must be operating when power-assisted brakes are checked. The pedal reserve check is not required for vehicles equipped with full power (central hydraulic) brake systems, or to vehicles with brake systems designed to operate with greater than 80 percent pedal travel.

### CHAPTER X—INTERSTATE COMMERCE COMMISSION

### SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1150]

### PART 1033—CAR SERVICE

### Kansas City Southern Railway Co. et al.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 10th day of September 1973.

It appearing, that The Kansas City Southern Railway Company (KCS) is unable to operate over its Lake Charles, Louisiana, branch because of destruction by fire of its bridge over the Houston River; that shippers served by the KCS are thereby deprived of railroad service; that KCS service to Lake Charles can be acomplished by operation by the KCS over certain tracks of the Southern Pacific Transportation Company (SPT), the Sabine River & Northern Railroad Company (SRN), and the Missouri Pacific Railroad Company (MP); that the SPT, SRN, and MP have consented to use of said tracks by the KCS; that operation by the KCS over the aforementioned tracks of the SPT, SRN, and MP is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

*It is ordered,* That:

**§ 1033.1150 Service Order No. 1150.**

(a) *The Kansas City Southern Railway Company authorized to operate over certain tracks of Southern Pacific Transportation Company, over certain tracks of Sabine River & Northern Railroad Company, and over certain joint tracks of Sabine River & Northern Railroad Company and Missouri Pacific Railroad Company.* The Kansas City Southern Railway Company (KCS) be, and it is hereby, authorized to operate over tracks of the Southern Pacific Transportation Company (SPT) between Lake Charles, Louisiana, and Echo, Texas, thence over tracks of the Sabine River & Northern Railroad Company (SRN) between Echo, Texas, and SRN milepost 12.8; thence over joint tracks of the SRN and the Missouri Pacific Railroad Company (MP) between SRN milepost 12.8 and Mauriceville, Louisiana.

(b) *Application.*—The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.*—Inasmuch as this operation by the KCS over tracks of the SPT, over tracks of the SRN, and over joint tracks of the SRN and the MP is deemed to be due to carriers' disability, the rates applicable to traffic moved by the KCS over these tracks of the SPT, SRN, and MP shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) *Effective date.*—This order shall become effective at 11:59 p.m., September 10, 1973.

(e) *Expiration date.*—The provisions of this order shall expire at 11:59 p.m., September 30, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; (49 U.S.C. 1, 12, 15, and 17(2)). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; (49 U.S.C. 1(10–17), 15(4), and 17(2).)

*It is further ordered,* That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
*Secretary.*

[Ex Parte 279]

## PART 1115—ISSUANCE OF SECURITIES, ASSUMPTION OF OBLIGATIONS, AND FILING OF CERTIFICATES AND REPORTS

### Public Offerings (Form of Offering Circular Required for Public Sales of Securities

*Order.* At a general session of the Interstate Commerce Commission, held at its office in Washington, D.C., on the 5th day of September 1973.

It appearing, that the Commission, on the date hereof, has made and set forth its report in this proceeding setting forth its conclusions and findings and its reasons therefor, which report is hereby referred to and made a part hereof;

It further appearing, that since the proposed amendments and additions to existing regulations relate to matters of practice and procedure resulting from the herein proceeding, further notice and public proceedings under 5 U.S.C. 533 are not necessary and good cause exists for making the amendments and additions effective on or before November 13, 1973.

*It is ordered,* That offering circulars, hereby required, issued in connection with public sales of securities under section 20a or 214 of the Interstate Commerce Act, shall hēnceforth be in the form prescribed by the Commission in this proceeding.

*It is further ordered,* That part 1115 of Subchapter B of Chapter X, Title 49 of the Code of Federal Regulations be, and it is hereby, amended by adding new material[1] to Form BF-6, referred to in § 1115.1;

*It is further ordered,* That this order shall become effective on or before November 13, 1973; and

*It is further ordered,* That notice of this order shall be given to the general public by depositing a copy of this notice in the Office of the Secretary of this Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission.

Title 50—Wildlife and Fisheries

## CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

## PART 32—HUNTING

### Kirwin National Wildlife Refuge, Kansas

The following regulation is issued and is effective September 14, 1973.

**§ 32.1 Opening of wildlife refuge areas to hunting; addition to open area.**

KANSAS

KIRWIN NATIONAL WILDLIFE REFUGE

The public hunting area on the Kirwin National Wildlife Refuge has been increased from 3,300 acres to 3,700 acres.

Properly described this addition includes all lands within the refuge and above the lake elevation, south along the section line common to sections 33 and 34, T 4S, R 17W, and sections 2 and 3, T 5S, R 17W, to the refuge boundary; thence east one mile to the section line common to sections 1 and 2, T 5S, R 17W; thence north to the lake shore; thence northwest following the water line to the beginning point.

This addition will be open for the hunting of all species previously authorized under §§ 32.11, 32.21, and 32.31 of this chapter.

KEITH S. HANSEN,
*Refuge Manager, Kirwin National Wildlife Refuge, Kirwin, Kansas.*

AUGUST 22, 1973.

[FR Doc.73-19547 Filed 9-13-73;8:45 am]

## PART 32—HUNTING

### Benton Lake National Wildlife Refuge, Montana

The following regulations are issued and are effective on September 14, 1973. These regulations apply to public hunting on portions of the Benton Lake National Wildlife Refuge.

Public hunting of geese, ducks, coots, mergansers and Wilson's snipe on the Benton Lake National Wildlife Refuge, Montana, is permitted only on areas designated by signs as open to public hunting. This open area is delineated on maps available at refuge headquarters.

Hunting shall be in accordance with all applicable state and federal regulations governing the hunting of the aforementioned species subject to the following special conditions:

1. Vehicle travel is restricted to existing gravel surface roads.

2. During the period October 6 through November 18, 1973, all hunters will be required to register at the designated check station prior to entering the hunting area.

3. During the period October 6 through November 18, 1973, all hunters will be required to check out by completing information forms concerning their hunt and by presenting their bag to refuge personnel for species identification.

4. On all even numbered days during the period October 6 through November 18, hunters may not possess or use shells other than 12 guage, iron shot, heavy loads, 1½ ounces of shot, No. 4 shot, which will be available for sale at the official check station. Specific days for use of iron shot are October 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, November 2, 4, 6, 8, 10, 12, 14, 16, 18, 1973.

5. On all odd numbered days during the period October 6 through November 18, hunters may not possess or use iron shot shotgun shells. Specific days for non-use of iron shot shells are October 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, November 1, 3, 5, 7, 9, 11, 13, 15, 17, 1973.

In order to avoid disruption of the Bureau's pilot iron shot program and continue the collection of important data and for the further reason that the waterfowl hunting season in this area opens on October 6, it is determined that this regulation shall take effect in less than 30 days from date of publication and that notice of public procedures thereof is impractical, unnecessary and contrary to public interest, thus falling within the exceptions of (5 U.S.C. 553(b)(3)(B)), and that these regulations shall be effective on October 6, 1973.

The provisions of this special regulation supplement to regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 6, 1974.

LYLE A. STEMMERMAN,
*Refuge Manager, Benton Lake National Wildlife Refuge, Great Falls, Montana.*

SEPTEMBER 7, 1973.

[FR Doc.73-19548 Filed 9-13-73;8:45 am]

Title 6—Economic Stabilization

## CHAPTER I—COST OF LIVING COUNCIL

## PART 150—COST OF LIVING COUNCIL PHASE IV PRICE REGULATIONS

### Petroleum and Petroleum Products

Subpart L of Part 150 of Title 6 of the Code of Federal Regulations is amended in §§ 150.355(c), 150.356, 150.357, and 150.358(g).

Section 150.355(c) is amended to allow refiner-retailers to increase ceiling prices for retail sales of No. 2 heating oil on a monthly basis to reflect, on a dollar-for-dollar basis, increases in costs of imported No. 2 heating oil incurred in the preceding month. This provision corrects Subpart L as issued on August 17, 1973, which inadvertently omitted refiner-retailers in § 150.355. This amendment implements the Council's intention

to provide the same option for refiner-retailers as afforded retailers and reseller-retailers in § 150.355(d)(2) as originally published. As amended, therefore, Subpart L provides that refiner-retailers, reseller-retailers and retailers of No. 2 heating oil may adjust ceiling prices for No. 2 heating oil on the first day of each month to reflect increased costs of imports of No. 2 heating oil incurred during the preceding month, provided that a report, on forms prescribed by the Council, is made to the Internal Revenue Service by the 5th day of the month after any such price increase.

The new § 150.356 replaces existing §§ 150.356 and 150.357. It prescribes with greater specificity the requirements governing the inclusion of a refiner's increased costs of imports and domestic crude petroleum in the computation of its ceiling prices for retail sales of gasoline, No. 2–D diesel fuel and No. 2 heating oil and the base prices for covered products.

Section 150.356(b) adds a new subparagraph containing definitions used in the section. Attention is particularly directed to the definitions of "landed cost" in which the Council has set out more precise methods for determining both the costs of imported petroleum products and transportation costs for those products. In particular, this definition is intended to make clear the rules for calculating these costs in transactions between affiliated entities. Costs are established in certain cases of transactions among affiliated entities of the same firm by requiring use of accounting procedures generally accepted and consistently and historically applied by the firm rather than treating such transactions as "arms-length" transactions involving either posted prices or imputed world scale transportation rates. The Council intends to review the accounting procedures which firms subject to this section apply in making the necessary computations and reserves the right to require firms to modify their accounting procedures for purposes of this provision where the Council concludes that the accounting practices used by the firms are not a fair reflection of the actual costs incurred. Changes in business practices designed to frustrate the purposes of these rules may also be disallowed by the Council.

Another change from the regulations, as originally published on August 17, 1973, is substitution of a monthly cost period for each type of product to measure both base costs and current costs. The original provision established a single date (i.e., May 15, or July 31) on which to measure cost. This change eliminates the need for using imputed costs in many cases and will provide a more realistic and accurate basis for measurement of increased costs of imports and domestic crude petroleum.

Section 150.356 provides a more precise method for calculating the allocation of increased costs of imports and domestic crude petroleum to various products. The Council has furnished in this amendment, a mathematical formula which firms must use in calculating the dollar amount of the increased costs of imports and domestic crude petroleum. The formula is intended to further implement the Council's intention of allowing recovery of increased costs of imports and domestic crude on a dollar-for-dollar basis. The substance of the corresponding provisions in the regulations, as originally published on August 17, 1973, has been generally retained. Having been made aware of some uncertainty among firms as to precisely what form of computations should be employed, the Council developed this formula to provide explicit guidance and to avoid misunderstandings.

The Council believes that the clarifications embodied in these amendments provide assurance that increased costs of imports can be fully recovered on a dollar-for-dollar basis. This assurance should encourage the importation of the additional quantities of these products which will be required in the months immediately ahead.

Section 150.356 is further amended to make clear that increased costs of imports incurred in a particular month cannot be recouped in a period of time less than the next succeeding month, but that to the extent that recoupment does not occur in its entirety in the next succeeding month, the unrecouped portion may be recovered in a later month.

Because the purpose of these amendments is to provide immediate guidance and information with respect to the decisions of the Council, the Council finds that publication in accordance with normal rule making procedure is impracticable and that good cause exists for making these amendments effective in less than 30 days.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11695, 38 F.R. 1473; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489.)

In consideration of the foregoing Chapter I of Title 6 of the Code of Federal Regulations is amended as follows, effective 11:59 p.m., e.s.t., August 19, 1973.

Issued in Washington, D.C., on September 12, 1973.

JOHN T. DUNLOP,
*Director,*
*Cost of Living Council.*

1. Section 150.355(c) is amended to read as follows:

**§ 150.355 Retail sales of gasoline, No. 2–D diesel fuel and No. 2 heating oil.**

* * * * *

(c) *Ceiling prices: refiner-retailers.*—(1) The ceiling price for retail sales of gasoline of a particular octane number, No. 2–D diesel oil and No. 2 heating oil by a refiner-retailer at each outlet where the refiner-retailer sells such item is (i) the weighted average price at which each such item was lawfully priced in transactions on May 15, 1973, at each such outlet plus (ii) increased costs of imports incurred between May 15, 1973, and August 1, 1973 and calculated pursuant to § 150.356(d)(1). If the refiner-retailer first offered gasoline, No. 2–D diesel fuel or No. 2 heating oil at a particular outlet after May 15, 1973, the price at which each such item was priced in transactions on May 15, 1973, at the nearest comparable outlet shall be used in computing the ceiling price In computing the ceiling price, a firm may not exclude any temporary special sale, deal or allowance in effect on May 15, 1973.

(2) Notwithstanding the provisions of paragraph (c)(1) of this section, monthly adjustments to the ceiling prices of No. 2 heating oil may be made on the first day of each month beginning with September 1973 when calculated pursuant to § 150.356(d)(2) to reflect increased costs of imported No. 2 heating oil. Any refiner-retailer which increases the ceiling price on No. 2 heating oil pursuant to this subparagraph must submit a report in accordance with the forms and instructions issued by the Cost of Living Council by the fifth day of the month in which the ceiling is increased.

2. Section 150.356 is amended to read as follows:

**§ 150.356 Allocation of refiner's increased costs of imports and domestic crude petroleum.**

(a) *Scope.*—This section prescribes the requirements governing (1) the inclusion of a refiner's increased costs of imports in the computation of its ceiling prices for retail sales of gasoline, No. 2–D diesel fuel, and No. 2 heating oil, and base prices for covered products; and (2) the inclusion of a refiner's increased costs of domestic crude petroleum and purchased domestic petroleum products commingled for accounting purposes in the computation of its base prices for covered products.

This section does not apply to increased costs of imports and increased costs of domestic crude petroleum for products a refiner resells as a refiner-reseller pursuant to § 150.359.

(b) *Definitions.*—For purposes of this section—

"Cost of domestic crude petroleum" means (1) for purposes of arms-length transactions the purchase price provided that it conforms with the requirements of § 150.354; (2) for purposes of a transaction between affiliated entities, the posted price for the new crude petroleum and the posted price or price determined pursuant to § 150.354(c)(3) for base production control level crude petroleum. If there is no posted price in a particular field, the related price for that grade of new domestic crude petroleum which is most similar in kind and quality at the nearest field for which the price is posted and the price determined pursuant to § 150.354(c)(3) for base production control level crude petroleum.

"Firm" means a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls.

V 38-178 SEP 14 73 XUM

"Increased costs of domestic crude petroleum" means the difference between the total cost of domestic crude petroleum during the month of measurement and the total cost of domestic crude petroleum during the month of May, 1973. Increased costs of domestic crude petroleum also means the difference between the total cost of a purchased domestic petroleum product commingled for accounting purposes during the month of measurement and the total cost of that product commingled for accounting purposes during the month of May, 1973.

"Increased costs of imports" means, for an imported product, the difference between the total landed cost for that product landed during the period of measurement and the total landed cost of that product landed during the month of May 1973.

"Landed cost" means: (1) For purposes of complete arms-length transactions, the purchase price at the point of origin plus the actual transportation cost. (2) For purposes of products purchased in arms-length transactions and shipped pursuant to a transaction between affiliated entities, the purchase price at the point of origin plus the transportation cost computed by use of the accounting procedures generally accepted and consistently and historically applied by the firm concerned. (3) For purposes of products purchased in a transaction between affiliated entities and shipped pursuant to an arms-length transaction, the cost of the product computed by use of the customary accounting procedures generally accepted and consistently and historically applied by the firm concerned plus the actual transportation cost. (4) For purposes of products purchased and shipped pursuant to a transaction between affiliated entities, the costs of the product and the transportation, both computed by use of the customary accounting procedures generally accepted and consistently and historically applied by the firm concerned.

"Special products" means gasoline, No. 2–D diesel fuel and No. 2 heating oil.

"Transactions between affiliated entities" means all transactions between entities which are part of the same firm and transactions with entities in which the firm has a beneficial interest to the extent of entitlement of covered product by reason of the beneficial interest.

(c) *Allocation of increased costs.*—(1) *General rule.*—In computing its ceiling prices and base prices for covered products pursuant to §§ 150.355(c) and 150.358(g), a refiner may increase its May 15, 1973, selling prices to each class of purchaser on the first day of each month beginning with September 1973 by an amount to reflect the increased costs of imports and increased costs of domestic crude petroleum allowable under paragraphs (d), (e), and (f) of this section, provided that the amount of increased costs used in computing a ceiling price or base price is calculated by use of the general formula set forth in paragraph (c)(2) of this section. If, in any month beginning with September 1973, a firm establishes a base price for any covered product or a ceiling price for No. 2 heating oil which does not include the entire amount of increased costs calculated pursuant to this formula and allowable under paragraphs (d), (e), and (f) of this section for a particular item, the unused portion may be added to the May 15, 1973, selling price to compute the respective base price or ceiling price for a subsequent month.

For purposes of this subpart, transactions between affiliated entities may be used to calculate increased costs. Whenever a firm uses a landed cost which is computed by use of its customary accounting procedures, the Council may allocate such costs between the affiliated entities if it determines that such allocation is necessary to reflect the actual costs of those entitles or the Council may disallow any costs which it determines to be in excess of the proper measurement of costs. Costs incurred in transactions in which covered products are obtained which are resold without being refined by the firm or commingled for accounting purposes may not be included in the calculation of the general formula.

(2) *General formula.*

$$D_{ij}{}^{n}=\frac{\left[A\times\frac{S_i{}^{n}}{S^{n}}+B\right]S_{ij}{}^{n}}{Q_{ij}{}^{n}}.$$

Where:

D = The dollar increase that can be applied to each May 15, 1973 selling price of the covered product concerned to each class of purchaser to compute either the ceiling price or base price to each class of purchaser.

p = The unit price of a covered product other than crude petroleum. For imported products, the landed cost.

q = The quantity or volume of a covered product other than crude petroleum.

$C^{t}$ = The unit cost of crude petroleum.

Q = The quantity or volume of crude petroleum.

$S$ $\sum_{i=1}^{1}\sum_{j=1}^{3}[p_{ij}q_{ij}]$ which is the total sales of all covered products other than crude petroleum.

$S_i$ $\sum_{j=1}^{3}[p_{ij}q_{ij}]$ which is the total sales of a specific covered product or products other than crude petroleum.

$S_{ij}$ $p_{ij}q_{ij}$ which is the total sales of a specific covered product or products other than crude petroleum at a specific level of distribution. For ceiling prices, j=1. For base prices, j=2 or 3, as appropriate, for special products and j=1, 2 or 3 for other covered products.

$$A=\sum_{k}[(C_k{}^{t}Q_k{}^{t}-C_k{}^{o}Q_k{}^{o})-X^{n}(Q_k{}^{t}-Q_k{}^{o})]$$

Where

$$X^{n}=\frac{\sum_{k=1}^{2}[C_k{}^{o}Q_k{}^{o}]}{\sum_{k=1}^{2}[Q_k{}^{o}]}$$

which is the average unit cost of crude petroleum. For ceiling price determinations, K=2 except in computing $X^{o}$.

$$B=\sum_{k}[p_{ik}{}^{t}q_{ik}{}^{t}-p_{ik}{}^{o}q_{ik}{}^{o}-Y^{o}(q_{ik}{}^{t}-q_{ik}{}^{o})]$$

Where

$$Y^{o}=\frac{\sum_{j=1}^{3}[p_{ij}{}^{o}q_{ij}{}^{o}]}{\sum_{j=1}^{3}[q_{ij}{}^{o}]}-\frac{\sum_{j=1}^{2}[p_{ij}{}^{o}q_{ij}{}^{o}(p_{ij}{}^{n}-p_{ij}{}^{o})]}{\sum_{j=1}^{2}[p_{ij}{}^{o}q_{ij}{}^{n}]}$$

The type of covered product is referenced by the subscript i:

i=1 represents No. 2 heating oil.
i=2 represents gasoline.
i=3 represents No. 2–D diesel fuel.
i=4 represents all covered products other than special products.

The category of purchaser or level of distribution is referenced by the subject j:

j=1 represents sales to ultimate consumers.
j=2 represents sales to retailers.
j=3 represents sales to wholesalers.

The origin of a purchased covered product is referenced by the subscript k:

k=1 represents domestic origin.
k=2 represents foreign origin or import.

SUPERSCRIPTS

n = The fiscal quarter of the preceding year corresponding to the respective period of measurement.

o = The month of May 1973.

t = The period of measurement. For ceiling prices other than No. 2 heating oil, t=the month of July 1973. For ceiling prices of No. 2 heating oil, t=the month of July 1973 as to costs derived from imported crude petroleum and the month of measurement for imported No. 2 heating oil. For base prices, t=the month of measurement. (The month of measurement is the month preceding the current month).

u = The current month for base prices and the ceiling price of No. 2 heating oil and the month of July 1973 for the ceiling prices of gasoline and No. 2–D diesel fuel. Quantities calculated for the current month will be estimates which should be based on the best available data.

MATHEMATICAL TERM

$\sum$ Represents a calculation by summing with respect to the designated subscript all terms designated in the superscript.

(d) *Measurement of increased costs of imports for inclusion in computation of ceiling prices of special products—(1) Adjustment to May 15, 1973, selling price.*—In computing its ceiling prices for a special product, a refiner may increase its May 15, 1973, selling price to each class of purchaser by an amount to reflect the increased costs of imported crude petroleum and imported special product attributable to retail sales of that special product using the differential between the month of July 1973 and the month of May 1973.

(2) *Subsequent adjustments to the ceiling price of No. 2 heating oil.*—Notwithstanding the provisions of subparagraph (1), in computing the ceiling price for No. 2 heating oil, a refiner may, for any month subsequent to August 1973, increase its May 15 selling price to each class of purchaser by an amount to reflect the increased costs of imported crude petroleum using the differential between the month of July 1973 and the month of May 1973 and the increased costs of imported No. 2 heating oil using the differential between the preceding month and the month of May 1973, attributable to retail sales, provided that the refiner uses the amount derived from this computation in lieu of the amount calculated in paragraph (d)(1) of this section. In computations pursuant to this subparagraph, the term $S_i{}^{n}/S^{n}$ should be computed as in paragraph (d)(1) of this section to correspond with the month of July while the term $S_{ij}{}^{n}/S_i{}^{n}$ should be computed to correspond to the appropriate month of measurement used for determining the increased costs of imported No. 2 heating oil.

(e) *Measurement of increased costs of imports and domestic crude petroleum for inclusion in computation of base prices of covered products other than special products.*—In computing base prices for a covered product other than a special product, a refiner may, for any month subsequent to August 1973, increase its May 15 selling price to each class of purchaser to reflect the increased costs of imports and the increased costs of domestic crude petroleum attributable to sales of covered products using the differential between the month of measurement and the month of May 1973, provided that the amount of increased costs included in computing base prices of a particular covered product other than a special product must be equally applied to each class of purchaser. To the extent that a refiner does not allocate increased costs pursuant to this paragraph, it may include that part of its increased costs attributable to special products in computing its base prices for those products pursuant to paragraph (f) of this section except that if any base price of a special product is increased pursuant to paragraph (f) then the part of increased costs attributable to retail sales of special products after July 31, 1973, may not be included in the ceiling price of No. 2 heating oil or the base price of any covered product.

(f) *Measurement of increased costs of imports and domestic crude petroleum for inclusion in computation of base prices of special products.*—In computing base prices for a special product, a refiner may, for any month subsequent to August 1973, increase its May 15 selling price to each class of purchaser by an amount to reflect the increased costs of imports and increased costs of domestic crude petroleum attributable to sales of that special product at other then retail using the differential between the month of measurement and the month of May 1973 provided that such increased costs have not been otherwise allocated pursuant to paragraph (e) of this section.

§ 150.357 [Revoked]

3. Section 150.357 is revoked.

4. Section 150.358(g) is amended to read as follows:

§ 150.358 Price rule: Refiners.

* * * * *

(g) *Base price.*—The base price for a particular month for sales of an item by a refiner is the weighted average price at which the item was lawfully priced in transactions with the class of purchaser concerned on May 15, 1973, or if none occurred on that date, in the transaction next preceding May 15, 1973, plus increased costs of imports and domestic crude petroleum incurred between the month of measurement and May 15, 1973, and measured pursuant to the provisions of § 150.356. In computing the base price, a firm may not exclude any temporary special sale, deal, or allowance in effect on May 15, 1973.

# Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Office of the Secretary

### [ 7 CFR Part 20 ]

## EXPORTERS OF CERTAIN COMMODITIES

### Proposed Reporting Requirements

Notice is hereby given that, purusant to section 812 of the Agriculture and Consumer Protection Act of 1973 (Pub. L. 93-86), it is proposed to issue regulations requiring exporters of certain commodities to report information regarding export sales contracts entered into with respect to such commodities. Section 812 provides that exporters shall make reports covering export sales of wheat, wheat flour, feed grains, oilseeds, cotton and products thereof, and any other commodities the Secretary may designate. The commodities and products thereof for which reports will be required will be set forth in Appendix 1, together with the marketing year and unit of measure to be used in making reports with respect to each commodity. Initially reports will be required with respect to export sales contracts for rice as well as the commodities specified in section 812. Appendix 2 [1] contains the proposed forms on which reports are to be submitted.

Section 812 provides a method to effectively monitor export commitments so that commodities in short supply can be detected, to monitor the foreign demand for certain commodities, and to provide the public with this information.

An open meeting will be held in room 218-A (Administration Building), U.S. Department of Agriculture, 14th and Independence Avenue Northwest, Washington, D.C., on September 19, 1973, at 1:30 p.m., to discuss the proposed regulation with interested persons.

Interested persons may also submit data, views, and comments in connection with the proposal in duplicate to the Estimates Division, Statistical Reporting Service, U.S. Department of Agriculture, Washington, D.C. 20250. In order to be assured of consideration, submissions must be received on or before September 21, 1973. All written submissions made pursuant to this notice will be made available for public inspection in the Office of the Director at the above address during regular business hours (7 CFR 1.27(b)).

The proposed regulations are as follows:

Sec.
20.1 General.
20.2 Administration.
20.3 Delegation of authority.
20.4 Definitions.
20.5 Announcements of commodities subject to reports.
20.6 Submission of reports.
20.7 Confidentiality of reports.
20.8 Failure to report.
20.9 Records.
20.10 Place of submission of reports.
20.11 Additional reports.

AUTHORITY: Sec. 812 of the Agriculture and Consumer Protection Act of 1973, Pub. L. 93-86.

### § 20.1 General.

The regulations of this Part 20 are issued to implement the export sales reporting requirements of section 812 of the Agriculture and Consumer Protection Act of 1973. The Act provides as follows:

All exporters of wheat and wheat flour, feed grains, oilseeds, cotton and products thereof, and other commodities the Secretary may designate produced in the United States shall report to the Secretary of Agriculture, on a weekly basis, the following information regarding any contract for export sales entered into or subsequently modified in any manner during the reporting period: (a) Type, class, and quantity of the commodity sought to be exported, (b) the marketing year of shipment, (c) destination, if known. Individual reports shall remain confidential but shall be compiled by the Secretary and published in compilation form each week following the week of reporting. All exporters of agricultural commodities produced in the United States shall upon request of the Secretary of Agriculture immediately report to the Secretary any information with respect to export sales of agricultural commodities and at such times as he may request. Any person (or corporation) who knowingly fails to report export sales pursuant to the requirements of this section shall be fined not more than $25,000 or imprisoned not more than one year, or both. The Secretary may, with respect to any commodity or type or class thereof during any period in which he determines that there is a domestic supply of such commodity substantially in excess of the quantity needed to meet domestic requirements, and that total supplies of such commodity in the exporting countries are estimated to be in surplus, and that anticipated exports will not result in excessive drain on domestic supplies, and that to require the reports to be made will unduly hamper export sales, provide for such reports by exporters and publishing of such data to be on a monthly basis rather than on a weekly basis.

### § 20.2 Administration.

The regulations of this part will be administered by the Statistical Reporting Service (SRS) under the general supervision of the Administrator, SRS. Information pertaining to these regulations may be obtained from the office specified in § 20.10.

### § 20.3 Delegation of authority.

Authority is hereby delegated to the Administrator to promulgate amendments and revisions to the regulations in this part.

### § 20.4 Definitions.

As used in these regulations and in all instructions, forms, and documents pertaining hereto, the words and phrases defined in this section shall have the meaning assigned to them as follows:

(a) *Administrator.*—The Administrator, Statistical Reporting Service, U.S. Department of Agriculture.

(b) *Buy-back contract.*—A transaction under which a reporting exporter having sold a commodity for export to a foreign buyer liquidates the export sale contract by making an off-setting purchase of the same kind of commodity from the same foreign buyer.

(c) *Commodity.*—Wheat and wheat flour, feed grains, oil seeds, cotton, and products thereof and any other agricultural commodity the Secretary may designate, "Commodity" shall also mean a commodity having an identifying characteristic as described in any announcement issued pursuant to § 20.5 such as class(es) of wheat, or staple length(s) of cotton. "Commodity" shall refer only to a commodity produced in the United States or a product processed in the United States from a commodity produced in the United States.

(d) *Country of destination.*—(1) Any country outside the United States or, (2) any territory or possession of the United States. Country of destination shall be designated "unknown" if such information is not available at time of compiling a report.

(e) *Export.*—A shipment of a commodity from the United States destined to a country specified in paragraph (d) of this section. The commodity shall be deemed to have been exported on the date of the applicable export carrier on-board bill of lading or the date the commodity is received for shipment as specified on the bill of lading in the case of a commodity received for shipment in a lash barge or containerized van if a through on-board bill of lading is issued for shipment to a country specified in paragraph (d) of this section.

(f) *Export carrier.*—The vessel on which a commodity is exported from the United States to a country specified in paragraph (d) of this section, or if export is by railcar, truck, or airplane, "export carrier" means such railcar, truck, or airplane.

(g) *Exports for exporter's own account.*—Shipments made by the reporting exporter which are unsold at the time of export, shipments on consignment to selling agents of the reporting exporter for subsequent sale for the account of the reporting exporter, shipments by a reporting exporter to a country outside the United States for his own account, shipments by the reporting exporter that have not been allocated to any outstanding export sale, and shipments from the United States to Canada in bond for subsequent shipment to a third country.

(h) *Export sale.*—A transaction entered into between a reporting exporter and a foreign buyer whose place of business with respect to the transaction is outside the United States. The transaction must represent a written agreement under which (1) the exporter agrees to export the commodity, (2) the foreign buyer agrees to receive the commodity, (3) there is a firm dollar and cent price or an agreed formula for determining a price based on a premium or discount to a price in a designated future delivery month at a recognized contract market, and (4) payment will be made to the reporting exporter by the foreign buyer for delivery of the commodity. If the transaction is concluded with an agent (other than an employee) of the foreign buyer and the agent's place of business is in the United States, the resulting contract shall be construed to be between the reporting exporter and the foreign buyer. The quantity of "outstanding export sale" means the quantity not yet exported under an export sale. Export sale shall not include a transaction which is conditioned upon the imposition or non-imposition of export controls and such a transaction shall not be reported under these regulations.

(i) *Foreign buyer and foreign seller.*—A person whose place of doing business with respect to the transaction is outside the United States.

(j) *Marketing year.*—The reporting period specified for a commodity in Appendix 1.

(k) *Optional origin contracts.*—An export sale contract between a reporting exporter and a foreign buyer under which the reporting exporter has the option of exporting the commodity from the United States or from one or more other exporting countries or an export sale contract under which no origin is specified.

(l) *Person.*—An individual, partnership, corporation, association or other legal entity.

(m) Purchases from foreign sellers. The purchase of a commodity from a seller whose place of business with respect to the transaction is outside the United States when the terms of the contract provide that the commodity to be delivered under the contract will be exported from the United States or where the seller has the option of exporting the commodity from the United States or from one or more other exporting countries.

(n) *Quantity.*—The actual contract quantity (exclusive of any upward or downward tolerance) specified in the agreement between the reporting exporter and foreign buyer or seller.

(o) *Reporting exporter.*—A person who is engaged in the United States in the business of selling for export any commodity subject to these regulations, who maintains a bona fide business office for such purpose in the United States, who has an agent in the United States upon whom service of judicial process may be made, and who sells a commodity to a foreign buyer irrespective of whether or not such person may appear as the shipper on the export documentation or whether or not such person is required to file a Shipper's Export Declaration. A reporting exporter shall not include agents of either the reporting exporter or foreign buyer, brokers, or freight forwarders unless such agents, brokers or freight forwarders are acting in the capacity of a principal.

(p) *United States.*—All of the 50 States, the District of Columbia and Puerto Rico.

### § 20.5 Announcement of commodities subject to reports.

Commodities for which reports are required under these regulations are set forth in Appendix 1 below. Any change therein will be made by publication in the FEDERAL REGISTER of an amendment thereto, and, in addition, announcement of such change will be made through the press and ticker service. The unit of measure to be used in reporting the commodity, the beginning and ending dates of the marketing year for each commodity, and any other information deemed necessary to be included in the report will be specified in Appendix 1 below and amendments thereto and in the announcements through press and ticker service.

### § 20.6 Submission of reports.

(a) *Weekly reports.*—For each commodity for which reports are required under these regulations, the reporting exporter shall file weekly with the office specified in § 20.10 and not later than the time specified in paragraph (m) of this section, a report by marketing year on C.E. 06-0095 "Report of Export Sales and Exports," and on C.E. 06-0096, "Report of Optional Origin Sales," setting forth the information required by this section and by the instructions to the forms as set forth in Appendix 2 below. Each report shall contain the full business name, address and telephone number of the reporting exporter, the name and signature of the person submitting the report on behalf of the reporting exporter and, in addition to the following, any other information required by Appendix 1 and Appendix 2 below:

(1) *United States origin sales only.*—(i) *Initial report.*—Total quantity of outstanding export sales by country of destination and exports for the exporter's own account that have not been applied to an export sale.

(ii) *Second and subsequent reports.*—(a) Total quantity of outstanding export sales from the previous report by country of destination.

(b) Quantity of export sales made during the week expressed in the specified unit of measure (do not include any tolerance). Include the quantity of any optional origin export sale for which an option was exercised during the week to export the commodity from the United States.

(c) Quantity of any purchases of the same kind of commodity made from foreign sellers during the week.

(d) Quantity of export sales canceled and quantity of buy-back contracts made during the week.

(e) Changes in destination during the week for sales and exports previously reported.

(f) Changes in the marketing year during the week for sales previously reported.

(g) Exports made against sales during the week.

(h) Total outstanding balance of export sales at the close of business for the current report.

(i) Total outstanding exports made for the reporting exporter's own account. Include shipments from the United States to Canada where the commodity will be in bond until exported from Canada to a third country.

(2) *Optional original sales (United States and other countries).*—(i) *Initial report.*—Total quantity of outstanding export sales by country of destination.

(ii) *Second and subsequent reports.*

(a) Total quantity of outstanding export sales from the previous report by country of destination.

(b) Quantity of export sales made during the week expressed in the specified unit of measure (do not include any tolerance) by country of destination.

(c) Quantity of export sales for which an option was exercised during the week which would determine the origin of the commodity to be exported with the origin indicated on C.E. 06-0096 as the United States or other than the United States.

(d) Quantity of optional export sales canceled and the quantity of optional buy-back contracts made during the week.

(e) Changes in destination during the week for sales previously reported.

(f) Changes in the marketing year during the week for sales previously reported.

(g) Total outstanding balance of optional export sales for which an option has not been exercised at the time of compiling the report.

(b) *Exporters who are required to report.*—The reporting exporter has the sole responsibility of reporting any and all information required by these regulations. The following are examples of who shall be considered the reporting exporter for the purpose of these regulations. (Firm A in each example is a firm whose place of doing business with respect to the transaction is in the United States, and the commodity to be delivered under the purchase contract

[1] Filed as part of the original document.

V 38-178 SEP 14 73 XUM

is subject to these regulations. See § 20.4 (i) for definition of a foreign buyer and foreign seller).

(1) Firm A makes an export sale to Firm B whose place of doing business with respect to the transaction is also in the United States. Firm B has made or will make an export sale to a foreign buyer. In this case Firm A cannot report the sale to Firm B since Firm B's place of doing business with respect to the transaction is located in the United States. In this example, Firm B is required to report the sale to the foreign buyer.

(2) Firm A makes an export sale to a foreign buyer through the foreign buyer's agent (other than an employee of the foreign buyer) and the agent's place of doing business with respect to the transaction is in the United States. In this example Firm A is required to report the export sale since the resulting contract is between Firm A and the foreign buyer.

(3) Firm A consigns an export to his agent (other than an employee of Firm A). When the agent makes a sale to a foreign buyer, Firm A is required to report the sale. If the agent makes the sale to a firm whose place of doing business with respect to the transactions is in the United States, Firm A will not report the sale.

(4) Firm A makes a purchase from a foreign seller. In this example, Firm A is required to report the purchase.

(5) Firm A makes a purchase from an agent of a foreign seller and the agent's place of doing business with respect to the transaction is in the United States. In this example, Firm A is required to report the purchase. The agent cannot report the sale to Firm A since he is not a principal party in interest in the contract and the foreign seller is not required to make a report of the sale since he is not a reporting exporter.

(6) If a reporting exporter has a transaction not described in subparagraphs (1) through (5) of this paragraph and he is in doubt whether he should report the transaction, he should request a decision from the office specified in § 20.10.

(c) *Monthly reports.*—The information described in paragraph (a) of this section shall be reported monthly when specified by an announcement issued pursuant to § 20.5.

(d) *No change during reporting period.*—If the reporting exporter did not have any activity during a reporting period which would change his last report and his last report reflects his outstanding export sales and exports made for his own account, the reporting exporter is nevertheless required to file a new report showing the still outstanding export sales and exports made for his own account.

(e) *Contract terms.*—(1) The first report required by these regulations shall include a report showing certain contract terms of export sales and foreign purchases which are outstanding at the close of the reporting period. Subsequent reports of contract terms shall be filed when specified in an announcement issued pursuant to § 20.5. The report showing contract terms shall be filed on C.E. 06–0097, "Contract Terms Supporting Export Sales," and shall include the following:

(i) Reporting exporter's contract number.

(ii) Date of export sale.

(iii) Name of the foreign buyer and the country in which the buyer has his place of business with respect to the transaction.

(iv) Coast of export. For optional export origin sales also show the other countries covered by the export sales. If no other countries are specified in the export sale, so indicate.

(v) Delivery period specified in the export sale.

(vi) Delivery terms specified in the export sale (F.O.B., C.&F., etc.).

(vii) Actual quantity of the export sale.

(viii) Quantity not exported against the sale (do not include any tolerance).

(ix) On purchases from foreign sellers, show separately from export sales, the name of the foreign seller, the country in which the foreign seller has his place of business with respect to the transaction, and the terms of the purchase made from the foreign seller as described in subparagraph (1) (i), (ii) and (iv) through (viii) of this paragraph (e).

(f) *Unknown destinations at time of reporting.*—If a reporting exporter files a report showing unknown destinations, he shall be responsible for taking whatever action is necessary to determine the ultimate destination and to report the country of destination in his next report after the destination becomes known to him.

(g) *Export for exporter's own account.*—Exports for exporter's own account for which an export sale has not been made shall be reported separately from export sales. When an export sale is made for a commodity exported for the exporter's own account (excluding shipments to Canada in bond where an export sale has already been reported), the sale shall be reported as an export sale on the next report. A corresponding quantity shall be deducted from the quantity shown as exported for the exporter's own account on the previous report and a corresponding quantity shall be shown as an export against an export sale on the current report even though the export may not have been made during the current reporting period. For shipments to Canada in bond where the export sale has already been reported, deduct the quantity shipped from Canada from the quantity exported for the exporter's own account and include a corresponding quantity as an export against an export sale, even though the export may not have been made during the reporting period.

(h) *Optional class or kind of commodity.*—If the export sale provides for an option as to the class or kind of commodity to be delivered under the export sale, the reporting exporter should report the particular class or kind of commodity expected to be exported.

(i) *Range in contract quantity.*—If the export sale provides for a range in quantity (e.g. 10,000 metric tons to 12,000 metric tons with or without a loading tolerance) with the reporting exporter or buyer having the option to declare a firm quantity at a later date, the reporting exporter shall report the maximum export sale quantity (exclusive of any loading tolerance). If a lesser quantity is exercised at a later date, the reporting exporter shall report the reduction as an amendment to an export sale previously reported by him.

(j) *Transfer of unexported balances from one marketing year to the next marketing year.*—If exports against an export sale are not complete by the end of the marketing year in which the commodity is being reported for export, the reporting exporter shall transfer the quantity not exported against the export sale to the next market ing year on the first report submitted after the beginning of the new marketing year.

(k) *Errors on previous reports.*—Whenever an exporter discovers an error or is advised by SRS of an error on a sale to the next marketing year on the prior report, he shall furnish a corrected report for that reporting period together with a complete explanation of such reporting error.

(l) *When reports are not required.*—(1) A reporting exporter shall submit reports only for those commodities for which he has outstanding export sales, has made exports for his own account for which an offsetting export sale has not been made and reported, or has made a purchase from a foreign seller.

(2) A reporting exporter may discontinue reporting for a commodity only when his actual exports and other required reporting of changes have reduced to zero all of his export sales, exports made for his own account, and purchases from foreign sellers. The reporting exporter shall report his zero balance prior to discontinuing reporting for the commodity involved.

(3) If a reporting exporter discontinues making reports because he has reached a zero balance for a particular commodity, he shall be responsible to commerce reporting again once he has made a new export sale or has made a new export for his own account or has made a new purchase from a foreign seller for that commodity.

(m) *Manner and time of reporting*—(1) *Manner.*—All reports must be filed in an original with the office specified in § 20.10. The original must be signed in an original signature by a person authorized to submit reports on behalf of the reporting exporter.

(2) *Time of filing reports*—(i) *Reports that are delivered in person.*—If the reports described in paragraph (a) of this section are delivered in person they must be received in the office specified in § 20.10 no later than 12:00 noon Washington time on each Thursday and shall set forth the information described in paragraph (a) of this section as of the preceeding Sunday.

(ii) *Reports that are mailed.*—If the reports described in paragraph (a) of this section are mailed to the office specified in § 20.10, the envelope containing the reports must show that it was received by the U.S. Postal Service no later than 5:00 p.m. Monday (time zone at place of mailing) and shall set forth the information described in paragraph (a) of this section as of the preceeding Sunday. Do not use a meter to show the time or date mailed.

**§ 20.7 Confidentiality of reports.**

A reporting exporter's individual reports shall remain confidential and subject to examination only by designees of the Administrator of SRS. All reports filed by exporters will be compiled and published in compilation form each week following the week of reporting.

**§ 20.8 Failure to report.**

Any person who knowingly fails to report export sales pursuant to the requirements of these regulations shall be fined not more than $25,000 or imprisoned not more than one year, or both.

**§ 20.9 Records.**

Each reporting exporter shall establish and maintain accurate records as to all export sales of commodities subject to these regulations and to support the reports made under these regulations. Such records shall include, but shall not be limited to, export sales contracts or other agreements with the foreign buyer or foreign seller pursuant to which any export has or will be made; bills of lading or delivery documents evidencing all such exports and inspection and weight certificates relating thereto. Such records shall be available during regular business hours for inspection and audit by authorized employees of the United States Department of Agriculture and shall be preserved for three years after the date of export to which they relate.

**§ 20.10 Place of submission of reports.**

Reports required to be submitted under these regulations shall be addressed to or delivered to the following office:

Statistical Reporting Service, Export Sales Reports, U.S. Department of Agriculture, Room 0250, South Agriculture Building, 14th and Independence Avenue, Washington, D.C. 20250.

**§ 20.11 Additional reports.**

The reporting exporter shall file such additional reports as may be required from time to time with the office specified in § 20.10.

Signed at Washington, D.C., on September 11, 1973.

CARROLL G. BRUNTHAVER,
*Acting Secretary.*

APPENDIX 1—COMMODITIES SUBJECT TO REPORTS, UNITS OF MEASURE TO BE USED IN REPORTING, AND BEGINNING AND ENDING DATES OF MARKETING YEARS

| Commodity to be reported | Unit of measure to be used in reporting | Beginning of marketing year | End of Marketing year |
|---|---|---|---|
| Wheat—Hard red winter | Metric tons | July 1 | June 30. |
| Wheat—Soft red winter | do | do | Do. |
| Wheat—Hard red spring | do | do | Do. |
| Wheat—Winter | do | do | Do. |
| Wheat—Durum | do | do | Do. |
| Wheat—Mixed | do | do | Do. |
| Wheat flour—72 percent (type of extraction (including clears), bulgur, semolina, farina and malted wheat flour (All of these products of wheat to be reported as wheat flour). | do | do | Do. |
| Barley—Unmilled | do | do | Do. |
| Corn—Except seed, unmilled | do | Oct. 1 | Sept. 30. |
| Rye—Unmilled | do | July 1 | June 30. |
| Oats—Unmilled | do | do | Do. |
| Grain sorghums—Unmilled | do | Oct. 1 | Sept. 30. |
| Soybeans | do | Sept. 1 | Aug. 31. |
| Soybean oil cake and meal | do | Oct. 1 | Sept. 30. |
| Soybean Oil including: Crude (including degummed), once refined, soybean salad oil (including refined and further processed by bleaching, deodorizing or winterizing), hydrogenated. | do | do | Do. |
| Flaxseed | do | July 1 | June 30. |
| Linseed Oil—including raw, boiled, etc | do | do | Do. |
| Cottonseed | do | Aug. 1 | July 31. |
| Cottonseed oil cake and meal | do | Oct. 1 | Sept. 30. |
| Cottonseed oil, including: crude, once refined, cottonseed salad oil (refined and further processed by bleaching, deodorizing or winterizing), hydrogenated. | do | Oct. 1 | Do. |
| Cotton—Raw, extra long staple | Running bales | Aug. 1 | July 31. |
| Cotton—Raw, staple length 1⅛s inches and over | do | do | Do. |
| Cotton—Raw, staple length 1 inch up to 1⅛ inches | do | do | Do. |
| Cotton—Raw, staple length under 1 inch | do | do | Do. |
| Rice—Long grain, brown | Metric tons | do | Do. |
| Rice—Medium, short and mixed grain, brown | do | do | Do. |
| Rice—Long grain, milled | do | do | Do. |
| Rice—Medium, short and mixed grain, milled | do | do | Do. |

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

[ 50 CFR Part 32 ]

### LEWIS AND CLARK NATIONAL WILDLIFE REFUGE, OREG.

#### Notice of Proposed Rulemaking

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior by the Migratory Bird Conservation Act of February 18, 1929, as amended (45 Stat. 1222 (16 U.S.C. 715)), and the National Wildlife Refuge System Administration Act of 1966 (80 Stat. 927 as amended (16 U.S.C. 668dd)) as delegated to the Director, Bureau of Sport Fisheries and Wildlife by Chapter 2, Part 242 of the Departmental Manual, it is proposed to amend 50 CFR Part 32 by the addition of Lewis and Clark National Wildlife Refuge, Oregon to the list of areas open to hunting of migratory birds.

It has been determined that regulated hunting of migratory birds may be permitted as designated on the above refuge without detriment to the objectives for which the area was established.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections, with respect to the proposed amendment, to the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C. 20240, by September 30, 1973.

Accordingly, § 32.11, list of open areas, migratory game birds, amended by the following addition:

OREGON

LEWIS AND CLARK NATIONAL WILDLIFE REFUGE

CHARLES M. LOVELESS,
*Acting Director, Bureau of Sport Fisheries and Wildlife.*

SEPTEMBER 11, 1973.

### COLUMBIAN WHITE-TAILED DEER NATIONAL WILDLIFE REFUGE

#### Notice of Proposed Rulemaking

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior by the Migratory Bird Conservation Act of February 18, 1929, as amended (45 Stat. 1222 (16 U.S.C. 715)), and the National Wildlife Refuge System Administration Act of 1966 (80 Stat. 927 as amended (16 U.S.C. 668dd)), as delegated to the Director, Bureau of Sport Fisheries and Wildlife by Chapter 2, Part 242 of the Departmental Manual, it is proposed to amend 50 CFR, Part 32 by the addition of Columbian White-Tailed Deer National Wildlife Refuge, Washington, to the list of areas open to hunting of migratory birds.

It has been determined that regulated hunting of migratory birds may be permitted as designated on the above refuge

V 38-178
SEP 14 73
XUM

without detriment to the objectives for which the area was established.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportuntiy to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections, with respect to the proposed amendment, to the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C. 20240, by September 30, 1973.

Accordingly, § 32.11, list of open areas, migratory game birds, is amended by the following addition:

WASHINGTON

COLUMBIAN WHITE-TAILED DEER NATIONAL WILDLIFE REFUGE

CHARLES M. LOVELESS,
*Acting Director, Bureau of Sport Fisheries and Wildlife.*

SEPTEMBER 11, 1973.

[FR Doc.73-19577 Filed 9-13-73;8:45 am]

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

### [ 21 CFR Parts 121, 135 ]

### RESTRICTION ON LEVEL OF COPPER IN ANIMAL FEED

### Proposed Amendment to the List of Substances That Are Generally Recognized as Safe

A new animal drug application was filed with the Food and Drug Administration requesting approval of the addition of copper from copper sulfate or copper oxide to swine feed at levels up to 250 parts per million (ppm) as a growth promotant. Review of the application showed that copper was effective for improving rate of gain and feed efficiency when fed to swine at high levels (125–250 ppm). Questions arose, however, concerning animal safety, human safety, and the environmental impact of such a practice. Each of these problems was studied in depth to determine whether high-level use of copper in swine feed for the purposes of improving growth rate and feed efficiency could be approved.

The animal safety review determined that animal health would not be compromised provided that total dietary copper did not exceed 250 ppm. Toxicology data presented in the application showed that such a level did not present a hazard to swine. Other published data support this conclusion (R. Braude, *Copper as a Growth Stimulant in Pigs (cuprum pro pecunia), Symposium on Copper's Role in Plant and Animal Life*, pp. 55–66, Vienna, Austria, 1965).

Human safety questions were raised based on data in the application and data published in scientific literature showing that copper accumulates in the livers of swine fed high levels of the element. This was documented by H. D. Wallace, Professor, Department of Animal Science, University of Florida, in a comprehensive review of the use of copper in swine diets (*High Level Copper in Swine Feeding, A Review of Research in the United States*, 1967, sponsored by International Copper Research Association, Inc., 1271 Avenue of the Americas, New York, NY 10020). The following table, taken from Wallace's review, summarizes research findings on liver copper residues in swine resulting from various dietary copper treatments. These data show that while there is considerable variation in the degree to which copper feeding increases liver copper content, a trend nevertheless exists. Wallace attributes the variability to differences in diets, protein sources, copper sources, analytical methods, and interactions of copper with other minerals.

SWINE LIVER COPPER CONCENTRATIONS AS INFLUENCED BY DIETARY COPPER LEVEL [1]

| Copper source | Dietary Copper level ppm | Total number of pigs involved | Number days on test | Liver copper, ppm (dry matter basis) | |
|---|---|---|---|---|---|
| | | | | Control pigs | Copper pigs |
| $CuSO_4 \cdot 5H_2O$ | 125 | 18 | 106 | 19 | 70 |

[2] Copper was either removed from diet or reduced in amount during the feeding as indicated.

These data also demonstrate that when copper supplementation is removed from the diet when the pig reaches about 125 pounds body weight, liver copper content returns to normal or near normal by slaughter weight (225 pounds). The fact that feeding high level copper to swine would elevate liver copper raises the concern that these liver residues would contribute additional copper to the diet of humans. Scheinberg (*Federation Proceedings*, Vol. 20, No. 3, Supplement 10, pp. 179–185, Sept. 1961) and Scheinberg and Sternlieb (*Pharmacol. Rev.* 12:355, 1960) consider that the likelihood of excess copper in human diets is much greater than that of a deficiency.

The problem of copper residue in edible tissues was further complicated by the fact that copper is an essential nutrient normally present in varying amounts in natural foodstuffs consumed by man and animals, and also normally present in varying amounts in organs and tissues of man and animals. It was determined that, in order not to increase the load of copper in the human diet, no increase in tissue copper level above that normally found in swine not fed high level copper could be permitted without basic toxicology data.

The environmental impact of high level copper feeding was also fully considered. The available literature shows that copper is very poorly absorbed in the intestine, and approximately 75 percent of the ingested copper is excreted in the feces when normal levels are fed. (Comer and Bronner, eds. *Mineral Metabolism*, Vol. 2, Part B, Chapter 32, *Copper*, Academic Press, New York, NY, 1962). A greater percentage is excreted when dietary copper level is elevated. Since copper is an element, and thus not subject to further chemical breakdown, it was determined that a study should be made of the environmental implications of the practice of adding copper to swine feeds at high levels in view of the fact that significant amounts of copper would be expected to be deposited in or on soils fertilized by manures derived from commercial swine production.

Accordingly, the Commissioner of Food and Drugs requested that an Ad Hoc Advisory Committee of scientists, expert

in the various fields and disciplines pertinent to the subject, review the matter and submit their recommendations. A copy of that Committee's report entitled "Report to the Commissioner Food and Drug Administration from the Ad Hoc Committee on High Level Copper Swine Feeding Program" is available for public review at the Hearing Clerk's office, Rm. 6–86, 5600 Fishers Lane, Rockville, MD 20852, and may be purchased from the National Technical Information Service (NTIS), 5285 Port Royal Rd., Springfield, VA 22151.

The Ad Hoc Committee reported that the possible environmental effects resulting from the addition of high levels of copper to swine rations have not been adequately studied and recommended research on such possible effects and the associated waste disposal problems. The Ad Hoc Committee reported that copper levels which may be found in plants subjected to high level copper manure applied to soil will depend upon many factors, including the plant species, the stage of maturity, and the available copper in the soil. In addition, different parts of the plant will also vary greatly in copper content at any given copper level in the soil. Most plants will respond adversely in terms of yield when the plant copper content appreciably exceeds 20 ppm on a dry weight basis. The amount of manure which may be applied to a given acreage will depend on the soil type, soil pH, content of clay and organic matter, weather, drainage, and other treatments such as the application of lime. Long term continuous application of from 3 to 6 pounds of copper annually per acre, which would result from the use of high copper swine manure, may be expected to result in accumulation of copper in the soil. Whether or not this reaches hazardous levels will depend in large measure upon the soil type and other factors.

The Ad Hoc Committee further reported that (1) the toxicity of very low concentrations of copper to desirable phytoplankton and zooplankton is recognized, and on the basis of present information it is difficult to predict how serious the pollution of surface waters from high copper applications would be; and (2) available information does not permit a general statement regarding time required to build up copper to a hazardous level since soil composition will be critical. The Ad Hoc Committee therefore made the following recommendations:

1. That if high level (250 ppm) copper rations be permitted, then it should be stipulated:

a. That suitable precautions should be taken to include adequate levels of zinc and iron in the diets.

b. That precautions should be introduced to limit the distribution of manure from swine fed the high level copper diets to 20 tons per acre per year (3 to 6 lbs of copper).

c. That warnings shoud be issued regarding the possible hazard of grazing sheep on areas fertilized with manure from such a swine-feeding operation without adequate provision for molybdenum and sulfate in the sheep diet.

d. That depending upon the soil to which the manure is applied, suitable monitoring should be made of the build-up of available copper, preferably at not less than five-year intervals, on low exchange capacity soils.

e. That if lagooning of manure from such swine-feeding operations is practiced, procedures should be instituted to remove the copper prior to soil application of the solid residue.

f. That to prevent runoff into water supplies, care should be taken not to put manure on frozen land where runoff can be a problem.

2. Research should be instituted into the long-term effects of increases in copper intake in food and water in both animals and humans in order to estimate the maximum safe dose. Special attention should be given to possible teratological effects. These studies should address the life span effects and the relation to degenerative diseases.

3. The present monitoring-analysis techniques are in need of evaluation and additional research. Specificially, plant and soil copper values as indicators of copper buildup should be throughly evaluated. Present information does not permit a general statement regarding the time required to build up copper to a hazardous level since soil composition will be critical. It is for this reason that we recommend a monitoring program.

The relevant findings of the Ad Hoc Committee were reviewed by the U.S. Department of Agriculture and the Environmental Protection Agency. Both agencies agreed with the findings of the Ad Hoc Committee and that the potential for adverse environmental impact from the feeding of a high level of copper was significant.

Based upon the findings of the Ad Hoc Committee, comments from the U.S. Department of Agriculture and the Environmental Protection Agency, the fact that other growth-promoting drugs without adverse environmental impact were available for use in swine production, and other relevant information, the Commissioner of Food and Drugs concluded that the request for approval of the addition of high levels of copper to swine feed should be denied. The sponsor of the new animal drug application was so informed and withdrew the application.

The Ad Hoc Committee also reported that the use of high levels of copper in feed is currently being extensively practiced for both swine and poultry. The Commissioner has therefore concluded that there is a need to clarify the status of copper as a feed ingredient since various copper compounds are presently listed as generally recognized as safe (GRAS) as trace ingredients added to animal feeds under 21 CFR 121.101(f), which provides for the addition of copper to animal feed as a nutritional dietary supplement at levels consistent with good feeding practice.

Accordingly, the Commissioner has reviewed the current provisions of the regulations, literature on animal nutrition with respect to copper, and current manufacturing practice in the feed industry. While the quantitative requirements for copper are not known for all classes of swine and poultry, most nutritionists believe that 5–15 ppm copper in the diet is adequate. Nutrient Requirements of Domestic Animals (Pub. 1599, 1968, Swine; Pub. ISBM 0–309–01861–7, 1971, Poultry; National Academy of Sciences, 2101 Constitution Ave., Washington, DC 20418), list the copper requirement for baby pigs and turkey poults as 6 ppm and for chicks as 4 ppm. Nutritional need for copper may be somewhat increased by demands of gestation, lactation, or maximum growth, although no quantitative data are available.

It has become standard practice of mineral premix manufacturers routinely to include copper in the trace mineral supplements used for swine and poultry feeds. Almost all trace mineral premixes currently sold contain copper, more as insurance against deficiency rather than to alleviate a specific lack of copper in feed. The amount of copper added to a finished feed may vary for different brands of mineral supplements, but is usually about 5–15 ppm, which approximates the amount recommended by the National Academy of Sciences. The feed industry considers this level of copper supplementation to be good feeding practice since it is reasonably consistent with the amount regarded as required by animals.

The mean of the naturally occurring copper content of representative swine and poultry rations, including those containing ingredients naturally high in copper (e.g., soybean meal, milo, barley), is approximately 12 ppm with a standard deviation of about 4 ppm. Assuming a normal distribution of copper in feeds, 99.87 percent of all similar swine and poultry diets can statistically be expected to contain 24 ppm or less copper from naturally occurring copper sources (obtained by adding the mean and 3 times the standard deviation (12+(3 x 4)).

Therefore, the addition of copper from trace mineral premixes to animal feeds at levels up to 15 ppm in the finished feed, even where such feeds contained copper at the high extreme of the population, would not be expected to result in finished feeds containing more than 40 ppm copper. Thus, finished swine and poultry feed will not contain over 40 ppm total copper if 15 ppm is permitted to be added to the feed. On the basis of the Ad Hoc Committee report and other available information, the Commissioner concludes that this level, taking into consideration natural background copper and up to 15 ppm of copper added for nutritional purposes, will not pose a hazard to swine or poultry, humans consuming animal products, or the environment. Accordingly, it is proposed that copper may be added to swine or poultry feed in accordance with good feeding practice at levels not to exceed 15 ppm.

V 38-178
SEP 14 73
XUM

Further, the Commissioner has carefully considered the environmental effects of this proposal pursuant to 21 CFR 6.1 and concludes for the above reasons that an environmental impact statement is not needed.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784–1788, as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed that Parts 121 and 135 be amended as follows:

1. In § 121.101(f) by revising the entry "Copper" to read as follows:

**§ 121.101 Substances that are generally recognized as safe.**

* * * * *

(f) * * *

| *Element* | *Source compounds* |
|---|---|
| * * * | * * * |
| Copper (may be added to swine or poultry feed in accordance with good feeding practice at a level not to exceed 15 parts per million) | Copper carbonate.<br>Copper chloride.<br>Copper gluconate.<br>Copper hydroxide.<br>Copper orthophosphate.<br>Copper oxide.<br>Copper pyrophosphate.<br>Copper sulfate. |
| * * * | * * * |

2. In Part 135 by adding to Subpart B the following new section:

**§ 135.____ Addition of copper to swine and poultry feed.**

Copper salts may be added to swine and poultry feed for nutritional purposes in accordance with good feeding practice at a level not to exceed 15 parts per million. Addition of more than 15 parts per million of copper to finished swine or poultry feed is unlawful and causes both the feed and the animals to be adulterated.

Interested persons may, on or before November 12, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6–86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated September 4, 1973.

A. M. SCHMIDT,
*Commissioner of Food and Drugs.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

**[ 14 CFR Part 71 ]**

[Airspace Docket No. 73-SO-38]

### TRANSITION AREA

### Proposed Alteration

On June 27, 1973, FR Doc. No. 73-12850 was published in the FEDERAL REGISTER (38 FR 16914), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Dillon and Bennettsville, S.C., transition area.

Subsequent to publication of the notice, it was determined that the type of aircraft utilizing Dillon County Airport requires a basic radius circle of 6.5 in lieu of 5 miles. Additionally, the Dillon extension was erroneously predicated on the 245° in lieu of the 239° bearing, and the Bennettsville extension was erroneously predicated on the 239° in lieu of the 245° bearing.

In consideration of the foregoing, effective immediately, the following proposed descriptions published in FR Doc. No. 73-12850 are amended to read:

DILLON, S.C.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Dillon County Airport (Lat. 34°27'00" N, Long. 79°22'00" W); within 2.5 miles each side of Florence VORTAC 046° radial, extending from the 6.5-mile radius area to 16 miles northeast of the VORTAC; within 3 miles each side of the 239° bearing from Dillon RBN (Lat. 34°27'01" N, Long. 79°22'09" W), extending from the 6.5-mile radius area to 8.5 miles southwest of the RBN.

BENNETTSVILLE, S.C.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Bennettsville Airport (Lat. 34°37'45" N, Long. 79°43'57" W.); within 3 miles each side of the 245° bearing from Bennettsville RBN (Lat. 34°37'39" N, Long. 79°43'53" W), extending from the 6.5-mile radius area to 8.5 miles southwest of the RBN; excluding the portion within Darlington, S.C., transition area.

(Sec. 307(a) Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c))

Issued in East Point, Ga., on September 6, 1973.

PHILLIP M. SWATEK,
*Director, Southern Region.*

[FR Doc.73-19581 Filed 9-13-73;8:45 am]

## Federal Highway Administration

**[ 23 CFR Part 772 ]**

### TRAFFIC NOISE

### Invitation for Comment on Proposed Guidelines

Section 114 of the Federal-Aid Highway Act of 1973 provides that:

The Secretary, after consultation with the Administrator of the Environmental Protection Agency and appropriate Federal, State and local officials, may promulgate standards for the control of highway noise levels for highways on any Federal-aid system for which project approval has been secured prior to July 1, 1972. The Secretary may approve any project on a Federal-aid system to which noise-level standards are made applicable under the preceding sentence for the purpose of carrying out such standards. Such project may include, but is not limited to, the acquisition of additional rights-of-way, the construction of physical barriers, and landscaping. Sums apportioned for the Federal-aid system on which such project will be located shall be available to finance the Federal share of such project. Such project shall be deemed a highway project for all purposes of this title.

Pursuant to the Federal-Aid Highway Act of 1970, the Federal Highway Administration (FHWA) developed noise standards for use in the planning and design of new highway projects. These standards were promulgated February 8, 1973, and published in the FEDERAL REGISTER June 19, 1973 (38 FR 15953), amending 23 CFR by the addition of Part 772.

The new legislation authorizes FHWA to develop and promulgate "standards" for the control of traffic noise on previously constructed highways. It further provides that noise abatement projects may be programed as highway projects, and that the Federal share on such projects shall be the same as that for the Federal-aid system on which the project is located.

The "standards" which FHWA plans to develop in response to this legislation will probably take the form of guidelines which will be an extension of the noise standards which were promulgated February 8, 1973. Because of its desire that these guidelines respond to public needs to the greatest possible extent, the FHWA wishes to offer an opportunity to interested persons to submit written comments, suggestions, or objections. All views submitted will receive consideration during the development of the standards. Such views or comments should be received in the Office of Environmental Policy, HEV-10, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590, on or before November 1, 1973.

Issued on September 10, 1973.

NORBERT T. TIEMANN,
*Federal Highway Administrator.*

**[ 49 CFR Part 393 ]**

[Docket No. MC-52; Notice 73-23]

### SLEEPER BERTHS IN COMMERCIAL MOTOR VEHICLES

### Proposed Dimensional Requirements

The Director of the Bureau of Motor Carrier Safety is considering a revision of § 393.76 of the Motor Carrier Safety Regulations, 49 CFR 393.76, which contains the dimensional requirements for sleeper berths on commercial motor vehicles. The principal purpose of the revision under consideration is to increase the minimum interior dimensions of sleeper berths. In addition, the proposal would recast the language of § 393.76 in order to eliminate areas of ambiguity or lack of clarity.

This proceeding was initiated by a petition for rulemaking filed by Local 222 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers. The petition argued that the present minimum interior dimensions of sleeper berths (72 inches long, 18 inches wide, and 18 inches deep for berths on older vehicles, and 75 inches long, 21 inches wide, and 21 inches deep for berths on vehicles manufactured after December 31, 1952) are inadequate, in that they prevent drivers who must rest in sleeper berths from getting sufficient rest to enable them to be alert enough to handle large, complex trucks safely. The petition requested that the minimum dimensions of sleeper berths be increased to 84 inches in length, 36 inches wide, and 36 inches deep. In addition to the information contained in the petition, the Bureau has received driver complaints alleging that sleeper berth dimensions are inadequate.

A review of the available literature[1] indicates that, with respect to truck and bus drivers, the height of the 50th percentile male driver is 68.4 inches, and the height of the 95th percentile male driver is 72.5 inches. Chest breadth is 11.8 inches for the 50th percentile driver and 13.5 inches for the 95th percentile drivers. The shoulder breadth of the 50th percentile male truck and bus driver is 18.3 inches, and the shoulder breadth of the 95th percentile truck and bus driver is 19.9 inches. The available data also show that since 1953, when the dimensions of sleeper berths were last amended, the body dimensions of Americans have increased. We have not increased significantly in height; there has been growth in terms of breadth.

Accordingly, the Director is proposing to require a three-inch increase in the minimum width and height of sleeper berths and to retain the existing 75-inch length requirement. The Bureau will, however, give careful consideration to documented arguments that other dimensional criteria should be established.

In addition, the Director is proposing to remove air mattresses from the list of allowable sleeping equipment. The Bureau has tentatively concluded that air mattresses generally do not provide sufficient support for drivers to obtain adequate rest.

The new requirements would be effective on October 1, 1975.

In consideration of the foregoing, the Director proposes to amend § 393.76 in Subchapter B of Chapter III of Title 49, CFR to read as set forth below.

Interested persons are invited to submit written data, views, or arguments pertaining to the proposal. All comments submitted should refer to the docket number and notice number appearing at the top of this document and should be submitted in three copies to the Director, Bureau of Motor Carrier Safety, Washington, D.C. 20590. All comments received before the close of business on December 3, 1973, will be considered before further action is taken. Comments will be available for examination in the public docket of the Bureau of Motor Carrier Safety, located in Room 4136, 400 Seventh Street SW., Washington, D.C., both before and after the closing date for comments.

This notice of proposed rule making is issued under the authority of section 204 of the Interstate Commerce Act, as amended, (49 U.S.C. 304), section 6 of the Department of Transportation Act, (49 U.S.C. 1655), and the delegations of authority by the Secretary of Transportation and the Federal Highway Administrator in §§ 1.48 and 389.4 of Title 49, Code of Federal Regulations.

Issued on September 4, 1973.

ROBERT A. KAYE,
*Director, Bureau of Motor Carrier Safety.*

[1] McFarland et al., Anthrometry in the Design of the Driver's Workspace, 16 Amer. Journal of Physical Anthropology 1 (1958).

**§ 393.76 Sleeper berths.**

(a) *Dimensions.*—(1) *Size.*—A sleeper berth must be at least the following size:

| Date of installation on motor vehicle. | Length measured on centerline of longitudinal axis (inches) | Width measured on centerline of transverse axis (inches) | Height measured from highest point of top of mattress (inches) |
|---|---|---|---|
| Before January 1, 1953 | 72 | 18 | 18 |
| After December 31, 1952, and before October 1, 1975 | 75 | 21 | 21 |
| After September 30, 1975 | 75 | 24 | 24 |

(2) *Shape.*—A sleeper berth installed on a motor vehicle on or after January 1, 1953, must be of generally rectangular shape, except that the horizontal corners and the roof corners may be rounded to radii not exceeding 10½ inches.

(3) *Access.*—A sleeper berth must be constructed so that an occupant's ready entrance to, and exitf rom, the sleeper berth is not unduly hindered.

(b) *Location.*

(1) A sleeper berth must not be installed in or on a semitrailer or a full trailer other than a house trailer.

(2) A sleeper berth located within the cargo space of a motor vehicle must be securely compartmentalized from the remainder of the cargo space. A sleeper berth installed on or after January 1, 1953, must be located in the cab or immediately adjacent to the cab and must be securely fixed with relation to the cab.

(c) *Exit from the berth.*—(1) Except as provided in subparagraph (2) of this paragraph, there must be a direct and ready means of exit from a sleeper berth into the driver's seat or compartment. If the sleeper berth was installed on or after January 1, 1963, the exit must be a doorway or opening at least 18 inches high and 36 inches wide. If the sleeper berth was installed before January 1, 1963, the exit must have sufficient area to contain an ellipse having a major axis of 24 inches and a minor axis of 16 inches.

(2) A sleeper berth installed before January 1, 1953 must either—

(i) Conform to the requirements of subparagraph (1) of this paragraph; or

(ii) Have at least two exits, each of which is at least 18 inches high and 21 inches wide, located at opposite ends of the vehicle and useable by the occupant without the assistance of any other person.

(d) *Communication with the driver.*—A sleeper berth which is not located within the driver's compartment and has no direct entrance into the driver's compartment must be equipped with a means of communication between the occupant and the driver. The means of communication may consist of a telephone, speaker tube, buzzer, pull cord, or other mechanical or electrical device.

(e) *Equipment.*—A sleeper berth must be properly equipped for sleeping. Its equipment must include—

(1) Adequate bedclothing and blankets; and

(2) Either—

(i) Springs and a mattress; or

(ii) An innerspring mattress; or

(iii) A cellular rubber mattress at least four inches thick.

A sleeper berth must be designed and constructed so that its mattress and bedclothing can readily be removed for cleaning.

(f) *Ventilation.*—A sleeper berth must have louvers or other means of providing adequate ventilation. A sleeper berth must be reasonably tight against dust and rain.

(g) *Protection against exhaust and fuel leaks and exhaust heat.*—A sleeper berth must be located so that leaks in the vehicle's exhaust system or fuel system do not permit fuel, fuel system gases, or exhaust gases to enter the sleeper berth. A sleeper berth must be located so that it will not be overheated or damaged by reason of its proximity to the vehicle's exhaust system.

(h) *Occupant restraint.*—A motor vehicle manufactured on or after July 1, 1971, and equipped with a sleeper berth must be equipped with a means of preventing ejection of the occupant of the sleeper berth during deceleration of the vehicle. The restraint system must be designed, installed, and maintained to withstand a minimum total force of 6,000 pounds applied toward the front of the vehicle and parallel to the longitudinal axis of the vehicle.

## ENVIRONMENTAL PROTECTION AGENCY

**[ 40 CFR, Part 51 ]**

### USE OF SUPPLEMENTARY CONTROL SYSTEMS AND IMPLEMENTATION OF SECONDARY STANDARDS

### Preparation, Adoption, and Submittal of Implementation Plans

On August 14, 1971 (36 FR 15486), the Administrator promulgated as 40 CFR, Part 420, regulations for the preparation.

V 38-178 SEP 14 73 XUM

adoption, and submittal of State Implementation Plans (State plan guidelines) under section 110 of the Clean Air Act, as amended. These regulations were republished November 25, 1971 (36 FR 22398), as 40 CFR, Part 51. The amendments proposed herein would revise 40 CFR, Part 51 by making certain modifications and additions.

The proposed amendments would allow selective use of supplementary control systems as a means of attaining and maintaining the national ambient air quality standards (referred to hereafter as "national standards") in cases where permanent production curtailment, shutdown, or delays in attainment of the national standards are the only other alternatives. The proposed amendments also clarify policies on the use of increased stack height to take advantage of the dispersive effects of the atmosphere; modify the definition of "reasonable time" for attainment of secondary national ambient air quality standards; and modify guidelines for preparation of future State Implementation Plan revisions related to attainment and maintenance of national standards for sulfur dioxide and particulate matter.

### Supplementary Control Systems

Supplementary control systems, as addressed herein, are systems whereby the rate of emissions from a source is curtailed when meteorological conditions conducive to high ground-level pollutant concentrations exist or are anticipated. Supplementary control systems continuously monitor emissions, meteorological conditions, and ambient air quality in the vicinity of the source, and, by combining these and other data in an appropriate prediction model, provide a procedure for estimating the ambient air quality which would exist in the future. Integral to supplementary control systems are comprehensive and enforceable emission limitation criteria and source control procedures to insure that emissions are curtailed at the times and to the extent necessary to attain and maintain the national standards regardless of meteorological conditions. Systems of this general type have been discussed in the past under various terminologies such as "intermittent control systems," "variable control systems," etc., and have not been previously considered acceptable for maintenance of the national standards.

The previous Environmental Protection Agency position on supplementary control systems was set forth in the Federal Register on July 27, 1972 (37 FR 15095), as follows:

> • • • At this time, it [supplementary control] is not considered an acceptable substitute for permanent control systems for attaining and maintaining national standards. Experience with systems employing intermittent process curtailment indicates that although air quality is improved, violations of ambient air quality standards still occur. Additional experience with these systems may, however, in specific cases improve this reliability.

Over the past year, EPA has continued to assemble and evaluate available data on the development and use of supplementary control systems. EPA has examined published reports and statements 1–3 containing information on experience with supplementary control systems at the Tennessee Valley Authority's Paradise Steam Plant and the American Smelting and Refining Company copper smelter at El Paso, Texas. In addition, EPA personnel have visited these facilities and have discussed the use of supplementary control systems with air pollution control officials, citizens' groups, and industry representatives.

The available data show a substantial and consistent improvement in the performance of supplementary control systems in the recent past. As one example, data provided by the Puget Sound Air Pollution Control Authority (PSAPCA) show substantial improvement in air quality around a copper smelter using a supplementary control system which meets some of the criteria set forth in these proposed regulations. In this instance, at the one PSAPCA monitoring station that has been operating since 1969, the frequency of one-hour sulfur dioxide concentrations exceeding 0.25 ppm dropped progressively from 102 times in 1969, before the supplementary control system was initiated, to 7 times in 1972, to only once in the first five months of this year. Similarly, one-hour concentrations exceeded 0.5 ppm 25 times in 1969, only once in 1972, and not at all during the first five months of this year. At seven other PSAPCA monitoring stations, data for the period beginning in August-October 1971 and running through May 1973, show that one-hour sulfur dioxide concentrations exceeded 0.25 ppm ten times and exceeded 0.5 ppm only twice.

Analysis of data such as these indicates that incorporation of the design and enforcement features required by these proposed regulations and the proposed Appendix P would insure that such systems would be reliable means of attaining and maintaining the national standards in carefully selected situations. Furthermore, given the limitations on availability of stack-gas cleaning systems and low-sulfur fuels over the next few years, the difficulty in retrofitting some facilities with stack-gas cleaning systems, and the distribution/allocation problems associated with low-sulfur fuels, it would be undesirable to rely solely upon these methods to attain and maintain the national standards in cases where supplementary control systems could be applied in an equally reliable and enforceable manner. Also, since the availability of stack-gas cleaning systems and low-sulfur fuels is, in part, a function of time (e.g., the time required to design, build, and install hardware without unduly disrupting production of electric power, and the time required to develop new fuel sources), their availability will improve with time. The use of supplementary control systems in selected situations could, therefore, result in attainment of the national standards in a shorter time than would otherwise be possible.

These proposed regulations impose stringent limitations on the types of sources and situations for which use of supplementary control systems may be considered acceptable. These limitations are based on two principal considerations: First, supplementary control systems will be allowed only in situations where their use is necessary to augment constant emission limitation techniques which are available to a specific source, and only until completely adequate constant emission limitation techniques become available; that is, in situations wherein the sole alternatives are either permanent production curtailment or delay of an attainment date for the national standards. Second, supplementary control systems will be allowed only in situations where they will exhibit a high degree of reliability and can be made legally enforceable; that is, where the emission sources can be readily and unequivocally identified.

These considerations preclude use of supplementary control systems to control carbon monoxide and particulate emissions; constant emission reduction techniques and equipment capable of adequately reducing such emissions are widely used and can be considered available for application to all sources. Although temporary shortages of low sulfur fuel oil may occur during the next several years, techniques for producing low sulfur oil are expected to become sufficiently available so that the use of supplementary control systems for oil-fired boilers will not be necessary.

The requirement for enforceability precludes the use of supplementary control systems to control hydrocarbon and nitrogen oxides emissions. Hydrocarbons and nitric oxides are precursors to photochemical oxidants and nitrogen dioxide—Formation of the latter two pollutants is a result of complex photochemical processes involving atmospheric conditions which may be highly variable and requires the interaction of pollutants from a variety of sources, including motor vehicles. The contribution of one precursor source to the resultant photochemical oxidant or nitrogen dioxide concentration cannot be defined with sufficient confidence to ensure enforceability, nor is it likely that any source owner or operator would be willing to accept sole responsibility for attaining and maintaining the national standards for photochemical oxidants or nitrogen dioxide throughout the area potentially influenced by that source's emissions.

Finally, if supplementary control systems are to be reliable, a strong predictive relationship must be established between the user's emissions and the ambient air quality in the affected area. This predictive relationship cannot be established with confidence if other sources have a significant impact on air quality in the area. Hence, the enforceability

requirement can only be satisfied for supplementary control systems applied to a source sufficiently isolated from others that the owner or operator is willing and able to accept full legal responsibility for maintaining the national standards throughout the area in which emissions from that source influence ambient air quality. It is essential that this area be carefully defined on a case-by-case basis. In a few instances, it may be possible for two or more sources to implement a supplementary control system jointly, and thus share responsibility for the ambient air quality. The regulations proposed herein are not intended to prevent this type of arrangement so long as the appropriate conditions, including enforceability, are met. It should be noted, however, that designing and operating a system involving more than one source increases the complexity of this technique. These criteria, therefore, generally restrict consideration of supplementary control systems for application to only a small number of isolated sources of sulfur dioxide.

The regulations proposed herein would also require demonstration by each candidate source on a case-by-case basis that adequate constant emission reduction techniques are not available to attain and maintain the national standards, and that those techniques which are available would be applied to permanently reduce emissions to the maximum extent practicable prior to application of supplementary control systems. Further, these regulations would require that each source or system of sources utilizing a supplementary control system support and participate in an appropriate research, development, engineering, and demonstration program to insure that the supplementary control system can be replaced by constant emission limitation techniques as soon as possible. In cases where the source is subject to a current compliance schedule, good faith efforts to achieve that schedule should be attempted prior to resorting to a supplementary control system. If a supplementary control system is found to be necessary, the revised compliance schedule should contain the major applicable milestones associated with the program to obtain constant emission limitation techniques. It is not intended that accomplishment of the milestones be legally binding, because in many cases the schedule for a particular phase may be dependent upon the results of a previous phase. However, the milestones should be sufficiently definitive so that the progress of the program can be included in the annual review of the supplementary control system performance as specified in these regulations.

Obviously, the necessity for the continued application of supplementary control systems must be reassessed from time-to-time in consideration of the increasing availability of constant emission limitation techniques. The proposed regulations require that this reassessment be accomplished at least once during each five-year period in addition to the annual review of the source's efforts to replace the supplementary control system.

Supplementary control systems will not be authorized for new or modified sources. It is intended that in all cases, new sources be properly designed, located, and constructed with constant emission limitation techniques adequate to maintain the national standards.

However, in the Administrator's judgment it does not appear to be in the public interest to require shutdown or permanent curtailment of production for existing sources which could temporarily use supplementary control systems to attain and maintain the national standards. For example, many existing nonferrous smelters would require emission reductions in excess of 90 percent in order to avoid violations of the national standards for sulfur dioxide during all adverse meteorological conditions. Constant emission limitation techniques capable of achieving this degree of emission reduction are not available for every smelter. The alternatives in most cases will be either to close these facilities (or drastically curtail production), or apply supplementary control systems. Weak gas stream scrubbing and process changes may become available for application to many nonferrous smelters in the future. However, at this time, available control technology for most nonferrous smelters consists of operation of byproduct sulfuric acid plants to control emissions from strong gas streams. The regulations proposed herein require that, where byproduct sulfuric acid plants are impractical on sources currently violating the NAAQS, procedures such as permanent production curtailment must be implemented to permanently reduce emissions to the level attainable with acid plants. This level must be achieved through permanent emission limitation procedures; if further reductions are still necessary to meet national standards, and cannot be achieved through other control techniques, then a supplementary control system would be required until constant emission limitation techniques become available. It is estimated that the majority of the major nonferrous smelters in the country will require and qualify for supplementary control systems to attain the national standards.

A similar, though less severe, situation exists for a few coal-fired electric generating plants which, if not allowed to use supplementary control systems, would have to either delay attainment of the standards or permanently curtail power production in order to accommodate adverse meteorological conditions occurring only a few percent of the time. Conventional sulfur oxides control techniques for coal-fired electric generating plants include stack-gas cleaning and use of low-sulfur coal. Stack-gas cleaning to control sulfur oxides emissions is considered "adequately demonstrated" for the purposes of section 111 of the Clean Air Act and therefore was the basis for the new source performance standards promulgated December 23, 1971 (36 FR 24876). Sulfur oxides scrubbing equipment currently is being installed at a number of new and existing electric generating plants, and its use at existing facilities will be increased gradually over the next few years. However, there are practical limitations to this technology including: Sulfur oxides scrubbing is relatively new technology which means, among other things, that each installation must be individually designed to a much greater extent than is necessary for most other air pollution control systems; there are limitations on control equipment manufacturers' capacity to design, build, and install sulfur oxides scrubbing equipment on a retrofit basis; and, perhaps most importantly, the retrofit of available equipment is not currently possible on all existing coal-fired electric generating plants. Nevertheless, EPA continues to believe that sulfur oxides scrubbing is completely appropriate and available for use in most situations where adequate amounts of low-sulfur fuel are not available. As for the use of low-sulfur coal, the limitations on its availability impose definite constraints on its use as a sulfur oxides control technique at this time. Low-sulfur fuels cannot be considered available for all coal-fired electric generating plants in all sections of the country.

Accordingly, demonstration that stack gas cleaning and low-sulfur (and desulfurized) coal are not available for use by a specific source will have to be evaluated on a case-by-case basis. It is estimated that less than 50 coal-fired electric generating plants would qualify for supplementary control systems under these criteria.

Concern has been expressed that the approval of supplementary control systems could tend to inhibit further development and application of improved constant emission limitation techniques. However, the vast majority of sulfur dioxide sources cannot meet the criteria required for use of supplementary control systems. Hence, there are many hundreds of sulfur dioxide sources which must attain and maintain the national standards by use of constant emission limitation techniques. These will provide sufficient stimulus for development and application of new and improved techniques. Also, a condition for the use of a supplementary control system will be support of a research and demonstration program by the firm operating the source to accelerate the development of constant emission reduction technology applicable to the source.

The Administrator recognizes that there are several unquantified factors which could cause the widespread use of supplementary control systems to be undesirable. The effect of total atmospheric loading of sulfur oxides is of particular concern: It includes the impact of suspended sulfate formation, acidification of soil and water, visibility reduction, and changes in background concentration. It is not currently possible to quantify these effects of atmospheric loading, nor is it

V 38-178 SEP 14 73 XUM

possible to accurately estimate the impact of supplementary control systems on total atmospheric loading. It is for this reason, in addition to the implied preference in the Clean Air Act, that attainment of the national standards through constant emission reduction is preferable to use of supplementary control systems.

It should be emphasized that these proposed regulations merely allow States to give appropriate sources the option of using such systems as a temporary measure to attain and maintain national standards. EPA cannot and would not require States to offer this option. Moreover, each request for approval to use such a system would have to be evaluated individually by the State agency, and State approval will be subject to review and approval by EPA. In addition, it must be recognized that the monitoring and enforcement efforts will be more extensive and, therefore, more costly than in cases where constant emission limitation systems are used. Accordingly, States are encouraged to require licensing of supplementary control systems and to impose fees to defray the additional monitoring and enforcement costs.

Section 110(a)(2) of the Clean Air Act requires that State Implementation Plans must include "emission limitations, schedules, and timetables for compliance with such limitations, and such other measures as may be necessary to insure attainment and maintenance of such primary or secondary standard, including, but not limited to, land-use and transportation controls." It is the Administrator's judgment that the use of supplementary control systems is in certain situations a "necessary" measure as authorized by the Act. Because such systems can be designed and operated in such a way as to be a reliable means of attaining and maintaining national standards in selected situations, it would serve no stated purpose of the Act to prohibit their use where no other reasonable alternatives exist.

While the Administrator is well aware that questions have been raised as to the legal basis for allowing the use of supplementary control systems, it is his judgment that their use, under the conditions set forth in these proposed regulations, is fully consistent with the purposes and provisions of the Clean Air Act and is in the best interests of the public.

### Acceptability of Increased Stack Height

Effective and reliable operation of a supplementary control system often can be enhanced by increasing the stack height beyond what would normally be considered good engineering practice. For purposes of this discussion a stack which conforms to good engineering practice is sufficiently tall that emissions from the stack are not significantly affected by the atmospheric downwash, eddies, or wakes created by the facility or nearby structures and terrain. Emissions from stacks which are shorter than required by good engineering practice often can cause excessively high ground level concentrations and nuisances within, and in the immediate vicinity of, the facility. For fairly level terrain, good engineering practice will normally result in stack height approximately two and one-half times the height of the facility and nearby obstructions. For more complex situations, this rule-of-thumb is too simplistic, and detailed engineering and meteorological investigations of the proposed site should be conducted to determine the appropriate stack height. The use of stack height up to the level of good engineering practice is encouraged by EPA in order to avoid local nuisances. But although the Environmental Protection Agency will accept existing stacks, it will not credit, as an acceptable portion of an air pollution control strategy, any extension of stack height beyond that of good engineering practice unless the extension is accomplished as part of an approved supplementary control system.

### Definition of Reasonable Time

The revisions proposed herein also modify the definition of "reasonable time" for attainment of secondary standards by specifying that "reasonable time" shall be the time required to design, fabricate, and install reasonably available control technology, as defined in Appendix B to the State plan guidelines (40 CFR Part 51). States may postpone application of such measures only in cases where the control strategy would have a severe adverse economic or social impact. The Administrator expects such postponements to be rare, but they may be required in special cases to prevent plant shutdown or to prevent massive replacement of recently installed equipment which would result in an inequitable economic impact. Any postponement beyond January 1, 1978, must be subject to periodic reevaluation at five-year intervals.

### Future Revisions To Control Strategies

The proposed regulations would establish more stringent requirements for future demonstrations of attainment and maintenance of standards for particulate matter and sulfur dioxide. Diffusion modeling would be required for use in estimating maximum concentrations, and the areas in which these concentrations occur, unless application of a diffusion model is shown to be inappropriate. The alternatives to diffusion models, such as the simple rollback techniques which have been used and accepted in the past, are particularly inappropriate for prediction of the short-term peak concentrations which are a major factor in detailed analyses of air quality around large point sources.

The use of "example regions" would also be eliminated in revisions to sulfur dioxide and particulate matter control strategies. This concept was necessary and acceptable during the initial development of State Implementation Plans, but it can result in inadequate analysis of the impact of large point sources. Elimination of the "example region" concept is intended to lead to better understanding and solution of air quality control problems in regions not initially selected as examples.

These changes would apply only to future revisions to particulate matter and sulfur dioxide control strategies. The currently approved State Implementation Plans have been reviewed and are considered necessary and adequate to attain and maintain the national ambient air quality standards. The proposed regulations would not require that revisions be submitted solely in order to redemonstrate adequacy of these control strategies under the revised guidelines.

### Public Participation

Interested persons are encouraged to participate in this rule-making by submitting written comments in triplicate to the Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Mr. Robert Neligan. All relevant comments received not later than thirty days after the date of publication of this notice will be considered. Receipt of comments will be acknowledge but substantive responses will not be provided. Comments received will be available for public inspection during normal business hours at the Office of Public Affairs, 401 M Street SW., Washington, D.C. 20460.

This notice of proposed rulemaking is issued under the authority of section 301(a) of the Clean Air Act, as amended (42 U.S.C. 1857g(a)).

Dated September 6, 1973.

JOHN R. QUARLES, JR.,
*Acting Administrator,*
*Environmental Protection Agency.*

3. Nelson, K. W. Statement Regarding Alternatives to an Emission Standard. Att. 18, letter from J. F. Boland, Attorney for ASARCO, to Casandra Jencks, Legal Counsel, Region IX, October 16, 1972.

It is proposed to amend Part 51 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

1. In § 51.1, the first sentence in paragraph (n) is revised and paragraph (q) is added. As amended § 51.1 reads as follows:

**§ 51.1 Definitions.**

* * * * * *

(n) "Control strategy" means a combination of emission reductions and such other measures as may be necessary for the attainment and maintenance of a national standard, including, but not limited to, measures such as:

* * * * * *

(q) "Supplementary control systems" are systems which limit the rate of pollutant emissions during periods when meteorological conditions in excess of ground-level concentrations in excess of national standards exist or are anticipated.

2. In § 51.12, paragraph (a) is revised to read as follows:

**§ 51.12 Control strategy: General.**

(a) In any region where existing (measured or estimated) ambient levels of a pollutant exceed the levels specified by an applicable national standard, the plan shall provide for the degree of emission reduction and other measures necessary for attainment and maintenance of such national standard, including those necessary to offset emission increases that can reasonably be expected to result from projected growth of population, industrial activity, motor vehicle traffic, or other factors that may cause or contribute to an increase in emissions.

* * * * * *

3. In § 51.13, paragraphs (a) and (b) are revised and subparagraphs (d)(4), (e)(4), and (e)(5) and paragraph (h) are added. As amended § 51.13 reads as follows:

**§ 51.13 Control strategy: Sulfur oxides and particulate matter.**

(a) In any region where emission reductions and other measures are necessary for attainment and maintenance of a primary standard for sulfur oxides or particulate matter, the plan shall set forth a control strategy which shall provide for the attainment of such primary standard within the time prescribed by the Act.

(b)(1) "Reasonable time" for attainment of a secondary standard pursuant to § 51.10(c) shall be the time required to design, fabricate and install necessary control systems or to apply other control measures, unless the State shows that good cause exists for postponing their application. Good cause for postponing the application of such systems or other measures may include the unavailability of necessary control systems or measures, or the likelihood that their installation or application would cause severe adverse social and economic impacts. (b)(2) Where the time for attainment of a secondary standard established by the State extends beyond January 1, 1978, the State shall submit, after notice and public hearing, a reanalysis of the plan at intervals of no more than five years from the date of plan approval by the Administrator. States shall consider application of reasonable interim emission reduction measures to minimize adverse welfare effects which occur at air quality levels in excess of the secondary standards.

* * * * * *

(d) * * *

(4) Control strategy demonstrations submitted as a revision to an approved plan after the effective date of this subparagraph shall provide an explicit control strategy demonstration for each region affected by such revision.

(e) * * *

(4) Control strategy demonstrations submitted as a revision to an approved plan after the effective date of this subparagraph shall utilize a diffusion model to estimate the maximum air quality concentrations which are expected after application of the control strategy. Other methods of relating emissions to air quality may be used only when the application of a diffusion model is shown to be inappropriate.

(5)(i) Before supplementary control systems can be authorized, the owner or operator of the source must show that (1) all constant emission reduction technology (or its equivalent) available to the source has been applied and is insufficient to attain national standards; (2) further constant emission reduction means are not available in its particular case; and (3) a program will be undertaken to research, develop, engineer, and demonstrate such constant emission reduction technology as is necessary to attain the national standards. An estimated schedule for their attainment by such means must be provided.

(ii) If supplementary control systems are authorized, each source using this technique must be treated separately. It must be shown through a combination of diffusion modeling and air quality sampling that operation of the system will enable national standards to be attained and maintained at all points significantly influenced by emissions from said source.

(iii) It must be shown that each source using a supplementary control system to achieve national air quality standards has accepted liability for violations of such ambient standards in all areas where air quality is significantly affected by the source's emissions. In some exceptional cases, two or more sources may be considered jointly under paragraph (e)(4)(i) of this section provided that it is established a priori how the liability for an air quality standard violation is to be shared by the sources involved.

(iv) A detailed description of and additional conditions for the acceptability of supplementary control systems for attainment of national standards are set forth in Appendix P.

* * * * * *

(h) The increase of stack height up to a height consistent with good engineering practice is acceptable without qualification. An increase in stack height beyond this level is not an acceptable air quality control measure unless accomplished as part of an approved supplementary control system (see Appendix P to this part).

A stack which conforms to good engineering practice is sufficiently tall that emissions from the stack are unaffected by the atmospheric downwash, eddies and wakes which may be created by the facility itself, nearby structures or terrain obstacles.

For fairly level terrain, good engineering practice is normally taken to be a stack height 2½ times the height of the facility or nearby structure. For complex terrain, the 2½ times rule-of-thumb is too simplistic. For such cases, and for more detailed information on good engineering practices, the references listed should be consulted.

### Appendix P—Description of a Supplementary Control System and Criteria for an Acceptable State Regulation

This appendix describes supplementary control systems for the attainment and maintenance of National Ambient Air Quality Standards by taking advantage of the dispersive capability of the atmosphere. It is now concluded that for a limited number of cases and under carefully controlled conditions, procedures which enhance the dispersion of emissions from large isolated sources are reliable means by which ground-level ambient air quality standards can be met.

The supplementary control system is a relatively new control procedure for most States. Its successful application depends on careful design and vigorous surveillance. This Appendix provides guidance to the States and sources for use in the development of supplementary control systems.

The statements presented herein are not intended to require or encourage State agencies to authorize such supplementary control techniques as a means to attain and maintain national standards without first considering (1) the frequency and severity of threats to the national standards in the vicinity of the source, (2) the availability to the source of constant emission reduction techniques, including low sulfur fuel, for the attainment of national standards around such source, (3) the reliability and enforceability of supplementary control techniques, (4) the potential environmental effects of emissions even though such emissions are sufficiently diluted at ground level to attain national standards, and (5) problems unique to the source or state regulatory system.

#### 1.0 Definitions

"Supplementary Control Systems" are systems which limit the rate of pollutant emissions during periods when meteorological conditions conducive to ground-level concentrations in excess of national standards exist or are anticipated. They are designed to meet air quality standards by varying the emission rate with meteorological conditions in order to take advantage of the changing

V 38-178 SEP 14 73 XUM

dispersive capacity of the atmosphere. Supplementary control systems may also make use of the increased dispersion of pollutants usually achieved by an increase in effective stack height.

"Effective stack height" means the sum of the physical height of the stack above grade and the height the effluent plume rises above the height of the stack top. (Under most circumstances, an increase in the effective stack height results in a decrease in the maximum ground-level concentration of the emitted pollutant and an increase in the distance from the source that the maximum concentration occurs. 1,2)

"Isolated source" means a source that will assume responsibility for all ground-level concentrations of the pollutant covered by the supplementary control system in all areas significantly influenced by its emissions.

## 2.0 Elements of A Supplementary Control System

2.1 Figure 2.1 presents a block diagram of the elements of an acceptable supplementary control system and the relationships among them.

2.2 The function of each element follows:

(a) *Meteorological inputs.*—Observations and predictions of the values of meteorological variables required by the operational model to determine the degree of control needed to avoid threats to the national standard (e.g., wind speed, wind direction, stability, mixing height).

(b) *Operating model.*—An intellectual construct which relates meteorological inputs, emission rates, source data and terrain and location factors to current and future ambient air quality in the vicinity of the source.

(c) *Scheduled emission rate.*—The emission rate which would result under the currently scheduled processes and levels of operation.

(d) *Control decision.*—Decisions, based on either the model prediction or real-time air quality (whichever dictates the lower emission rate), whether or not to continue with scheduled processes and their attendant emissions, and if not, how much to curtail the emission rate.

(e) *Controlled emissions.*—The emission rate resulting from the control decision.

(f) *Actual meteorological conditions.*—The measures of wind speed, wind direction, stability, mixing height, and other meteorological factors at the time of emission release.

(g) *Time delays.*—Time will be required to implement the control decision, and more time will pass before the reduced emission rate affects air quality at a distance from the source.

(h) *Air quality.*—Ground-level pollutant concentrations and their temporal and spatial distribution resulting from the source's emissions.

(i) *Air quality monitors.*—An array of sampling stations located at points where maximum ground-level concentrations are most probable to occur (inaccessible points excepted), and in sufficient numbers to allow calibration of the dispersion model so that it may accurately interpolate air quality between samplers. A portion of the monitors may be mobile or portable.

(j) *Threshold values.*—Measured concentration levels somewhat below air quality standards and/or rates of change of concentrations that serve as indicators of potential violations of the standard. They are selected so that a control decision for emission reduction can be made in sufficient time to prevent air quality standards from being violated.

(k) *Data storage.*—Synchronous records meteorological conditions, emission rate, model prediction, measured air quality, and control decisions available for control agency review and model upgrading.

(l) *Upgrade system.*—A periodic evaluation of all system parameters (including the operating model, the meteorological prediction methods, threshold values and other control criteria), based on stored data, with the objective to improve the system's reliability in maintaining the national standards.

2.3 The supplementary control system described in Figure 2.1 will be seen to consist of three basic operations: control based on air quality prediction, control based on air quality measurement, and periodic model upgrading. Each of these operations is considered necessary to a reliable system, for each performs a valuable function. The operating model is used to predict ground-level pollutant concentration sufficiently in advance of its potential occurrence, and to interpolate between monitors. The monitored data and threshold values are used to supplement and, if necessary, override decisions based on the model output, thus compensating for the less than perfect accuracy of the model. The model upgrade operation is used to convert the tentative initial model into an accurate prediction mechanism tailored to the specific plant and site.

## 3.0 Criteria for an Acceptable State Regulation Authorizing Use of Techniques To Attain National Ambient Air Quality Standards by Supplementary Control Systems

3.1 This section presents criteria for an acceptable State regulation concerning supplementary control systems. The purpose of such a regulation is to ensure that supplementary control systems will be authorized only in the limited situations prescribed by these regulations, and that the systems authorized will be reliable and enforceable with all necessary elements of the system clearly and legally identified.

3.2 An acceptable State regulation must:

(a) Authorize approval of each supplementary control system only after reasonable notice and public hearing.

(b) Authorize supplementary control systems on a source-by-source basis only after demonstration by each source that technology is not available in its case to meet national standards through application of constant emission reduction. The justification must include:

(1) A short description of the type and location of the facility.

(2) The number, location and emissions of other relevant sources in the vicinity of the facility.

(3) Data on the frequency and severity of recent air quality standard violations.

(4) Methods of constant emission reduction that will be applied and the degree of emission reduction expected due to their application.

(5) A statement by an appropriate senior official of the firm which operates the facility that the firm has investigated in good faith the availability and reliability of constant emission reduction methods necessary to reduce the emissions of the facility sufficiently to attain and maintain air quality standards. Documentation should accompany the statement that attests to the firm's efforts to obtain and apply appropriate flue gas control devices and, in the case of combustion sources, to obtain an adequate supply of low sulfur fuel. A description must be presented of the firm's research and demonstration programs, or its participation in such programs, which will accelerate the development of constant emission reduction technology applicable to the source. Such description must include schedules and resources to be committed, and an anticipated date when adequate emission reduction technology can be applied to the source.

(6) A plan for development, operation and demonstration of a supplementary control system.

(7) Any other factors pertinent to the justification for the use of a supplementary control system.

(c) Apply only to isolated sources.

(d) Define air quality violations as:

(1) A single ambient concentration that exceeds the standard at any point in the area significantly affected by the source emissions. Repeated or consecutive excesses at the same monitor or non-simultaneous excesses at different monitors are multiple violations.

(2) Non-compliance with stated and agreed upon emission curtailment conditions and procedures.

(e) Require that penalties be specified for violations of ambient air quality standards or for failure to control emissions in accordance with the approved criteria associated with the supplementary control systems.

(f) Apply only to those sources which can curtail their emissions at a rate compatible with the advance warning time (of adverse atmospheric dispersion conditions) afforded by the supplementary control system, and which will provide assurances that curtailment actions necessary to attain national standards will be appropriately implemented.

(g) If permission is granted to develop and operate a supplementary control system, require formal review and reexamination of the permit at intervals of 5 years or less. The reexamination should include a survey of control techniques which may have become available, the continued relative isolation of the facility and other factors which may bear on the conditions for use of a supplementary control system by the facility.

(h) Require the source to establish, maintain and continuously operate monitors for sensing the pollutant emission rate, air quality and meteorological variables. Emission rate estimates may be substituted for emission measurements provided such estimates provide data of equivalent accuracy, documentation, and legal acceptability as direct emission measurements.

(i) Grant the agency continuous access to all emission, air quality and meteorological data collected by the source and authority to inspect, test and calibrate all sensors, recorders and other equipment operated by the source to collect these data. "Continuous access" may, in practice, require telemetering of such data to the control agency.

(j) Require the source to notify the control agency when emission curtailment is initiated and when air quality standards are exceeded.

(k) Require the source to submit a plan and schedule for implementing a supplementary control system, which is subject to approval by an appropriate control agency. The plan shall have two parts:

(1) A comprehensive report of a thorough background study which demonstrates the capability of the supplementary control system to attain the national standards. The report shall describe a study during a period of at least 120 days when national standards are frequently or likely to be exceeded which:

(i) Describes the emission monitoring system and the air quality monitoring network.

(ii) Describes the meteorological sensing network and the meteorological prediction program.

(iii) Identifies the frequency, characteristics, times of occurrence and durations of meteorological conditions associated with high ground-level concentrations.

(iv) Describes the methodology (e.g., dispersion modeling and measured air quality data) by which the source determines the degree of control needed under each meteorological situation.

(v) Describes the method chosen to vary the emission rate, the basis for the choice, and the time required to effect a sufficient reduction in the emission rate to avoid violations of national standards.

(vi) Estimates the frequency that emission rate reduction is required to attain national standards.

(vii) Describes the basis for the above estimate.

(viii) Includes data and results of objective reliability tests. "Reliability," as the term is applied here, refers to the ability of the supplementary control system to protect against violations of national standards.

(2) An operational manual which:

(i) Specifies and substantiates the number, type, and location of ambient air quality monitors, in-stack monitors, and meteorological instruments to be used.

(ii) Identifies the meteorological situations and monitor readings before and/or during which the emission rate must be reduced to avoid exceeding short-term national standards.

(iii) Describes techniques, methods and criteria used to anticipate the onset of meteorological situations associated with gound-level concentrations in excess of national standards.

(iv) Describes the criteria by which the source determines the degree of control needed for each situation.

(v) Identifies specific actions that will be taken to curtail emissions when critical meteorological conditions exist or are predicted and/or when specified air quality levels occur.

(vi) Identifies the company personnel responsible for initiating and supervising such actions.

(vii) Demonstrates that the curtailment program will result in maintenance of short-term and long-term national standards.

(viii) Describes the manner in which monitoring data are transmitted to the control agency (in a manner acceptable to the agency).

(ix) Describes a program whereby the source systematically evaluates and improves the reliability of the supplementary control system.

(x) Identifies a responsible and knowledgeable person (and alternates) on site who are authorized to curtail and who can apprise the control agency on the status of the supplementary control system at any time.

(l) Require the source to submit monthly reports on the supplementary control system, including an analysis of how the system affected air quality and how response to adverse dispersion conditions will be improved.

(m) Require annual review of the supplementary control system by the control agency, and authorize the agency to deny continued use of the supplementary control system if:

(1) The source has not complied with all provisions designed to protect long-term national standards.

(2) The source has not developed a control program that is effective in enabling short-term national standards to be met (e.g., the source has not followed the control criteria set forth in the approved operational manual).

(3) The source has not demonstrated good faith in operating an effective control program by failing to:

(i) Utilize trained competent personnel.

(ii) Maintain, operate and calibrate the monitoring equipment properly.

(iii) Refine and continuously validate and upgrade the response of the supplementary control system to adverse dispersion conditions.

(iv) Reduce the emission rate in accordance with stipulated control criteria.

(4) The source has not demonstrated good faith efforts to follow its stated program for developing and applying constant emission limitation procedures.

## FEDERAL COMMUNICATIONS COMMISSION

**[ 47 CFR Part 73 ]**

(Docket No. 19795)

### FM BROADCAST STATIONS

### Order Extending Time for Filing Comments and Reply Comments

In the matter of amendment of § 73.202(b) Table of Assignments, FM Broadcast Stations. (Rapid City, South Dakota) RM-2014.

1. On July 26, 1973, the Commission adopted a notice of proposed rulemaking in the above-captioned proceeding. Publication was given in the Federal Register on August 2, 1973, 38 FR 20627. Comment and reply comment dates are presently designated as September 7 and September 17, 1973, respectively.

2. In a petition for extension of time dated September 6, 1973, Counsel for Robert W. Gunderson, Ray J. Aldrich, William A. Goodhope, and Bruce H. Lien requested that the time for filing comments and reply comments be extended to September 21 and October 1, 1973, respectively. Counsel states that the additional time is necessary in order to obtain certain additional information to include in the comments and for the further reason that he has been out of town for 3 weeks on a Commission field hearing.

3. It appears that the requested extension is warranted. Accordingly, *It is ordered*, That the dates for filing comments and reply comments are extended to and including September 21 and October 1, 1973, respectively.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281(d)(8) of the Commission's rules.

Adopted September 7, 1973.

Released September 10, 1973.

[SEAL] Wallace E. Johnson,
*Chief,*
*Broadcast Bureau.*

## FEDERAL RESERVE SYSTEM

**[ 12 CFR Part 204 ]**

### RESERVES OF MEMBER BANKS

### Definition of Gross Demand Deposits

The Board of Governors proposes to apply reserve requirements against certain accounts classified among "Other liabilities" against which reserves are presently not maintained. The certain "Other liability" accounts against which reserve requirements will now apply are those accounts which a member bank has created to balance its books after debiting demand deposit accounts (or any other accounts for the transfer of funds).

For example, member banks, at present, sometimes exchange checks in the late afternoon or evening, and may debit an account on the day the checks were received, while not making settlement

V 38-178 SEP 14 73 XUM

until the following business day. Some banks balance their books until the next business day by creating an "Other liability" account the night that the debit is posted. On the next business day, the "Other liability" account is debited and the check is paid. The Board of Governors proposes to regard that "Other liability" account as a "deposit" against which reserves must be maintained.

"Other liability" accounts that are used for other purposes would not be affected, e.g. bills payable for services and supplies received and for which payment is not yet due.

There are several reasons why the Board proposes the change. The use of an "Other liability" account for this purpose involves a one business day delay in crediting accounts after debits are posted and the practice may deprive customers of the use of funds in a way that is difficult to detect and is misleading. The Board is also concerned that the practice outlined above can result in understatement of the money supply. Also, a bank that became accustomed to the practice described may have problems in adapting to any electronic payments mechanism that will require simultaneous credits and debits. Finally, the practice allows the level of required reserves to be lower than the Board intended.

To aid in the consideration of this matter by the Board, interested persons are invited to submit relevant data, views, and arguments. Any such material should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than October 12, 1973. Such material will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's rules regarding availability of information.

To implement its proposal, the Board proposes to amend § 204.1(g) of its Regulation D (12 CFR Part 204) by adding a new sentence at the end thereof to read as follows:

**§ 204.1 Definitions.**

* * * * * * *

(g) *Gross demand deposits.* * * * "Gross demand deposits" also includes any obligation to pay a check (or other instrument, device, or arrangement for the transfer of funds) drawn on the Bank, where the account of the bank's customer has already been debited.

* * * * * * *

By order of the Board of Governors, September 7, 1973.

[SEAL] THEODORE E. ALLISON,
*Assistant Secretary of the Board.*

[FR Doc.73-19542 Filed 9-13-73;8:45 am]

## SELECTIVE SERVICE SYSTEM

**[ 32 CFR Part 1604 ]**

**SIGNING OF OFFICIAL PAPERS**

**Notice of Proposed Rule Making**

Pursuant to the Military Selective Service Act, as amended (50 U.S. Code App., sections 451 et seq.) and § 1604.1 of Selective Service Regulations (32 CFR 1604.1), the Director of Selective Service hereby gives public notice that consideration is being given to the following proposed amendment to the Selective Service Regulations constituting a portion of Chapter XVI of the Code of Federal Regulations. These Regulations implement the Military Selective Service Act, as amended (50 U.S. Code App., sections 451 et seq.).

The proposed amendment provides authority for additional persons to sign official papers of appeal boards.

All persons who desire to submit views to the Director on the proposals should prepare them in writing and forward them to the Director, Selective Service System, Attn: LLD, 1724 F Street, Northwest, Washington, D.C., 20435. Comments received by October 16, 1973 will be considered.

The proposed amendment follows:

Section 1604.28 is amended to read as follows:

**§ 1604.28 Signing official papers.**

Official papers issued by an appeal board or panel may be signed by any member or compensated employee of the appeal board or panel or any compensated employee of the Selective Service System whose official duties require him to perform administrative duties at the appeal board or panel except when otherwise prescribed by the Director of Selective Service.

BYRON V. PEPITONE,
*Director.*

# Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF STATE

[Public Notice CM-66]

**ADVISORY COMMITTEE TO UNITED STATES SECTION, INTERNATIONAL NORTH PACIFIC FISHERIES COMMISSION**

**Notice of Meeting**

Notice is hereby given, pursuant to the provisions of Pub. L. 92-463, that a meeting of the Advisory Committee to the United States Section, International North Pacific Fisheries Commission, will be convened on September 24, 1973, at Montlake Laboratory, Northwest Fisheries Center, National Marine Fisheries Service, 2725 Montlake Boulevard East, Seattle, Washington at 9:00 a.m. The agenda of the meeting will include discussion of surveillance of foreign fishing fleets, the progress of fisheries research, the Alaska salmon fisheries, the status of the stocks of halibut, other groundfish and king and tanner crab, the observer program, and world fishery developments as they affect the International North Pacific Fisheries Commission. The meeting on September 24 will be open to the public.

The Advisory Committee will also meet on September 25, 1973. This meeting will not be open to the public inasmuch as the discussion will be devoted to matters exempt from public disclosure under 5 U.S.C. 552(b)(1) and the public interest requires that such discussion be withheld from disclosure.

SUE M. MORELAND,
*Committee Management Officer.*

SEPTEMBER 11, 1973.

[FR Doc.73-19623 Filed 9-13-73;8:45 am]

[Public Notice CM-64]

**LAW OF THE SEA ADVISORY COMMITTEE**

**Notice of Closed Meeting**

In accordance with section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is given that the Law of the Sea Advisory Committee shall hold a meeting on Friday and Saturday, September 21 and 22. As it has been determined that the meeting will involve discussion of law of the sea matters exempt from public disclosure under (5 U.S.C. 552(b)(1)) and that the public interest requires that such discussions be withheld from disclosure, the meeting shall be a closed one not open to the general public. The reason for this determination is that documents classified in accordance with Executive Order 11652 would be circulated and discussed.

Dated September 7, 1973.

MYRON H. NORDQUIST,
*Executive Secretary.*

[FR Doc.73-19565 Filed 9-13-73;8:45 am]

[Public Notice 398]

**TRAVEL INTO OR THROUGH CUBA**

**Restriction on Use of U.S. Passports**

Pursuant to the authority of Executive Order 11295 and in accordance with 22 CFR 51.72(c), use of U.S. passports for travel into or through Cuba remains restricted. To permit unrestricted travel would be incompatible with the resolutions adopted at the Ninth Meeting of Consultation of Ministers of Foreign Affairs of the Organization of American States, of which the United States is a member. At this meting, held in Washington from July 21 to 26, 1964, it was resolved that the governments of the American States not maintain diplomatic, consular, trade or shipping relations with Cuba under its present government. This resolution was reaffirmed in the Twelfth Meeting of Ministers of Foreign Affairs of the OAS held in September 1967, which adopted resolutions calling upon Member States to apply strictly the recommendations pertaining to the movement of funds and arms from Cuba to other American nations. Among other things, this policy of isolating Cuba was intended to minimize the capability of the Castro government to carry out its openly proclaimed programs of subversive activities in the Hemisphere.

U.S. passports shall not be valid for travel into or through Cuba unless specifically validated for such travel under the authority of the Secretary of State.

This public notice shall expire on September 14, 1974 unless extended or sooner revoked by public notice.

*Effective date.*—This notice becomes effective on September 14, 1973.

Dated August 31, 1973.

[SEAL] KENNETH RUSH,
*Acting Secretary of State.*

[FR Doc.73-19537 Filed 9-13-73;8:45 am]

[Public Notice 399]

**TRAVEL INTO OR THROUGH NORTH KOREA**

**Restriction on Use of U.S. Passports**

Pursuant to the authority of Executive Order 11295 and in accordance with 22 CFR 51.72(c), use of U.S. passports for travel into or through North Korea remains restricted. In view of the continued hostility of the North Korean regime toward the United States, the unsettled situation along the Military Demarcation Line, and the special position of the Government of the Republic of Korea which is recognized by the U.S. as well as by U.N. resolution as the only lawful government in Korea, the Department of State believes that wholly unrestricted travel by American citizens to North Korea would seriously impair the conduct of U.S. foreign affairs.

U.S. passports shall not be valid for travel into or through North Korea unless specifically validated for such travel under the authority of the Secretary of State.

This public notice shall expire on September 13, 1974, unless extended or sooner revoked by public notice.

*Effective date.*—This notice becomes effective on September 14, 1973.

Dated August 31, 1973.

[SEAL] KENNETH RUSH,
*Acting Secretary of State.*

[FR Doc.73-19538 Filed 9-13-73;8:45 am]

[Public Notice 400]

**TRAVEL INTO OR THROUGH NORTH VIETNAM**

**Restriction on Use of U.S. Passports**

Pursuant to the authority of Executive Order 11295 and in accordance with 22 CFR 51.72(c), the use of U.S. passports for travel into or through North Vietnam remains restricted. In the aftermath of the signing on January 27, 1973, of the Agreement on Ending the War and Restoring Peace in Vietnam, tensions continue to be high and conditions unsettled in the Indo-China area. The Peace Agreement envisages that the implementation of the Agreement will create conditions for establishing a new, equal and mutually beneficial relationship between the United States and North Vietnam. However, the development of such a new relationship is still in its earliest stages. In these circumstances the Department of State believes that unrestricted travel by American citizens to North Vietnam would seriously impair the conduct of U.S. foreign affairs.

U.S. passports shall not be valid for travel into or through North Vietnam unless specifically validated for such travel under the authority of the Secretary of State.

V38-178 SEP 14 73 XUM

This public notice shall expire on September 14, 1974, unless extended or sooner revoked by public notice.

*Effective date.*—This notice becomes effective on September 13, 1973.

Dated August 31, 1973.

[SEAL] KENNETH RUSH,
*Acting Secretary of State.*

[FR Doc.73-19539 Filed 9-13-73;8:45 am]

## DEPARTMENT OF THE TREASURY

### Comptroller of the Currency

### REGIONAL ADVISORY COMMITTEE ON BANKING POLICIES AND PRACTICES; TENTH NATIONAL BANK REGION

#### Notice of Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a closed meeting of the Comptroller of the Currency's Regional Advisory Committee on Banking Policies and Practices of the Tenth National Bank Region will be held at 9:00 a.m. on September 28, 1973, at the Board Room of the First National Bank & Trust Company of Lincoln, Lincoln, Nebraska.

The purpose of this meeting is to assist the Regional Administrator and Comptroller of the Currency in a continuing review of bank regulations and policies. The meeting will also apprise agency officials of current conditions and problems banks are experiencing in the Tenth National Bank Region.

It is hereby determined pursuant to section 19(d) of Pub. L. 92-463 that the meeting is concerned with matters listed in section 552(b) of Title 5 of the United States Code and particularly with exceptions (3), (4), and (8) thereof, and is therefore exempt from the provisions of section 10(a)(1) and (a)(3) of the Act (Pub. L. 92-463) relating to open meetings and public participation therein.

Dated September 11, 1973.

[SEAL] JAMES E. SMITH,
*Comptroller of the Currency.*

[FR Doc.73-19602 Filed 9-13-73;8:45 am]

## DEPARTMENT OF DEFENSE

### Department of the Air Force

### SCIENTIFIC ADVISORY BOARD

#### Notice of Meetings

SEPTEMBER 7, 1973.

The USAF Scientific Advisory Board Science and Technology Advisory Group will hold closed meetings on September 24 and 25, 1973, from 9 a.m. until 5 p.m., at Headquarters Air Force Systers Command, Andrews Air Force Base, Maryland 20331.

The Group will receive classified briefings on the Air Force Systems Command Laboratory Exploratory and Advanced Development Program Elements.

The USAF Scietnific Advisory Board Electronic Systems Division Advisory Group will hold a closed meeting on September 26, 1973 from 8 a.m. until 4 p.m., at L. G. Hanscom Field, Maine.

The Group will receive classified briefings on various Electronics Systems Divisions systems.

The USAF Scientific Advisory Board Ad Hoc Commitee on Electro Optics Technology will hold closed meetings on September 27 and 28, 1973, from 8:30 a.m. until 5 p.m., at the Pentagon, Washington, D.C.

The Committee will receive classified briefings on the Air Force Programs and Requirements for Electro Optics.

For further information contact the Scientific Advisory Board Secretariat at (202) 697-4648.

JOHN W. FAHRNEY,
*Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.*

[FR Doc.73-19551 Filed 9-13-73;8:45 am]

## DEPARTMENT OF THE INTERIOR

### Bonneville Power Administration

### HUNGRY HORSE CLOUD SEEDING PROGRAM

#### Notice of Public Meeting Regarding Draft Environmental Statement

Bonneville Power Administration will hold a public information meeting at 7:30 p.m., October 15, 1973, in the Large Lecture Room of the Flathead County High School, Kalispell, Montana to present its draft environmental statement covering its proposed Hungry Horse Cloud Seeding Program.

This program is designed to enhance the snowpack in the area drained by the South Fork of the Flathead River above Hungry Horse Dam. The purpose of the program is to help alleviate a projected shortage of firm energy in the Pacific Northwest by assuring normal streamflows and hydroelectric generation. The program is scheduled to begin November 15, 1973, and end no later than April 15, 1974.

All interested parties are urged to attend. The environmental impacts of the cloud seeding program will be described at the meeting and comments on these environmental impacts will be received from the public. All comments are welcomed in order to assist the Administration in fully evaluating the environmental factors of the proposed program.

Copies of the draft environmental statement can be obtained from, or reviewed at, the BPA Kalispell District Office, Box 758, Kalispell, Montana 59901. Copies will also be available at the following:

BPA Headquarters Building
1002 NE. Holladay
Portland, Oregon 97232

BPA Washington, D.C. Office
5600 Interior Building
Washington, D.C. 20240

[M 20307; Power Project No. 407]

### MONTANA

#### Order Providing for Opening of Lands

SEPTEMBER 7, 1973.

By virtue of the authority contained in section 24 of the Act of June 10, 1920 (41 Stat. 1075 (16 U.S.C. 818)), as amended, and in accordance with Bureau of Land Management Order No. 701 dated July 23, 1964 (29 FR 10526), as amended, and pursuant to the vacating order of the Federal Power Commission issued June 27, 1973, it is ordered as follows:

1. The following described lands, so far as they are withdrawn and reserved for power purposes, are hereby restored to disposition under applicable public land laws from the withdrawal for Federal Power Project No. 407 dated April 12, 1923, as amended February 1, 1926, subject to valid existing rights and the provisions of existing withdrawals:

PRINCIPAL MERIDIAN, MONTANA

T. 5 S., R. 15 E.,
Sec. 32, S½NE¼, SE¼, and unsurveyed E½SW¼; and
Sec. 33, SW¼NW¼, SW¼, and W½SE¼.
T. 6 S., R. 15 E., (unsurveyed)
Sec. 4, N½NW¼ and SW¼NW¼;
Sec. 5, N½, SW¼, N½SE¼, and SW¼SE¼;
Sec. 6, SE¼NE¼, NE¼SW¼, S½SW¼, and SE¼;
Sec. 7, N½N½; and
Sec. 8, NW¼NW¼.

The areas described aggregate approximately 1,840 acres in Stillwater County.

The lands are withdrawn as part of the Custer National Forest and are under the jurisdiction of the Department of Agriculture. In addition to the withdrawal for national forest purposes, the SW¼SE¼NE¼, NE¼SE¼, SE¼NW¼SE¼, NE¼SW¼SE¼, and N½SE¼SE¼, Sec. 32, T. 5 S., R. 15 E., are withdrawn for a national forest recreation area and the NW¼ Sec. 6, T. 6 S., R. 15 E., is withdrawn for Federal Power Project 1662.

2. At 10 a.m. on October 20, 1973, the lands shall be open to such forms of disposition as may by law be made of national forest lands. The above described land has been open to application and offers under the mineral leasing laws, and to location under the United States mining laws subject to the provisions of the Act of August 11, 1955 (69 Stat. 682; (30 U.S.C. 621)).

ROLAND F. LEE,
*Chief, Branch of Lands and Minerals Operations.*

[FR Doc.73-19546 Filed 9-13-73;8:45 am]

## DEPARTMENT OF AGRICULTURE

### Farmers Home Administration

[Designation No. A024]

### SAN PATRICIO COUNTY, TEXAS

#### Designation as Emergency Areas

The Secretary of Agriculture has found that a general need for agricultural credit exists in San Patricio County, Texas.

The Secretary has further found that such general need for agricultural credit existing in these areas cannot be met temporarily by private, cooperative, or other responsible sources at reasonable rates and terms for loans for similar purposes and periods of time, and that the need for such credit in such areas is the result of a natural disaster consisting of hail and high winds on June 5, 1973, and excessive rains June 5 through July 7, 1973, which occurred during the incidence period of June 5, 1973, through July 7, 1973.

Therefore, the Secretary has designated this area as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 93-24, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Dolph Briscoe that such designation be made.

Applications for Emergency loans must be received by this Department prior to October 29, 1973, for physical losses and prior to May 30, 1974, for production losses, except that qualified borrowers who received initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 7th day of September 1973.

FRANK B. ELLIOTT,
*Administrator, Farmers Home Administration.*

## DEPARTMENT OF COMMERCE

### Maritime Administration

### CONSTRUCTION-DIFFERENTIAL SUBSIDY CONTRACT UNDER MARAD TANKER CONSTRUCTION PROGRAM

#### Notice of Award

Notice is hereby given that on June 29, 1973, the Maritime Subsidy Board awarded a construction-differential subsidy contract, Contract No. MA/MSB-283, to Seatrain Shipbuilding Corporation (Seatrain) and Contract No. MA/MSB-284 to Fillmore Tanker Corporation for one 225,000 deadweight ton tanker, MA Design T10-S-92a, to be constructed by Seatrain at its Brooklyn, New York, shipyard. The application of Fillmore Tanker Corporation for such contract was filed on June 12, 1972, and amended on May 29, 1973.

By Order of the Maritime Subsidy Board Maritime Administration.

Dated September 11, 1973.

JAMES S. DAWSON, JR.,
*Secretary.*

[FR Doc 73-19612 Filed 9-13-73;8:45 am]

[Docket No. S-388]

### OPERATING-DIFFERENTIAL SUBSIDY FOR CARRIAGE OF BULK CARGO PRINCIPALLY BETWEEN THE U.S. AND USSR

#### Notice of Application To Extend Existing Agreements

Notice is hereby given that applications have been filed under the Merchant Marine Act, 1936, as amended, for operating-differential subsidy with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire, unless extended, on December 31, 1973 (except for subsidized voyages in progress on that date). Inasmuch as the operators listed below and/or related persons or firms, employ ships in the domestic, intercoastal or coastwise service, written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, will be required for each operator upon extension of its contract, notwithstanding that a voyage in the above-mentioned bulk carrier service would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

Name of Applicant: Vancor Steamship Corp. (Vancor).

Description of Domestic Service and Vessels: Vancor is the parent of National Transport Corp. (National), which owns and operates the National Defender, a U.S. flag tanker with coastwise privileges. Accordingly, Vancor requests written permission for National or a charterer to operate the *National Defender* in domestic intercoastal or coastwise service during the period of requested extension of Vancor's operating-differential subsidy contract.

Name of Applicant: National Transport Corp. (National).

Description of Domestic Service and Vessels: National owns and operates the *National Defender*, a U.S. flag tanker with coastwise privileges. Accordingly, National requests written permission for it or a charterer to operate the *National Defender* in domestic intercoastal or coastwise service during the period of requested extension of National's operating-differential subsidy contract.

Name of Applicant: American Eagle Tanker Corp. (American Eagle).

Description of Domestic Service and Vessels: Applicant's parent, American Foreign Steamship Corporation, is the owner of the *SS American Oriole, SS American Robin*, each a U.S. flag dry cargo vessel with full U.S. flag privileges. A corporation affiliated with the applicant, American Condor Steamship Corp. owns the *SS American Condor, SS Star, SS Moon*, which are U.S. flag dry cargo vessels with full U.S. flag privileges. The vessels now owned by applicant's parent or affiliates may be engaged by the owner or charterer in the domestic intercoastal or coastwise service. Accordingly, American Eagle requests written permission for related companies or charterers to employ one or more of the aforementioned vessels in intercoastal or coastwise service.

Interested parties may inspect this application in the Office of The Secretary, Maritime Administration, Department of Commerce Building, Fourteenth & E Streets NW., Washington, D.C. 20230.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) in the application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the applications must, by close of business September 20, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for September 21, 1973, in Room 4896 Department of Commerce Building, Fourteenth & E Street NW., Washington, D.C. 20230. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether

V 38-178
SEP 14 73
XUM

the proposed operation (a) could result in unfair competition to any person, firm or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act.

By order of the Maritime Administration.

Dated September 6, 1973.

JAMES S. DAWSON, Jr.,
*Secretary.*

[FR Doc.73-19615 Filed 9-13-73;8:45 am]

[Docket No. S-389]

## UNITED STATES LINES, INC.

### Notice of Application

Notice is hereby given that United States Lines, Inc. (U.S. Lines), for a prospective wholly-owned subsidiary, has filed an application under the Merchant Marine Act of 1936, as amended (the Act), for operating-differential subsidy with respect to operation of four (4) 80,000 deadweight ton tankers in worldwide tanker trades. U.S. Lines operates containerships in a service between the U.S. East and West Coast and Hawaii and the Far East, including carriage of domestic intercoastal cargo and domestic cargo to Hawaii. Accordingly, U.S. Lines or the prospective wholly-owned subsidiary will require written permission under section 805(a) of the Act if its application for operating-differential subsidy is approved, for U.S. Lines to continue such domestic operations.

The Applicant believes that it is entitled under section 805(a) of the Act to mandatory permission to continue the intercoastal portion of such domestic service if its application is granted because in 1935, and before that almost continuously since the opening of the Panama Canal in 1915, the Applicant (and predecessors in interest) was in bona fide operation as a common carrier by water in the intercoastal trade and has so operated since that time except for interruptions of service over which the Applicant (or its predecessors in interest) had no control.

Interested parties may inspect this application in the Office of The Secretary, Maritime Administration, Department of Commerce Building, Fourteenth & E Streets NW., Washington, D.C. 20230.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) in the application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business September 24, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for September 26, 1973 in Room 4896 Department of Commerce Building, Fourteenth & E Streets NW., Washington, D.C. 20230. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act.

By Order of the Maritime Administration.

Dated September 6, 1973.

JAMES S. DAWSON, Jr.,
*Secretary.*

[Docket No. S-390]

## WATERMAN STEAMSHIP CORPORATION

### Notice of Application

Notice is hereby given that Waterman Steamship Corporation, a New York corporation, has filed an application with the Maritime Subsidy Board pursuant to Title VI (46 U.S.C. 1171-1183) of the Merchant Marine Act, 1936, as amended, (the Act) for a long term operating-differential subsidy agreement for operations on Trade Route No. 12 (U.S. Atlantic/Far East). This company presently has the privilege of calling at U.S. Atlantic ports under its current Operating-Differential Subsidy Agreement, Contract No. MA/MSB-138, covering operations on Trade Route No. 22 (U.S. Gulf/Far East), which agreement is scheduled to expire not later than May 8, 1975. Application for a long-term agreement for operating-differential subsidy on Trade Route No. 22 has been filed previously and has been docketed as S-336. In its present application, Waterman Steamship Corporation is requesting operating-differential subsidy on up to a maximum of 30 sailings per annum on Trade Route No. 12. The applicant proposes to operate such service in conjunction with its service on Trade Route No. 22, utilizing the same vessels. The service would be operated initially with war-built vessels and/or Mariner type vessels, and the applicant has proposed a replacement program which involves the ultimate replacement of three Mariners by two LASH-type vessels in 1977 and the remaining three Mariners by two LASH-type vessels in 1985.

Interested parties may inspect this application in the Office of the Secretary, Maritime Subsidy Board, Room 3099-B, Department of Commerce Building, Fourteenth & E Streets NW., Washington, D.C. 20230.

Any person firm or corporation having any interest in such application and desiring a hearing on issues pertinent to section 605(c) of the Act (46 U.S.C. 1175), should by the close of business on September 27, 1973, notify the Secretary, Maritime Subsidy Board, in writing in triplicate of his interest therein, and file petition for leave to intervene in accordance with the Rules of Practice and Procedure of the Maritime Subsidy Board (46 CFR, Part 201). Each such statement of interest and petition to intervene should indicate with as much specificity as possible those portions of the application with which the intervenor is concerned and the facts which the intervenor would undertake to prove at a hearing.

In the event that a section 605(c) hearing is ordered to be held, the purpose of the hearing will be to receive evidence relevant to (1) whether the application is one with respect to a vessel or vessels to be operated in an essential service, served by citizens of the United States which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate, (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon, (3) whether the application is one with respect to a vessels or vessels operated or to be operated on an essential service served by two or more citizens of the United States with vessels of United States registry, and if so, whether the effect of the requested contract would be to give undue advantage or be unduly prejudicial, as between citizens of the United States, in the operation of vessels in such essential service, and (4) whether it is necessary to enter into such contract in order to provide adequate service by vessels of United States resigtry.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

Dated September 11, 1973.

By Order of the Maritime Subsidy Board.

## National Oceanic and Atmospheric Administration

## ALABAMA, LOUISIANA, AND MISSISSIPPI

### Determination of Commercial Fishery Failure Due to Resource Disaster

Whereas, many individuals and firms in Alabama, Louisiana, and Mississippi are engaged in harvesting, processing, and marketing oysters to meet consumer demands; and

Whereas, the oyster resources in Alabama, Louisiana, and Mississippi make an important contribution to the economy of these States with a combined production value of more than $5 million; and

Whereas, mortalities of oyster stocks from excessive flood waters, a natural cause, ranged from 29 to 85 percent on individual oyster reefs in Alabama, over 40 percent on approximately 2,400 acres of oyster reefs in Louisiana, and 95 to 100 percent on 2,500 acres of oyster reefs in Mississippi; and

Whereas, natural rehabilitation has been hampered by deposition of silt and heavy fouling of cultch by marine organisms; and

Whereas, it is known that the damaged oyster resources can be effectively and economically restored through planting of cultch material;

Now, therefore, as the authorized representative of the Secretary of Commerce, I hereby determine that the foregoing circumstances constitute a commercial fishery failure due to a resource disaster arising from natural causes within the meaning of subsection 4(b) of the Commercial Fisheries Research and Development Act as amended. I hereby authorize the use of funds under this Act to restore and put back into production the damaged oyster resources in coastal areas of Alabama, Louisiana, and Mississippi.

HOWARD W. POLLOCK,
*Acting Administrator.*

## CENSUS ADVISORY COMMITTEE ON POPULATION STATISTICS

### Notice of Public Meeting

The Census Advisory Committee on Population Statistics will convene on September 21, 1973, at 9:30 a.m. The Committee will meet in Room 2113, Federal Building 3, at the Bureau of the Census in Suitland, Maryland.

The Census Advisory Committee on Population Statistics was established in 1965 to advise the Director, Bureau of the Census, on current programs, on plans for the 1970 Census of Population and on other matters dealing with the collection and issuance of population statistics.

The Committee is composed of 10 members appointed by the Secretary of Commerce.

The agenda for the meeting includes: (1) 1970 Census data delivery system—1970 Census experience, (2) Issues in statistical area concepts and definitions, (3) Net Census undercount—use in post-censal estimates and extension to sub-national levels, (4) Neighborhood characteristics, (5) New population projections, (6) Review of poverty and income statistics, and (7) Revision of Current Population Survey March package.

A limited number of seats—approximately 15—will be available to the public. A brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Guidance Control Officer at least three days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting should contact the Committee Guidance and Control Officer, Mr. Daniel B. Levine, Associate Director for Demographic Operations, Bureau of the Census, Room 2061, Federal Building 3, Suitland, Maryland. (Mail address: Washington, D.C. 20233). Telephone 301-763-5167.

EDWARD D. FAILOR,
*Administrator, Social and Economic Statistics Administration.*

## Food and Drug Administration

## ADVISORY COMMITTEES

### Notice of Renewal

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Food and Drug Administration announces the renewal by the Secretary, Department of Health, Education, and Welfare, of the National Advisory Food Committee for an additional period of two years beyond August 24, 1973, and the Anti-Infective Agents Advisory Committee and the Radioactive Pharmaceuticals Advisory Committee for an additional period of two years beyond August 30, 1973.

Authority for these committees will expire August 24, 1975, and August 30, 1975, unless the Secretary formally determines that continuance is in the public interest.

Dated September 10, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

[FR Doc.73-19628 Filed 9-13-73;8:45 am]

## NATIONAL ADVISORY VETERINARY MEDICINE COMMITTEE

### Notice of Meeting

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Food and Drug Administration announces the following public advisory committee meeting and other required information in accordance with provisions set forth in section 10(a)(1) and (2) of the act:

| Committee name | Date, time, and place | Type of meeting and contact person |
|---|---|---|
| National Advisory Veterinary Medicine Committee. | Sept. 27-28, 9 a.m., Conference Room A, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md. | Open—Kenneth E. Taylor, D.V.M., Room 7-79, 5600 Fishers Lane, Rockville, Md. 20852, 301-443-1490. |

*Purpose.*—Advises the Commissioner of Food and Drugs on policy matters of national significance as they relate to assuring safety and efficacy of drugs, medical feeds and food additives used in veterinary medicine and animal production; truthful labeling and wholesomeness of animal foods; animal nutrition; and the safety of food from animals that have been treated with drugs or fed drugs or other additives.

*Agenda.*—Animal Drug and Feed Additive Residues: legal status, human health implications, safety criteria, animal husbandry practices, analytical methods. Veterinary Medical Practice and its Relationship to FDA: OTC and prescription drugs, certification of veterinary products, pet foods.

Agenda items are subject to change as priorities dictate.

During the open sessions shown above, interested persons may present relevant information or views orally to any committee for its consideration. Information or views submitted to any committee in writing before or during a meeting shall also be considered by the committee.

A list of committee members and summary minutes of meetings may be obtained from the contact person for the committee both for meetings open to the public and those meetings closed to the public in accordance with section 10(d) of the Federal Advisory Committee Act.

Most Food and Drug Administration advisory committees are created to advise the Commissioner of Food and Drugs on pending regulatory matters. Recommendations made by the committees on these matters are intended to result in action under the Federal Food, Drug, and Cosmetic Act, and these committees thus necessarily participate with the Commissioner in exercising his law enforcement responsibilities.

Dated September 10, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

## ATOMIC ENERGY COMMISSION

[Docket Nos. 50-413, 50-414]

### DUKE POWER CO.

### Notice of Further Prehearing Conference

In the matter of Duke Power Company, (Catawba Nuclear Station Units 1 and 2), Docket Nos. 50-413, 50-414.

Notice is hereby given that, pursuant to the Atomic Energy Commission's "Notice of Hearing on Application for Construction Permit" herein, published in the FEDERAL REGISTER on December 1, 1972 (37 FR 25560), and pursuant to the Memorandum and Order dated September 6, 1973, issued herein by the Atomic Safety and Licensing Board established by the Commission for this proceeding, a further Prehearing Conference will be held on Thursday, September 20, 1973, at 10:00 a.m., local time, in Courtroom No. 7, District Court, Mecklenburg County Courthouse, 700 East Trade Street, Charlotte, North Carolina 28201.

The further Prehearing Conference will deal with the following matters:

(1) Identification of the key issues;

(2) Any steps necessary for further identification of the issues;

(3) The need for discovery, and the time required therefor;

(4) Establishment of a schedule for further action; and

(5) Such other matters as may aid in the orderly and expeditious conduct of the hearing.

The parties are directed to confer prior to the Prehearing Conference in an effort to narrow, simplify and clarify the contentions and issues presented in this proceeding, so as to assist in the more orderly development of the record in this hearing.

The persons and organizations who were permitted by the aforesaid Memorandum and Order of September 6th to make limited appearances in this proceeding are not required to appear at this scheduled Prehearing Conference; such presentations will be received at the forthcoming Evidentiary Hearing.

Issued at Washington, D.C., this 10th day of September 1973.

It is so ordered.

THE ATOMIC SAFETY AND LICENSING BOARD,
MAX D. PAGLIN,
*Chairman.*

[Docket Nos. 50-416, 50-417]

### MISSISSIPPI POWER AND LIGHT CO.

### Notice and Order for Third Prehearing Conference

In the matter of Mississippi Power and Light Company (Grand Gulf Nuclear Station, Units 1 and 2), Docket Nos. 50-416, 50-417.

Notice is hereby given, in accordance with § 2.752 of the Atomic Energy Commission's rules of practice, 10 CFR Part 2, that the Atomic Safety and Licensing Board (the Board) will hold a third prehearing conference in the above captioned case on Tuesday, October 23, 1973, at 10:00 a.m., local time, in the Main Courtroom, Circuit Court for Jackson County, 400 East Pascagoula Street, Jackson, Mississippi 39205.

The third prehearing conference shall consider the following matters:

1. All pending motions;
2. The status of discovery;
3. Further simplication, clarification, and specification of the issues;
4. The advisability of holding a separate hearing on environmental issues prior to a hearing on health and safety issues;
5. Scheduling of future hearings in this proceeding; and
6. Such other matters as may aid in the orderly disposition of the proceeding.

The attorneys for the respective parties are directed to confer in advance of this prehearing conference, in such matter as they deem appropriate, and report to the Board at said conference of any stipulations regarding issues or evidence, and on any other mutually agreeable procedures to expedite any evidentiary hearing that is to be scheduled.

Members of the public are invited to attend this third prehearing conference as well as all evidentiary hearings to be held at a later date to be fixed by the Board.

By order of the Atomic Safety and Licensing Board.

Dated this 10th day of September 1973, at Washington, D.C.

DANIEL M. HEAD,
*Chairman.*

[Docket Nos. 50-450 and 50-451]

### DELMARVA POWER & LIGHT COMPANY AND PHILADELPHIA ELECTRIC COMPANY

### Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matter

Delmarva Power & Light Company, 800 King Street, Wilmington, Delaware 19899, and Philadelphia Electric Company, 2301 Market Street, Philadelphia, Pennsylvania 19101 (the applicants), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, have filed an application which was docketed on August 16, 1973, for authorization to construct and operate two generating units utilizing high temperature gas-cooled reactors. The application was tendered on April 30, 1973. Following a preliminary review for completeness, it was accepted on June 15, 1973.

The proposed nuclear facilities, designated by the applicants as the Summit Power Station, Units 1 and 2 will be located on a site in New Castle County, Delaware, approximately 1.2 miles south of the Chesapeake and Delaware Canal, 5 miles northeast of Middletown, Delaware, and 15 miles southwest of Wilmington, Delaware. Each reactor is designed for initial operation at approximately 2000 megawatts thermal, with a net electrical output of approximately 785 megawatts.

A Notice of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before October 30, 1973. The request should be filed in connection with Docket Nos. 50-450-A and 50-451-A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, and at the Newark Free Library, Elkton Road and Delaware Avenue, Newark, Delaware 19711.

The applicants also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR, Part 50, an environmental report dated April 1973. Following a preliminary review for completeness, it was rejected on June 15, 1973, for lack of sufficient information. The applicants submitted a supplement to the environmental report on July 30, 1973, and the report was accepted. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations related to the proposed construction of the Summit Power Station, Units 1 and 2 is also being made available at the Delaware State Planning Office, Tomas Collins Building, 530 South Dupont Highway, Dover, Delaware 19901, and at the Wilmington Metropolitan Area Planning and Coordinating Council, 4613 Robert Kirkwood Highway, Wilmington, Delaware 19808.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Maryland, this 20th day of August 1973.

For the Atomic Energy Commission.

DARRELL G. EISENHUT,
*Acting Chief, Gas Cooled Reactors Branch, Directorate of Licensing.*

[FR Doc.73-18380 Filed 8-30-73;8:45 am]

[Docket Nos. 50-448 and 50-449]

### POTOMAC ELECTRIC POWER COMPANY

### Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matter

Potomac Electric Power Company (the applicant), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed an application, which was docketed on August 9, 1973, for authorization to construct and operate two single cycle, forced circulation, boiling water nuclear reactors. The application was tendered on July 2, 1973. Following a preliminary review for completeness, it was found acceptable for docketing on August 6, 1973.

The proposed nuclear facilities, designated by the applicant as the Douglas Point Nuclear Generating Station, Units 1 & 2 are located on the east bank of the Potomac River, about 30 miles south-southwest of Washington, D.C., in Charles County, Maryland, and are designed for initial operation at approximately 3579 megawatts (thermal), with a net electrical output of approximately 1178 megawatts.

A Notice of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before October 30, 1973. The request should be filed in connection with Docket Nos. 50-448-A & 50-449-A.

The applicant has also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR, Part 50, an environmental report dated August 8, 1973. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations relative to the proposed construction of the Douglas Point Nuclear Generating Station, Units 1 & 2, is also being made available at the Department of State Planning, 301 West Preston Street, Baltimore, Maryland 21201 and at the Metropolitan Washington Council of Governments, 1225 Connecticut Avenue NW., Washington, D.C. 20036.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Maryland, this 14th day of August 1973.

For the Atomic Energy Commission.

WALTER R. BUTLER,
*Chief, Boiling Water Reactors, Branch 1 Directorate of Licensing.*

[Docket Nos. 50-387 and 50-388]

### PENNSYLVANIA POWER & LIGHT COMPANY (SUSQUEHANNA STEAM ELECTRIC STATION, UNITS 1 AND 2)

### Assignment of Members of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority in 10 CFR 2.787 (a), the Chairman of the Atomic Safety and Licensing Appeal Panel has assigned the following panel members to serve as the Atomic Safety and Licensing Appeal Board for these proceedings:

Alan S. Rosenthal, Chairman
Dr. John H. Buck, Member
William C. Parler, Member

Dated September 11, 1973.

MARGARET E. DU FLO,
*Secretary to the Appeal Board.*

### ADVISORY COMMITTEE ON REACTOR SAFEGUARDS' SUBCOMMITTEE ON BROWN'S FERRY NUCLEAR PLANT

### Postponement of Meeting

SEPTEMBER 12, 1973.

The meeting of the Advisory Committee on Reactor Safeguards' Subcommittee on Brown's Ferry Nuclear Plant, Units 2 and 3, originally scheduled for September 20, 1973, a notice of which was previously published in the FEDERAL REGISTER on September 4, 1970 (Vol. 38, No. 170), at page 23814, has been postponed until further notice.

JOHN C. RYAN,
*Advisory Committee Management Officer.*

## CIVIL AERONAUTICS BOARD

[Docket 25280, Agreement CAB 23773, R-3]

### INTERNATIONAL AIR TRANSPORT ASSOCIATION

### Order Regarding Cargo Charters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of September 1973.

There has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958, as amended, and Part 261 of the Board's Economic Regulations, an agreement among various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA) adopted at meetings recently held in Mexico City, and assigned the above designated CAB agreement number. The agreement relates to IATA resolutions 045a and 045c governing cargo charters for various areas.[1] The resolutions are proposed for effectiveness October 1, 1973. The effect of the resolutions would be to revalidate the IATA cargo charter resolution and an IATA resolution concerning involuntary change of routing of cargo from chartered aircraft to scheduled service for all areas of the world through September 30, 1975.

On August 20, 1973, Trans International Airlines, Inc. and World Airways, Inc., filed a joint request urging the Board to disapprove IATA resolution 045a at such time as the Board amends Part 297 of its Economic Regulations to delete the provisions of § 297.23. On August 24, 1973, the Air Freight Forwarders Association requested the Board to disapprove IATA resolution 045a.

For reasons hereinafter set forth, the Board has decided to approve the above resolutions through October 31, 1973, and to afford interested parties an opportunity to show cause by October 1, 1973, why the above agreements should not be

[1] The agreement is IATA standard revalidation resolution 002, and so our action herein is only insofar as it concerns IATA resolution 045a and 045c.

V 38-178
SEP 14 73
XUM

disapproved after October 31, 1973, insofar as they apply to air transportation to or from the United States.

The Board is mindful of the differences between these two resolutions and the Board's own charter rules. These differences raise a basic question as to whether the present agreements, or in fact any agreement on these subjects between IATA members, continue to serve a useful regulatory purpose. It is on this question that we especially seek the comments of interested parties. We note that the Board, in disapproving the IATA passenger charter resolution (045), found that that agreement served no useful regulatory purpose.[2]

The Board is not satisfied with the disparity between its cargo charter rules and the cargo charter rules agreed to by the members of IATA. The IATA cargo charter resolution is in some respects more restrictive than the Board's rules,[3] and in other respects more liberal.[4] To the extent the IATA resolutions are more restrictive than the Board's rules, they prevent the public from taking advantage of charter services to the same extent as the Board has found to be required in the public interest. To the extent the IATA carriers have agreed to rules that are more liberal than the Board's rules, the Board's rules would, in any event, preclude such operations in air transportation. There does not appear to be any valid basis for having two sets of differing charter regulations, one by the U.S. government and one by certain air carriers.

For the foregoing reasons, the Board tentatively finds that the above IATA resolutions are adverse to the public interest. However, the Board recognizes that the resolutions have been in effect, and have been approved by the Board and that it would be appropriate to afford interested parties an opportunity to show cause why we should not make our tentative finding final. In order that interested parties may have sufficient time to prepare their comments, and the Board may have time to consider the comments, we will approve the subject resolutions through October 31, 1973. The Board therefore finds that until October 31, 1973, these resolutions will not be adverse to the public interest nor in violation of the Act, and should be approved until that date.

Accordingly, *it is ordered:*

1. That Agreement CAB 23773, R-3 (insofar as it relates to resolutions 045a and 045c) be and it hereby is approved, provided that the Board's approval shall be limited to the period ending October 31, 1973, insofar as such resolutions relate to air transportation, as defined in the Act;

2. That interested parties are hereby directed to show cause why these IATA resolutions should not be disapproved to the extent that they relate to air transportation, as defined in the Act, after October 31, 1973;

3. That such comments shall be filed in this Docket on or before October 1, 1973;[5] and

4. That this order shall be served on all holders of foreign air carrier permits or certificates of public convenience and necessity, and upon the Departments of Justice, State, and Transportation.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19598 Filed 9-13-73;8:45 am]

[Dockets 23333, 24488; Agreement C.A.B. 23845]

## INTERNATIONAL AIR TRANSPORT ASSOCIATION

### Order Regarding Currency Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of September 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted by mail vote, and has been assigned the above-designated C.A.B. agreement number.

The agreement would revise the IATA-agreed exchange rate for the Gambian dalasi from 1.91886 dalasi=1 U.S. dollar to 1.53508 dalasi=1 U.S. dollar.[1] This rate is used for conversion of specified dollar fares/rates into local currency selling fares and rates in Gambia, which would now be surcharged five percent. The subject changes were necessitated by currency fluctuations resulting in undervaluation of the dalasi in the existing IATA parities, and will effect a reduction of 16 percent in fares and rates stated in dalasi for transportation originating in Gambia.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find that Resolutions 100(Mail 930)022x, 200(Mail 187)022x, and 300(Mail 411)022x, incorporated in Agreement C.A.B. 23845, are adverse to the public interest or in violation of the Act.

Accordingly, *it is ordered that:*

Agreement CAB 23845 be and hereby is approved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19599 Filed 9-13-73;8:45 am]

## COST OF LIVING COUNCIL

### HEALTH INDUSTRY ADVISORY COMMITTEE

### Notice of Change of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 88 Stat. 770), notice is hereby given that the meeting of the Health Industry Advisory Committee scheduled, as previously announced, on September 17, 1973, at the Cost of Living Council offices, 2000 M Street NW., will meet instead in the Chinese Room of the Mayflower Hotel in Washington, D.C. Also, the afternoon portion of the meeting will be held in the same room and will be open to the public. Therefore, both morning and afternoon sessions will be open to the public on a first-come, first-serve basis.

Issued in Washington, D.C., on September 12, 1973.

HENRY H. PERRITT, Jr.,
*Executive Secretary,*
*Cost of Living Council.*

[FR Doc.73-19707 Filed 9-12-73;3:31 pm]

## FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19812; FCC 73-926]

### GTE SATELLITE CORP.

### Memorandum Opinion and Order Re Oral Argument En Banc

In the matter of applications of GTE Satellite Corporation for authorization to lease satellite transponders and to construct five earth stations to provide domestic communications satellite services, Docket No. 19812, File Nos. 14-DSE-P-71, 15-DSE-P-71, 16-DSE-P-71, 17-DSE-P-71, 14-DSE-P-73.

1. One of the domestic satellite system proposals considered by the Commission in the domestic satellite proceeding (Docket 16495) was a proposal by GTE Service Corporation and various GTE operated companies to provide interstate message toll telephone service (MTT) and private line services by means of satellite facilities leased from Hughes Aircraft Company, now National Satellite Services, Inc. (NSS) and earth stations owned by GTE. Following the issuance of the Second Report and Order in Docket 16495, GTE Service Corporation formed a separate corporate subsidiary, GTE Satellite Corporation (GSAT), to engage in domestic satellite operations and transferred the pending applications to that entity. NSS proposes to use the remainder of the satellite capacity now used by GSAT to provide interconnection service to public broadcasting interests without charge and to engage in its own private venture for distributing programming to the cable television industry. The two proposals are interdependent in that NSS represents that it cannot proceed and will abandon its application if the GSAT proposal is not authorized.

2. In the Second Report and Order on domestic satellites in Docket No. 16495 (38 FCC 2d 844, 853-854, paragraphs 27-30), the Commission left open the question of whether GSAT should be authorized to provide interstate MTT service via domestic satellite and determined that GSAT would, in any event, be under the same restriction as A.T. & T. with respect to the provision of private line and other specialized services. Concerning MTT service, the Commission stated:

> 27. * * * in encouraging multiple entry and the development of competition in the supply of domestic communications, we have maintained a distinction between the so-called monopoly switched telephone services now being furnished by A.T. & T. and all other classes of existing and potential specialized services. We have made this distinction not for the purpose of protecting any established position that A.T. & T. occupies in the MTT field. Rather, it has been our purpose and concern to protect the public in the availability of efficient and economic switched MTT services—an interest that might well be adversely affected by unnecessarily fragmenting responsibility for the planning and provision of the facilities required for this integrated service. On the other hand, we should not reject any proposal that might prove feasible and beneficial to the public simply because it represents some departure from the established scheme. This is particularly true when the proposal comes from an entity, such as GTE, which already is a significant participant in the furnishing of MTT facilities and services, although essentially as a carrier which originates, terminates, and switches large volumes of MTT traffic rather than in the provision of long lines transmission facilities.
>
> 28. At least potentially, GTE's proposal offers several advantages. It would introduce more directly, although on a limited scale, the perspective and experience of another responsible entity into the planning and operation of the interstate MTT network, which heretofore has been the sole responsibility of A.T. & T. It could provide a basis for regulatory comparison of the relative efficiencies and cost advantages of somewhat different technologies represented by A.T. & T.'s proposal and GTE's proposal. It could also tend to lessen A.T. & T.'s dominance and economic influence in the domestic communications field.
>
> 29. Notwithstanding these potential public benefits, there are a number of uncertainties, not dispelled by the information contained in the record before us, that must be resolved before we can make the required statutory finding that GTE's proposal will serve the public interest. Accordingly, before determining whether this portion of the Hughes/GTE applications should be authorized, we will require a showing of the nature described by the staff (paragraphs 98-99) concerning: what potential benefits might be achieved by affording GTE access to the satellite technology for this purpose; whether its proposal is economically justified from the standpoint of the public in terms of costs and prospective fill; the effect on GTE's present contracts for settlement with A.T. & T.; GTE's plans for handling traffic in case of temporary outages or catastrophic failure of its satellite system facilities; how the costs of such facilities would be treated for rate-making and accounting purposes; and the kinds of data it will gather and report to the Commission to assist our evaluation of the efficiency and economy of any authorized operations compared to continued exclusive reliance on the interstate switched telephone facilities of A.T. & T.

3. Further, if GSAT's domestic satellite proposal is authorized, the Second Report did not foreclose the possibility that GSAT would be the designated entity to provide MTT service to Hawaii if it showed that the cost of using its facilities would be less than or approximately equivalent to the cost of utilizing A.T. & T. facilities (Second Report, 38 FCC 2d at 858, paragraph 39).

4. Neither GSAT nor NSS sought reconsideration of the Second Report. Instead GSAT filed amendments to the pending applications on October 16, 1972, which purported to make the showings required by the Commission. The staff afforded A.T. & T. an opportunity to comment on the GSAT amended proposal, and A.T. & T. filed its comments on November 27, 1972. Subsequently, GSAT filed a reply and A.T. & T. filed supplemental comments.

5. The Commission has given careful consideration to the showings made by GSAT in support of its application with respect to the remaining issues specified in paragraph 29 of the Second Report and Order quoted above, as well as to the comments filed by A.T. & T. and GSAT's replies thereto. It is the Commission's view that its resolution of these issues and the pleadings with respect thereto would be assisted by an oral argument at an early date as hereinafter designated with our final decision issued immediately thereafter.

6. Since no parties other than GSAT and A.T. & T. have filed data and pleadings concerning the GSAT applications, we are limiting the arguments herein to those two parties. We are not concerned with the NSS aspects of the applications in this matter.

7. *It is therefore ordered,* That an oral argument will be held before the Commission en banc at its offices in Washington, D.C., on September 11, 1973, at 9:30 a.m.

8. *It is further ordered,* That GSAT and A.T. & T. shall each limit themselves to the issues as quoted above from paragraph 29 of the Second Report and Order in Docket 16495 and to the context of data and pleadings heretofore filed by said parties.

9. *It is further ordered,* That each party shall have 60 minutes of argument and GSAT shall have the right to open and close said argument.

Adopted September 6, 1973.

Released September 7, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] VINCENT J. MULLINS,
*Acting Secretary.*

[FR Doc.73-19595 Filed 9-13-73;8:45 am]

[Docket No. 19808; FCC 73-901]

### TELERENT LEASING CORP., ET AL.

### Federal Pre-emption of Interconnection of Subscriber Furnished Equipment

In the matter of Telerent Leasing Corporation, et al., petition for declaratory rulings on questions of Federal pre-emption on regulation of interconnection of subscriber-furnished equipment to the nationwide switched public telephone network.

1. The Commission has before it a petition for declaratory rulings filed on August 8, 1973 by North American Telephone Association (NATA) and a number of firms doing business in the States of North Carolina and Nebraska, hereinafter jointly referred to as Petitioners. NATA is a national trade organization of companies engaged in the manufacture, distribution, installation, and maintenance of interconnected communications terminal equipment and systems.[1] The primary question raised by the petition is whether and, if so, to what extent the actions which we have taken on interconnection of customer-provided communications equipment to the nationwide switched public telephone network have preempted state action in this area. A ruling is also sought as to whether customers, such as hotels and motels, providing their own communications systems (e.g., PABX) are communications common carriers and therefore subject to regulation as such.

2. On August 15, 1973, we invited persons interested in commenting on the subject petition to file comments on or before September 12, 1973, and reply comments on or before September 24, 1973.[2]

---

[5] Twelve (12) copies of such comments shall be filed.

[1] The dalasi/U.K. pound parity would also be revised, from 5.00 to 4.00=1 pound.

[2] See Order 72-6-91, dated June 21, 1972, at page 5.

[3] The IATA resolution is more restrictive than the Board's charter rules in that it does not allow member carriers to charter to airfreight forwarders.

[4] Examples of instances where the IATA resolutions are more liberal than the Board's charter rules are that they allow the carrier to allocate unused space for the carriage of mail, and for the use of the carrier's government, that they allow split cargo charters in limited circumstances, and that they allow charter traffic to be rerouted over scheduled services in certain instances.

[1] Commissioners Robert E. Lee, Johnson, and H. Rex Lee dissenting.

[1] In addition to NATA, Petitioners are comprised of Telerent Leasing Corporation, Crescent Industries, Inc., Long Engineering Co., Petty Communications, Inc., Tele-Sound Company, Inc., and Telephone Interconnect Company, all NATA members in the States of North Carolina or Nebraska.

[2] Public Notice dated August 15, 1973 (Mimeo No. 05725). In an earlier News Release dated August 10, 1973 (mimeo No. 05612) our Public Information Office called attention to Petitioners' filing as one of a number received of more than routine interest.

V38-178
SEP 14 73
XUM

3. In our Carterfone decision,[3] we held that the Carterfone[4] filled a need, that its use did not adversely affect the telephone system, that its use was nevertheless precluded by provisions in an American Telephone & Telegraph Company (A.T. & T.) tariff, and that the tariff was unlawful because it prohibited the use of the Carterfone and other interconnecting devices without regard to actual harm caused to the telephone system. We did not prescribe the terms of a new tariff, but left that to the initiative of the telephone companies, pointing out that they were in no wise precluded from adopting reasonable standards to prevent harmful interconnection. Basic to our holding was a rejection of A.T. & T.'s position that because A.T. & T. could not control the interconnected private system, interconnection was by definition a degradation of the message toll telephone system without regard to the quality of the interconnecting device or of the interconnected mobile radio system, i.e., without regard to actual harmful effects. We viewed that position, and the tariff rule embodying it, as unreasonable.

4. As a result of our Carterfone decision, A.T. & T. filed new and revised tariffs, presently in effect, which permit the interconnection and use of customer-provided terminal devices or communications systems to the telephone message toll and exchange network subject to certain conditions. One such condition is that any network control signalling unit (NCSU) must be furnished, installed and maintained by the telephone company (except for certain military installations and remote or hazardous locations). In permitting such tariffs to go into effect without formal investigation or hearing, we held that the tariff bar against any customer providing his own NCSU in connection with telephone company facilities was not in conflict with our Carterfone ruling.[5] Similarly, we have held that the present restrictions in the interstate MTS and WATS tariffs against customers providing connecting arrangements (CA's) for direct connection of customer-provided equipment (e.g., electrocardiograph, telephotograph, and recording devices) to the telephone system also did not violate our Carterfone decision.[6]

5. On June 14, 1972, we instituted a Federal-State Joint Board proceeding under section 410(c) of the Communications Act (Docket 19528) to determine whether there was a public need to go beyond what we ordered in Carterfone. We made clear at that time that we were not looking toward any modification of our holding in Carterfone and stated:

> We believe that the soundness of our Carterfone decision has been amply demonstrated. New markets have been opened to the innovative enterprise of many companies; the public has benefitted from having a wide range of choices available when the individual user selects the terminal device or private system which will best serve his particular communications need; and there has been no actual demonstrable harm to the telephone system or its users. Accordingly, this proceeding will not be concerned with any question relating to whether or not modifications should be made in that decision or in any of the provisions in the interstate MTS and WATS tariff provisions filed in compliance therewith. Our proceeding herein is concerned with the pending and unresolved basic issues now before us as to whether, and to what extent, there is public need for us to go beyond what we ordered in Carterfone and permit customers to provide, in whole or in part, the aforementioned NCSU's and CA's in interstate MTS and WATS and, if so, what terms and conditions should apply to protect the telephone system and services of others.[7]

6. On June 29, 1973, the North Carolina Utilities Commission gave notice of a proposed rule (R9–5)[8] which would generally prohibit interconnection of customer-owned or customer-provided equipment to the communications system of any telephone company doing business in North Carolina. It appears that, under the proposed rule, any such telephone company could provide such interconnection for interstate services only over facilities distinct and separate from those used for intrastate service.

7. By letter dated July 11, 1973 to the North Carolina Utilities Commission, the Chief of our Common Carrier Bureau noted that all interstate message toll service is offered over equipment used for both interstate and intrastate service. It was further noted that A.T. & T. Tariff No. 263 on file with this Commission governs the provision of interstate message toll telephone service throughout the nation, and that all subscribers have a right to interconnect their own equipment to such commonly used network facilities under that Tariff. Accordingly, the North Carolina Utilities Commission was advised that its proposed rule could not be implemented without a major restructuring of intrastate and interstate service offerings and the tariffs reflecting the terms and conditions of those offerings. It was noted that such a major revision in interstate service offerings would present numerous public interest questions under the Communications Act. It was further noted that the National Association of Regulatory Commissioners had taken the view, in which we have concurred, that because of the commonality of the joint use of telephone company facilities by all subscribers for intrastate and interstate message toll service, matters of interconnection with the message toll network should be treated on a cooperative, coordinate basis and that the pending Federal-State Joint Board proceeding in Docket 19528 was such an effort.

8. By letter dated July 18, 1972 to the Nebraska Public Service Commission, the Attorney General of Nebraska rendered an advisory opinion that our Carterfone decision did not prevent a telephone company from prohibiting interconnection of customer-provided equipment or wire interconnection for intrastate use. He also advised, in effect, that a hotel or motel could not interconnect privately-owned communications equipment with the telephone company without a hearing and finding by the Nebaska commission that the telephone company in the area had refused or failed to provide adequate service. (See attachment B.)

9. Petitioners contend that the above described actions of Nebraska and North Carolina, and the probability of similar State actions threatens the jurisdictional basis of Federal and State authority in our Joint Board proceeding in Docket 19528, compromises Federal-State Joint Board proceedings, imparts uncertainty to other Commission proceedings, and undermines our Carterfone, MCI[9] and Specialized Common Carrier[10] decisions. Petitioners further contend that these actions also threaten the ability of interconnect industry to furnish equipment and services to users of interstate and foreign communications, and could result in rolling back this service to a point where telephone companies again became the sole source of supply of user services and facilities.

10. On August 22, 1973, the North Carolina Utilities Commission filed pleadings[11] requesting that it be authorized to participate in this proceeding for the limited purpose of contesting our jurisdiction to grant the relief sought by Petitioners. The Utilities Commission stated that the specific relief sought raises serious and substantial constitutional questions with respect to state and federal relations and accordingly should be set for oral argument before this Commission. The Utilities Commission contends that, after hearing oral argument, we should dismiss the subject petition as premature and contrary to the provisions of section 2(b) and 221(b) of the Communications Act (47 U.S.C. 152 (b) and 47 U.S.C. 221(b)).

11. We are of the opinion that the above described advisory opinions of the Attorney General of the State of Nebraska and Rule R9–5 proposed by the North Carolina Utilities Commission have created uncertainty concerning whether and, if so, to what extent actions which we have taken, and policies which we have promulgated, in *Carterfone* and related cases with respect to interconnection of customer-provided communications equipment to the nationwide switched public telephone network have pre-empted state action in this area. We are of the further opinion that such uncertainty and the legal issues raised can and should be promptly resolved on the basis of briefs and oral argument before the Commission.

12. Accordingly, *It is hereby ordered*, Pursuant to sections 4(i), 4(j), and 403 of the Communications Act and §§ 1.1 and 1.2 of our rules, that this matter is designated for oral argument before the Commission, en banc, in Washington, D.C. on October 30, 1973, at 9:30 a.m.

13. *It is further ordered*, That each person or entity intending to participate in the oral argument shall file a brief on or before October 1, 1973 and a statement of intention to appear, specifying the amount of time requested for oral argument, by no later than October 15, 1973, and may file reply comments on or before October 15, 1973. The Commission reserves the right to limit the numbered of participants and the time of argument of each participant in the oral argument.

14. *It is further ordered*, That the petition of Telerent Leasing Corporation, et al., is hereby granted to the extent reflected above, and otherwise is denied.

15. *It is further ordered*, That the pleadings described in footnote 11 herein filed by the North Carolina Utilities Commission are hereby granted to the extent indicated herein and otherwise shall be held in abeyance pending oral argument and our decision thereafter.

Adopted September 6, 1973.

Released September 7, 1973.

## FEDERAL MARITIME COMMISSION

[Docket No. 73-56]

### NON VESSEL OPERATING COMMON CARRIERS IN DOMESTIC OFFSHORE TRADES

### Order To Show Cause

On February 1, 1973, the Commission issued an order pursuant to section 21 of the Shipping Act, 1916 (46 U.S.C. 820), requiring all Non Vessel Operating Common Carriers by Water (NVOCC's) in the Domestic Offshore Trades, with tariffs on file at this Commission, to complete and return a questionnaire attached to that order.[1] Notice was given in the last paragraph of the order that failure to furnish the questionnaire would result in the issuance of an Order to Show Cause why that NVOCC's tariff(s) in the Domestic Offshore Trade(s) should not be canceled. Appendix A, attached below, lists the NVOCC's who have failed to furnish the subject questionnaire, and who continue to have FMC Tariffs on file. The Commission considers this failure to be prima facie evidence that those NVOCC's no longer operate pursuant to their tariffs.

*Now, therefore, it is ordered*, That pursuant to sections 18(a), 21, and 22 of the Shipping Act, 1916 (46 U.S.C. 817, 820 and 821), and section 2 of the Intercoastal Shipping Act, 1933 (46 U.S.C. 844), each of the NVOCC's listed in Appendix A hereto be named as respondent in this proceeding and that each be ordered to show cause why its individual tariff(s) in the Domestic Offshore Trade(s), on file with this Commission, should not be canceled for failure to reflect the service actually offered by that NVOCC.

*It is further ordered*, That this proceeding shall be limited to the submission of affidavits and memoranda of law, replies, and oral argument if deemed necessary by the Commission. Should any party feel that an evidentiary hearing is necessary, that party must accompany any request for such hearing with a statement setting forth in detail the facts to be proven, their relevance to the issues in this proceeding, and why such proof cannot be submitted through affidavit. Requests for hearing shall be filed on or before October 10, 1973. Affidavits of fact and memoranda of law shall be filed by respondents and served upon all parties no later than the close of business October 10, 1973. Reply affidavits and memoranda shall be filed by the Commission's Bureau of Hearing Counsel and intervenors, if any, no later than close of business October 25, 1973.

*It is further ordered*, That a notice of this order be published in the FEDERAL REGISTER and that a copy thereof be served upon respondents.

*It is further ordered*, That persons other than those already party to this proceeding who desire to become parties to this proceeding and to participate therein shall file a petition to intervene pursuant to Rule 5(1) of the Commission's rules of practice and procedure (46 CFR 502.72), no later than close of business October 3, 1973.

*It is further ordered*, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, in an original and 15 copies as well as being mailed directly to all parties of record.

By the Commission.

[SEAL] JOSEPH C. POLKING,
*Assistant Secretary.*

APPENDIX A

## FEDERAL POWER COMMISSION

[Docket No. G-2712, et al.]

### RATE SCHEDULES

### Findings and Order After Statutory Hearing

AUGUST 31, 1973.

Each Applicant herein has filed an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce or a petition to amend an order issuing a certificate, all as more fully set forth in the applications and petitions to amend.

Applicants have filed FPC gas rate schedules or supplements to rate schedules on file with the Commission and propose to initiate, add or discontinue in part natural gas service in interstate commerce as indicated in the tabulation herein.

After due notice by publication in the FEDERAL REGISTER, no petitions to intervene, notices of intervention, or protests to the granting of the applications and petitions have been filed.

At a hearing held on August 24, 1973, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and petitions and exhibits thereto, submitted in support of the authorizations sought herein, and upon consideration of the record.

*The Commission finds*

(1) Each Applicant herein is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission or will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of the Natural Gas Act upon the commencement of service under the authorizations hereinafter granted.

(2) The sales of natural gas hereinbefore described, as more fully described in the applications in this proceeding, will be made in interstate commerce subject to the jurisdiction of the Commission; and such sales by Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(3) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules, and regulations of the Commission thereunder.

(4) The sales of natural gas by Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity; and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the orders issuing certificates of public convenience and necessity in various dockets involved herein should be amended as hereinafter ordered.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant in Docket No. CI73-339 should be made co-respondent in its predecessors' rate proceedings and that Applicant in Docket No. G-14460 should be substituted as respondent in its predecessor's rate proceeding.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the FPC gas rate schedules and supplements related to the authorizations hereinafter granted should be accepted for filing.

(8) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the orders issuing certificates, for sales authorized herein to be continued under new or amended certificates, should be amended by deleting therefrom authorization to sell gas.

(9) Section 154.93 of the regulations under the Natural Gas Act should be waived to the extent necessary to permit the acceptance for filing of the rate schedules for the sales authorized in Docket Nos. CI73-527 and CI73-529 with contractual provisions for the possible sales of the Federal Government's royalty shares of the gas at prices in excess of the otherwise applicable rates and with contractual provisions to increase rates to higher area rates found to be proper by hearing, rulemaking, or Commission approved settlement.

(10) The application filed in Docket No. CI72-700 by Car-Tex Producing Company, predecessor of Applicant in Docket No. CI73-437, for authorization to continue sales of natural gas authorized in Docket No. G-12500, is now moot.

(11) The rate at which the sale in Docket No. CI73-704 is authorized to be continued is below the just and reasonable area ceiling rate.

*The Commission orders*

(A) Certificates of public convenience and necessity are issued upon the terms and conditions of this order authorizing sales by Applicants of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the applications and in the tabulation herein.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations, and orders of the Commission.

(C) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of section 7 of the Natural Gas Act or of part 154 or part 157 of the Commission's regulations thereunder and is without prejudice to any findings or orders which have been or which may hereafter be made by the Commission in any proceedings now pending or hereafter instituted by or against Applicants. Further, our action in this proceeding shall not foreclose or prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. The grant of the certificates aforesaid for service to the particular customers involved does not imply approval of all of the terms of the contracts, particularly as to the cessation of the service upon termination of said contracts as provided by section 7(b) of the Natural Gas Act. The grant of the certificates aforesaid shall not be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificates.

(D) The orders issuing certificates of public convenience and necessity in various dockets are amended by adding thereto or deleting therefrom authorization to sell natural gas or by substituting successors in interest as certificate holders as more fully described in the applications and in the tabulation herein. In all other respects said orders shall remain in full force and effect.

(E) Within 90 days from the date of initial delivery, Applicants in Docket Nos. G-18117, CI73-6, CI73-181, CI73-339, CI73-363, CI73-394, CI73-395, CI73-435, CI73-437, CI73-528, and CI73-572 shall each file three copies of a rate schedule-quality statement in the form prescribed in Opinion Nos. 586, 598, and 607, as applicable.

(F) The certificates and certificate authorization granted in Docket Nos. G-18117, CI73-6, CI73-181, CI73-339, CI73-363, CI73-394, CI73-395, CI73-435, CI73-437, CI73-528, and CI73-572 are subject to the Commission's findings and orders accompanying Opinion Nos. 586, 586-A, 598, 598-A, 607, and 607-A, as applicable. If the quality of the gas deviates at any time from the quality standards set forth in the regulations under the Natural Gas Act so as to require a downward adjustment of the existing rates, notices of changes in rate shall be filed pursuant to section 4 of the Natural Gas Act; provided, however, that adjustments reflecting changes in Btu content of the gas shall be computed by the applicable formula and charged without the filing of notices of changes in rate.

(G) Applicants in the dockets indicated shall charge and collect the following rates, subject to Btu adjustment where applicable:

| Docket No. | Rate (cents per M c.f.) | Pressure base (p.s.i.a.) |
|---|---|---|
| CI73-181 | 15.0 | 14.65 |
| CI73-288 | 23.5 | 15.025 |
| CI73-339 | [1] 19.3278 | 14.65 |
| | [2] 18.243 | 11.65 |
| | [3] 20.8536 | 14.65 |
| CI73-395 | [4] 21.0 | 11.65 |
| | [5] 19.7925 | 11.65 |
| CI73-437 | 12.4374 | 14.65 |
| CI73-529 | 24.0 | 15.025 |

[1] Applies to FPC Gas Rate Schedules Nos. 1, 3, and 5.
[2] Applies to FPC Gas Rate Schedules No. 2.
[3] Applies to FPC Gas Rate Schedule No. 4.
[4] For gas-well gas.
[5] For casinghead gas.

(H) The certificates issued in Docket Nos. G-8845 and CI62-202 are terminated.

(I) Docket No. CI73-505 is cancelled.

(J) The rate schedules and rate schedule supplements related to the authorizations granted herein are accepted for filing or are redesignated, all as set forth in the tabulation herein. Where the effective date is the date of initial delivery, Applicant shall advise the Commission of said date within 10 days thereof.

(K) Polaris Production Corp., Applicant in Docket No. CI73-339, is made a co-respondent in the proceedings pending in Docket Nos. RI69-650, RI70-544, RI70-869, RI72-154 and RI72-265. Applicant shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(L) Orders issuing certificates in the following dockets are amended by deleting therefrom authorization to sell gas where said sales are authorized to be continued under new or amended certificates herein:

| New certificate authorization Docket No.: | *Amended certificate Docket No.* |
|---|---|
| G-18117 | G-13299 [1] and G-17260 [2]. |
| CI73-339 | G-2978,[3] G-5145,[4] and G-17012.[5] |
| CI73-572 | G-8906. |
| CI73-704 | G-2906 and 2907. |

[1] Certificate issued to Atlantic Richfield Company, predecessor to Cabot Corporation which assigned properties to Applicant in Docket No. G-18117.
[2] Certificate issued to Monsanto Company, predecessor to Cabot Corporation which assigned properties to Applicant in Docket No. G-18117.
[3] G-2978—Certificate issued to Sun Oil Company.
[4] G-5145—Certificate issued to Exxon Company.
[5] G-17012—Certificate issued to Sohio Petroleum Company.

(M) The acceptance for filing of the rate schedules for the sales authorized in Docket Nos. CI73-527 and CI73-529 should not be construed as meaning that any rate increase based upon the provisions for the sales of the Federal Government's royalty shares of the gas at prices in excess of the otherwise applicable rate would be accepted for filing without suspension.

(N) The petition to amend filed October 27, 1972, by Mobil Oil Corporation in Docket No. CI61-137 is unnecessary and is dismissed.

(O) The application in Docket No. CI72-700 is dismissed.

(P) The certificate issued in Docket No. CI73-181 authorizes the sale of gas only from acreage dedicated under the basic contract and not from acreage which may be dedicated by the option agreement. Within 30 days from the date of this order Applicant shall file a rate schedule supplement providing for a full percentage downward Btu adjustment from a base of 1,000 Btu per cubic foot measured on a wet basis and a billing reflecting the rate of 15.0 cents per M c.f. as required by § 154.92(b) of the regulations under the Natural Gas Act.

(Q) Odessa Natural Corporation, Applicant in Docket No. G-14460, is substituted in lieu of Odessa Natural Gasoline Corporation as respondent in the proceeding pending in Docket No. RI70-523 and said proceeding is redesignated accordingly. Odessa Natural Corporation shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(R) The certificate authorizations granted in Docket Nos. G-14460, CI62-990, CI73-288, CI73-395, and CI73-425 determine the rates at which Applicants may sell gas to the respective affiliated purchasers but are without prejudice to any action which the Commission may take in rate proceedings involving either the sellers or the buyers.

(S) The motion to be made co-respondent in the proceeding pending in Docket No. RI72-141, filed by Applicant in Docket No. CI73-704, is dismissed.

(T) Applicant in Docket No. CI73-427 shall not release any acreage dedicated to the contract on file as its FPC Gas Rate Schedule No. 111 without first having secured authorization from the Commission as required by section 7 of the Natural Gas Act.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[1] Assignment of acreage to small producer. Applicant has stated the assignment is a transfer of leases and not a transfer of reserves in place.
[2] Assigns acreage to Jack D. Nelson and George R. Womack. Nelson has a small producer certificate in Docket No. CS72-1057 and Womack in Docket No. CS72-1056.
[3] Effective date of transfer of producing properties.
[4] Succession filings by Paseo, Inc., included in this tabulation.
[5] From Atlantic Richfield Co. to Paseo, Inc.
[6] No certificate filing required. 18 CFR 2.61. Succession filings by Polaris Production Corp. is included in this tabulation.
[7] Assignment from Applicant to Polaris Production Corp. also submitted and attached to supplement.
[8] From Applicant to Clarke Corp. Clarke's succession filing is included in this tabulation.
[9] Delete leases which have expired and been released.
[10] Assignment by Odessa Natural Gasoline Co. to Odessa Natural Corp.
[11] Amended contract summary filed 3-2-73.
[12] Dedicates acreage acquired from Cabot Corp. Cabot acquired acreage from Monsanto Co. and Atlantic Richfield Co., effective the same date as assignment to Applicant. Predecessor's contracts were similar or identical to Applicant's contract.
[13] Columbia Oil Corp. has a small producer certificate in Docket No. CS69-10 but may not include this acreage acquired from a large producer thereunder.
[14] By Mobil Oil Corp. to CRA, Inc.
[15] Assignment, originally submitted by Mobil on 10-27-72 as a filing for deletion of acreage from its FPC Gas Rate Schedule No. 362, is being used as a filing of Columbia Oil Corp., successor to Mobil. Mobil's related certificate application in Docket No. C161-137 will be dismissed.
[16] Acreage which includes Carlson Federal No. 1 Well.
[17] Acreage which includes Langlie Federal No. 1 Well.
[18] Acreage which includes Carlson Federal No. 1-A Well.
[19] Applicant transports Columbia Trust's gas to Beacon's Blackburn Gasoline Plant in Webster Parish, Louisiana; after processing, the residue gas will be delivered to United Gas Pipe Line Company; Columbia Trust has a small producer certificate in CS72-548.
[20] Where no effective date is shown, it is the date of initial delivery.
[21] Original application filed 7-5-72, by J. M. Huber, who assigned acreage to Applicant prior to certification. Applicant filed 11-9-72, to amend the application to be substituted for J. M. Huber. On 3-7-73, Applicant filed an amendment to release certain properties
[22] Between J. M. Huber Corp. and buyer.
[23] From J. M. Huber Corp. to Applicant.
[24] Contract between buyer and Glover Hefner Kennedy Oil Co.
[25] Provides that other than present contract acreage may be included under contract if developed and buyer agrees to take gas.
[26] From Glover Hefner Kennedy to Helena L. Glover.
[27] From Helena L. Glover to Applicant.
[28] By letter dated 2-20-73, Applicant agreed to accept permanent certificate conditioned to a rate of 23.5 cents per M c.f. subject to Btu adjustment.
[29] Midlands Gas Corp., a wholly owned subsidiary of the buyer, is a limited partner in Applicant.
[30] Previously accepted for filing by letter order granting temporary certificate.
[31] Previously accepted for filing.
[32] From Sun Oil Co. to Applicant.
[33] From Sohio Petroleum Co. to Applicant.
[34] From Humble Oil & Refining Co. to Applicant.
[35] From Phillips Petroleum Co. to Applicant.
[36] As amended on 12-4-72.
[37] Applicant's interest previously covered by operator (Bert Fields, Jr.) who is a small producer. Sales from Applicant's interests cannot be covered by the small producer certificate.
[38] Effective date of small producer certificate of operator.
[39] Modifies and adopts basic contract of 8-5-59 between J. P. Owen, *et al.*, and Columbia Gas Transmission Corp.
[40] Assigns interest from Monterey Pipeline Co. to Ada Oil Co. and subsequent reassignment to the Applicant, Ada Land Co.
[41] Applicant has agreed to accept a permanent certificate conditioned as in the temporary certificate.
[42] By letter filed 2-23-73, Applicant agreed to accept a permanent certificate conditioned as in the temporary certificate.
[43] Applicant is a wholly owned subsidiary of purchaser.
[44] Currently on file as Amerada Hess Corp. FPC Gas Rate Schedule No. 138.
[45] From Amerada Hess Corp. to Kaiser-Francis Special Account B (a partnership made up He Geo. Kaiser and a number of other parties).
[46] Currently on file as Barnwell-DeBardeleben Oil Co., *et al.* FPC Gas Rate Schedule No
[47] From Barnwell, Inc., and Barnwell Drilling Co., Inc., to Car-Tex Producing Co.
[48] From Car-Tex Producing Co. to E. H. Railsback, M. R. McCoy, Jr., Roland C. Smith, Arthur C. He and W. G. Stanley (partners in Shreve Operating Co.).
[49] Docket designation C173-505, erroneously assigned to this filing, is cancelled. Succession is authorized in Docket No. C169-458.
[50] Revises liquid settlement procedures.
[51] As amended on 2-6-73 and 2-22-73.
[52] Limited to casinghead gas produced from the Gallup Formation and does not apply to gas-well gas.
[53] Provides for: (1) increases to any higher area rate and (2) provides that buyer will reimburse seller for all "excess in royalty payments" which seller shall be required to pay the United States Government for royalty gas.
[54] As amended on 2-22-73.
[55] For gas produced from gas wells completed in the Dakota Formation.
[56] On file as The Superior Oil Co. FPC Gas Rate Schedule No. 46.
[57] From Superior to Applicant predecessor's filing reporting the assignment is included in this tabulation.
[58] Also on file as Atlantic Richfield Co. FPC Gas Rate Schedule No. 464, Atlantic's deletion filing is included in this tabulation.
[59] From Atlantic Richfield to Applicant.

[Docket No. CI61-697 et al.]

## AUTHORIZATION TO SELL NATURAL GAS

### Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

AUGUST 31, 1973.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before September 27, 1973, file with the Federal Power Commission, Washington D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates of the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
*Secretary.*

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

## CONTINENTAL OIL CO. ET AL.

### Hearing on and Suspension of Proposed Changes in Rates, and Allowing Rate Changes To Become Effective Subject to Refund [1]

SEPTEMBER 5, 1973.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

*The Commission finds*

It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

*The Commission orders*

(A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR, Chapter I), and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

KENNETH F. PLUMB,
*Secretary.*

[1] Does not consolidate for hearing or dispose of the several matters herein.

APPENDIX A

| Docket No. | Respondent | Rate schedule No. | Supplement No. | Purchaser and producing area | Amount of annual increase | Date filing tendered | Effective date unless suspended | Date suspended until | Cents per Mcf [1] Rate in effect | Cents per Mcf [1] Proposed increased rate | Rate in effect subject to refund in dockets Nos. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| RI74-33... | Continental Oil Co..... | 180 | 10 | Transwestern Pipeline Co. (Bell Lake Unit Area, Lea County, N. Mex., Permian Basin). | $12,315 | 8-6-73 | 9-6-73 [2] 2-6-74 | [2] Accepted | 21.4683 | 24.0243 | |
| RI74-34... | Union Oil Co. of California.. | 195 | 8 | Transwestern Pipeline Co..... | 1,750 | 8-8-73 | 9-8-73 [2] 2-8-74 | [2] Accepted | 21.0 | 23.5 | |

[1] Unless otherwise stated, the pressure base is 14.65 psia.
[2] Accepted as of the date set forth in the "Effective Date Unless Suspended" column insofar as proposed rate does not exceed the ceiling prescribed in Opinion No. 662.
[3] Proposed rate is suspended until date shown insofar as it exceeds ceiling in Opinion No. 662.

The proposed increases are accepted in part for that portion of the proposed rate that does not exceed the applicable area rate pursuant to Opinion No. 662. These proposed rates will become effective upon expiration of the thirty day statutory notice period or the contractual effective date, whichever is later, and the remaining portions of the proposed rates that exceed the applicable area rate pursuant to Opinion No. 662 of each respondent is suspended for five months.

Nothing contained in this order shall relieve the respondents of any responsibility imposed by the Economic Stabilization Act of 1970 (Pub. L. 91-379, 84 Stat. 799, as amended by Pub. L. 92-15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

## FEDERAL RESERVE SYSTEM

### BARNETT BANKS OF FLORIDA, INC.

#### Acquisition of Bank

Barnett Banks of Florida, Inc., Jacksonville, Florida, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of First Bank of Plantation, Plantation, Florida; University Bank, Broward County, Florida; and Riverland Bank, Fort Lauderdale, Florida. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than October 3, 1973.

Board of Governors of the Federal Reserve System, September 6, 1973.

*Assistant Secretary of the Board.*

[FR Doc.73-19543 Filed 9-13-73;8:45 am]

### FIRST TENNESSEE NATIONAL CORP.

#### Order Approving Acquisition of Pence Mortgage Company

First Tennessee National Corporation, Memphis, Tennessee, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire not less than 99 percent of the voting shares of Pence Mortgage Company, Louisville, Kentucky (Company), a company that engages in originating, selling and servicing real estate mortgages, construction lending, and the offering of credit accident and health insurance, in connection with such extensions of credit. Applicant has also applied for authority of Company to offer credit life insurance in connection with such extensions of credit. Such activities have been determined by the Board to be closely related to the business of banking (12 CFR 225.4(a)(1), (3), and (9)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 138). The time for filing comments and views has expired, and none has been timely received.

Applicant, the largest banking organization in Tennessee, controls eight banks with aggregate deposits of approximately $1.2 billion, representing 11.5 percent of the total commercial deposits in the State.[1] Applicant's lead bank, The First National Bank of Memphis, Memphis, Tennessee (First National), with deposits of approximately $994 million is the largest bank in the Memphis SMSA.[2] All of Applicant's subsidiary banks originate and service mortgage loans for their own account. In addition, First National originates and services mortgages for the accounts of others. Applicant's nonbanking subsidiaries engage in mortgage banking, investment and management services, personal property and equipment leasing, trust services, and underwriting, as reinsurer, credit life and disability insurance. None of Applicant's bank or nonbanking subsidiaries originate or service mortgages in the market areas served by Company.

On the basis of its loan servicing volume ($194 million on June 30, 1972), Company is the largest mortgage banking firm headquartered in the Louisville, Kentucky, SMSA (which includes Jefferson County, Kentucky, and Clark and Floyd Counties, Indiana) and is ranked 129th in the United States.[3] It is engaged primarily in originating, selling, and servicing all types of real estate mortgages and construction lending.[4] Company also has offices in Clearwater, Florida, and Indianapolis, Indiana, which are newly established and have operated less than a full fiscal year. During fiscal year 1973, Company's total originations of permanent mortgages was approximately $48 million, its mortgage servicing volume was $202 million and total closings of construction and development loans were $19.5 million. It appears that Company's market share in any of its business activities in the Louisville SMSA is less than 20 percent. Company derives no business from the service areas of any of Applicant's subsidiaries.

Since Applicant and Company do not compete in the same mortgage loan or construction loan markets, the proposed acquisition would eliminate no direct competition. Although it appears that both Applicant and Company could enter each other's market de novo, consummation of the proposal herein would not add significantly to the existing level of market concentration or result in an undue concentration of financial resources in any market.

Company is engaged in the sale of credit accident and health insurance in connection with its extensions of credit. In addition to these insurance actvities, Applicant proposes to engage de novo in the sale of credit life insurance in connection with its extensions of credit through Company. Due to the limited nature of its insurance activities, it does not appear that Company's engagement in such activities would have any significant effect on either existing or potential competition.

Approval of the proposed acquisition will make available to Company the financial resources of Applicant, and thereby provide Company an additional source of working capital enabling it to increase its lines of credit for construction and development lending. These increased capabilities are positive factors

[1] Includes acquisitions approved through August 26, 1973. Applicant has an application pending before the Board to acquire Jackson State Bank, Jackson, Tennessee, with deposits of $15 million.
[2] All banking data are as of December 31, 1972.
[3] Company has an office in Louisville, Kentucky, and an office in Clarksville, Indiana; the service area of these two offices is the Louisville, Kentucky, SMSA.
[4] Company, through two subsidiaries, holds certain real property for development. Company and Applicant have stated their intention to dispose of these holdings within six months.

V38-1178 SEP 14 73 XUM

in terms of public needs and convenience.

Based upon the foregoing and other considerations in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable, and the application is hereby approved subject to the following condition: divestiture of real property held for development by Company's two wholly owned subsidiaries within six months after consummation of the proposed acquisition. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof. The transaction shall be consummated not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of St. Louis pursuant to delegated authority.

By order of the Board of Governors,[5] effective September 5, 1973.

[SEAL] CHESTER B. FELDBERG,
*Secretary of the Board.*

[FR Doc.73-19541 Filed 9-13-73;8:45 am]

## NORTHEAST BANKSHARE ASSOCIATION

### Acquisition of Bank

Northeast Bankshare Association, Lewiston, Maine, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of Sanford Trust Company, Sanford, Maine. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Boston. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than October 3, 1973.

Board of Governors of the Federal Reserve System, September 6, 1973.

## FOREIGN-TRADE ZONES BOARD

[Order No. 95]

### BAYONNE, NEW JERSEY

### Voluntary Relinquishment of Grant for Foreign-Trade Zone No. 11

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board has adopted the following Order:

Whereas, on November 20, 1968, the Foreign-Trade Zones Board by Order No. 77 (33 FR 17377) issued a grant to New Jersey Foreign Trade Zone, a private corporation, authorizing the establishment, operation and maintenance of a foreign-trade zone at Bayonne, New Jersey, designated Foreign-Trade Zone No. 11; and,

Whereas, New Jersey Foreign Trade Zone advised the Board on June 6, 1972, that due to circumstances beyond its control, unforeseen at the time of the application, it has not been able to activate the proposed zone, and as a result voluntarily relinquishes the grant;

Now, therefore, the Foreign-Trade Zones Board, after full consideration and a finding that approval of the grantee's voluntary relinquishment of the grant is in the public interest, hereby revokes the grant for Zone No. 11 and rescinds Order No. 77 under which the grant was issued.

Signed at Washington, D.C., this 6th day of September 1973.

[SEAL] FREDERICK B. DENT,
*Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.*

Attest:
JOHN J. DA PONTE, JR.,
*Executive Secretary.*

## GENERAL SERVICES ADMINISTRATION

[Federal Property Management Reg.; Temporary Reg. F-191]

### SECRETARY OF DEFENSE

### Delegation of Authority

1. *Purpose.*—This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in a telecommunications proceeding.

2. *Effective date.*—This regulation is effective immediately.

3. *Delegation.*—a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Federal Communications Commission in a proceeding involving the application of the American Telephone and Telegraph Company for special permission to file a tariff establishing so-called Hi/Lo Density Rates for private line services.

[5] Voting for this action: Chairman Burns and Governors Mitchell, Brimmer, Sheehan, Bucher, and Holland. Absent and not voting: Governor Daane.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration and, further, shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

ARTHUR F. SAMPSON,
*Administrator of General Services.*

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (73-71)]

### NASA SPACE PROGRAMS ADVISORY COUNCIL (SPAC) APPLICATIONS COMMITTEE

### Notice of Meeting

The NASA SPAC Applications Committee will meet on September 26, 1973, at the Headquarters of the National Aeronautics and Space Administration. The meeting will be held in room 226 of Federal Office Building 10B, 600 Independence Avenue, SW., Washington, D.C. 20546. Members of the public will be admitted to the meeting beginning at 9:15 a.m., on a first come first served basis up to the seating capacity of the room, which can accommodate about 35 persons. The approved agenda for the meeting is noted below.

The NASA SPAC Applications Committee serves in an advisory capacity only. It is concerned with the total range of applications of space-derived, space-related technology, including communications, meteorology, earth resources survey (includes agriculture/forestry, cartography, geography, geology/hydrology, oceanography), earth and ocean physics, solar energy conversion, space processing, and other technology applications. Currently, the Committee comprises 11 members, and a recording secretary, Louis B. C. Fong, who can be contacted for further information at (202) 755–2070.

The following is the approved agenda and schedule for the September 26, 1973, meeting of the Space Program Advisory Council Applications Committee:

NASA'S 5-YEAR PLAN FOR APPLICATIONS

| Time | Topic |
|---|---|
| 9:00 a.m.---- | (*Purpose.*—The 5-year plan for the Earth Observations Program, the Communications Program, and Special Programs (Space Processing and Solar Energy) will be presented to Committee members for comment.) |
| AGRICULTURE IN A LOW OR ZERO "G" ENVIRONMENT | |
| 1:00 p.m.---- | (*Purpose.*—The potential of agriculturel applications in a low or zero "G" environment will be discussed by Committee members.) |
| EXECUTIVE SESSION (CLOSED SESSION) | |
| 2:00 p.m.---- | (*Purpose.*—To discuss and evaluate the qualifications of candidates for Chairman of and membership on the Committee.) |
| 3:00 p.m.---- | *Adjourn* |

HOMER E. NEWELL,
*Associate Administrator, National Aeronautics and Space Administration.*

[AA1921-123]

## ELECTRONIC COLOR SEPARATING OR SORTING MACHINES FROM THE UNITED KINGDOM

### Determination of No Injury or Likelihood Thereof

SEPTEMBER 7, 1973.

On June 7, 1973, the Tariff Commission received advice from the Treasury Department that electronic color separating or sorting machines from the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. In accordance with the requirements of section 201(a) of the Antidumping Act (19 U.S.C. 160(a)), the Tariff Commission instituted investigation No. AA1921–123 to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on July 31, 1973. Notice of the investigation and hearing was published in the FEDERAL REGISTER of June 20, 1973 (38 FR 16118).

In arriving at a determination in this case, the Commission gave due consideration to all written submissions from interested parties, evidence adduced at the hearing, and all factual information obtained by the Commission's staff from questionnaires, personal interviews, and other sources.

On the basis of the investigation, the Commission[1] has unanimously determined that an industry in the United States is not being or is not likely to be injured, or is not prevented from being established, by reason of the importation of electronic color separating or sorting machines from the United Kingdom sold, or likely to be sold, at less than fair value within the meaning of the Antidumping Act, 1921, as amended.

STATEMENT OF REASONS[2]

In the instant antidumping case, the Treasury Department advised the Tariff Commission that electronic color separating or sorting machines from the United Kingdom (hereinafter referred to as "color sorters") are being or are likely to be sold at less than fair value (LTFV). There were no imports of color sorters from any other foreign source. These color sorters are used chiefly to sort agricultural commodities of granular substance (such as beans, rice, coffee, nuts, etc.) by color. The purpose of the process is to separate out defective pieces and foreign substances, thereby upgrading the quality of the commodity sorted.

In making this determination, the Commission considered the United States industry to consist of those facilities in the United States engaged in the production of electronic color separating or sorting machines. There are presently three domestic producers of color sorters, two of which accounted for over 90 percent of the total sales value of all such machines during the period 1969–72.

A Commission survey of recent purchasers of the imported color sorters from the United Kingdom indicated that price was not the foremost consideration in their purchase determination. Factors more important than the initial price included the adaptability of a color sorter for specific uses and ease of maintenance. Sales of domestic producers lost to imports of U.K. color sorters by reason of LTFV sales were negligible. Moreover, evidence available to the Commission indicates that the U.K. color sorters sold at LTFV did not result, by reason of their being sold at LTFV, in depressing the prices of domestic producers. The prices of the imported color sorters sold at LTFV were higher than the prices of most domestically produced color sorters. To the extent that underselling occurred, it was closely related to the introduction of multichannel[3] gravity drop color sorters which provide color sorting capacity at a much lower price per channel than single-channel machines. The prices of both imported and domestic color sorters, on a per channel basis, have declined as the manufacturers turned increasingly to produce multichannel machines.

Imported color sorting machines from the United Kingdom were the first multichannel machines in the U.S. market—introduced in 1969. In terms of the number of channels supplied, imports from the United Kingdom achieved a 30 percent share of apparent U.S. consumption during that year. The imports declined considerably between 1969 and 1970 and a similar drop was experienced in the shipments of U.S. producers. These declines were attributable to generally depressed economic conditions in the U.S. market at that time. In 1971, the domestic shipments of color sorters, in terms of the number of channels, more than tripled with the introduction of multichanneled gravity drop machines manufactured by a domestic producer, and such shipments remained at a high level in 1972. Thus, while imports of color sorters from the United Kingdom increased in 1972, the share of the U.S. market supplied by the domestic producers was larger in 1972, when Treasury found sales at less than fair value, than in earlier years. Excluding domestic shipments of color sorters to rice producers to whom no imported color sorters were sold, data on apparent U.S. consumption[4] shows that the share of the U.S. market accounted for by imported color sorters declined from 32 percent in 1971 to 27 percent in 1972. There is no evidence that imports of color sorters disrupted the U.S. market by reason of their having been sold at LTFV.

Further evidence of the competitive strength of the domestic industry is demonstrated by its financial experience. In 1972, the year during which the Treasury Department found imports sold at LTFV, aggregate profits of two major domestic concerns producing color sorters were at a peak for the years 1969–1972.

Considering all the evidence developed during this investigation, any injury suffered by the domestic industry by reason of the imports of color sorters sold at LTFV is de minimis. With regard to likelihood of future injury to the U.S. industry, both the U.S. importer and the United Kingdom exporter of color sorters have offered assurances to the Treasury Department and to the Tariff Commission that LTFV sales ceased in May 1973 and will not reoccur.

On the basis of the foregoing, the Commission has determined that an industry in the United States is not being or is not likely to be injured by reason of the importation of electronic color

[1] Commissioners Leonard and Young did not participate in the decision.

[2] Vice Chairman Parker and Commissioner Ablondi concur in the result.

[3] One color sorter may incorporate any number of channels—the part of a color sorter which conveys the product to be sorted to the viewing chamber.

[4] Apparent consumption is calculated by adding imports to domestic shipments and subtracting U.S. exports from that total.

V 38-178 SEP 14 73 XUM

separating or sorting machines from the United Kingdom at less than fair value.[6]

By order of the Commission.

KENNETH R. MASON,
*Secretary.*

[AA1921-124]

## STEEL WIRE ROPE FROM JAPAN

### Determination of Injury

SEPTEMBER 7, 1973.

On June 7, 1973, the Tariff Commission received advice from the Treasury Department that steel wire rope from Japan is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. In accordance with the requirements of section 201(a) of the Antidumping Act (19 U.S.C. 160(a)), the Tariff Commission instituted investigation No. AA1921-124 to determine whether an industry in the United States is being, or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on August 2 and 3, 1973. Notice of the investigation and hearing was published in the FEDERAL REGISTER of June 20, 1973 (38 FR 16118).

In arriving at a determination in this case, the Commission gave due consideration to all written submissions from interested parties, evidence adduced at the hearing, and all factual information obtained by the Commission's staff from questionnaires, personal interviews, and other sources.

On the basis of the investigation, the Commission has determined by a vote of 2 to 1[1] that an industry in the United States is being injured by reason of the importation of steel wire rope from Japan that is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended.

STATEMENT OF REASONS FOR AFFIRMATIVE DETERMINATION BY CHAIRMAN BEDELL AND COMMISSIONER MOORE

The Antidumping Act, 1921, as amended, requires that the Tariff Commission find two conditions satisfied before an affirmative determination can be made.

First, there must be injury or likelihood of injury to an industry in the United States.[5] Second, such injury or likelihood of injury must be by reason of the importation into the United States of the class or kind of foreign merchandise which the Secretary of the Treasury has determined is being, or is likely to be, sold at less than fair value (LTFV).

In our judgment, both of the aforementioned conditions are satisfied. Accordingly, for the reasons set forth below, we have determined that an industry in the United States is being injured by reason of the importation of steel wire rope from Japan sold at LTFV.[2]

In making this determination under section 201(a) of the Antidumping Act, we have considered the injured industry to consist of the operations of the U.S. facilities producing steel wire rope.

The U.S. steel wire rope industry in the United States, presently consisting of 17 U.S. firms with 23 plants located in 13 states, has traditionally recognized six "zones" or "regions" as areas to be serviced either by a regional manufacturing plant or warehouse facility.

In addition to significant freight-cost differentials between these six regions, there also exist separate and distinct regional pricing and discounting levels that reflect specific regional market characteristics and competition.

Of these six regions, the Pacific Northwest and the Pacific Southwest and the South Central Regions were of the greatest concern to interested parties in this case. Data supplied to the Commission during its investigation indicated that during the period 1970-72 over half of U.S. shipments were sold in the Pacific Southwest, Pacific Northwest, and South Central Regional markets. It is apparent that these three regions are vitally important to the U.S. industry in its marketing of wire rope in the United States. We are of the opinion that there has been substantial injury to the U.S. industry in these three market areas. We believe that LTFV imports of steel wire rope from Japan into these three regions have been of sufficient magnitude to cause injury to the U.S. industry.

*Market penetration.*—Imports of steel wire rope from Japan, the principal foreign supplier, have nearly doubled over a 5-year period, from 9,912 net tons in 1968 to 18,996 net tons in 1972. During the 6-month period January-June 1973, such imports amounted to 11,413 net tons, or about one-fifth more than during the corresponding period in 1972. It is clear that the tide of imports determined by the Treasury Department to have been sold at less than fair value has entered the United States and the regional market areas identified above in substantial volume.

The penetration of LTFV imports has occurred in the regional markets identified above in sufficient volume as to be injurious to the entire U.S. industry. For example, in 1970 the bulk of Japanese imports of steel wire rope sold in the Pacific Southwest, Pacific Northwest, and the South Central Regions were equal to about 8 percent of U.S. producers' shipments for these areas. In 1972, such imports from Japan increased to about 11 percent of U.S. producers' shipments. Such regional market penetration by LTFV imports has caused plant closures, market withdrawals, and a general suppression of wire rope prices in these geographic areas to the point where such prices are lower than prices paid elsewhere for wire rope in the United States.

*Price suppression.*—Information developed during the investigation showed that prices received by Japanese importers were consistently well below those received by domestic producers. For example, between the first quarter of 1970 and the second quarter of 1973, the prices of five particular items of Japanese wire rope—which Treasury found to have been sold at LTFV—averaged 22 to 38 percent below the prices received by domestic producers for the same items. Such price differentials were even more pronounced in the Pacific Southwest, Pacific Northwest and South Central Regions. As a result, in order to remain competitive, U.S. producers have been prevented from increasing their prices to offset fully increased costs of domestic production.

*Loss of sales.*—Data supplied to the Commission documents specific examples of sales lost to LTFV imports. Although demonstration of every lost sale was not possible, it is clear from the evidence of price suppression that loss of sales has taken place, particularly in the Pacific Southwest, Pacific Northwest, and South Central Regions, where the price disparities between LTFV imports of wire rope and domestic wire rope are especially pronounced.

*Plant closures.*—Since January 1, 1968, six plants producing steel wire rope in the United States have closed, and an estimated 1,300 workers have lost their jobs. Among the plants closing were two operated by Colorado Fuel and Iron Corp., one of the largest U.S. steel wire rope producers, where over 900 workers were employed. We believe these plant closures and resultant unemployment have been due in part to LTFV imports of steel wire rope from Japan.

*Conclusion.*—On the basis of the foregoing we conclude that an industry in the United States is being injured by reason of the importation of steel wire rope from Japan that is being, or is likely to be, sold at less than fair value.

STATEMENT OF REASONS FOR THE NEGATIVE DETERMINATION OF COMMISSIONER ABLONDI

Although there have been LTFV imports of steel wire rope from Japan in recent years, and these imports may have caused some slight market disruption, I am unable to find injury, or likelihood of injury, to an industry within the meaning of the Antidumping Act, 1921, as amended.

There is an industry in the United States presently producing steel wire rope and it consists of 17 firms which are geographically located nationwide. The complainant, for example, with production facilities in Kenosha, Wis., sells and services the west coast area. Other firms in the industry located on the east coast do the same. Evidence, in part, indicates that most of the 17 firms are now producing at capacity (three shifts a day, 5½ days a week); that many of these plants are weeks behind in filling current orders with existing productional capacity; and that the industry is operating at a generally increasing profit level. I do not believe that the industry above described is being injured by reason of the LTFV imports.

The complainant in this proceeding contends that the west coast area and the south central region are the areas most affected by LTFV imports from Japan. Application of this regional concept of injury would not, in my opinion, lead to a finding of injury to an industry of steel wire rope producers located in the regions complained of.

The four plants currently operating in the west coast area and south central region have increased their shipments by about 19 percent during the period 1970-72—the period when the injury alleged by the domestic producers is claimed to have occurred. Secondly, available data on net operating profits of wire rope operations for the plants most likely affected, i.e., those in the west coast and south central areas, indicate that profits were larger in 1972 (the year when Treasury found LTFV sales), both in absolute terms and as a percent of net sales, than in any year since 1968. Imports of steel wire rope from another Asian country were at a unit price level lower than that of the Japanese and compete in the same region.

The regional industry that would most likely be injured by reason of the importation of LTFV imports from Japan does not appear to be injured in light of available data. It has been reported that one large firm currently manufacturing on the east coast intends to begin manufacture of steel wire rope on a limited basis at one of its west coast steelmaking facilities.

In conclusion, since there appears to be sufficient reason to believe that no injury has occurred to domestic producers of steel wire rope by reason of LTFV imports of steel wire rope from Japan, I find no injury, or likelihood of injury, to an industry in the instant investigation.

By order of the Commission.

[SEAL] KENNETH R. MASON,
*Secretary.*

[FR Doc.73-19582 Filed 9-13-73;8:45 am]

[6] The prevention of establishment of an industry is not at issue in this case.

[1] Chairman Bedell and Commissioner Moore determined in the affirmative; Commissioner Ablondi determined in the negative. Commissioner Young did not participate in the determination, and Vice Chairman Parker and Commissioner Leonard were absent.

[5] Prevention of establishment of an industry is not an issue in the instant case.

[2] At the hearing, certain importers of a Japanese product, described as copper-coated steel-wire cord of stranded construction of a type used to reinforce automobile and truck tires, raised a question as to the applicability of the Treasury Department's determination of LTFV sales to this product. The complainants agreed that the U.S. steel wire rope industry did not make a product of this description.

## DEPARTMENT OF LABOR

### Office of the Secretary

### NATIONAL MANPOWER ADVISORY COMMITTEE

### Notice of Meeting

The National Manpower Advisory Committee will meet at the Department of Labor on September 21. Appointed by the Secretary of Labor in 1962, the Committee makes recommendations to the Secretary relative to the carrying out of his duties under the Manpower Development and Training Act. Members of the Committee are chosen from representatives of labor, management, agriculture, education, training and the public at large. The chairman is Dr. Eli Ginzberg of Columbia University.

At its meeting on September 21 the National Manpower Advisory Committee will review the roles and outcomes of the Work Incentive Program (WIN) and the Job Corps; identify issues that might be considered for the President's Message in the 1974 Manpower Report of the President; and discuss possible courses of action for future meetings of its subcommittees.

The meeting will be held in Conference Room 107 in the Department of Labor starting at 9:30 a.m., and is expected to adjourn soon after 4:00 p.m. The meeting will be open to the public.

Signed at Washington, D.C., this 10th day of September 1973.

ROBERT R. BEHLOW,
*Executive Secretary.*

[FR Doc.73-19549 Filed 9-13-73;8:45 am]

## INTERSTATE COMMERCE COMMISSION

[Notice 341]

### ASSIGNMENT OF HEARINGS

SEPTEMBER 11, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 66121 Sub 28, Indian Bow Truck Lines, Ltd., now assigned October 29, 1973, will be held in Room 206, Tax Court, 26 Federal Plaza, New York, N.Y.

MC 62690 Sub 3, Carey F. Weathers Transfer & Storage Co., now assigned October 10, 1973, at Atlanta, Ga., will be held in Room 305, 1252 West Peachtree Street, NW.

MC 127418 Sub 7 Trop-Arctic Refrigerated Service Inc., now assigned October 15, 1973, at Atlanta, Ga., will be held in Room 305, 1252 West Peachtree Street, NW.

MC-F-11436, Milton Transportation, Inc., Purchase—Milton Trucking, Inc., MC 136343, Milton Transportation, Inc., Conversion and Extension, MC 134776 Sub 20, Milton Trucking, Inc., Extension-Paper, now being assigned hearing October 29, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

No. 35834, Increased Rates, Matson Navigation Company, No. 35834 Sub 1, Increased Rates, Seatrain Lines, California, No. 35834 Sub 2, Increased Rates, Trans-Continental Freight Bureau, and No. 35834 Sub 3, Increased Rates, United States Lines, now assigned September 17, 1973, at San Francisco, Calif., is postponed indefinitely.

MC 263 Sub 205, Garrett Freightlines, Inc., and MC 97699 Sub 39, Barber Transportation Co., now assigned October 1, 1973, at Denver, Colo., will be held in Room B-230, New Custom House, 19th and Stout Street.

MC 138237, Metro Heavy Hauling, Inc., now assigned October 1, 1973, at Olympia, Wash., will be held in Hearing Room 6th Floor, Highway Licenses Bldg., 12th and Washington Street.

MC-C-8041, Garrett Freight Lines, Inc., Et Al-V-Puget Sound Truck Lines, Inc., now assigned October 15, 1973, at Olympia, Washington, will be held in Hearing Room 6th Floor, Highway Licenses Bldg., 12th and Washington Street.

[Notice 352]

### MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before October 4, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74417. By order of September 10, 1973, the Motor Carrier Board approved the transfer to Charles Eberly and Roger Eberly, a partnership, doing business as Valley Bus Lines, Scotland, Pa., of Certificates Nos. MC-125754 and MC-125754 (sub-No. 1), issued April 21, 1964, and December 10, 1964, respectively, to Lee McBeth, doing business as McBeth Bus Company, Walnut Bottom, Pa., authorizing the transportation of passengers and their baggage, in round-trip charter operations beginning and ending at specified points in Pennsylvania and extending to points in New York, New Jersey, Delaware, Maryland, Virginia, West Virginia, Ohio, Connecticut, Massachusetts, Rhode Island, Maine, and the District of Columbia. S. Berne Smith and Harry H. Frank, 100 Pine Street (P.O. Box 1166), Harrisburg, Pa. 17108, attorneys for applicants.

V 38 - 178 SEP 14 73 XUM

No. MC-FC-74601. By order entered September 10, 1973, the Motor Carrier Board approved the transfer to Sage Bros. Trucking Co., Mount Holly, N.J., of the operating rights set forth in Certificates Nos. MC-59495 and MC-59495 (sub-No. 2), issued by the Commission February 7, 1941 and May 6, 1949, respectively, to Benjamin B. Powell and Joseph P. Powell, doing business as Powell Bros., Moorestown, N.J., authorizing the transportation of agricultural commodities, fertilizer, lime, plaster, feed, and grain, from and to points in New Jersey, New York, Pennsylvania, and Delaware. William H. Wells, 135 High Street, Mount Holly, N.J. 08060, attorney for applicants.

No. MC-FC-74609. By order of September 7, 1973, the Motor Carrier Board approved the entry of a supplemental order to transfer to Leon Ledbetter Trucking, Inc., Amarillo, Texas, the additional operating rights in Certificates No. MC-125000 (sub-No. 8), issued August 7, 1973, to Leon Ledbetter, Vega, Texas, in order to accomplish applicants desires that all of the operating rights issued to the individual, Leon Ledbetter, under docket series No. MC-125000 be transferred to the above-named transferee corporation. The rights transferred cover the transportation of: Asphalt paying materials, in dump vehicles, from points in specified counties in Texas to points in specified counties in Kansas, Oklahoma, and New Mexico. John S. Fessenden, attorney, 1111 E St. NW., Washington, D.C. 20004.

[SEAL] ROBERT L. OSWALD, *Secretary.*

| 1062 | St. Louis-Ozarks | AO-10-A12. |
| 1099 | Paducah, Ky. | AO-183-A21. |

Notice is hereby given of the filing with the Hearing Clerk of this revised recommended decision with respect to proposed amendments to the tentative marketing agreements and orders regulating the handling of milk in the aforesaid marketing areas.

Interested parties may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, by October 15, 1973. Seven copies of the exceptions should be filed. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

#### PRELIMINARY STATEMENT

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreements and to the orders as amended, were formulated, was conducted at Clayton, Mo., on July 14–22, 1970, pursuant to notice thereof which was issued June 26, 1970 (35 FR 10692).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on June 4, 1971 (36 FR 11352), filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

On the basis of exceptions to the recommended decision, a number of changes in the findings and conclusions of that decision concerning the classification and pricing of milk in certain uses are appropriate. Because such changes are substantive, a revised recommended decision is being issued with an opportunity to submit exceptions thereto.

The material issues on the record of the hearing relate to:

1. Application of a uniform milk classification plan in the seven markets;
2. Revision of the present Class I classification;
3. Classification and pricing of milk not needed for Class I use;
4. Miscellaneous classification and accounting changes:
   (a) Other source milk definition;
   (b) Accounting for nonfat milk solids added to milk and milk products;
   (c) Classification of milk transferred or diverted to other plants;
   (d) Classification of end-of-month inventories;
   (e) Shrinkage allowances;
   (f) Allocation of receipts to utilization;
   (g) Obligations relative to other source milk; and
   (h) Reports;
5. Changing the butterfat differentials; and
6. Advance announcement of prices for surplus milk.

*General setting of the hearing.* Prior to the hearing, the National Milk Producers Federation, an organization of cooperative associations of dairy farmers and federations of such cooperative associations, undertook the development of a uniform milk classification plan for use under Federal milk orders. Guidelines were formulated for use by member organizations in the drafting of specific classification proposals for consideration at public hearings.

Using these guidelines as a basis for their proposals, Associated Milk Producers, Inc., Dairymen, Inc., Mid-America Dairymen, Inc., and Pure Milk Products Cooperative petitioned the Department for a hearing on various proposals relating to the classification and pricing of milk in the seven subject markets. These four cooperative associations, which will be referred to in this decision as the "principal" cooperatives, collectively represent a substantial number of the producers associated with each of these markets.

The main thrust of the cooperatives' proposals was the proposed use of an identical classification plan under each of the seven orders. As proposed, the new plan would have three classes of utilization rather than the two classes now provided in each order. The present Class II classification would be redesignated as Class III and a new Class II classification, which would include various milk products now in Class I and Class II, would be established.

Corollary proposals by the principal cooperatives would provide that the Class III price under each order be the Minnesota-Wisconsin manufacturing milk price for the month. They proposed that the new Class II price under each order be the Minnesota-Wisconsin price plus 10 cents. They proposed also that a single handler butterfat differential apply to all three classes. This differential, which would be identical among the seven orders, would be based on the Chicago butter price times a factor of 0.115.

These proposals in general were endorsed at the hearing by the Association of Operating Cooperatives on behalf of six Wisconsin-based producer groups. These cooperatives proposed, however, that the price to be applicable to milk used in butter and nonfat dry milk be the lower of the Minnesota-Wisconsin price or a butter-nonfat dry milk formula price. Another cooperative association, Land O'Lakes, Inc., proposed that the lower of the Minnesota-Wisconsin price or the product formula price apply to all Class III uses of milk. Its butter-nonfat dry milk formula price would be lower relative to the formula price proposed by the Association of Operating Cooperatives.

A uniform classification plan for the seven orders was advocated also by the Milk Industry Foundation and the International Association of Ice Cream Manufacturers, national trade associations of fluid milk and ice cream processors whose members operate in each of the seven subject markets. Instead of taking a position on whether there should be two or three use classes, these groups offered alternative proposals on the classification of various milk products under either type of classification plan. Individual handlers also made proposals concerning specific aspects of the classification scheme.

#### FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Application of a uniform milk classification plan in the seven markets.* Each of the seven orders under consideration should provide for the same basic classification plan. As adopted herein, each order would provide for three classes of utilization, with the milk uses included in each class being the same for each order. Likewise, the same basic procedure would be used under each order for classifying milk transferred or diverted from pool plants to other plants, and for allocating a handler's receipts to his utilization to determine the classification of his producer milk. Each order would use the same Class II and Class III price formulas. Also, all differential butterfat received from producers would be priced at the same level regardless of use.

The statutory authority for Federal milk orders specifies that an order shall classify milk purchased by handlers from producers or associations of producers in accordance with the form in which or the purpose for which the milk is used. When each of the seven subject orders was promulgated, the classification plan adopted reflected the marketing conditions and practices prevailing at the time in the local area concerned. Because local conditions were seldom alike from market to market, the classification plans often varied from one order to another. As long as the markets remained relatively isolated from each other, marketing problems resulting from the differences in the various classification plans were minimal.

In recent years the "local" character of these markets has been disappearing. Intermarket movements of milk have become commonplace as handlers and producers alike seek to find additional outlets for milk. Such milk movements have been encouraged or facilitated by such developments as inspection reciprocity between health jurisdictions, improved highway networks and transportation equipment, conversion from can handling to farm bulk tanks, emergence of regional cooperatives, new processing and packaging techniques, and concentration of processing and packaging operations in large, specialized facilities.

Widespread distribution patterns prevail particularly for the processors of specialty products such as yogurt and sterilized cream items. Although the volume of these products is relatively limited, it is probably the distribution of these products more than any others that has precipitated such general interest within the industry for uniform classification provisions among Federal orders.

Several cases cited on the record serve to illustrate the widespread movements of packaged specialty products. At the time of the hearing a handler regulated under the Paducah order was distributing half and half or whipping cream in 20 federally regulated marketing areas, including six of the markets involved in this hearing. Similarly, a handler under the Louisville-Lexington-Evansville order was selling half and half, yogurt or sour cream in 12 Federal order markets. A processor with plants in New York and Ohio was selling yogurt in nearly every State east of the Mississippi River, which includes most of the markets involved in this proceeding.

Although the seven orders have been revised from time to time to reflect the closer intermarket relationships, the classification plans of these orders continue to differ. The differences relate not only to the products included in each respective class, but also to the attendant class prices and butterfat differentials, the rules for classifying milk moved from one plant to another, the procedure for allocating a handler's receipts to his utilization, the method of classifying end-of-month inventories, and the manner of classifying shrinkage.

Such differences in the classification and pricing of milk are often disruptive to the competitive relationships of handlers and to the marketing of producer milk. Many of these differences, though, have little, if any, foundation under today's marketing conditions. It is thus concluded that a generally uniform classification and pricing plan should be incorporated in each of the seven orders under consideration.

In conjunction with the development of uniform provisions pertaining to the classification and pricing of milk, it is desirable to also develop a single format of order provisions for use in each of these orders. All Federal orders contain essentially the same categories of provisions, such as those relating to the definition of a pool plant or other source milk, those setting forth the class price formulas, or those describing how the uniform price shall be computed. At present, however, many of the orders are structured in such a way that provisions serving essentially the same purpose under all orders do not appear in each order in the same place or under the same section title.

A revised recommended decision on uniform classification and pricing provisions for 32 other Federal orders is being issued concurrently with this seven-market decision. The format of order provisions adopted herein is comparable to the format set forth in the 32-market decision. The opportunity to effect changes in a relatively large number of orders at the same time makes the adoption of a uniform order format a particularly desirable step at this juncture of the order program. Moreover, coordination of the orders in this respect will be helpful to those in the industry who must work with more than one order, a situation that is becoming increasingly common as cooperatives and handlers continue to expand their marketing activities into more and more regulated markets.

Each of the seven orders under consideration is set forth in its entirety at the end of this document. Each order reflects the revised order format as well as the classification and pricing amendments adopted herein. In adapting each order to the new format, no substantive changes have been made in those provisions not under consideration at the hearing. Since the classification and pricing amendments may be less discernable to the reader with the reprinting of the complete order, the sections in each order that encompass the basic changes in classification and pricing are listed below:

Sections 12–16, 30, 40–44, 50, 52–54, 60, 62, 74–76, and 85.

Some of the amendments adopted herein would change certain procedures under the orders that are carried out after the end of the month to which they apply. These include the submission of reports, the classification of milk, and the computation and announcement of certain class prices, butterfat differentials, and producer prices. It is intended, however, that the amendments apply only to that milk handled after the effective date of the changes. Such amendments are not intended to affect the completion of previously existing procedures with respect to milk handled prior to the effectuation of the amendments.

2. *Revision of the present Class I classification.* With certain exceptions noted below, Class I milk under each of the seven subject orders should include all skim milk and butterfat disposed of in the form of milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milk shakes and ice milk mixes containing less than 20 percent total solids. Skim milk and butterfat disposed of in any such product that is flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted, likewise should be classified as Class I milk. Such classification should apply whether the products are disposed of in fluid or frozen form.

In addition, Class I milk should include all skim milk and butterfat disposed of in the form of any other fluid or frozen milk product (if not specifically designated as a Class II or Class III use) that contains by weight at least 80 percent water and 6.5 percent nonfat milk solids, and less than 9 percent butterfat and 20 percent total solids.

Skim milk disposed of in any product described above that is modified by the addition of nonfat milk solids should be Class I milk only to the extent of the weight of the skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

Class I milk should not include skim milk or butterfat disposed of in the form of evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, and any product that contains by weight less than 6.5 percent nonfat milk solids, or whey.

As a convenience in drafting order provisions, each product designated herein as a Class I product would be defined in the seven orders as a "fluid milk product."[1]

Class I milk should include also any skim milk and butterfat not specifically accounted for in Class II or Class III, other than shrinkage permitted a Class III classification.

Except for sterilized products, most of the products herein included in Class I are presently included in the Class I classification under each of the seven orders. Only the Chicago Regional order, however, now includes any milk shake mixes in Class I. The Paducah order is the only one of the seven orders that includes sterilized fluid milk products (other than cream items) in Class I.

The adopted Class I classification would not include cream products or mixtures of cream and milk or skim milk (such as half and half) containing 9 percent or more butterfat. Sweet cream (except that in frozen, concentrated, aerated or sterilized form) and half and half are presently Class I products under the seven orders. Grade A sour cream is a Class I product under all but the Indiana order, while Grade A sour cream mixtures are Class I items under all but the Indiana and Paducah orders. Also, non-Grade A sour cream is presently a Class I product under the Paducah and Louisville-Lexington-Evansville orders.

[1] The reader should keep in mind that the orders do not classify products per se but rather the skim milk and butterfat disposed of in the form of a particular product or used to produce a particular product. To simplify the presentation of the findings and conclusions, however, reference is made in this decision to Class I products, Class II products and Class III products, or to certain products included in a particular class.

V 38 I 178 SEP 14 73 XUM

Under the adopted changes, yogurt would not be a Class I product. A Class I classification for yogurt, which is now in the surplus class under these orders, was proposed by the principal cooperatives.

Two of the seven orders now include ending inventories of packaged fluid milk products in Class I. As discussed later, such inventories would be classified as Class III milk under the revised orders.

The proposals concerning the Class I classification of milk related primarily to the use under all orders of a uniform fluid milk product definition based on product composition, and to the appropriate classification of milk shake and ice milk mixes, sterilized fluid milk products, cream, eggnog, yogurt, fluid milk products to which nonfat milk solids have been added and ending inventory. The classification of cream, eggnog, and yogurt is discussed under Issue 3 which deals with the classification and pricing of milk not needed for Class I use. The method of accounting for nonfat milk solids added to fluid milk products is discussed under Issue 4(b). The classification of ending inventory is dealt with under Issue 4(d). The remaining Class I issues are dealt with at this point.

Milk shake and ice milk mixes containing less than 20 percent total solids should be included in Class I. Such mixes containing a greater percentage of solids should be Class II products.

The principal cooperatives proposed that milk shake mixes that "are not further processed in a commercial establishment" be in Class I. They proposed that all other milk shake mixes be in Class II. The national organizations of fluid milk and ice cream processors, on the other hand, asked that all milk shake mixes be included in the lowest classification.

Milk shake and ice milk mixes are being marketed generally through two channels. Limited quantities of such mixes are processed for home consumption, with such mixes being distributed to consumers through food stores and on home delivery routes. The major outlet for milk shake and ice milk mixes, though, is the so-called "soft-serve" trade. Mixes processed by regulated handlers for this use are sold to commercial establishments where the product is run through a special freezer and dispensed to the public in a semisoft form.

Milk shake and ice milk mixes are basically similar in composition and purpose to what might be considered as traditional frozen desserts, such as ice cream. Although such shake mixes are intended to be consumed in a semisoft form, or even in a very thick fluid form, they are being marketed for essentially the same use as the traditional frozen desserts. This is the case whether such mixes are sold through the "soft-serve" trade or for home use. With minor exception, as noted below, milk used in milk shake and ice milk mixes thus should be classified in the same class as milk used in the traditional frozen desserts. As discussed later in this decision, the classification plan adopted herein includes frozen desserts in Class II.

It is possible that a product very similar in composition and form to chocolate milk could be marketed under the label of a milk shake mix for the purpose of having a lower classification apply to the product. Since such a product actually would have the same general form and purpose as other fluid milk products now classified as Class I under these orders, it should be included in the Class I classification. It is necessary, though, to provide some means of distinguishing between such a product and the general category of milk shake mixes that are being sold in competition with frozen desserts. For this purpose, the total solids content of the product should be used. A standard of 20 percent or more total solids should encompass those milk shake and ice milk mixes intended for use as a type of frozen dessert. Mixes with less solids are similar in composition to chocolate milk and other flavored fluid milk products and should be a Class I product.

No exception to the Class I classification of milk should be made for fluid milk products in sterilized form. This was proposed by the principal cooperatives and the national organizations of fluid milk and ice cream processors. A group of handlers in the Indiana and Louisville-Lexington-Evansville markets proposed, however, that all sterilized products in rigid metal or glass containers be excluded from Class I.

The sterilization of fluid milk products does not change the form or purpose of such products. As in the case of the unsterilized fluid milk products which they resemble, such sterilized products are disposed of in fluid form for consumption as a beverage. They are generally intended for use in place of their unsterilized counterparts and are thus competing for the same consumers.

Returns to producers for milk disposed of in the form of fluid milk products should be the same whether such products are sterilized or unsterilized. Such products in either form are being marketed for the same beverage use. Classifying all such products in Class I will assure that the returns from producer milk used in sterilized fluid milk products will contribute on the same basis as returns from producer milk used in unsterilized fluid milk products toward inducing an adequate supply of milk for beverage use.

With the removal of any exception to the Class I classification of milk because of sterilization, specific reference must be made in the "fluid milk product" definition to the exclusion of certain products that otherwise could be construed to fall within such definition. Such products are evaporated or condensed milk or skim milk, formulas in hermetically sealed glass or all-metal containers that are especially prepared for infant feeding or dietary use, and products (such as flavored drinks in "pop" bottles) containing by weight less than 6.5 percent nonfat milk solids. These products, which are being sold in sterilized form, are now excluded from the Class I classification and, as proposed by cooperatives and handlers, such exclusion should be continued, notwithstanding the fact that they are sold to the public in fluid form. Evaporated milk and condensed milk sold for home use are intended primarily for cooking purposes. They are not consumed normally as a beverage. Infant and dietary formulas, which are being sold in hermetically sealed glass or all-metal containers, are specialized food products prepared for a limited use. Such formulas do not compete with other milk beverages consumed by the general public. Similarly, fluid products containing only a minimal amount of nonfat milk solids are not considered as being in the competitive sphere of the traditional milk beverages.

Fluid milk products should not be defined only on the basis of product composition, as was proposed by the principal cooperatives. Contending that the present fluid milk product definition in each order does not clearly identify those products that are intended to be classified as Class I products, the cooperatives proposed that a fluid milk product be defined solely in terms of moisture and milk solids content of the product. As proposed by producers, a "fluid milk product" would be any product containing at least 6.5 percent but less than 27 percent nonfat milk solids, less than 9 percent butterfat, and more than 20 percent moisture, all computed on the basis of weight.

In support of their proposal, proponents indicated that such a definition would result in a more uniform application among the seven orders of the classification provisions. They contended that the listing of products under the current definitions does not accommodate the proper classification of new products or variations of the listed products when they are introduced on the market. Proponents pointed out that as market administrators have had to make order interpretations in response to this situation variations in interpretation and classification have resulted among the markets. Adoption of the proposed definition, it was contended, would eliminate such problems. Any product meeting the specified composition limits for a fluid milk product would be a fluid milk product regardless of the name under which the product might be marketed.

Proponents recognized, however, that their proposed fluid milk product definition would include some products not intended by them to be in Class I, and, at the same time, would exclude certain products that they wanted in this classification. To overcome this problem, proponents stated that certain products should be listed by name, either as inclusions or exclusions, to assure that the fluid milk product definition would include those products, and only those products, warranting a Class I classification.

Handlers generally took the position that the fluid milk product definition should continue to list by name those products intended to be included in Class I. They believed that this procedure would result in less confusion within the industry concerning the application of this definition. Also, handlers were concerned that defining a fluid milk product on the basis of product composition would deter the development and marketing of new products. They contended that the proposed composition standards could embrace a new product that was intended by the processor to be marketed in direct competition with products that would be included in Class II or Class III rather than in competition with Class I products.

The primary concern with any fluid milk product definition is that it clearly define the products or types of products that are intended to be included in the definition. The fluid milk product definition adopted herein, which incorporates both the listing of specified products and the use of composition percentages, should meet this requirement. Incorporation of this definition in each of the seven orders will provide a uniform basis for identifying those products that are to be defined as "fluid milk products."

For simplicity, the fluid milk product definition should continue to list the generic names of those products commonly sold for consumption as beverages. The products listed in the adopted definition encompass most of the forms in which milk for fluid uses is sold. Anyone referring to this fluid milk product definition may easily ascertain in the case of most milk products whether or not a particular product is included in the definition.

A listing of products alone in the fluid milk product definition may not clearly indicate the classification of new milk products developed for fluid consumption. With certain limited exceptions noted, the fluid milk product definition is intended to include all milk products that are distributed for use as beverages. Although a new milk beverage introduced on the market might not be encompassed within the list of named products, it should be treated as a fluid milk product, nevertheless, if its composition is similar to that of the listed products. This will be the result of the standards of product composition for fluid milk products herein adopted.

As indicated, the adopted composition standards would embrace any fluid or frozen milk product not specified as a Class II or Class III product that contains by weight at least 80 percent water and 6.5 percent nonfat milk solids, and less than 9 percent butterfat and 20 percent total solids. The 9 percent butterfat standard coincides with the butterfat percentage adopted herein to delineate the mixtures of cream and milk or skim milk to be included in Class II. The total solids and water percentages represent a reasonable measure of the fluidity of those products that normally are consumed as beverages. The 6.5 percent nonfat milk solids standard is used to exclude from the fluid milk product definition those products which contain some milk solids but which are not closely identified with the dairy industry, such as chocolate flavored drinks in "pop" bottles.

These composition standards are chosen so as to conform as closely as possible to the water, solids and butterfat content of those products specifically listed in the fluid milk product definition, i.e., the traditional milk beverages. It is intended that these standards apply only to milk products, and only to such products that are being marketed for consumption in fluid form. Such standards would not be applied to products such as soups, which are not customarily thought of as milk products, or to products that would be a type of frozen dessert marketed for consumption in frozen form.

In determining whether or not a milk product in fluid form falls within the composition standards of the fluid milk product definition, such standards should be applied to the composition of the product in its finished form, not to the composition of the product on a skim equivalent basis. A new product not intended for beverage use might contain in its finished form somewhat more than the maximum total solids specified for a fluid milk product under the adopted composition standards. On this basis, the product would not fall within the fluid milk product definition. Application of the composition standards to this product on a skim equivalent basis, however, could result in the product meeting such standards and thus being defined as a fluid milk product.

As pointed out by producers in their exceptions, applying the composition standards to products in the form in which marketed could exclude from the fluid milk product definition a new concentrated fluid product that is intended to be consumed as a beverage only after reconstitution. For the present time, however, the composition standards should be applied to a product in its finished form. A refinement of such standards may be appropriate once there has been an opportunity to evaluate their applicability under actual market conditions.

It should be noted that under the adopted classification provisions accounting for a new product on other than a skim equivalent basis would be limited solely to determining whether or not the product meets the composition standards of the fluid milk product definition. For all other purposes under the order, the product would be accounted for on a skim equivalent basis.

In applying the 6.5 percent nonfat milk solids standard, it is intended that this standard apply to such solids in any form except sodium caseinate. Under the "filled milk" provisions in these orders, sodium caseinate in any product is treated as a nonmilk ingredient. There is no basis for changing this procedure.

The use of composition standards as a means of defining fluid milk products should not deter the development of new milk products, as handlers contended. Should the Class I classification of a new product appear to be incongruous with the intended use of the product, the hearing process remains as an avenue through which a different classification may be considered. The use of composition standards should result, however, in a more uniform classification among orders of new products developed for fluid consumption.

3. *Classification and pricing of milk not needed for Class I use.* The present Class II classification of milk under each of the seven orders should be redesignated as Class III, and a new Class II classification that would include certain products now in Class I and Class II should be established. The new Class II price should be the basic formula price (Minnesota-Wisconsin manufacturing milk price) for the month plus 10 cents. The price under each of the orders for the redesignated Class III classification should be the basic formula price for the month.

Class II milk should include skim milk and butterfat disposed of in the form of eggnog, yogurt or a "fluid cream product", i.e., cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients. Any product containing 6 percent or more nonmilk fat (or oil) that resembles any of these products likewise should be in this class. Also, eggnog, yogurt and fluid cream products that are in inventory at the end of the month in packaged form should be in Class II.

Included also in this classification should be skim milk and butterfat used to produce cottage cheese, lowfat cottage cheese, dry curd cottage cheese, milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, frozen dessert mixes, any concentrated milk product in bulk fluid form, plastic cream, frozen cream, anhydrous milkfat, custards, puddings, pancake mixes, and formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

A Class II classification should apply also to bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages.

Class III milk should include skim milk and butterfat used to produce cheese (other than cottage cheese, low fat cottage cheese and dry curd cottage cheese), butter, any milk product in dry form, evaporated or condensed milk (plain or sweetened) in a consumer-type package, evaporated or condensed skim milk (plain or sweetened) in a consumer-type package, and any product not otherwise specified as a Class I, Class II or Class III product.

Other Class III uses should include bulk and packaged fluid milk products and bulk fluid cream products in inventory at the end of the month, and that

V 38 178 SEP 14 73 XUM

portion of modified (by the addition of nonfat milk solids) fluid milk products not included in Class I. Class III should include any fluid milk product or Class II product accounted for on a "disposed of" basis that is used for animal feed, or is dumped if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition. Also, shrinkage within certain limits should be classified as Class III milk.

As described later, the classification and pricing adopted herein for milk not needed for Class I use differs in some respects from that set forth in the June 4, 1971, recommended decision.

The Class II classifications under the present orders are essentially alike. Class II uses include skim milk and butterfat used to produce any product other than a fluid milk product, and skim milk and butterfat in fluid milk products that are disposed of to commercial food processing establishments, dumped, disposed of for animal feed, or in inventory at the end of the month. Under the Southern Illinois and Central Illinois orders, such classification of inventory is limited to fluid milk products in bulk form. The orders also include shrinkage (within certain limits) in this classification and that portion of the skim milk equivalent of nonfat milk solids added to fluid milk products that is not classified as Class I milk.

Under five of the seven orders, the present Class II price is the Minnesota-Wisconsin manufacturing milk price. The Indiana order establishes the Class II price at the lower of the Minnesota-Wisconsin price or a butter-nonfat dry milk formula price. Under the Louisville-Lexington-Evansville order, the Class II price for the months of September through March is the Minnesota-Wisconsin price. For the remaining months, it is the Minnesota-Wisconsin price less 10 cents.

The principal cooperatives proposed that the present Class II classification under each order be redesignated as Class III and that many of the uses now included in the surplus class be included in a new, higher-priced Class II classification. These uses would include all soft and hard cheeses except cheddar cheese, frozen desserts, milk shake mixes sold to commercial establishments for further processing, eggnog, cream in plastic, frozen, aerated or sterilized form, anhydrous milkfat, sour cream, sour mixtures (dips), evaporated or condensed milk or skim milk, dietary and infant formulas, custards, puddings, pancake mixes, any product with 6 percent or more nonmilk fat (or oil), and fluid milk products disposed of to commercial food processors. In addition, the cooperatives proposed that the new Class II also include all cream products now in Class I, i.e., cream, mixtures of cream and milk or skim milk containing 9 percent or more butterfat, sour cream and sour mixtures. Under their proposal, producer milk allocated to these uses would be priced under each order at the Minnesota-Wisconsin price plus 10 cents.

Of the present Class II uses, only cheddar cheese, butter, dried products, dumpage, animal feed, shrinkage, ending inventory, and the non-Class I portion of modified fluid milk products would remain in the lowest class under the cooperatives' proposal. These groups asked that milk in such uses be priced under each order at the Minnesota-Wisconsin price.

In support of their proposed classification plan, proponents contended that the present differences in the demand for certain groups of milk products support three different price levels, or classes of utilization, for milk. They stated that the demands for cheddar cheese, butter and nonfat dry milk are quite sensitive to changes in product prices, thus warranting the classification of milk used in such products in the lowest priced class. Proponents contended, on the other hand, that other products presently in Class II should be included in an intermediate-priced class since the demands for such products are less sensitive to price changes.

The principal cooperatives testified also that handlers generally demand a regular supply of producer milk for many of their proposed Class II uses and that alternative supplies of milk or milk products for such uses cannot be obtained for less than the Class II price they propose. Moreover, they claimed that a higher price for some of the surplus milk uses would result in products other than fluid milk products bearing some of the burden of attracting a total supply of milk for the market.

The principal cooperatives contended further that a lower price should apply to milk used in cream and cream mixtures now in Class I. They pointed out that the present classification has placed these products in a poor competitive position in the market relative to nondairy substitutes. Indicating that the industry already may have waited too long to shift cream products to a lower price category, proponents urged a lower price for milk used in such products with the hope that the declining demand for cream could be halted.

The classification plan proposed by the principal cooperatives was generally endorsed by other cooperative associations operating in or near the seven markets. One group of cooperatives urged, however, that all "American" cheeses, rather than just cheddar cheese, be included in Class III. "American" cheeses are commonly considered to include cheddar cheese, colby cheese, granular or stirred curd cheese, and washed curd cheese. Another cooperative proposed that cheddar cheese and colby cheese be in separate classes, but with little difference in the prices established for such classes. Three producer groups also proposed that yogurt be included in the proposed new Class II, rather than in Class I as proposed by the principal cooperatives.

As noted earlier, the national trade associations of fluid milk and ice cream processors did not take a position at the hearing on whether there should be two or three classes of utilization. The two handler groups stated that if a three-class system is adopted certain products proposed by the principal cooperatives to be in the new Class II should be included, instead, in Class III. They urged that the lowest classification apply to frozen desserts (including those with yogurt flavoring), puddings, sour cream, sour mixtures, and dispositions to commercial food processors.

Other handler groups and individual handlers likewise opposed a higher price on milk used in certain manufactured products. Particular attention was focused on milk and condensed products sold to food processors and on evaporated milk. Representatives of the "soft-serve" frozen dessert industry urged that milk shake mixes for commercial use be in the lowest class. Some handlers advocated that the only classification change be that of classifying cream products in a lower class. They proposed that any action to maintain producer returns at present levels because of a change in the classification of cream be limited to increasing the Class I price.

Producer milk not needed for Class I use must be priced at a level that insures the orderly disposition of the milk. Normally, excess milk supplies must be channeled into manufacturing uses. This requires that such milk be priced competitively with manufacturing grade milk if the market is to be cleared of its reserve supplies. At the same time, it is consistent with the purposes of the statute authorizing milk orders that reserve milk supplies be priced at the highest practicable level compatible with orderly disposal of the milk.

Several Wisconsin and Minnesota cooperative associations engaged in the manufacture of butter and nonfat dry milk proposed that all seven of the orders under consideration provide for the use of a butter-nonfat dry milk formula for pricing surplus milk. Under the proposal of the Wisconsin cooperatives, the lower of the Minnesota-Wisconsin price or a butter-nonfat dry milk formula price would apply to producer milk processed into butter and nonfat dry milk. Other proposed Class III uses would be priced at the Minnesota-Wisconsin price. A cooperative based in Minnesota proposed that the lower of the Minnesota-Wisconsin price or a butter-nonfat dry milk formula price apply to all Class III uses.

Different formula prices were proposed, however, by these producer groups. The Wisconsin cooperatives urged the adoption of essentially the same butter-nonfat dry milk formula contained in the Indiana order. The formula proposed by the Minnesota cooperative, on the other hand, would yield a price 12 cents per hundredweight lower than the Indiana formula because of the greater processing costs for butter and nonfat dry milk, or "make allowance," built into the formula. In 1969, the proposed pricing would have returned 17 to 29 cents (depending on the formula used) per hundredweight less than the use of the Minnesota-Wisconsin price alone.

The basic contention of these cooperatives was that plants processing butter and nonfat dry milk from a Class I market's surplus milk cannot afford to pay

the Minnesota-Wisconsin price for milk so used. They indicated that the difference between the market value for these products and the Minnesota-Wisconsin price is considerably less than the amount required to cover the operating costs of such plants. Such plants associated with a fluid market, proponents claimed, have particularly high costs of operation because of the underutilized plant capacity that results when there is a heavy demand for milk at bottling plants. The cooperatives maintained that the class price for milk used in butter and nonfat dry milk must assure processors of such products a minimum processing allowance.

As pointed out, producer milk not needed for Class I use should not be priced lower than is necessary for the orderly disposition of the milk. Presently, handlers and cooperative associations in the seven markets are generally disposing of milk not needed for Class I use at prices that are not less than the Minnesota-Wisconsin price adopted herein as the minimum price for surplus milk. The Minnesota-Wisconsin price is now the lowest price for surplus milk under the St. Louis-Ozarks, Paducah, Southern Illinois, Central Illinois, and Chicago Regional orders. There is no indication that handlers or cooperatives in these five markets are experiencing difficulty in disposing of excess milk supplies at this price level. This includes the Chicago Regional market where nearly one-half of the 7.115 billion pounds of producer milk in 1969 was disposed of in Class II uses.

In the Louisville-Lexington-Evansville market where the Minnesota-Wisconsin price also applies to surplus milk except in certain months, reserve supplies likewise are being disposed of at not less than the Minnesota-Wisconsin price. During the period of January 1969 through June 1970, 176 million pounds of the market's 424 million pounds of Class II producer milk were disposed of by a cooperative to nonpool plants for manufacturing at not less than this price level. This included sales in those months (April–August) when the Class II price under the Louisville-Lexington-Evansville order is the Minnesota-Wisconsin price less 10 cents.

Although the Indiana order now provides for the use of a butter-nonfat dry milk formula price in combination with the Minnesota-Wisconsin price, there is no indication that handlers or cooperatives in this market are disposing of their surplus milk under conditions uniquely different from those faced by handlers in the other nearby markets under consideration. Much of the producer milk associated with the Indiana market is, in fact, produced in the State of Wisconsin.[2] Such milk not needed for Class I use by Indiana handlers is either transferred from Indiana pool plants back to manufacturing plants in the Wisconsin production area or diverted directly to such plants from nearby farms. Processors in Wisconsin buying milk for manufacturing use are generally paying not less than the Minnesota-Wisconsin price for such milk. Moreover, handlers in the Indiana market are not limited to butter and nonfat dry milk uses in disposing of milk not needed for Class I purposes. Of the total quantity of milk processed in this market into manufactured products in 1969, only one-fifth was used in butter and nonfat dry milk.

Under these circumstances, it must be concluded that conditions in each of the seven markets support the use of the Minnesota-Wisconsin price as the minimum price for surplus milk.

Certain uses of producer milk not needed for Class I purposes should be priced at a level 10 cents per hundredweight higher than the Minnesota-Wisconsin price. These uses, which are included in a new Class II classification, were set forth at the beginning of this discussion on pricing surplus milk.

Of the products adopted herein for inclusion in the new Class II, one of principal importance is cottage cheese. For this discussion, the term "cottage cheese" encompasses cottage cheese (i.e., creamed cottage cheese), lowfat cottage cheese, and dry curd cottage cheese.

In these markets cottage cheese has been considered for pricing purposes merely as one of various uses for producer milk not needed for the Class I market. There are, however, several distinguishing characteristics of cottage cheese production that support a higher price for milk in this use than for milk channeled into the residual surplus uses. There is little, if any, relationship between the quantity of cottage cheese made and the amount of reserve milk in the market, as is the case with respect to butter and nonfat dry milk, for instance. Regulated handlers, in conjunction with their fluid milk sales, generally move cottage cheese through the same retail and wholesale outlets. In addition to supplying the Class I requirements of handlers, producers are expected to make available sufficient supplies of fresh, high quality milk for the production of cottage cheese.[3] This is not the case with respect to butter, nonfat dry milk, or hard cheese.

Although some cottage cheese is made in specialized country plants, as the economics of location would suggest, cottage cheese production is commonly an integral part of the processing operations at fluid milk distributing plants. Such plants are usually located in or near the populated centers of the market. This entails a greater hauling expense for producers than when the reserve milk is processed in the production area, as is generally the case with respect to butter, nonfat dry milk and hard cheese manufacture. Also, cottage cheese, unlike most other manufactured products, has a more limited storage life and must be processed on a regular basis. Thus, as in the case of fluid milk products, handlers require that adequate supplies of producer milk be made available at their distributing plants at all times for cottage cheese use.

The adopted Class II price (the Minnesota-Wisconsin price plus 10 cents) is a reflection of some of the additional value which producer milk used in cottage cheese has to regulated handlers. The local producer supplies are the only dependable supplies of quality fluid milk within the normal milksheds of the seven subject markets for cottage cheese production. In these markets, any nearby milk of the necessary quality is attached to other regulated fluid milk markets and would be available to handlers only sporadically. With the handling and transportation charges, the cost of this milk to handlers would be at least as high as the adopted Class II price.

Rather than produce his own cottage cheese, a handler might choose to purchase the finished product from some other Federal order market where a lower price applies to cottage cheese milk. There is no indication, however, that under the adopted pricing such a handler could materially enhance his competitive position relative to handlers using producer milk. The cost of transporting cottage cheese, a relatively bulky and perishable item, from distant areas to outlets in the seven markets would generally negate any apparent price advantage attributable to differences in order prices applicable to cottage cheese milk.

Milk used in yogurt should be priced at the Class II price level rather than at the Class I level as the principal cooperatives proposed. Yogurt is a soft, nonfluid, "spoonable" product. It is not a beverage as are other products defined herein as fluid milk products.

Yogurt has some of the marketing characteristics of cottage cheese, although, unlike cottage cheese, very limited quantities of yogurt are made in the seven markets under consideration. To the extent of this limited production, however, processors generally use regular supplies of inspected milk. Although yogurt can be made from cream and nonfat dry milk, processors indicated that milk is preferred. Since yogurt has a relatively limited shelf life, it is made on a continuing basis, thus requiring a regular supply of milk at all times. As in the case of cottage cheese production, these conditions warrant that producer milk used in yogurt be priced at a level above the price for milk disposed of through the traditional residual uses for surplus milk.

[2] Official notice is taken of the publication issued February 1971 by the Dairy Division, Consumer and Marketing Service, U.S. Department of Agriculture (C&MS–50 (1969)), titled "Sources of Milk for Federal Order Markets." This publication indicates that in December 1969 over 26 percent of the producer milk on the Indiana market was produced in Wisconsin.

[3] The reliance on producers for milk for cottage cheese production is not unique to the seven markets under consideration. As noted in the November 1970 issue of Federal Milk Order Market Statistics, 80 percent of the creamed cottage cheese made in the United States in 1969 was processed from milk regulated under Federal milk orders. Official notice is taken of this publication which was issued by the Dairy Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D.C.

V 38 I 178 SEP 14 73 XUM

Class II also should include frozen desserts (including commercial milkshake and ice milk mixes), custards, puddings, pancake mixes, dietary and infant formulas, and sales of bulk milk and cream to commercial food processors for use in food products. In the June 4 recommended decision, such uses of skim milk and butterfat were proposed to be included in Class III. Upon consideration of exceptions filed to that decision by cooperatives, it is concluded that market conditions support a higher price for producer milk in such uses than was initially recommended.

As producers pointed out in their exceptions, the rationale set forth in the June 4 decision for including cottage cheese in an intermediate class is in several respects applicable to these other products just listed. The demand for producer milk used in these products is related closely to the current consumer demand for such products. Thus, handlers normally want adequate supplies of producer milk made available at their plants in the quantities and at the times needed for these uses. This is in contrast to the more storable residual "hard" products. Also, the processing of such products often takes place at the market center, which entails a greater hauling expense for producers than when reserve milk is processed in the production area. Moreover, it is doubtful that handlers in general would be able to obtain alternative supplies of milk or product ingredients at less than the cost of producer milk under the adopted pricing provisions.

Cooperatives proposed that the Class II price in these markets be set at 10 cents over the Minnesota-Wisconsin price. The national trade associations of fluid milk and ice cream processors contended that any price differential over the Class III price for milk in an intermediate class should not be more than 10 cents per hundredweight. In supporting this position, individual handlers stressed that any greater price differential would seriously jeopardize the competitive position of regulated handlers using producer milk relative to unregulated processors relying largely on ungraded milk.

With respect to the several milk uses at issue in the cooperatives' exceptions, the preponderance of evidence at the hearing focused largely on the marketing of frozen desserts. The marketing conditions for frozen desserts are somewhat varied in the seven-market area. Some regulated handlers rely regularly on producer milk for use in frozen desserts. Other handlers rely on purchases of condensed skim milk or nonfat dry milk in processing frozen desserts. Also, the concentrated products used may be made from either graded or ungraded milk. In addition, much of the processing of frozen desserts is done at unregulated plants. Some unregulated processors rely on ungraded milk, while others use milk surplus to the needs of regulated fluid markets. Other unregulated processors use concentrated forms of milk from either graded or ungraded sources.

The marketing situation in the seven-market area for the several other milk uses in question (custards, puddings, pancake mixes, dietary and infant formulas, and sales to commercial food processors) is essentially the same as for frozen desserts.

Under these varying conditions, the Class II price should be set at 10 cents over the Minnesota-Wisconsin price. Pricing Class II milk at this level should permit regulated handlers using producer milk to remain competitive in the marketplace with the unregulated sector in the sale of Class II products. At the same time, such price will reflect the minimum additional value of such high quality producer milk supplied to regulated handlers over the widespread area covered by the seven markets at the times and places, and in the quantities, needed for the several Class II uses.

It is recognized that under the varied conditions just described an individual handler may find that producer milk does not represent the cheapest source of milk for his Class II uses. Presumably the alternative source would be concentrated forms of milk since health regulations would not permit the receipt of ungraded supplies of whole milk at a pool distributing plant, and graded supplies would not be available on a regular basis at less than the Class II price. Under the revised allocation provisions adopted herein, receipts of nonfluid other source milk such as condensed skim milk or nonfat dry milk that are used in a Class II product would be allocated directly to the handler's Class II uses, with no obligation applying under the order to such milk. Under this arrangement, the handler could choose to use the other source milk without the cost impact of down-allocation should the cost of such milk become less than the cost of producer milk. The handler thus could rely upon whichever source of milk best fits his competitive and operational circumstances.

Classifying the several types of cream items, some of which are now in Class I while others are in Class II, in the new Class II will accommodate proponents' desire for a lower price for milk used in cream products and at the same time price at the same level a variety of products that often compete with each other. Half and half, whether sterilized or unsterilized, and light cream are used principally by consumers in coffee. Aerated cream and sterilized and unsterilized whipping cream are used as dessert toppings. Both graded and ungraded sour cream and sour mixtures are used by consumers for the same purpose. The same classification for these cream products will result in uniform pricing to handlers for milk used in products competing in the same trade channels for the same users.

Although the present Class I cream products sold in these markets must be made from inspected milk, which is delivered regularly by producers to distributing plants, there was general agreement by producers that milk sold in the form of such products should no longer be subject to the Class I price. Relative to the total Class I sales of producer milk in these markets, cream products represent approximately 2 percent of the present Class I market. Thus, this classification change will have relatively little effect on the total returns to producers.

In connection with the reclassification of cream products, it is desirable to define a new term—"fluid cream product". "Fluid cream product" would mean cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

With the reclassification of cream, movements of cream to or from a plant no longer should be considered in determining if a plant meets the pooling requirements of the order. To accommodate this, certain changes are necessary in those pool plant definitions that make specific reference to the movement of cream.

Eggnog should be a Class II product, rather than a Class I product as was proposed in the June 4 recommended decision.

The principal cooperatives proposed that eggnog, which is presently a Class II product under each order, be included in the new intermediate price class. Although recognizing that eggnog is a beverage, the cooperatives contended that eggnog should not be a Class I product because of its relatively high butterfat content (6 percent or more) and its highly seasonal demand. This position was supported by handlers.

In their exceptions to the recommended inclusion of eggnog in Class I, handlers and producers pointed out that this classification would place eggnog at a competitive disadvantage with imitation eggnog containing nonmilk fat. It was noted that, as at present, only those "filled" products containing less than 6 percent nonmilk fat (or oil) would be included in Class I under the revised classification plan.

An estimated 40 percent of the marketings of eggnog-type products is in the form of imitation eggnog. Since imitation eggnog would not be a Class I product, it is concluded that eggnog similarly should be included in a lower class. This will enhance the competitive position of the product in the marketplace.

Certain handlers proposed that eggnog flavored fluid milk products be included in the same class as eggnog. This should not be adopted. The record in no way demonstrates that a Class I classification for fluid milk to which eggnog flavoring has been added is any less appropriate than for fluid milk to which chocolate or some other flavoring has been added. Returns to producers for milk disposed of in the form of a flavored fluid milk product should be the same regardless of the type of flavoring used.

With the establishment of a new intermediate price class, it is appropriate that any filled products that resemble the proposed Class II products made with milk fat likewise be included in this new class. The substitution of nonmilk fat for milk fat in a product merely changes the composition of the product and not its

use. For competitive reasons, a comparable classification of products made with milk fat and their filled counterparts is necessary.

Condensed milk or skim milk in bulk, plastic cream, frozen cream and anhydrous milk fat are "intermediate" products that also should be included in Class II. These products are not end uses in themselves but instead are used in making other products, including frozen desserts and food products such as candy and soup. Under the classification adopted herein, frozen desserts and food products are Class II uses for milk. Accordingly, producer milk used in the several intermediate products likewise should be priced at the Class II level.

A Class II classification should not apply to evaporated or condensed milk or skim milk in consumer-type containers as cooperatives proposed. Also, such classification should not apply to certain hard cheeses. Such storable products should be included in the redesignated Class III classification. A Class III classification for producer milk in these products will permit such uses to remain as a competitive outlet for milk surplus to the needs of the Class I market. Such products made from milk regulated under these orders must compete over wide areas with the same products processed from ungraded milk or other graded milk that is often priced at no more than the Minnesota-Wisconsin price. Comparable pricing should prevail under these seven orders.

In proposing a generally uniform classification plan for the seven markets, cooperatives emphasized that any new plan adopted should not result in lower total returns to producers. Handlers, on the other hand, stressed that their total cost of milk should not be increased.

Providing for classification and pricing provisions that are generally uniform among the various markets cannot necessarily encompass at the same time the maintenance of precisely the same value of producer milk in each market. With the many classification and pricing differences that now exist among these orders, resolution of these differences through a uniform classification and pricing plan would be expected to have some effect on the value of producer milk in individual markets. While the provisions adopted in this decision are not designed to change the value of producer milk in the aggregate, their effect on producer returns or handlers' costs in an individual market cannot be controlling in deciding on the matter of classification and pricing here under consideration.

4. *Miscellaneous classification and accounting changes.* The following findings and conclusions relate to certain miscellaneous classification proposals by handlers and producers and to some of the order changes that are necessary to implement the revised classification plan adopted herein for each of the seven subject orders.

(a) *Other source milk definition.* A common other source milk definition should be adopted for each order.

Because of the revised classification plan, certain changes in the present other source milk definition of each order are necessary. This definition would continue to serve, however, the present function of implementing the identification of various categories of receipts at a regulated plant.

Presently, fluid milk products (which include cream) from any source other than producers, cooperatives acting as a handler for farm bulk tank milk, pool plants, and plant inventory at the beginning of the month are considered as other source milk. Under the revised classification plan, cream no longer would be defined as a fluid milk product. To facilitate the application of other provisions of each order, however, it is desirable that fluid cream products, when in bulk form, continue to be treated in the same manner as fluid milk products for purposes of applying the other source milk definition.

Other source milk should include any receipts in packaged form of fluid cream products eggnog or yogurt (or any filled product resembling such products). These are Class II products under the revised classification plan.

This is a different accounting procedure than was proposed under the June 4 recommended decision. As proposed initially, fluid cream products received at a pool plant from any source in consumer-type packages and disposed of, or held in inventory, in the same container in which received would not have been considered as other source milk. Such products would have been treated as "pass-through" products and as such would not have been subject to the allocation and pricing provisions of the order. A somewhat similar treatment would have been accorded receipts of yogurt. Receipts of packaged eggnog (a Class I product under the initial recommendations) would have been accounted for under the other source milk provisions in the same manner as fluid milk products.

Although no handler obligation would apply under the provisions adopted herein to these receipts of packaged Class II products, it is desirable for accounting purposes that such receipts be defined as other source milk. This accounting procedure will preclude the recordkeeping difficulties that might otherwise be experienced in accounting separately for inventories and sales of Class II products processed in the handler's plant versus those received at the plant in packaged form from other plants. As provided herein, such receipts of other source milk would be allocated directly to the handler's Class II utilization, rather than being allocated to the extent possible to the handler's lowest utilization as is provided in some cases for other types of other source milk.

The orders now provide that manufactured products from any source that are reprocessed, converted into, or combined with another product in the plant shall be considered as other source milk. For accounting purposes under the order, such manufactured products should include dry curd cottage cheese received at a pool plant to which cream is added before distribution to consumers. When used to produce cottage cheese or low-fat cottage cheese, the receipts of dry curd would be allocated under the adopted provisions directly to the handler's Class II utilization. No handler obligation would apply under the order to such receipts.

The orders should provide that products manufactured in a pool plant during the month and then reprocessed, converted into, or combined with another product in the same plant during the same month not be defined as other source milk. A typical processing operation would be for a handler to make condensed skim milk from producer milk and then use the condensed product in making ice cream. It is intended under this situation that the producer milk be considered as having been used to produce ice cream. The condensing operation is merely one of the steps performed by the handler in processing ice cream from raw milk.

Other source milk should include any disappearance of manufactured milk products for which the handler fails to establish a disposition. Four of the seven orders now have a provision concerning the unaccounted for disappearance of such products. The other source milk definitions in the Chicago Regional, Paducah and Louisville-Lexington-Evansville orders do not specify such disappearance as other source milk.

It is reasonable that each handler be required to account fully for all milk and milk products received or processed at his plant. Otherwise, a handler with inadequate records may have an opportunity to gain a competitive advantage over his competitors who properly account for all milk. Specifying any unexplained disappearance of manufactured milk products as other source milk will contribute to a uniform application of the regulatory plan to all handlers.

(b) *Accounting for nonfat milk solids added to milk and milk products.*—No change should be made in the present method of classifying the skim milk equivalent of nonfat milk solids added to a fluid milk product.

Currently, each of the seven orders provides that a modified fluid milk product shall be classified as Class I in the amount of the weight of an equal volume of an unmodified product of the same nature and butterfat content. The remaining skim milk equivalent of the nonfat milk solids in such product is classified in Class II.

The principal cooperatives proposed that the amount of a modified fluid milk product that is classified as Class I be the actual weight of the modified product rather than the weight of a like unmodified product.

Proponents stated that when verification of the nonfat milk solids used to modify natural milk and skim milk involves laboratory tests of the modified product, the amount of modification is expressed as a percentage of the weight of the modified product. Where laboratory analysis is used to determine the

V 38-178 SEP 14 73 XUM

total milk solids disposed of in modified products, proponents contended that administrative procedures could be simplified by using the actual product weight factor.

There was no showing of the extent to which laboratory analysis of modified products is used in verification by market administrators in these seven markets. Also, there was no claim that any saving in administrative cost would be possible under the procedure proposed by the cooperatives in those instances where the market administrator determines the amount of solids added to modified products by using production records rather than by laboratory tests of packaged products. Accordingly, it is not clear from this record that the proposed procedure would result in any net saving in administrative cost.

Proponents did not attempt to demonstrate any economic basis for making the slightly greater charge for nonfat milk solids used to modify fluid milk products which would result from their proposal. Their proposed procedure would increase slightly the quantity of a modified product priced in Class I. A gallon of modified skim milk containing 11 percent nonfat milk solids would be classified in Class I on an 8.7 pounds weight factor as compared to the present basis of an 8.63 pounds weight factor. The larger weight factor would add about one-tenth cent (ranging from 0.09 cent under the Chicago Regional order to 0.11 cent under the St. Louis-Ozarks order) to a handler's obligation under the order per gallon of such product sold.

The present method of classifying modified fluid milk products increases total Class I sales only to the extent of the volume of the unmodified product that the added nonfat milk solids replaces. In the absence of evidence that the present procedure is inappropriate, it should be continued. The present procedure is used under Federal orders generally and, therefore, carries out the objective of uniformity in this respect.

Handlers may add nonfat milk solids to several of the proposed Class II products, such as half and half and light cream. Each order should provide in this case that the entire weight of the skim milk equivalent of the solids added be classified in Class II. This procedure would differ from that applicable to modified fluid milk products in that no part of the skim milk equivalent of the added solids would be classified in the lowest class. As described in detail later, nonfat dry milk or condensed milk that is added to a Class II product would be allocated directly to the handler's Class II use. Thus, classification of the entire skim milk equivalent in Class II would not affect adversely the handler's pool obligation under this allocation procedure.

(c) *Classification of milk transferred or diverted to other plants.* Certain changes should be made in the provisions of each order that prescribe the classification of fluid milk products that are transferred or diverted from a pool plant to another plant. Several of the changes become necessary with the adoption of three classes of utilization in place of the present two classes. Other changes are appropriate for purposes of uniformity among orders and clarity in the classification of milk.

Under the adopted classification plan, fluid cream products would be classified as Class II products. If such products are transferred to another plant in packaged form, the skim milk and butterfat contained therein should be classified as Class II milk since these items are moved in final form. The classification of fluid cream products when disposed of in bulk form, however, is determinable only by following the movement of the bulk product to its final use. Thus, it is necessary that fluid cream products that are transferred in bulk form from a pool plant to another plant be classified in a manner similar to that now used in classifying transfers of bulk fluid milk products.

Each order now prescribes a procedure for classifying transfers of bulk fluid milk products from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant. To determine such classification, the nonpool plant's utilization must be assigned to its receipts of milk from each source. Some amplification of this procedure is appropriate to set forth clearly the priority for assigning the different types of plant use to the different sources of fluid milk products and bulk fluid cream products received at the nonpool plant.

Under the proposed assignment priorities, the first step is to assign the nonpool plant's Class I utilization to its receipts of packaged fluid milk products from all federally regulated plants. Such receipts should receive first priority on the nonpool plant's Class I use since all orders provide that such packaged transfers from a pool plant to an unregulated nonpool plant shall be classified as Class I milk.

Thus, any Class I route disposition of the nonpool plant in the marketing area of a Federal order, and any transfers of packaged fluid milk products from the nonpool plant to plants fully regulated under such order, would be assigned, first, to the nonpool plant's receipts of packaged fluid milk products from plants fully regulated under such order and, second, to any such remaining packaged receipts from plants fully regulated under other Federal orders.

A similar assignment of any such remaining disposition (i.e., the aforesaid Class I route disposition and transfers of packaged fluid milk products) then would be made to the nonpool plant's receipts of bulk fluid milk products from pool plants and other order plants. Any other Class I disposition of packaged fluid milk products from the nonpool plant, such as route disposition in unregulated areas, would be assigned to any remaining unassigned receipts of packaged fluid milk products at the nonpool plant from plants fully regulated under any Federal order.

After these assignments, any Class I use at the nonpool plant that is attributable to the Class I allocation at a Federal order plant of fluid milk products transferred in bulk from the nonpool plant to the regulated plant would be assigned next. Such use would be assigned, first, to the nonpool plant's remaining unassigned receipts of fluid milk products from plants fully regulated under that order and, second, to any such remaining receipts from plants fully regulated under other orders.

Additional unassigned Class I utilization at the nonpool plant then would be assigned to the plant's receipts of Grade A milk from dairy farmers and unregulated nonpool plants that are determined to be regular sources of Grade A milk for the nonpool plant. Any remaining unassigned receipts of fluid milk products at the nonpool plant from plants fully regulated under any order would be assigned to any of the nonpool plant's remaining Class I utilization, then to its Class III utilization, and then to its Class II utilization.

Following these assignments, any receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants would be assigned to the nonpool plant's remaining unassigned utilization in each class. Such assignment would be made in sequence beginning with the lowest class.

In determining the classification of any transfers or diversions from a pool plant to a nonpool plant, the utilization of any transfers from the nonpool plant to another unregulated nonpool plant also must be established. In this case, the same assignment priorities just outlined should apply also at the second nonpool plant.

Each of the seven orders now provides that transfers of fluid milk products from a pool plant to a producer-handler shall be classified as Class I milk. The St. Louis-Ozarks order requires also that such transfers to a producer-handler under any other order likewise shall be Class I. This additional requirement should apply under each of the orders.

Under the Federal order program, producer-handlers, in their capacity as handlers, are exempt from the pricing and pooling provisions of the various orders. In consideration of this exemption, each order requires a Class I classification of all fluid milk products that are transferred from a pool plant to a producer-handler as defined under that particular order. Inasmuch as the producer-handler exemption under each order is predicated on essentially the same basis, a Class I classification of milk transferred from a pool plant regulated under one order to a producer-handler as defined under another order would be in keeping with the general basis for producer-handler exemption.

Bulk fluid cream products transferred from a pool plant to a producer-handler should be assigned to the extent possible to the latter's Class III use, and then Class II use. If the producer-handler does not have enough utilization in these classes to cover such transfers, any remaining transfers should be classified as Class I milk.

As in the case of all other fluid milk products, such transfers of cream are

now classified as Class I milk. Such classification tends to assure that producers do not carry for producer-handlers the burden of all reserve supplies for their Class I market. With the removal of cream from the Class I classification, as adopted herein, a mandatory Class I classification of cream transfers to producer-handlers would not be necessary for this purpose.

In addition to the Class I classification of all fluid milk products transferred to a producer-handler, the Chicago Regional order provides for a similar classification of all fluid milk products transferred to an "exempt distributing plant." Also, a similar classification applies under the St. Louis-Ozarks order to all fluid milk products transferred to a plant operated by a "governmental agency." Under each of these two orders, the adopted method for classifying bulk fluid cream products transferred to a producer-handler should apply likewise to transfers of bulk fluid cream products to these two other types of plants.

The classification of milk transferred or diverted from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant should not be contingent upon any distance limitation. Presently, such mileage (or area) limitations apply under the Chicago Regional, Louisville-Lexington-Evansville and St. Louis-Ozarks orders. Until recently, similar limitations applied also under the Southern Illinois and Central Illinois orders. These limitations under the latter two orders were removed by amendatory actions (35 F.R. 12267, 18107) subsequent to the classification hearing on which this decision is based.

The Chicago Regional order provides that fluid milk products transferred in bulk form from a pool plant to a nonpool plant located outside the States of Wisconsin, Minnesota, Iowa, Illinois, Indiana, Michigan, or Ohio shall be classified as Class I milk to the extent of the nonpool plant's Class I disposition, regardless of where such disposition is made. Transfers to nonpool plants located in these States, on the other hand, are classified on a basis that assigns the nonpool plant's Class I utilization to its various sources of receipts in accordance with where the plant disposes of its Class I milk.

Under the Louisville-Lexington-Evansville order, milk transferred or diverted to a nonpool plant located 250 miles or more from the nearer of Louisville, Kentucky, or Evansville, Indiana, is classified as Class I milk regardless of its use at the nonpool plant. Recognition is given under the classification provisions of such order to the nonpool plant's actual utilization in the case of milk transferred to less distant plants.

Classification provisions similar to those for the Louisville-Lexington-Evansville order are contained in the St. Louis-Ozarks order. In this case, the automatic Class I classification applies on transfers and diversions of milk to plants located more than 350 miles from St. Louis.

The conditions prompting the initial adoption of these mileage limitations no longer prevail, thereby making their continued use inappropriate. The use of mileage limitations evolved in large part from the relatively high transportation cost of milk relative to its value for manufacturing and from the administrative cost of verifying the utilization of milk transferred to plants distant from the local market. Under today's conditions of distribution, milk regularly moves greater distances as a routine matter. Moreover, Federal orders now operate throughout much of the United States. Arrangements for verifying the utilization at distant plants can be made easily through the facilities of the various market administrators' offices.

Also, the mileage limitations often are no longer consistent with the existing supply patterns. Milk is often moved considerable distances from producers' farms to distributing plants. When such milk is not needed for fluid use, it is usually diverted to manufacturing plants located close to the production area. Classifying such milk in Class I because of applicable mileage limitations is not consistent with the obvious manufacturing use of the milk. Removal of such provisions will promote uniformity in classification among the seven markets.

The orders should be uniform with respect to the conditions under which the classification provisions apply to bulk milk movements from one regulated market to another. Although each order now has the same rules for classifying such movements of milk, their application is limited under the Louisville-Lexington-Evansville and Paducah orders to only those movements in the form of interplant transfers. These two orders do not permit milk to be moved to other Federal order plants by diversion.

In connection with developing uniform classification provisions for the seven orders, provision should be made under each order for the diversion of milk to other order plants for Class II or Class III use. This will contribute to a more uniform application of the classification provisions to all regulated handlers. At the same time, such provision will foster the efficient handling of surplus milk in these markets. Since the advent of farm bulk tanks, the diversion of producer milk from pool plants to manufacturing plants has been a common method of handling milk not needed for the fluid market. The handling of surplus milk can be facilitated by permitting the disposal of such milk directly from farms to manufacturing plants in other markets, rather than having such intermarket movements limited to the more expensive method of transferring milk from one plant to another. With the safeguards adopted herein, returns to producers in the market to which the milk is diverted will not be affected by the processing of this surplus milk in their market since the diverted milk will continue to be pooled in the market from which diverted.

(d) *Classification of end-of-month inventory.* Each of the orders should be made uniform with respect to the classification of inventory on hand at the end of the month. Fluid milk products in either packaged or bulk form that are in a handler's end-of-month inventory should be classified as Class III milk. Such inventory should be subject in the following month to reclassification in a higher class. Ending inventory of fluid cream products, eggnog and yogurt, when held in bulk form, likewise should be classified in Class III and subject to reclassification. Such products held in packaged form at the end of the month should be classified as Class II milk.

Presently, five of the orders classify all ending inventories of fluid milk products (which now include most cream products) in the lowest class. Under the Southern Illinois and Central Illinois orders, on the other hand, such inventories in bulk form are classified in the lowest class, while a Class I classification applies to such inventories in packaged form. In the latter case, a handler's obligation for the Class I inventory is adjusted in the following month by whatever amount the Class I price in such month changes from the Class I price level initially applicable to the inventory. This assures that such inventory is priced on a current basis when disposed of on routes.

The principal cooperatives proposed that all seven orders classify all ending inventories of fluid milk products in Class III. They claimed that this procedure would be less complicated for handlers since handlers only occasionally would have any adjustment in their pool obligation as a result of having Class III inventories reclassified the following month in Class I. Proponents stated that with packaged inventories in Class I, as under the Central Illinois and Southern Illinois orders, each handler usually has some adjustment each month in his obligation for Class I inventories. The cooperatives' proposed classification of ending inventories was supported by handlers.

In the interest of establishing uniform classification provisions among the orders, the same procedure for classifying end-of-month inventory should be adopted for each of the orders. It was concluded in the June 4 recommended decision that the differences among these orders in classifying ending inventories of fluid milk products should be resolved in favor of the procedure now used under the Southern Illinois and Central Illinois orders (i.e., packaged inventory in Class I and bulk inventory in Class III). It is recognized, however, that either type of inventory procedure now being used in these markets results over the long run in essentially the same pool obligation for handlers and the same returns to producers. In this circumstance, the substantial support among the industry for classifying all ending inventories of fluid milk products in the lowest class, as expressed both at the hearing and in producers' and handlers' exceptions, suggests that this procedure be used under all orders.

Under this procedure, such inventories would be subject in the following month to reclassification in a higher class, as determined through the alloca-

V 38 I 178 SEP 14 73 XUM

tion of a handler's receipts to his utilization. A charge to the handler at the difference between the Class III price for the preceding month and the Class I or Class II price as applicable, for the current month would apply to any reclassified inventory. This is the same reclassification procedure that now applies under the orders to inventories of fluid milk products in bulk form.

Fluid cream products in bulk form that are on hand at the end of the month likewise should be classified in Class III. As in the case of bulk milk, the final use of cream being held in bulk form is not necessarily apparent from that form. The cream must be followed to its ultimate use, which may be in any class. Accordingly, it is reasonable to classify any closing inventory of bulk cream in Class III and then apply a reclassification charge should the cream, as beginning inventory the following month, be allocated to a higher class.

Fluid cream products, yogurt, and eggnog that are on hand in packaged form at the end of the month should be classified in Class II, the class of expected ultimate use, rather than in Class III as would be the case for ending inventories of such products in bulk form. The higher classification will accommodate the treatment adopted herein whereby such products that are received at a pool plant in packaged form and disposed of in the same packages would be permitted to "pass through" the plant without any pool obligation or down-allocation. In this connection, the ending Class II inventory, as Class II inventory on hand at the beginning of the following month, would be allocated in the following month directly to the handler's Class II utilization.

For the first month that the revised classification plan is effective, certain transitional provisions relating to inventory should apply. Such provisions are necessary to assure that all handlers under an order will be subject to the same pricing for milk used in packaged fluid milk products and fluid cream products whether such products enter into the month's accounting as beginning inventory or are made from current receipts of producer milk.

As indicated, five of the orders under consideration presently classify ending inventories of fluid milk products, including cream items, in the lowest class. Thus, in the last month that the present classification plan is effective, handlers under these orders will have paid the corresponding class price for these products. In the first month under the new plan, such inventories that had been held over in the form of a fluid milk product or a bulk fluid cream product would be allocated to the extent possible to the handler's Class III utilization. Should such inventories be allocated to a higher class, the appropriate reclassification charge would apply.

Under the new plan, beginning inventories of fluid cream products in packaged form normally would be allocated directly to a handler's Class II utilization. Such allocation assumes that the products were priced at the Class II price in the preceding month. Since this would not be the case for the first month under the new amendments, such inventories should be allocated in the first month to the extent possible to Class III, as in the case of inventories of fluid milk products and bulk fluid cream products. A reclassification charge should apply if a higher classification results.

Under the Southern Illinois and Central Illinois orders, which now classify ending inventories of packaged fluid milk products in Class I, a pool credit should apply to such inventories in the first month that the revised classification plan is effective. Under the new plan, beginning inventories of fluid milk products and, for the first month all fluid cream products would be allocated to the extent possible to Class III. Again, this allocation assumes that such inventories were priced at the lowest class price in the preceding month. Since such inventories in packaged form will have been priced at the preceding month's Class I price, handlers under these two orders should receive a credit on such packaged inventories equal to the difference between the preceding month's Class I price and lowest class price. If a higher classification results through the allocation procedure, the appropriate reclassification charge would apply.

(e) *Shrinkage allowances.* The classification of shrinkage under each order should be changed only to the extent necessary to achieve uniformity among the seven orders in the application of certain shrinkage provisions.

A cooperative association proposed that any plant losses experienced by a handler be classified as Class I milk. Currently, a handler is permitted to have a certain amount of shrinkage classified in Class II. In conjunction with the shrinkage proposal, this producer group also proposed that no exception to the Class I classification of fluid milk products disposed of on routes be made for route returns. Presently, the orders permit route returns that are disposed of for animal feed or dumped to be classified in Class II.

The cooperative proposed that in lieu of the Class II shrinkage and route return allowances a handler be given a credit on his pool obligation of 2 cents per hundredweight for all milk, skim milk, and cream handled in bulk form in his plant. To maintain the present relationship in the proration of shrinkage between the receiving and processing operations, the cooperative proposed that a handler be allowed 0.5 cent per hundredweight for receiving and 1.5 cents per hundredweight for processing, or a total of 2 cents if the handler performed both operations.

While urging that the classification provisions of the seven orders be made as uniform as possible, the principal cooperatives proposed that no change be made at this time in the shrinkage provisions of the orders.

Other than to make them uniform in several respects, no basic change should be made at this time in the shrinkage provisions of the seven orders, or in the arrangement for classifying route returns. Although there may be some merit in revising these provisions to a greater extent than is set forth herein, such changes should be based on a thorough exploration of the issue at a hearing after adequate public notice. These conditions were not met at this hearing.

Each of the orders now provides that with respect to a handler's shrinkage of milk that is received at his pool plant directly from producers, up to 2 percent of such receipts may be classified as Class II milk, the lowest utilization. Should the handler transfer some of the producer milk to another pool plant for processing, the Class II shrinkage which the handler may claim on such milk is limited to 0.5 percent of the milk.

This division of shrinkage between the receiving handler and the processing handler also applies under those orders which provide for a cooperative association to be the handler on bulk tank milk which it receives at the farm and delivers to a pool plant. If, in this case, the plant operator purchases such milk on the basis of scale weights, the maximum Class II shrinkage allowance for the plant operator is 1.5 percent of such milk. The cooperative, as the receiving handler, is the responsible handler for any difference between the farm weights and the weight at which the plant operator purchases the milk. Of this difference, up to 0.5 percent of the milk at farm weights is allowed the cooperative as Class II shrinkage. If the plant operator purchases the milk on the basis of farm weights, however, he is permitted the full 2 percent Class II shrinkage allowance.

With respect to producer milk diverted from a pool plant to a nonpool plant or, under certain of the orders, to another pool plant, either by a plant operator or by a cooperative association, the shrinkage allowances under the present orders are not consistent in all cases with the shrinkage classification outlined above. There is little, if any, reason for applying shrinkage allowances differently under the several orders under comparable handling arrangements. The shrinkage provisions of these orders should be modified to the extent necessary to make them generally uniform with respect to the same handling arrangements.

In this regard, each order should provide that in the case of milk diverted to a nonpool plant or, if permitted, to another pool plant, the diverting handler shall be allowed up to 0.5 percent Class III shrinkage on the milk if it is not purchased on the basis of farm weights by the operator of the plant where the milk is physically received. Where such diversions are to a pool plant, the operator of the plant to which the milk is diverted should be permitted in this case up to 1.5 percent Class III shrinkage. If the operator of the nonpool plant or pool plant purchases such milk on the basis of farm weights, no shrinkage allowance on the milk should be permitted the diverting handler. In the case of the operator of the pool plant where the milk is physically received,

such operator should receive the full 2 percent allowance.

(f) *Allocation of receipts to utilization.* In adopting a revised classification plan under each of the seven orders, conforming changes must be made in the provisions that prescribe how a handler's receipts from different sources shall be allocated to his utilization for the purpose of classifying producer milk. Such changes are necessary to provide for the allocation of receipts to three classes of utilization rather than two classes as at present.

In this connection, the adoption of three use classes requires a new consideration of how other source milk shall be allocated to a handler's utilization of milk. Under the present orders, other source milk is allocated in most cases to a handler's surplus uses to the extent possible, regardless of how it actually may have been used. The producers who are relied upon for a regular supply of milk for the local fluid market thus receive the highest possible classification of their milk. Depending on the supply conditions, milk from unregulated supply plants and other Federal order plants is permitted to share in varying degrees with local producer milk in the higher value of the handler's Class I sales.

In conjunction with the revised classification plan, however, handlers using certain types of other source milk (whether in the form received or in reconstituted form) in the processing of Class II products should be permitted to have such other source milk allocated directly to their Class II uses. Under the plan adopted herein, such other source milk to which direct allocation could apply would be limited to milk products that are not fluid milk products or fluid cream products (such as nonfat dry milk and condensed milk or skim milk).

The national associations of fluid milk and ice cream processors proposed that if a three-class system is adopted handlers should have the option of having other source milk allocated to their Class II utilization rather than allocated to the extent possible to the lowest class. It was their position that the Class II price for producer milk should not be set at a level that is any higher than the cost to handlers of obtaining alternative supplies of milk or milk products for Class II use. These groups contended that with such pricing there is no justification for "down-allocating" to Class III any receipts of other source milk which actually may have been used in Class II.

Handlers indicated further that with optional allocation a handler could choose to use other source milk without the cost impact of down-allocation should the cost of such milk become less than the cost of producer milk for Class II use. Also, these groups stated that down-allocation of other source milk would imply an intent to provide undue protection of the Class II market for producers. They maintained that such protection is not justified, or apparently intended by producers in view of no producer proposal for a compensatory payment on other source milk used in Class II.

The principal cooperative associations, on the other hand urged in connection with their proposal for three classes that producers have first claim on a handler's Class II use as well as on his Class I use. It was their contention that producer milk not used in Class I should receive the next highest possible classification since the milk was produced for the Class I market and represents the reserve supply for this segment of the dairy industry.

In establishing a new intermediate price class, it is not intended that this outlet for producer milk necessarily be reserved for local producers. This new use class merely recognizes that some additional value attaches to producer milk used by regulated handlers in the Class II products. Pricing this milk at a level above the Class III price serves also to reduce the burden on the Class I price of attracting a supply of producer milk for the Class I market. It is not intended that producer returns be enhanced for the purpose of also attracting a full supply of producer milk for handlers' Class II uses. Accordingly, no obligation to the pool (commonly known as a compensatory payment) would be imposed under the revised classification plan on any other source milk which regulated handlers may use in Class II or on any Class II products that may be distributed in the market by nonpool plants, either directly on routes or through pool plants.

As long as the Class II price for producer milk remains in proper relationship with the cost of alternative supplies, it is not expected that this direct allocation of nonfluid other source milk to Class II will induce handlers to use other source milk in preference to producer milk to any greater extent than presently for processing Class II products. Under the adopted Class II price, producers would represent in most circumstances the most economical source of milk for Class II use.

No provision should be made for the direct allocation to a handler's Class II utilization of other source milk received in fluid form. Unlike the handling of nonfat dry milk, it would not be unusual for a handler to commingle in his plant any receipts of fluid other source milk with his receipts of producer milk. In this circumstance, it would not be possible to know just how much of the other source milk may have been used in the processing of a Class II product. The difficulty which a handler would have in demonstrating that he actually used fluid other source milk in a Class II product, and the administrative difficulty in verifying such claimed use, warrants the allocation of such milk in essentially the same manner as now provided by the orders.

In this connection, it should be noted that under the revised classification plan each order would provide for the specific allocation to a handler's Class II and Class III utilization of any receipts of bulk fluid milk products from an other order plant or an unregulated supply plant for which the handler requests a Class II or Class III classification. Such receipts would be allocated to the extent possible first to the handler's Class III utilization and then to his Class II utilization. This would be the case even if a Class II classification were requested by the handler.

In keeping with the goal of classifying milk uniformly under the seven orders, certain changes should be made in the orders to effect a uniform application of the allocation provisions to multiple-plant handlers. Presently, the seven orders differ as to how the allocation procedure shall be carried out for handlers who operate two or more pool plants regulated under the same order.

Each order should provide that for purposes of allocating a multiple-plant handler's receipts to his utilization, the operations at each of his pool plants shall be considered separately. As is the case now, however, those receipts of other source milk from unregulated supply plants and other Federal order plants eligible to share with producer milk in a handler's Class I utilization should be allocated on the basis of the handler's total plant system.

This application of the allocation provisions to a multiple-plant handler is now used under the Indiana and Louisville-Lexington-Evansville orders. The St. Louis-Ozarks, Central Illinois, and Southern Illinois orders also provide that allocation shall be on an individual plant basis. The three orders provide, however, that if there are receipts of other source milk at any one of the plants that are to be prorated with producer milk to the plant's Class I utilization, all allocations of the handler's receipts to utilization shall be done on the basis of his total system. The Chicago Regional order provides for system allocation unless a handler requests that allocation be on an individual plant basis and he has no other source milk to be allocated pro rata with producer milk. The Paducah order requires that allocation be on a system basis in all cases.

Conditions in the individual markets do not require continuance of the several allocation methods now provided in the orders under consideration. Handlers are often subject at different times to the regulatory provisions of different orders. Applying the allocation provisions uniformly among all orders will reduce unnecessary regulatory differences being experienced by these handlers.

There would be little, if any, difference in a handler's total obligation under the order, or in producer returns, from allocating receipts on either an individual-plant basis or a system basis. The latter procedure was proposed in the June 4 recommended decision. Such procedure required, however, rather extensive modification of the location adjustment provisions of these orders. With system allocation, it was considered necessary that rules for determining the quantity of producer milk eligible for Class I location adjustment be explicitly stated in each order. Such extensive changes can be avoided, however, with the use of individual-plant allocation, as adopted herein.

V 38 178 SEP 14 73 XUM

All the orders now provide that certain receipts of milk from unregulated supply plants and other Federal order plants shall share in varying degrees with local producer milk in the receiving handler's Class I utilization at all of his pool plants combined. This procedure, which resulted from the 1964 "compensatory payment" decisions, should be continued. To implement this procedure in those orders being changed from system allocation to individual-plant allocation, several additional allocation steps must be provided in such orders. These involve essentially the same computations now required under the Indiana and Louisville-Lexington-Evansville orders that use individual-plant allocation. Such provisions are revised, however, to incorporate three classes of utilization rather than two classes.

The additional allocation steps establish a procedure whereby the milk from unregulated supply plants and other order plants will continue to be classified on the basis of the handler's total system, but will be assigned to classes at the pool plant of actual receipt. Under this procedure, the situation may arise where there is not enough utilization in a specific class at the plant of actual receipt to which such other source milk must be assigned (as determined from receipts and utilization of his entire system). In this case, an accounting technique is used for increasing the utilization in such class at the plant of actual receipt and making a corresponding reduction in the same class at one or more of his other pool plants in his system. This technique does not result, however, in changing the amount of milk to be accounted for at each plant, or the classification of milk within the handler's entire system.

(g) *Obligations relative to other source milk.* As indicated earlier in this decision, it is proposed herein that each of the orders be clarified with respect to the classification of milk that is transferred or diverted from a pool plant to a nonpool plant not regulated under any order, particularly when the nonpool plant also has receipts of milk from plants regulated under other Federal orders. In conjunction with these changes, other revisions should be made to assure that handlers are not assessed a "double charge" on Class I other source milk from such nonpool plants for which a Class I charge already has been assessed under some Federal order. Under the present orders, such a charge could result in the following manner.

Producer milk could be transferred in bulk from a pool plant under the Indiana order to an unregulated nonpool plant and be assigned to the nonpool plant's Class I utilization. In determining his pool obligation, the pool plant operator would be charged for this Class I utilization of milk at the Class I price.

During the same month, bulk milk could be transferred from the nonpool plant to a pool plant under the Southern Illinois order and be allocated to such pool plant's Class I utilization. In this case, the operator of the pool plant would be charged under the Southern Illinois order the difference between the order's Class I price and weighted average price for this receipt of "other source" Class I milk.

Thus, to the extent of the Class I milk that was moved to the nonpool plant from the Indiana market as Class I milk, the Class I other source milk received at the Southern Illinois pool plant from the nonpool plant is, in effect, priced twice as Class I milk under the Federal order system.

More and more, plants are tending to specialize in the processing of certain products, or in the packaging of products in particular types of containers. It is not uncommon for milk to be transferred from a pool plant to an unregulated nonpool plant for special processing and the finished products to be moved back into the regulated market. When the milk is initially priced at the Class I price, the market price structure is in no way undermined if this milk, or its equivalent, is disposed of by the nonpool plant in the regulated market.

The orders therefore should provide that the operator of the Southern Illinois plant, in this example, will have no obligation to the pool on such other source Class I milk. This is achieved through a revision of the allocation provisions and the procedure for computing the pool obligation of a pool plant operator. Receipts of packaged fluid milk products at a pool plant from an unregulated supply plant would be allocated to the pool plant's Class I utilization to the extent that an equivalent amount of skim milk or butterfat disposed of to the unregulated plant by handlers fully regulated under any Federal order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order. This allocation would be made prior to any other allocation of receipts to the plant's Class I utilization, and no order obligation would apply to the milk so allocated to Class I. In the case of fluid milk products received from an unregulated supply plant in bulk form, the provisions setting forth a handler's pool obligation would specify that no payment would apply to any of such milk allocated to Class I if, as just described for packaged milk, an equivalent amount of milk received at the unregulated plant had been priced as Class I milk under some order.

In this same connection, the provisions in each order prescribing the obligation of a partially regulated distributing plant should be changed. When such plant's obligation is computed as though it were a pool plant, proper recognition must be given to any transfers from the plant to a regulated plant that are considered to already have been priced as Class I milk under some Federal order. Also, in computing such plant's pool obligation on route sales in a Federal order marketing area, recognition should be given to any receipt of milk at such plant from another unregulated plant if an equivalent amount of milk received at the latter plant already has been priced as Class I milk under an order.

Each order now imposes a handler assessment for administering the order on all other source Class I milk except that received in fluid form from an other order plant. This may include milk that already has been priced as Class I milk under some Federal order as described above. With the removal of a "double" Class I charge on such milk, each order should be changed to likewise remove any assessment on such milk for administrative expenses. It is presumed that such milk was subject to a similar charge under the order that initially priced the milk.

The orders should be changed also with respect to the application of location adjustments to other source Class I milk. As just described, each of the orders provides that a pool plant operator's obligation to the producer-settlement fund shall include a payment for fluid milk products received from an unregulated supply plant if they are allocated to Class I. The handler's payment is determined by charging him at the Class I price for the Class I other source milk and giving him a credit on the milk at the weighted average price (uniform price in the case of the Chicago Regional order). Both the Class I and weighted average prices are adjusted for the location of the unregulated supply plant. The adjustment of the weighted average price, though, is so limited as to be not less than the lowest class price. No such limitation is applied currently to the Class I price adjustment.

In his testimony on how to implement certain classification proposals, a witness for a cooperative association indicated that such a limitation on the Class I price adjustment should be provided. Although the producers' proposals are not being implemented in the manner envisioned by this witness, the problem raised concerning the applicable location adjustment nevertheless should be dealt with.

Providing that any adjusted Class I price applicable to other source milk be not less than the Class III price is appropriate under each order. Otherwise, under certain conditions a handler could receive payment from the producer-settlement fund on Class I milk obtained from an unregulated supply plant. Such payment could result when the location differential for the distant plant is greater than the difference between the Class I and Class III prices. In this circumstance, producers under the order, in effect, would be providing the handler with a credit that reduces his cost for the distant milk below its value for manufacturing use at the point of purchase. From the standpoint of marketing efficiency, the handler should not be provided an incentive, which would be at the expense of local producers, to import such distant milk into the local market. It is unreasonable to expect that such a handler credit should apply on the other source milk.

A similar situation now exists with respect to the obligation of the operator of a partially regulated distributing

plant or an other order plant. In certain cases, the handler's obligation includes a payment to the producer-settlement fund at the difference between the Class I price applicable at his plant and either the weighted average price or the Class III price. For the same reasons, each order should provide, in computing the obligation of such a handler also, that the Class I price, as adjusted for location, shall not be less than the Class III price.

(h) *Reports.* The proposed changes in the classification of milk are not expected to require any major change in the amount of information to be submitted by handlers in their monthly reports of receipts and utilization. The reporting provisions of each order must be changed, however, to reflect the new categories of information that each market administrator will need in administering an order. These changes stem largely from the proposed reclassification of cream and the revised accounting methods necessary for implementing a three-class classification scheme.

In revising the reporting provisions of each order, such provisions should be made uniform to the extent possible. Essentially the same information is now required to be reported under each order, basically for the purposes of determining the classification of the milk and its classified value. There is considerable variation among these orders, however, in the manner in which the provisions on reports are expressed.

As proposed herein, the reporting provisions would be stated in some orders in slightly less detail than is now the case. The market administrator would have, nevertheless, no less authority than at present to obtain through handler reports, in the detail and on forms prescribed by the market administrator, any information the latter believes is necessary for administration of the order.

5. *Changing the butterfat differentials.* A single butterfat differential should apply under each of the seven orders for adjusting prices to the actual butterfat content of the milk being priced. This differential should be the Chicago butter price multiplied by 0.115, rounded to the nearest one-tenth cent.

Presently, the Class I butterfat differential under these orders is the Chicago butter price for the preceding month multiplied by 0.120. The Class II butterfat differential is the Chicago butter price for the current month times the factor listed for the respective market: Chicago Regional and Louisville-Lexington-Evansville, 0.120; Central Illinois, Southern Illinois, and St. Louis-Ozarks, 0.115; Indiana, 0.113; and Paducah, 0.115 during the months of August–March and 0.110 during the months of April–July.

The "butter price" used to compute the butterfat differentials for Class I and Class II milk is the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk creamery butter at Chicago as reported during the month by the U.S. Department of Agriculture. This butter price would continue to be used under the revised orders.

The butterfat differential applicable to the uniform price to producers under each of the seven orders except Paducah is derived from the weighted average of the values of Class I and Class II butterfat. It is computed each month by multiplying the total pounds of butterfat in the producer milk allocated to each class by the respective butterfat differential for each class, dividing the sum of such values by the total pounds of butterfat in producer milk, and rounding the result to the nearest one-tenth cent. The butterfat differential to producers under the Paducah order is determined from a fixed schedule of rates in the order which are related to the Chicago butter price, i.e., for each 5-cent change in the butter price, the butterfat differential changes one-half cent per point of butterfat.

The principal cooperative associations proposed that all class and uniform prices be subject to adjustment by a single butterfat differential based upon the Chicago butter price times a factor of 0.115. Handler opposition to the proposal was limited largely to the proposed decrease in the Class I butterfat differential that would result.

Lowering the Class I butterfat differential factor from 0.120 to 0.115 will accommodate producers' request for a readjustment of the values of skim milk and butterfat in Class I milk at a time of declining use of butterfat in fluid milk products. In 1960, the average butterfat test of fluid milk products (including cream items) in 63 Federal order markets was 3.76 percent. In 1969, the average butterfat test for such products in 60 markets was 3.32 percent. Comparable data for the seven subject markets as they are presently constituted are not available. On the basis of information compiled for such of the area now regulated by the seven orders, however, there is every indication that the use of butterfat in Class I in each of the seven market is following the national trend.[4]

It is estimated that under the adopted classification plan the average butterfat test of Class I products in the seven markets would have ranged from 2.7 percent to 3.2 percent in 1969. On this basis, the effect of changing the Class I butterfat differential factor from 0.120 to 0.115 would be to increase the average Class I price at test by less than 3 cents per hundredweight. The effect upon the average handler's cost for skim milk would be an increase of 10.5 cents per hundredweight.

Using a single factor of 0.115 for computing the Class II and Class III butterfat differentials will result in a uniform adjustment of class prices of butterfat content among the markets under consideration. Continuation of the several butterfat differential factors now in use would offset to some extent the benefits to be gained through the adoption of a uniform classification plan and identical Class II and Class III prices for the seven orders. For example, if skim milk used to produce cottage cheese is to be priced uniformly among these markets, the same butterfat differential must apply under each order to such skim milk.

As indicated, the butterfat differential to producers under six of the orders reflects the weighted value of butterfat in the class uses. Inasmuch as producers favor this method of reflecting skim milk and butterfat values in their pay prices, this pricing arrangement should be extended to the Paducah order. Since the same butterfat differential would be used in adjusting each of the class prices, there is no actual need, of course, for any provision in the order for weighting the values of butterfat in the three classes in determining the producer butterfat differential.

With the use of a single butterfat differential for adjusting all prices under the order, it is necessary that each order provide only for a producer butterfat differential. Although handler butterfat differentials were provided in the June 4 recommended decision, no such differentials need be set forth as such in the order, nor is there any need for pooling butterfat values in each class. All producer differential butterfat would be priced to all handlers at the same level regardless of the class in which used. The proposed revised orders attached hereto have been drafted accordingly.

Under the new pricing arrangement, the single butterfat differential for the current month should be based upon butter prices for such month and should be announced by the fifth day of the following month. This represents a change only for the pricing of Class I milk. The Class I butterfat differentials are now based on butter prices prevailing during the preceding month and are announced by the fifth day of the current month. With the use of a single butterfat differential factor in adjusting all milk prices, as adopted herein, there appears to be no need for announcing more than one butterfat differential, or for doing so before the end of the month in which it applies. The average butter price changes very little from month to month, and changes that do occur result in relatively limited changes in the butterfat differential. Each change in the price of butter is readily seen by following the daily quotations for butter. In the absence of regulation, such information would be the best available for determining trends in butter prices and should be adequate for this purpose under regulation.

It is recognized that the basic formula price of these seven orders is determined by adjusting the average Minnesota-Wisconsin price at test to a 3.5 percent butterfat basis by using a factor of 0.120 times the average Chicago butter price. The appropriateness of such factor for this purpose was not considered at the hearing and no consideration is given in this decision to changing this factor for such purpose. Moreover, since this method of determining the basic formula price

[4] Official notice is taken of the annual summaries for 1960 and 1969 of Federal Milk Order Market Statistics which were issued by the Dairy Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D.C.

V 38-178
SEP 14 73
XUM

is now used under all Federal milk orders throughout the country, it would appear that any change in this butterfat differential factor should be considered simultaneously in all orders.

6. *Advance announcement of prices for surplus milk.* The proposals by handlers to announce order prices for surplus milk at the beginning of the month rather than at the end of the month in which the prices apply, or to use bracketed pricing, should not be adopted.

Under the present two-class orders, the Class II price is announced by either the fifth or the sixth day of each month. This price applies to producer milk delivered to handlers during the preceding month. The present Class II prices are based on prices paid to farmers in Minnesota and Wisconsin for manufacturing grade milk. The average Minnesota-Wisconsin price for a particular month is announced by the Department shortly after the end of such month. The current procedure for announcing the Class II price after the end of the month thus permits such price to reflect the corresponding manufacturing milk pay prices for the same month.

The national associations of fluid milk and ice cream processors proposed that the class prices to be applicable in a particular month to surplus milk be announced at least by the fifth day of such month, and preferably before the beginning of the month. Such prices necessarily would reflect the prices paid for manufacturing grade milk in the preceding month.

Another group of handlers proposed that the Class II price for the current month be based on the Class III price for the preceding month. The group indicated, though, that if the Class II price is based instead on the current basic formula price the Class II price should increase or decrease only in 12-cent increments.

Handlers maintained that under the present announcement procedure they are often disadvantaged by not knowing the cost of producer milk for manufacturing use until after the end of the month in which the milk is processed. They claimed that when there is a significant increase in the order price the delayed notice of the increase prevents them from making corresponding adjustments in their resale prices on a timely basis.

The proposal as it concerned the announcement of the price for the proposed Class III classification was opposed by the principal cooperatives. They claimed that for handlers manufacturing the principal surplus products the Class III price should correspond as closely as possible with the prices being paid for manufacturing grade milk in the same month.

For the regulated handler processing producer milk into butter, nonfat dry milk and cheddar cheese, advance announcement of the applicable class price could place him at a competitive disadvantage on his sales of these manufactured products. The pay prices for manufacturing grade milk in Minnesota and Wisconsin are closely related to the market values of cheddar cheese, nonfat dry milk and butter, the principal uses for such milk. These product prices are established on a regular basis in a market that is national in scope. The manufacturers of ungraded milk are fully aware of the movements of these product prices and adjust their pay prices for milk in response to changes in the prices for the finished products. Regulated handlers who are processing these particular products must compete in the same national market in which the processors of manufacturing grade milk are competing.

Substantial quantities of milk are disposed of by regulated handlers in the seven markets in the form of butter, nonfat dry milk and cheese. In 1969, over 2 billion pounds of milk, or 57 percent of the total Class II use, were so disposed of by handlers in the Chicago Regional market. Southern Illinois handlers used 56 percent, or nearly 236 million pounds, of that market's total Class II milk that year in manufacturing these products. Although lesser quantities of milk were used in such products in the other five markets, such uses still represented 25 percent or more of the total Class II use for each market. Thus, handlers in the seven markets have a very definite interest in the relationship of the applicable class price with prices being paid currently for manufacturing grade milk.

Accordingly, the prices paid by regulated handlers for Class III milk should correspond very closely with the pay prices for manufacturing grade milk if these handlers are to be competitive in the sale of the principal surplus products. Basing the Class III price for a particular month on the prices paid for manufacturing grade milk in the preceding month would not result in the price coordination necessary for those regulated handlers heavily engaged in the production of cheddar cheese, nonfat dry milk or butter.

The same considerations are involved in the case of an advance announcement of prices for milk used in the proposed Class II products, or in the case of bracketed pricing for such milk. The influence of the manufacturing milk price level on the competitive relationship of producer milk for Class II uses is similar to that for producer milk used in the proposed Class III products. Therefore, the prices for Class II milk should be announced on the same basis as the prices for Class III milk.

### Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

A handler presented a motion at the hearing that proposals for establishing a new intermediate price class (Class II) be rejected and denied. The motion was presented for inclusion in the hearing record; a ruling by the presiding officer was not requested.

The motion, as restated in the handler's brief is as follows: "That the proposals for such intermediate classification should be rejected and denied, for the reasons that said proposals and the related Order provisions proposed would result in discriminatory regulation, capricious regulation, arbitrary regulation, special legislation and class legislation; would constitute the practice of classification among parties and the selection of regulated parties on an unnatural and unreasonable basis; and would, therefore, be unlawful if adopted."

The statutory authority for Federal milk orders specifies that an order shall classify milk purchased by regulated handlers from producers or associations of producers in accordance with the form in which or the purpose for which the milk is used. Such authority does not limit the number of use classes that may be established. The evidence of this record supports the adoption of three classes of utilization for producer milk under the seven subject orders.

As previously found, producers would represent in most circumstances the most economical source of milk for use in the intermediate-priced (Class II) milk uses. Nevertheless, handlers would not be precluded under the terms of each order from obtaining from alternative sources nonfluid other source milk for Class II use. As adopted herein, such alternative supplies could be allocated directly to such uses and no pool obligation would apply to such other source milk.

Under these circumstances, there is no basis for rejecting and denying the proposal by producers for three classes of utilization. The motion to do so is denied.

### General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum

prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

### Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreements are not included in this decision because the regulatory provisions thereof would be the same as those contained in the orders, as hereby proposed to be amended. The following order amending the orders, as amended, regulating the handling of milk in the aforesaid marketing areas is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

Payments for Milk

1030.70 Producer-settlement fund.
1030.71 Payments to the producer-settlement fund.
1030.72 Payments from the producer-settlement fund.
1030.73 Payments to producers and to cooperative associations.
1030.74 Butterfat differential.
1030.75 Plant location adjustments for producers and on nonpool milk.
1030.76 Payments by handler operating a partially regulated distributing plant.
1030.77 Adjustment of accounts.

Administrative Assessment and Marketing Service Deduction

1030.85 Assessment for order administration.
1030.86 Deduction for marketing services.

Advertising and Promotion Program

1030.122 Liquidation.

Authority: The provisions of this Part 1030 issued under secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

### General Provisions

**§ 1030.1 General provisions.**

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

### Definitions

**§ 1030.2 Chicago Regional marketing area.**

"Chicago Regional marketing area," hereinafter called the "marketing area," means the territory within the boundaries of the following places, including piers, docks, and wharves and territory wholly or partly within such boundaries occupied by government (municipal, State, or Federal) reservations, installations, institutions or other similar establishments:

(a) In the State of Illinois:

(1) The counties of:

| | |
|---|---|
| Boone. | Kendall. |
| Carroll. | Lake. |
| Cook. | Lee. |
| De Kalb. | McHenry. |
| Du Page. | Ogle. |
| Jo Daviess (except the city of East Dubuque). | Stephenson. |
| Kane. | Will. |
| | Winnebago. |

(2) In Whiteside County:

(i) The townships of:

| | |
|---|---|
| Caloma. | Jordan. |
| Hahnaman. | Montmorency. |
| Hopkins. | Sterling. |
| Hume. | Tampico. |

(b) In the State of Wisconsin:

(1) The counties of:

| | |
|---|---|
| Adams. | Menominee. |
| Brown. | Milwaukee. |
| Calumet. | Monroe. |
| Columbia. | Oconto. |
| Crawford. | Oneida. |
| Dane. | Outagamie. |
| Dodge. | Ozaukee. |
| Fond du Lac. | Portage. |
| Forest. | Racine. |
| Grant. | Richland. |
| Green. | Rock. |
| Green Lake. | Sauk. |
| Iowa. | Shawano. |
| Jefferson. | Sheboygan. |
| Juneau. | Vernon. |
| Kenosha. | Vilas. |
| Kewaunee. | Walworth. |
| La Crosse. | Washington. |
| Lafayette. | Waukesha. |
| Langlade. | Waupaca. |
| Lincoln. | Waushara. |
| Manitowoc. | Winnebago. |
| Marquette. | |

(2) In Door County the city of Sturgeon Bay;

(3) In Marathon County:

(i) The towns of:

| | |
|---|---|
| Bergen. | Marathon. |
| Berlin. | Mosinee. |
| Bevent. | Norrie. |
| Easton. | Plover. |
| Elderon. | Reid. |
| Franzen. | Rib Mountain. |
| Guenther. | Ringle. |
| Harrison. | Stettin. |
| Hewitt. | Texas. |
| Knowlton. | Wausau. |
| Kronenwetter. | Weston. |
| Maine. | |

(ii) The vilages of:

| | |
|---|---|
| Brokaw. | Marathon. |

**§ 1030.3 Route disposition.**

"Route disposition" means a delivery (including disposition from a retail plant store) of any fluid milk product classified as Class I milk to a retail or wholesale outlet other than a milk plant. Disposition of a plant through a vendor or through a distribution point shall be considered a route delivery at the location of the wholesale or retail outlet to which delivery is made.

**§ 1030.4 Plant.**

"Plant" means a building together with its facilities and equipment, whether owned or operated by one or more per-

V 38 I 178 SEP 14 73 XUM

sons constituting a single operating unit or establishment: (a) that has facilities adequate for cleansing tank trucks, is approved by an appropriate health authority, and at which milk moved from the farm is transferred and commingled in another tank truck with other milk and is transshipped in such other tank truck to another plant, (b) at which milk is received from dairy farmers, or (c) at which milk is processed and packaged or manufactured. If a portion of the building is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition and is physically separated from the approved portion, such unapproved portion shall not be considered as meeting the terms of this definition.

**§ 1030.5 Distributing plant.**

"Distributing plant" means a plant from which there is route disposition in the marketing area, either directly or through another plant, of a Grade A fluid milk product that is processed or packaged in such plant during the month.

**§ 1030.6 Supply plant.**

"Supply plant" means a plant from which a Grade A fluid milk product is shipped or transshipped during the month to another plant. Such supply plant shall be equipped with storage capacity sufficient to hold the largest quantity of fluid milk product either received in the plant or shipped from the plant as a single load during the month, except that no storage capacity shall be maintained in a plant described in § 1030.4(a). Any plant located on the premises of a pool distributing plant pursuant to § 1030.7(a) shall not be considered a supply plant unless it is located in a building that is entirely separate from the distributing plant.

**§ 1030.7 Pool plant.**

Except as provided in paragraph (d) of this section, "pool plant" means a plant pursuant to § 1030.4 that is specified in paragraph (a), (b), or (c) of this section. In determining the pool plant qualifications of plants pursuant to this section on milk subject to the conditions specified in § 1030.9(h), the receipts and disposition of the plant operated by the transferor-handler shall exclude the milk described in § 1030.9(h)(3) but shall include the milk described in §1030.9(h)(4).

(a) A distributing plant from which there is disposed of during the month not less than the percentages set forth in paragraph (a) (2) and (3) of this section of the receipts specified in paragraph (a)(1) of this section. Two or more distributing plants of a handler shall be considered a unit for the purpose of paragraph (a)(3) of this section in any month if the handler operating such plants has filed a written request with the market administrator prior to such month requesting that they be considered a unit.

(1) The total Grade A fluid milk products, except filled milk, received during the month at such plant, including producer milk diverted under § 1030.13, and milk received from a handler pursuant to § 1030.9(h), but excluding receipts of fluid milk products in exempt milk, packaged fluid milk products and bulk fluid milk products by agreement for Class II and Class III uses from other pool distributing plants, and receipts from other order plants and unregulated supply plants which are assigned pursuant to § 1030.44 (a)(8)(1)(*a*) and (ii) and the corresponding step of § 1030.44(b).

(2) Not less than 10 percent of such receipts is disposed of from such plant in the marketing area in the form of packaged fluid milk products, except filled milk, either as route disposition or moved to other plants from which it is disposed of in the marketing area as route disposition. Such disposition is to be exclusive of receipts of packaged fluid milk products from other pool distributing plants.

(3) Not less than 45 percent in each of the months of September, October, November, and December and 35 percent in each of the months of January, February, March, and August, and 30 percent in all other months of such receipts is disposed of in the form of packaged fluid milk products, except filled milk, either as route disposition or moved to other plants. Such disposition is to be exclusive of receipts of packaged fluid milk products from other pool distributing plants.

(b) A supply plant from which the quantity of fluid milk products (except filled milk) and condensed skim milk shipped or transshipped during the month in accordance with paragraph (b) (1) and (2) of this section is not less than the percentages specified in paragraph (b)(4) of this section subject to paragraph (b) (5), (6), (7), and (8) of this section of the volume of Grade A milk received from dairy farmers and handlers described in § 1030.9(c), including producer milk diverted under § 1030.13. Such receipts shall be reduced by the disposition of packaged fluid milk products described in paragraph (b)(3) of this section.

(1) Shipped or transshipped as fluid milk products to and physically unloaded into:

(i) Pool plants pursuant to paragraph (a) of this section to the extent of the quantity determined pursuant to paragraph (b)(5) of this section;

(ii) Plants of producer-handlers; and

(iii) Partially regulated distributing plants and assigned to Class I milk disposed of in the marketing area from such plants pursuant to § 1030.42(d)(2)(ii) (*a*) and (c).

(2) Moved as condensed skim milk to pool plants pursuant to paragraph (a) of this section to the extent it is used in a fluid milk product that is disposed of as a fluid milk product (except filled milk). Such use of condensed skim milk shall be prorated over receipts of condensed skim milk from all supply plants.

(3) The receipts of Grade A milk required to be included pursuant to this paragraph shall be reduced by the amount of packaged fluid milk products (except filled milk) that are disposed of from such plant as route disposition or moved to a nonpool plant from which they are disposed of as route disposition outside the marketing area.

(4) Such percentage shall be not less than 40 for each of the months of September, October, and November, and 30 for all other months, except that a plant that was a pool plant pursuant to this paragraph during each of the months of August through December, the percentage shall be not less than 20 for each of the following months of January, February, and March. A plant meeting such requirements for August through March shall be a pool plant for each of the following months of April through July, unless:

(i) The milk received at the plant does not continue to meet the Grade A milk requirements for use in fluid milk products distributed in the marketing area; or

(ii) Written application is filed with the market administrator by the plant operator on or before the first day of any such month (April–July) requesting the plant be designated a nonpool plant for such month and any subsequent month through July, provided it does not otherwise qualify as a pool plant.

(5) For the purpose of determining the percentages specified in paragraph (b) (4) and (7) of this section, the quantity of fluid milk products moved from a supply plant pursuant to paragraph (b)(1)(i) of this section shall be a net quantity assignable at pool distributing plants computed by subtracting from the quantity of fluid milk products received from a supply plant(s), but not to exceed such quantity, the amounts described in paragraph (b)(5) (i) and (ii) of this section (if fluid milk products are received from more than one supply plant, such net quantity assignable shall be prorated among supply plants in accordance with the total receipts from such plants).

(i) The quantity of fluid milk products in the form of bulk milk and skim milk transferred from the pool distributing plant to pool supply plants plus any such bulk shipments to nonpool plants as Class II milk, other than:

(*a*) Transfers classified pursuant to § 1030.40(b)(3); and

(*b*) Transfers on any Saturday or on New Year's Day, Memorial Day, July 4, Labor Day, Thanksgiving, or Christmas, that no milk is received at the pool distributing plant from a supply plant, in an amount not in excess of 120 percent of the average daily receipts of producer milk pursuant to § 1030.13(a) at the plant during the prior month, less the quantity of producer milk diverted pursuant to § 1030.13(e) on such day. If no producer milk was received in the distributing plant during the prior month, the average daily receipts during the current month shall be used in lieu of the prior month for computing the transfers to be excepted by this subdivision; and

(ii) If milk is diverted from the pool distributing plant on the date of the receipt from the supply plant, the quantity so diverted, except any diversion of milk (not to exceed 3 days' production of any individual producer) made because of an emergency situation such as a breakdown of trucking equipment or hazardous road conditions shall not be subtracted if such emergency is reported to the market administrator.

(6) The percentages specified in paragraph (b)(4) and/or in paragraph (b)(7)(iii) of this section applicable during the months August-March shall be increased or decreased by up to 10 percentage points by the Director of the Dairy Division if he finds such revision is necessary to obtain needed shipments or to prevent uneconomic shipments except that the percentages specified in paragraph (b)(7)(iii) of this section shall not exceed 50 percent of those specified in paragraph (b)(4) of this section. Before making such a finding the Director shall investigate the need for revision either on his own initiative or at the request of interested persons and if his investigation shows that a revision might be appropriate he shall issue a notice stating that revision is being considered and inviting data, views, and arguments with respect to the proposed revision: *Provided*, That if a plant which would not otherwise qualify as a pool plant during the month pursuant to paragraph (b)(4) or (7)(iii) of this section would qualify as a pool plant as a result of this subparagraph, such plant shall be a nonpool plant for such month upon filing by the operator of such plant a written request for nonpool status with the market administrator.

(7) Two or more plants shall be considered a unit for the purpose of this paragraph if the following conditions are met:

(i) The plants included in a unit are owned or fully leased and operated by the handler establishing the unit and such plants shall have been pool plants the month prior to being included in a unit. In the case of plants operated by cooperative associations two or more cooperative associations may establish a unit of designated plants by filing with the market administrator a written contractual agreement obligating each plant of the unit to ship milk as directed by such cooperatives;

(ii) The handler or cooperatives establishing a unit notify the market administrator in writing of the plants to be included therein prior to August 1 of each year and no additional plants shall be added to the unit prior to August 1 of the following year;

(iii) Each plant in a unit ships or transships to plants specified in paragraph (b)(1) of this section the following percentages of its producer milk: 20 in each of the months of September, October, and November; 15 in each of the months of August and December; and 10 in each of the months of January, February, and March. If for any month a plant does not meet the individual plant shipping percentage, that plant shall be excluded from the unit; and

(iv) The notification pursuant to paragraph (b)(7)(ii) of this section shall list the plants in the order in which they shall be excluded from the unit if the minimum shipping requirements are not met, such exclusion to be in sequence beginning with the first plant on the list and continuing until the remaining plants as a unit have met the minimum requirements.

(8) If a handler notifies the market administrator in writing that a plant is unable to meet the requirements set forth herein because of a work stoppage due to a labor dispute between employer and employees, the market administrator, upon verification of the handler's claim, shall not include the receipts and utilization of skim milk and butterfat at such plant for those days from the date of notification through the last day of the work stoppage in determining the percentage of skim milk and butterfat shipped pursuant to this paragraph. When the work stoppage includes an entire month, the plant shall be considered to have met the minimum percentage shipping requirements in that month for pool plant status pursuant to this paragraph, but such relief shall not be granted for more than 2 consecutive months.

(c) A plant which is operated by a cooperative association and which is not a pool plant pursuant to paragraph (a) or (b) of this section shall be a pool plant if at least 50 percent of the Grade A milk of producers of such cooperative association is received at pool distributing plants of other handlers during the month and written application for pool plant status is filed with the market administrator on or before the first day of such month.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant or exempt distributing plant; or

(2) A plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act, unless it is qualified as a pool plant pursuant to paragraph (a), (b), or (c) of this section and a greater volume of fluid milk products, except filled milk, is disposed of from such plant in this marketing area as route disposition and to pool plants qualified on the basis of route disposition in this marketing area than is so disposed of in the marketing area regulated pursuant to such other order.

**§ 1030.8 Nonpool plant.**

"Nonpool plant" means a plant (except a pool plant) which receives milk from dairy farmers or is a milk or filled milk manufacturing, processing or bottling plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is not an other order plant, a producer-handler plant, or an exempt distributing plant and from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is not an other order plant, a producer-handler plant, or an exempt distributing plant from which fluid milk products are shipped during the month to a pool plant.

(e) "Exempt distributing plant" means a distributing plant operated by a governmental agency.

**§ 1030.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) Any cooperative association with respect to producer milk which it causes to be diverted from a pool plant of another handler pursuant to § 1030.13 for the account of such cooperative association;

(c) Any cooperative association with respect to milk of its producers which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by or under contract to such cooperative association;

(d) Any person in his capacity as the operator of a partially regulated distributing plant;

(e) A producer-handler;

(f) Any person in his capacity as the operator of an other order plant that is either a distributing plant or a supply plant;

(g) Any person in his capacity as a broker negotiating a purchase or sale of fluid milk products from or to a person described in paragraph (a) or (d) of this section; or

(h) Any person who is a handler operating a pool distributing plant pursuant to paragraph (a) of this section may be the handler on producer milk delivered to pool distributing plants of other handlers, subject to the following conditions:

(1) Prior to the first month he becomes the handler pursuant to this paragraph such handler shall notify the market administrator in writing of his election to do so and he shall provide the name and address of each transferee-pool plant receiving the milk that is subject to the conditions of this paragraph.

(2) All of the producer milk on which he is the handler pursuant to this paragraph shall be considered a transfer from such handler's pool distributing plant to another pool distributing plant for the purposes of classification pursuant to §§ 1030.40 through 1030.45;

(3) If an entire tank truck load of milk is delivered to the pool plant of an other handler, it shall be considered a receipt by the transferor-handler pursuant to this paragraph for pricing purposes pursuant to §§ 1030.50 through 1030.53 and 1030.60 through 1030.77 at the location of the transferee-plant; and

(4) If less than an entire tank truck load of milk is delivered to the pool plant of another handler, a portion of the milk on the tank truck load must be physically received at the transferor-handler's pool

V 38 I 178 SEP 14 73 XUM

distributing plant. Such split load shall be considered a receipt of producer milk at the transferor-handler's plant for pricing purposes pursuant to §§ 1030.50 through 1030.53 and 1030.60 through 1030.77.

**§ 1030.10 Producer-handler.**

"Producer-handler" means any person who operates a dairy farm and a distributing plant and who has route disposition in the marketing area of only fluid milk products of such person's own production or fluid milk products received from pool plants: *Provided*, That such person provides proof satisfactory to the market administrator that the care and management of all dairy animals and other resources necessary to produce the entire volume of fluid milk products handled (excluding receipts from pool plants) and the operation of the processing and packaging business are the personal enterprise and risk of such person.

**§ 1030.11 [Reserved]**

**§ 1030.12 Producer.**

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority and whose milk is received at a pool plant or diverted pursuant to § 1030.13.

(b) "Producer" shall not include:

(1) A dairy farmer who is a government and has nonproducer status for the month pursuant to § 1030.19;

(2) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(3) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1030.44(a)(8)(ii) and the corresponding step of § 1030.44(b);

(4) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk; and

(5) A dairy farmer with respect to milk produced by him that is received at a handler's pool plant during the months of January through July if any milk from the same farm was a receipt of producer milk in any "payback" month during the preceding year under an other order that provided for a seasonal incentive payment plan whereby funds previously withheld in the computation of the uniform price to producers were paid back to producers through the uniform price computation in subsequent months of the year.

**§ 1030.13 Producer milk.**

"Producer milk" means milk produced by producers which is:

(a) Received at a pool plant directly from producers, by being physically unloaded into processing facilities or a storage tank (including another tank truck in the case of a reload facility), and the shrinkage of skim milk and butterfat in milk received from producers' farms which was not unloaded in a pool plant. Such direct receipts from producers shall include the portion of a tank truck load of milk unloaded in a pool plant in the case where a portion of such load was first unloaded at another pool plant or diverted to a nonpool plant. The quantity of milk so received at each such plant shall be prorated over the total quantity of milk picked up at each producer's farm. In calculating the percentages specified in § 1030.7, milk so diverted shall be considered as received in the pool plant from which diverted. The location price adjustments pursuant to § 1030.75 shall be based on the zone location of the nonpool plant(s) where such milk is physically received, except that in the case of a distributing plant, diverted milk of a producer shall be priced at the location of such plant if during the month not more than 4 days' production of such producer is diverted, or if the diverted milk is part of a tank truck load of milk that exceeds the milk storage capacity of such distributing plant. Diverted milk shall be limited as follows:

(1) Milk of a producer diverted for the account of the operator of a pool plant or a handler described in § 1030.9(b) that during the months of April through December does not exceed the quantity of such producer's milk received in the pool plant from which diverted, and during the months of January, February and March does not exceed 70 percent of such producer's milk received in or diverted from such pool plant: *Provided*, That during the months of April through July such limits shall not apply for a producer who delivered to a pool plant any time during the prior August-December period and subsequently maintained producer status without interruption of more than 30 consecutive days;

(2) To the extent that milk diverted by a cooperative as a handler during any month would result in the plant failing to qualify as a pool plant under § 1030.7 such diverted milk shall not be producer milk; and

(3) Milk of a producer diverted by a handler who fails to report the information required pursuant to § 1030.32(a) (2) shall not be considered producer milk pursuant to this paragraph.

**§ 1030.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1030.40 (b)(1) from any source other than producers, handlers described in § 1030.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1030.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1030.40 (b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1030.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1030.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1030.40 (b) or (c)(1) (i) through (iv), if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1030.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1030.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1030.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines after application by the association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or milk products for its members.

**§ 1030.19 Exempt milk.**

"Exempt milk" means milk received at a pool plant in bulk from the dairy farmer who produced it, to the extent of the quantity of any packaged fluid milk products returned to the dairy farmer if:

(a) The dairy farmer is a government which is not engaged in the route disposition of any of the returned products; and

(b) The dairy farmer has, by written notice to the market administrator and the receiving handler, elected nonproducer status for a period of not less than 12 months beginning with the month in which the election was made and continuing for each subsequent month until canceled in writing, and the election is in effect for the current month.

## Handler Reports

**§ 1030.30 Reports of receipts and utilization.**

On or before the 10th day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants (except that if a handler so requests and the request is approved by the market administrator, a single report may be filed), shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1039.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from pool plants of other handlers (or other pool plants, as applicable), including a separate statement of the net receipts from each supply plant computed pursuant to § 1030.7(b)(5), except that during the months of April through July no such separate statement need be made if receipts from supply plants are from only plants that were pool plants during the prior months of August through March 9;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1030.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1030.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1030.31 Payroll reports.**

(a) On or before the 25th day after the end of each month, each handler described in § 1030.9(a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1030.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1030.32 Other reports.**

(a) Each handler pursuant to § 1030.9(a), (b), (g), and (h) shall report to the market administrator on or before the 10th day after the end of the month in detail and on forms prescribed by the market administrator as follows:

(1) Each handler pursuant to § 1030.9(g) shall report the quantities of skim milk and butterfat in fluid milk products moved for his account from each pool plant and received at each pool plant or partially regulated distributing plant during the month;

(2) Each handler pursuant to § 1030.9(a) and (b) shall report for each load of milk diverted for his account the quantity of each producer's milk included therein, the date(s) and times of pickup and delivery to the nonpool plant the name and location of that plant, and the plant from which diverted;

(3) Each handler pursuant to § 1030.9(h) shall report for each load of milk transferred for his account the quantity of each producer's milk included therein, the dates and times of pickup and delivery to the transferee-plant, the name and location of that plant and the plant from which transferred. Also, he shall report the quantities of skim milk and butterfat in his receipts of producer milk and delivery of such milk to each pool distributing plant during the month; and

(4) Each handler who, during the month, received milk from a dairy farmer from whom he had not received milk for at least 30 consecutive days, shall report the name and address of the dairy farmer and the plant to which each such person previously delivered milk. Each handler who discontinues receiving milk from a producer during the month shall report each such producer's name, address, and the plant to which such person transferred.

(b) In addition to the reports required pursuant to paragraph (a) of this section and §§ 1030.30 and 1030.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

## Classification of Milk

**§ 1030.40 Classes of utilization.**

Except as provided in § 1030.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1030.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

V 38 1178 SEP 14 73 XUM

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1030.15; and

(6) In shrinkage assigned pursuant to § 1030.41(a) to the receipts specified in § 1030.41(a)(2) and in shrinkage specified in § 1030.41 (b) and (c).

**§ 1030.11 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1030.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant (or at all of the handler's pool plants combined if a single report is filed pursuant to § 1030.30) to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section, excluding that received in the form of a packaged fluid milk product;

(b) The shrinkage of skim mlik and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1030.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1030.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants (or pool plants of other handlers, if applicable);

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk milk transferred to other pool plants (or pool plants of other handlers, if applicable) and to nonpool plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)(1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectivly, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1030.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

**§ 1030.12 Classification of transfers and diversions.**

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant (or to the pool plant of another handler if a single report is filed pursuant to § 1030.30 by the transferor-handler) shall be classified as Class I milk unless the operators of both plants request the same classification in another class. The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1030.44(a)(12) and the corresponding step of § 1030.44(b).

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1030.40.

(c) *Transfers to producer-handlers and diversions to exempt distributing plants.* Skim milk or butterfat in the following forms that is transferred from a pool plant to a producer-handler under this or any other Federal order transferred or diverted from a pool plant to an exempt distributing plant shall be classified:

(1) As Class I milk, if so moved in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to its receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, a producer-handler plant, or an exempt distributing plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1030.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

**§ 1030.43 General classification rules.**

In determining the classification of producer milk pursuant to § 1030.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1030.30 and shall compute separately for each pool plant (or for all of a handler's pool plants combined if paragraph (d) of this section applies) and for each cooperative association with respect to milk for which it is the handler pursuant to § 1030.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1030.40, 1030.41, and 1030.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids;

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1030.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative; and

(d) If a handler operates two or more pool plants, the classification of producer milk shall be determined on the basis of all of his pool plants combined if he files a single report pursuant to § 1030.30 or has received skim milk or butterfat that would be allocated pursuant to § 1030.44 (a) (11) or (12) or the corresponding steps of § 1030.44(b).

**§ 1030.44 Classification of producer milk.**

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1030.9(a) for each of his pool plants separately (or for all of his pool plants combined if § 1030.43(d) applies) and of each handler described in § 1030.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1030.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in:

(i) Receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(ii) Receipts of exempt milk;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products re-

V 38 I 178 SEP 14 73 XUM

ceived in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1030.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1030.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1030.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1030.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order and from an exempt distributing plant;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2)(i) of this section;

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(vii) Receipts of fluid milk products (other than exempt milk) from a government which has elected nonproducer status for the month pursuant to § 1030.19; and

(viii) Receipts of fluid milk products from persons described in § 1030.12(b)(5);

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III, but not in excess of such quantities, the pounds of skim milk in each of the following:

(i) Receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2)(i) and (7)(v) of this section:

(*a*) For which the handler requests a classification other than Class I; or

(*b*) Which are in excess of the pounds of skim milk determined by multiplying the pounds of skim milk remaining in Class I by 1.25 and subtracting the sum of the pounds of skim milk in receipts of producer milk, fluid milk products from other pool plants (or from pool plants of other handlers if § 1030.43(d) applies), and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(ii) Receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1030.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subtract from the pounds of skim milk remaining in each class, pro rata to such quantities in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2)(i), (7)(v), and (8)(i) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received;

(12) Subtract in the order specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(ii) of this section:

(i) From each class, in series beginning with Class III, the pounds determined by multiplying the pounds of such net receipts by the larger of the percentage of estimated combined Class II and Class III utilization of skim milk announced for the month by the market administrator pursuant to § 1030.45(a) or the percentage that the combined Class II and Class III utilization remaining is of the total remaining utilization of skim milk of the handler; and

(ii) From Class I, the remainder of such receipts;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from other pool plants (or from pool plants of other handlers if § 1030.43(d) applies) according to the classification of such products pursuant to § 1030.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to § 1030.44(a)(14) and the corresponding step of § 1030.44(b).

### § 1030.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1030.44(a)(12) and the corresponding step of § 1030.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1030.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 17th day after the end of each month, report to each cooperative association, upon request by such association, the percentage of the milk caused to be delivered by the cooperative association for its members which was utilized in each class at each pool plant receiving such milk. For the purpose of this report, the milk so received shall be allocated to each class at each pool plant in the same ratio as all producer milk received at such plant during the month.

CLASS PRICES

### § 1030.50 Class prices.

Subject to the provisions of § 1030.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.*—The Class I price shall be the basic formula price for the second preceding month plus $1.26.

(b) *Class II price.*—The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.*—The Class III price shall be the basic formula price for the month.

### § 1030.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

### § 1030.52 Plant location adjustments for handlers.

A location adjustment for each handler shall be computed by the market administrator as follows:

(a) The market administrator shall determine the location adjustment rate for each plant at which milk is to be priced under this part on the following basis:

(1) Zone 1—adjustment rate—none. Zone 1 shall consist of the territory within 40 miles of the city hall in Chicago.

(2) Zone 2—adjustment rate—minus 2 cents per hundredweight of milk. Zone 2 shall consist of the territory beyond Zone 1 but within 55 miles of the city hall in Chicago.

(3) Zone 3—adjustment rate—minus 4 cents per hundredweight of milk. Zone 3 shall consist of the territory beyond Zone 2 but within 70 miles of the city hall in Chicago.

(4) Zone 4—adjustment rate—minus 6 cents per hundredweight of milk. Zone 4 shall consist of the territory beyond Zone 3 but within 85 miles of the city hall in Chicago, plus Milwaukee County, Wis., and Winnebago County, Ill.

(5) For plants located beyond Zone 4 the adjustment rate shall be an additional 2 cents per hundredweight of milk for each 15 miles or fraction thereof over 85 miles. The territory beyond 85 miles, but not to exceed 100 miles, shall be Zone 5 and each successive 15-mile area shall be an additional zone.

(b)(1) The mileages applicable pursuant to this section and § 1030.75 shall be determined by the market administrator on the basis of the shortest highway distance between the handler's plant and the city hall in Chicago.

(2) The market administrator shall notify each handler of the zone or mileage determination.

(3) Mileage shall be subject to redetermination at all times. In the event, a handler requests a redetermination of the mileage pertaining to any plant, the market administrator shall notify the handler of his findings within 30 days after the receipt of such request. Any financial obligations resulting from a change in mileage shall not be retroactive for any period prior to the redetermination announced by the market administrator.

(c) A handler who operates a pool distributing plant (or plants) shall receive a location adjustment computed as follows:

(1) Determine the aggregate quantity of Class I milk at such plant (or all pool plants of such handler for which a single report is filed pursuant to § 1030.30 after eliminating duplication for transfer between such plants);

(2) Subtract the receipts of exempt milk and the quantity of packaged fluid milk products received at the handler's pool plant(s) from the pool plants of other handlers (or other pool plants, if applicable) and from nonpool plants if assigned to Class I milk;

(3) Subtract the quantity of bulk fluid milk products shipped from the handler's pool plant(s) to pool plants of other handlers (or other pool plants, if applicable) and to nonpool plants that are classified as Class I;

(4) Subtract the Class I milk packaged by pool supply plants and disposed of as route disposition or to other plants;

(5) Subtract the quantity of bulk fluid milk products received at the handler's pool plant(s) from other order plants and unregulated supply plants that are assigned to Class I pursuant to § 1030.44;

(6) Assign the remaining quantity pro rata to receipts during the month from each source as specified in paragraph (c)(6) (i) and (ii) of this section:

(i) Receipts at the handler's pool distributing plant(s) of producer milk, except that if the quantity prorated to any distributing plant exceeds the Class I disposition from such plant, such quantity shall be reduced to the amount of such Class I disposition and the quantity of milk represented in such reduction shall be prorated to receipts of producer milk at other distributing plants of the handler (limited in each instance to the amount of Class I disposition at each such plant) and receipts of bulk fluid milk products at such distributing plants from other pool plants; and

(ii) Receipts of bulk fluid milk products at such distributing plants from each other pool plant according to the quantity of such receipts from each such source;

(7) If receipts during the month at such distributing plants of producer milk and bulk fluid milk products from other pool plants are less than the quantity to be assigned pursuant to paragraph (c)(6) of this section, prorate the amount of such excess in the same manner over such receipts in the next prior month in which there were receipts in excess of those assigned in that month pursuant to this subparagraph;

(8) Multiply by the location adjustment rates applicable at the transferor plants, the quantity assigned to receipts of producer milk at such distributing plants pursuant to paragraph (c)(6)(i) and (7) of this section;

(9) Multiply by the location adjustment rates applicable at the transferor plants, the lesser of:

(i) 110 percent of the quantities assigned to receipts from each other pool plant pursuant to paragraph (c)(6)(ii) of this section; or

(ii) Receipts specified in paragraph (c)(6)(ii) of this section;

(10) Multiply by the location adjustment rates applicable at the transferor plants, the quantities assigned pursuant to paragraph (c)(7) of this section to receipts from other pool plants in prior months;

(11) Multiply the quantity of bulk fluid milk products shipped from the handler's pool plant(s) to nonpool plants and classified as Class I by the location adjustment rates applicable at the shipping plant;

(12) Multiply the quantity of Class I milk packaged by pool supply plants and disposed of as route disposition or to other plants by the location adjustment rates applicable at the pool supply plants from which disposition is made; and

(13) Add together the minus amounts obtained pursuant to paragraph (c)(8), (9), (10), (11), and (12) of this section.

(d) A handler (other than one described in paragraph (c) of this section) who operates a pool supply plant shall receive a location adjustment credit on producer milk at such plant classified as Class I that is not shipped as a bulk fluid milk product to a pool distributing plant.

(e) The Class I price applicable to other source milk shall be reduced at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

### § 1030.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

V 38 I 178 SEP 14 73 XUM

§ 1030.54 Equivalent price.

If for any reason a price quotation or other pricing factor required by this order for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price quotation or price factor determined by the Secretary to be equivalent to that required.

UNIFORM PRICE

§ 1030.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler described in § 1030.9 (a), (b), (c), and (h) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1030.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1030.44(a)(14) and the corresponding step of § 1030.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1030.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1030.44 (a)(9) and the corresponding step of § 1030.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1030.44(a)(7)(i) through (iv), (vii), and (viii) and the corresponding step of § 1030.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1030.44(a)(7)(v) and (vi) and the corresponding step of § 1030.44 (b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1030.44(a)(11) and the corresponding step of § 1030.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) Subtract an amount equal to the minus location adjustment computed pursuant to § 1030.52(c)(13) or (d).

§ 1030.61 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight of producer milk, of 3.5 percent butterfat content at plants in Zone I, as follows:

(a) Combine into one total the values computed pursuant to § 1030.60 for all handlers, except those of handlers who failed to make payments required pursuant to § 1030.71 for the preceding month;

(b) Add an amount equal to the total value of the minus location adjustments computed pursuant to § 1030.75(a);

(c) Add an amount representing not less than one-half the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1030.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight.

§ 1030.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 14th day after the end of each month the uniform price for such month.

PAYMENTS FOR MILK

§ 1030.70 Producer-settlement fund.

The market administrator shall maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments into such fund and from which he shall make all payments from such fund pursuant to §§ 1030.71, 1030.72, 1030.76, and 1030.77: *Provided*, That the market administrator shall offset the payment due to a handler against payments due from such handler.

§ 1030.71 Payments to the producer-settlement fund.

(a) On or before the 16th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1030.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1030.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1030.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

§ 1030.72 Payments from the producer-settlement fund.

On or before the 17th day after the end of each month, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1030.71(a)(2) exceeds the amount computed pursuant to § 1030.71 (a)(1): *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds become available.

§ 1030.73 Payments to producers and to cooperative associations.

(a) Except as provided in paragraphs (b) and (c) of this section, each handler shall make payment for producer milk received during the month as follows:

(1) On or before the 18th day of the following month to each producer, not less than the uniform price, as adjusted pursuant to §§ 1030.74 and 1030.75, multiplied by the hundredweight of milk received from such producer during the month, subject to the following adjustments:

(i) Less deductions for marketing services made pursuant to § 1030.86;

(ii) Plus or minus adjustments for errors in previous payments made to such producer; and

(iii) Less proper deductions authorized in writing by such producer; and

(2) If by such date for final payment, such handler has not received full payment from the market administrator pursuant to § 1030.72 for such month, he may reduce pro rata his payments to

producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator;

(b) Payments required in paragraph (a) of this section shall be made to a cooperative association, qualified under § 1030.18, or its duly authorized agent, with respect to milk of producers which the market administrator determines have authorized such cooperative association to collect payment for their milk and the cooperative association has presented the handler with a written request for such payments. Payments to the cooperative association under this paragraph shall be made subject to the condition that the association has provided the handler with a written promise to reimburse the handler the amount of any actual loss incurred by such handler because of any improper claim on the part of the cooperative association; and

(c) On or before the 18th day of the following month, each handler, in his capacity as operator of a pool plant, who receives milk for which a cooperative association is the handler during the month as described in § 1030.9(c) shall pay such cooperative association for such milk at the uniform price, as adjusted pursuant to §§ 1030.74 and 1030.75.

§ 1030.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the mid-point of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1030.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price pursuant to § 1030.61 for producer milk received at a plant shall be adjusted according to the location of the plant at the rates set forth in § 1030.52(a).

(b) The uniform price applicable to other source milk shall be reduced at the rates set forth in § 1030.52(a), except that the adjusted uniform price shall not be less than the Class III price.

§ 1030.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1030.30(b) and 1030.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1030.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1030.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee-plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1030.60 for such handler shall include, in lieu of the value of other source milk specified in § 1030.60(f) less the value of such other source milk specified in § 1030.71(a)(2)(ii), a value of milk determined pursuant to § 1030.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1030.7(b), subject to the following conditions:

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1030.30 (b) and 1030.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1030.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1030.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1030.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

V 38-178 SEP 14 73 XUM

§ 1030.77 Adjustment of accounts.

When verification by the market administrator of reports or payment of any handler discloses errors resulting in monies due (a) the market administrator from such handler, (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made not later than the date for making payment next following such disclosure.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

§ 1030.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 18th day after the end of each month 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk (including such handler's own farm production and including for a handler described in § 1030.9(c) producer milk described in § 1030.13(d));

(b) Other source milk allocated to Class I pursuant to § 1030.44(a) (7) and (11) and the corresponding steps of § 1030.44(b), except such other source milk that is excluded from the computations pursuant to § 1030.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant that exceeds the skim milk and butterfat subtracted pursuant to § 1030.76(a)(2).

§ 1030.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1030.73 shall deduct 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to producer milk received by such handler (except such handler's own farm production) during the month, and shall pay such deductions to the market administrator not later than the 18th day after the end of the month. Such monies shall be used by the market administrator to verify or establish weights, samples, and tests of producer milk and to provide producers with market information. Such services shall be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of member producers for whom a cooperative association is performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section such deductions as are authorized by such producers and, on or before the 18th day after the end of each month, pay over such deductions to the association rendering such services.

ADVERTISING AND PROMOTION PROGRAM

§ 1030.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1030.70.

NOTE.—An order terminating certain provisions in Order No. 30, 38 FR 11339, May 7, 1973, reads in part as follows:

"It is hereby found and determined that the following provisions no longer tend to effectuate the declared policy of the Act: • • • Sections 1030.100 through 1030.112. • • •

*It is therefore ordered*, That the aforesaid provisions of the order are hereby terminated • • • Effective dates • • • September 30, 1973, with respect to § 1030.112."

(Section 1030.112 has been renumbered as § 1030.122 under this proposed amended order.)

## PART 1032—MILK IN SOUTHERN ILLINOIS MARKETING AREA

**Subpart—Order Regulation Handling**

GENERAL PROVISIONS

Sec.
1032.1 General provisions.

DEFINITIONS

1032.2 Southern Illinois marketing area.
1032.3 Route disposition.
1032.4 [Reserved]
1032.5 Distributing plant.
1032.6 Supply plant.
1032.7 Pool plant.
1032.8 Nonpool plant.
1032.9 Handler.
1032.10 Produced-handler.
1032.11 [Reserved]
1032.12 Producer.
1032.13 Producer milk.
1032.14 Other source milk.
1032.15 Fluid milk product.
1032.16 Fluid cream product.
1032.17 Filled milk.
1032.18 Cooperative association.
1032.19 Reload point.

HANDLER REPORTS

1032.30 Reports of receipts and utilization.
1032.31 Payroll reports.
1032.32 Other reports.

CLASSIFICATION OF MILK

1032.40 Classes of utilization.
1032.41 Shrinkage.
1032.42 Classification of transfers and diversions.
1032.43 General classification rules.
1032.44 Classification of producer milk.
1032.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1032.50 Class prices.
1032.51 Basic formula price.
1032.52 Plant location adjustments for handlers.
1032.53 Announcement of class prices.
1032.54 Equivalent price.

UNIFORM PRICE

1032.60 Handler's value of milk for computing uniform price.
1032.61 Computation of uniform price (including weighted average price).
1032.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1032.70 Producer-settlement fund.
1032.71 Payments to the producer-settlement fund.
1032.72 Payments from the producer-settlement fund.
1032.73 Payments to producers and to cooperative associations.
1032.74 Butterfat differential.
1032.75 Plant location adjustments for producers and on nonpool milk.
1032.76 Payments by handler operating a partially regulated distributing plant.
1032.77 Adjustment of accounts.
1032.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1032.85 Assessment for order administration.
1032.86 Deduction for marketing services.

ADVERTISING AND PROMOTION PROGRAM

1032.121 Duties of the market administrator.
1032.122 Liquidation.

AUTHORITY: The provisions of this Part 1032 issued under secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

GENERAL PROVISIONS

§ 1032.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

§ 1032.2 Southern Illinois marketing area.

"Southern Illinois marketing area", hereinafter called the "marketing area", means all the territory within the following counties, all of which are in the State of Illinois, together with all municipal corporations therein and all institutions owned or operated by the Federal, State, county, or municipal governments located wholly or partially within such counties:

BASE ZONE

Bond.
Calhoun.
Christian.
Clark.
Clay.
Clinton.
Coles.
Crawford.
Cumberland.
Edwards.
Effingham.
Fayette.
Greene.
Jasper.
Jefferson.
Jersey.
Lawrence.
Macoupin.
Madison.
Marion.
Monroe.
Montgomery.
Richland.
St. Clair (except Scott Military Reservation, East St. Louis, Centreville, Canteen, and Stites Townships and the city of Belleville).
Shelby.
Wabash.
Washington.
Wayne.

NORTHERN ZONE

Champaign.
De Witt.
Douglas.
Edgar.
Logan.
Macon.
McLean.
Menard.
Morgan.
Moultrie.
Platt.
Sangamon.
Vermilion.

SOUTHERN ZONE

Franklin.
Hamilton.
Jackson.
Perry.
Randolph.
Saline.
White.
Williamson.

§ 1032.3 Route disposition.

"Route disposition" means a delivery (including disposition from a plant store or from a distributing point and distribution by a vendor or vending machine) to a retail or wholesale outlet, other than a plant, of any fluid milk product classified as Class I milk.

§ 1032.4 [Reserved]

§ 1032.5 Distributing plant.

"Distributing plant" means any plant at which fluid milk products are processed and packaged and from which there is route disposition of Grade A fluid milk products in the marketing area during the month.

§ 1032.6 Supply plant.

"Supply plant" means any plant at which Grade A milk is received from dairy farmers and from which fluid milk products are moved to a distributing plant.

§ 1032.7 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means a plant specified in paragraph (a), (b), or (c) of this section. For purposes of determining pool plant status pursuant to this section, Grade A receipts from dairy farmers shall include all quantities of milk diverted pursuant to § 1032.13(b) (1), (2), and (3) by an operator of a pool plant.

(a) A distributing plant from which during the month there is:

(1) Route disposition, except filled milk, in the marketing area equal to 10 percent or more of its Grade A receipts from dairy farmers and handlers described in § 1032.9(c), or an average of not less than 7,000 pounds per day of route disposition, except filled milk, in the marketing area; and

(2) Total route disposition, except filled milk, equal to 50 percent or more of its Grade A receipts from diary farmers and handlers described in § 1032.9(c) during the months of August through February and 40 percent during all other months.

(b) A supply plant from which during the month an amount equal to 50 percent or more of its receipts of Grade A milk from dairy farmers and handlers described in § 1032.9(c) is moved to and received at a pool plant(s) described in paragraph (a) of this section which have at least 50 percent Class I use (not including filled milk) of the total of such supply plan milk and producer milk receipts in the months of August through February and 40 percent in other months.

(c) Any supply plant which qualified pursuant to paragraph (b) of this section in each of the immediately preceding months of September through January shall be a pool plant for the months of February through August unless the operator of such plant notifies the market administrator in writing before the first day of such month of his intention to withdraw such plant as a pool plant, in which case such plant shall thereafter be a nonpool plant until it again meets the shipping requirements set forth in paragraph (b) of this section.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A distributing plant qualified pursuant to paragraph (a) of this section which meets the requirements of a fully regulated plant pursuant to the provisions of another order issued pursuant to the Act and from which during the month there is a greater quantity of route disposition, except filled milk, in the marketing area regulated by the other order than in the Southern Illinois marketing area: *Provided*, That such a distributing plant which was a pool plant under this order in the immediately preceding month shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of such route disposition is made in such other marketing area, unless the other order requires regulation of the plant without regard to its qualifying as a pool plant under this order subject to the proviso of this subparagraph;

(3) A distributing plant qualified pursuant to paragraph (a) of this section which meets the requirements of a fully regulated plant pursuant to the provisions of another Federal order and from which during the month there is a greater quantity of route disposition, except filled milk, in the Southern Illinois marketing area than in the other marketing area, and such other order which fully regulates the plant does not contain provisions to exempt the plant from regulation even though such plant has greater such route disposition in the marketing area of the Southern Illinois order; and

(4) Any plant qualified pursuant to paragraph (c) of this section for any portion of the period of February through August, inclusive, that the milk at such plant is subject to the classification and pricing provisions of another order issued pursuant to the Act.

§ 1032.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products are shipped to a pool plant.

§ 1032.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any cooperative association with respect to milk of its members diverted for its account pursuant to § 1032.13;

(c) Any cooperative association with respect to the milk of its members which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by, or under contract to such cooperative association. The cooperative association, prior to the first day of the month of delivery, shall notify in writing the market administrator and the handler to whose plant the milk is delivered, that it will be the handler for the milk. For purposes of location adjustments to producers, milk so delivered shall be deemed to have been received by the cooperative association at a pool plant at the location of the pool plant to which it is delivered;

(d) Any person in his capacity as the operator of a partially regulated distributing plant;

(e) A producer-handler;

(f) Any person who operates an other order plant described in § 1032.7(d); and

(g) Any person in his capacity as the operator of an unregulated supply plant.

§ 1032.10 Producer-handler.

"Producer-handler" means a person who:

(a) Operates a distributing plant and processes milk from his own farm production and who disposes of all or a portion of such milk as route disposition in the marketing area but who receives no milk from other dairy farmers or fluid milk products from nonpool plants: *Provided*, That the skim milk and butterfat disposed of in the form of fluid milk products designated as Class I milk pursuant to § 1032.40(a) does not exceed the skim milk and butterfat, respectively, in the form of milk from his own farm production, and in the form of fluid milk products from pool plants of other handlers, allowing for inventory derived from such sources; and

(b) Assumes as his personal enterprise and risk the processing and distribution of fluid milk products and the maintenance, care, and management of dairy animals and other resources necessary to produce his own farm milk production.

§ 1032.11 [Reserved]

§ 1032.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, and whose milk is received at a pool plant or diverted as producer milk pursuant to § 1032.13.

V 38 I 178 SEP 14 73 XUM

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1032.44(a)(8)(iii) and the corresponding step of § 1032.44(b); and

(3) Any person with respect to milk produced by him which is diverted from a pool plant to an other order plant if the other order designates such person as a producer under that order with respect to such milk.

**§ 1032.13 Producer milk.**

"Producer milk" means all skim milk and butterfat produced by producers which is:

(a) Received during the month:

(1) At a pool plant from producers or from a handler described in § 1032.9(c); and

(2) By a handler described in § 1032.9(c) but which is not delivered to a pool plant of another handler and constitutes shrinkage pursuant to § 1032.41(c) or Class I shrinkage; or

(b) Diverted by a handler who is the operator of a pool plant or by a cooperative association pursuant to the following conditions:

(1) Milk of a producer diverted from a pool plant for the account of the plant operator to another pool plant(s) for not more days of production of such producer's milk than is physically received at a pool plant(s) from which diverted;

(2) Milk of a producer diverted from a pool plant to a nonpool plant that is not a producer-handler plant or an other order plant, on any day during the months of May, June, and July, during the months of August and December for not more than 12 days of production of producer milk by such producer, and in any other month for not more than 8 days of production of producer milk by such producer;

(3) Milk of a producer diverted during the month from a pool plant to a nonpool plant that is an other order plant, for not more days of production of producer milk, by such producer than is received at a pool plant(s) pursuant to paragraph (a) of this section;

(4) For pricing purposes, milk diverted pursuant to paragraph (b) (2) and (3) of this section shall be deemed to be received by the diverting handler at the location of the plant to which diverted: *Provided*, That milk diverted pursuant to paragraph (b)(2) of this section to a plant located less than 50 miles (by the shortest highway distance as determined by the market administrator) from the pool plant from which diverted, shall be deemed to be received by the diverting handler at the location of the plant from which diverted; and

(5) For pricing purposes, milk diverted pursuant to paragraph (b)(1) of this section shall be deemed to be received by the diverting handler at the location of the plant to which diverted.

**§ 1032.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1032.40(b)(1) from any source other than producers, handlers described in § 1032.9(c), pool plants, or inventory at the beginning of the month;

(b) Receipts in packaged form from other plants of products specified in § 1032.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1032.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1032.40(b)(1)) for which the handler fails to establish a disposition.

**§ 1032.15 Fluid milk product.**

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1032.40(b) or (c)(1)(i) through (iv) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

**§ 1032.16 Fluid cream product.**

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

**§ 1032.17 Filled milk.**

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

**§ 1032.18 Cooperative association.**

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To be engaged in making collective sales, or marketing milk or its products for its members.

**§ 1032.19 Reload point.**

"Reload point" means a location at which facilities approved by a duly constituted health authority, only for the transfer of milk from one tank truck to another and for the washing of tank trucks and at which milk moved from the farm in a tank truck is commingled in a tank truck with milk from other tank trucks before entering a milk plant: *Provided*, That reloading facilities on the premises of a plant having equipment for the receiving, cooling, storing, and processing of milk, which equipment is in current use during the month, shall be considered a supply plant rather than a reload point.

HANDLER REPORTS

**§ 1032.30 Reports of receipts and utilization.**

On or before the 7th day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1032.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1032.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1032.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

**§ 1032.31 Payroll reports.**

(a) On or before the 20th day after the end of each month, each handler described in § 1032.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1032.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

**§ 1032.32 Other reports.**

In addition to the reports required pursuant to §§ 1032.30 and 1032.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

**§ 1032.40 Classes of utilization.**

Except as provided in § 1032.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1032.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(v) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1032.15; and

(6) In shrinkage assigned pursuant to § 1032.41(a) to the receipts specified in § 1032.41(a)(2) and in shrinkage specified in § 1032.41(b) and (c).

**§ 1032.41 Shrinkage.**

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1032.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in bulk fluid form;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1032.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1032.9(c) and in milk diverted to such plant from another pool plant, except that, in either case, if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and
